ErgoTip at a glance

ErgoTip combines Danish design with comfort and smart functionality made to fit your hand, your work, and your style.

ErgoTip is a modular instrument system that gives you complete freedom of choice.

Select from five ergonomic handles, eight colors, and over 130 precision-crafted tips for diagnostics and periodontics.

Each tip connects perfectly with your chosen handle, so you only replace what's needed — not the entire instrument.

This smart design saves time, reduces waste, and keeps your workflow simple and efficient.

ErgoTip brings together Danish design, ergonomic comfort, and everyday functionality made to fit your hands, your style, and your way of working.
