

25 years warranty

idealcore™ frame

Idealcombi would like to make the following announcement concerning the unique **idealcore™** frame construction.

At Idealcombi, we consistently manufacture our windows and doors using top-quality materials, strategically engineering them to optimise product longevity and overall economic value.

To this end, with any deliveries made from 1st January 2024 on products where a our **idealcore™** is incorporated into our frames, the product warranty is extended to 25 years on the frame construction against rot and fungus

The reason we can offer such a long guarantee is that the maintenance of the frame rebate, where **idealcore™** is incorporated, is simplified, requiring no water drainage inspections nor painting. Instead, maintenance is confined to wiping surfaces with a damp cloth and routine lubrication using acid-free lubricant, along with silicone spray on the weatherstrips.

The warranty on the **idealcore™** frame is contingent on the correct installation and adherence to our general maintenance instructions.

The above warranty is an addition to our standard 10-year warranty, which can be seen at: [idealcombi.com/warranty-10](https://www.idealcombi.com/warranty-10)
