

Bringing Renewable Green Paper To The World

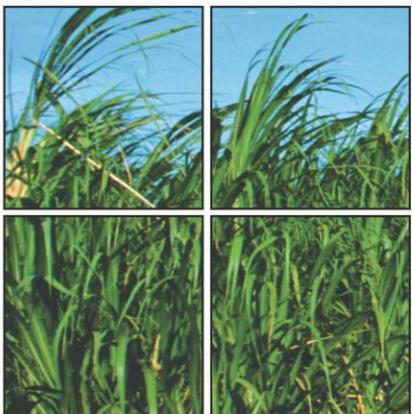

QUALITY PRODUCTS HELPING TO PROTECT THE ENVIRONMENT

COMPANY PROFILE

www.tehtung.com

At Teh Tung, customer service is our key to ensure our competitive edge in the ever changing and challenging paper market. As a leading international paper towels and tissue manufacture, we are able to deliver our high quality products to anywhere in North America, Europe, Central and South America, and Asia Pacific region. With newly established office in Guangxi, China, we are positioning ourselves in one of the world fastest growing area of Renewable Sugarcane paper making.

We are in the forefront of the green movement to save trees and our planet. Our entire standard Morex® products are 100% recycled paper that complies with the Environmental Protection Agency (EPA) recovered fiber content level, and scores maximum 3 points in United States Green Building Council's Leadership in Energy and Environmental Designs (LEED). Our newest "Renewable Green Paper" is made of sugarcane and bamboo. USDA's BioPreferred™ program has certified Biobased Product Label for our Morex and Dura Soft bath room tissue, paper towels, and paper napkins. It is rapidly renewable alternative pulp source to trees, 100% recyclable, and compostable. We are the leader and the future in the paper industry. Our Premium Morex™ products are well received in the market place.

Centered Los Angeles, we have seven warehouse and distribution facilities in California, Texas, New York, Shanghai China, Shenzhen China, and Hong Kong China. No matter it's supply chain management, or providing total solutions to your needs, our ability to service is consistent, accountable, reliable, and most of all, on time. We can process orders fast, accurate, and deliver quality products to your facility. You can request information or certifications, or even check on your order status just a click away. We are committed to provide the best service that will exceed your expectations.

SERVICE

Teh Tung is proud to provide a wide range of quality products to meet your needs. Our products and services including paper tissue, paper towels, paper napkins, paper dispensers, trash can liner, gloves, and custodial tools. We are as diverse as the market place to help you achieve both of your marketing and profit objectives.

Our production is fully equipped to serve industrial standard products, private label product with your specification, and custom products. Our engineering capability couples with our merchandising are part of your capability to gain competitive edge in the market place. The applications and markets of our products include janitorial, sanitation, disposables, and retail. Our production capacity exceeds 3500 container per year. All these advantages will allow us to become a trusted partner.

With highest quality of customer services in mind, Teh Tung is not only a paper manufacture but also an excellent supplier for your dispensers, trash can liners, gloves, and custodial tools. We strive to be your center of purchasing for all of your distribution needs. We can be part of your team in managing your supply chain, so you can focus more of your efficiency in marketing and increase your profit margins to your customers. We have the distribution capability to deliver these quality products anywhere on time.

In Teh Tung, we believe very strongly that the key to success is to provide good service and highest quality products at best possible price. With that in mind, each individual in our company takes personal pride in achieving excellence. We are committed to be part of your team and help you grow your business.

QUALITY PRODUCTS
HELPING TO PROTECT THE ENVIRONMENT

Elegant

Made of Canadian Spruce and Pine wood pulp, Morex® Premium and Elegant offers the whitest, softest, and highly absorbent paper products in the market place. Morex® Premium and Elegant paper product line is designed to serve the 5 Star Hotels and Resorts in lodging, Class A and Professional Office Buildings, Healthcare hospitals, and Premium Dining Restaurants and Foodservices. The design of these products exhibits luxury and elegance, and functionality exceeds all the expectations for premium bath tissue, paper towels, and napkins. It is simply the best products for your customer's needs.

An economical alternative is our Renewable Green Paper is from a sustainable resource that is rapidly renewable, 100% recyclable, and compostable. In addition, it meets one of the criteria for rapidly renewable materials of on-going consumables that scores 5 points in LEED's certification MR Credit 2.1-2.5. These products appear clean, bright white, and highly absorbent, while being GREENER than recycled products. Our bleaching process is non-chlorinated and absolutely no chlorine used. With your support, we are shifting the forest industry away from the paradigm of destruction of our forest and eco system for paper.

The BioPreferred® program was created by the Farm Security and Rural Investment Act of 2002 and expanded by the Food, Conservation, and Energy Act of 2008. In addition, Presidential Executive Order 13514, Federal Leadership in Environmental, Energy, and Economic Performance, mandates the purchasing of biobased products.

USDA has established minimum biobased content standards for many product categories. A product or package must meet or exceed the minimum biobased content percentage in its given category in order to use the Certified Biobased Product label. To the extent that the BioPreferred® program achieves its purpose, the increased purchase of biobased products will also be expected to reduce petroleum consumption, increase the use of renewable resources, better manage the carbon cycle, and may contribute to reducing adverse environmental and health impacts.

We look forward to a long and successful partnership with The BioPreferredsm program in the promotion of biobased products. To learn more about our product, visit to our website at www.tehtung.com. Saving our planet is Hard, but the Choice is Simple.

The United States Department of Agriculture's (USDA's) BioPreferredSM program has certified Biobased Product Label for our Morex and Dura Soft bath room tissue, paper towels, and paper napkins, which are made with more than 67% rapidly renewable sugarcane and bamboo pulp.

Sugarcane is an annual crop. After sugar is milled, the waste is traditionally burnt. However, with our paper making technology, we are able to mix the 67% sugarcane pulp with bamboo pulp, and 33% of eucalyptus and post industrial scrap. This waste is turned into sugarcane based tissue, towels, and napkins. By using our paper, you convert what would otherwise become another greenhouse gas pollutant to a forest-preserving useful paper product.

Our Renewable Green Paper is from a sustainable resource that is rapidly renewable, 100% recyclable, and compostable. In addition, it meets one of the criteria for rapidly renewable materials of on-going consumables that scores 5 points in LEED's certification MR Credit 2.1-2.5. These products appear clean, bright white, and highly absorbent, while being GREENER than recycled products. Our bleaching process is non-chlorinated and absolutely no chlorine used. With your support, we are shifting the forest industry away from the paradigm of destruction of our forest and eco system for paper.

The BioPreferred[®] program was created by the Farm Security and Rural Investment Act of 2002 and expanded by the Food, Conservation, and Energy Act of 2008. In addition, Presidential Executive Order 13514, Federal Leadership in Environmental, Energy, and Economic Performance, mandates the purchasing of biobased products.

USDA has established minimum biobased content standards for many product categories. A product or package must meet or exceed the minimum biobased content percentage in its given category in order to use the Certified Biobased Product label. To the extent that the BioPreferred[®] program achieves its purpose, the increased purchase of biobased products will also be expected to reduce petroleum consumption, increase the use of renewable resources, better manage the carbon cycle, and may contribute to reducing adverse environmental and health impacts.

We look forward to a long and successful partnership with The BioPreferredSM program in the promotion of biobased products. To learn more about our product, visit to our website at www.tehtung.com. Saving our planet is Hard, but the Choice is Simple.

USDA BioPreferred Certified Products

The BioPreferred[®] program was created by the Farm Security and Rural Investment Act of 2002 and expanded by the Food, Conservation, and Energy Act of 2008. In addition, Presidential Executive Order 13514, Federal Leadership in Environmental, Energy, and Economic Performance, mandates the purchasing of biobased products.

USDA has established minimum biobased content standards for many *product categories*. A product or package must meet or exceed the minimum biobased content percentage in its given category in order to use the Certified Biobased Product label. To the extent that the BioPreferred[®] program achieves its purpose, the increased purchase of biobased products will also be expected to reduce petroleum consumption, increase the use of renewable resources, better manage the carbon cycle, and may contribute to reducing adverse environmental and health impacts.

What the Label Means

Only by choosing biobased products labeled “USDA Certified Biobased Products” can the consumer be assured that the USDA and the Federal government stand behind the accuracy of the claim that the product contains biological ingredients in the amounts stated on the label. Manufacturers and vendors who have obtained the rights to use the BioPreferred[®] label on a product have submitted to USDA test evidence of the biobased content of the product or package.

Federal Purchasing Requirement

The Federal and Federal contractor market represents billions of purchases annually, and Federal agencies and Federal contractors are required to give preference to biobased products within product categories identified by USDA. As a part of this process of designating product categories for the Federal procurement preference, USDA establishes the minimum biobased content for the category. Information on the technical, health, and environmental characteristics of these products are also considered.

The United States Department of Agriculture's (USDA's) BioPreferredSM program has certified Biobased Product Label for our Morex and Dura Soft bath room tissue, paper towels, and paper napkins, which are made with more than 67% rapidly renewable sugarcane and bamboo pulp.

Sugarcane is an annual crop. After sugar is milled, the waste is traditionally burnt. However, with our paper making technology, we are able to mix the 67% sugarcane pulp with bamboo pulp, and eucalyptus and post industrial scrap. This waste is turned into sugarcane based tissue, towels, and napkins. By using our paper, you convert what would otherwise become another greenhouse gas pollutant to a forest-preserving useful paper product.

Our paper is from a sustainable resource that is rapidly renewable, 100% recyclable, and compostable. In addition, it meets one of the criteria for rapidly renewable materials of on-going consumables that scores 5 points in LEED's certification MR Credit 2.1-2.5. These products appear clean, bright white, and highly absorbent, while being GREENER than recycled products. Our bleaching process is non-chlorinated and absolutely no chlorine used. With your support, we are shifting the forest industry away from destruction of our forest and eco system for paper.

Our Dura Soft CL Series adopted a high capacity coreless design that offers tremendous labor cost saving. We eliminated paper core and paper boxes from supply chain by replacing with oxo-degradable plastic flexible packaging. space saver packaging is compact with fewer cubes during transportation and storage. We are eliminating another waste that further reducing the Carbon Foot Print.

We look forward to a long and successful partnership with The BioPreferredSM program in the promotion of biobased products. To learn more about our product, visit to our website at www.tehtung.com. Saving our planet is Hard, but the Choice is Simple.

Green Value paper product line is the complete offerings to meet all of your paper tissue, towel, and napkins needs. Designed with sustainability, renewability, recyclability, and compostable in mind, we put value into the green product.

Green Part 1: Our 100% recycled products are made with 100% post consumer recycled content, and exceed EPA requirement. The Comprehensive Procurement Guideline (CPG) program is part of EPA's continuing effort to promote the use of materials recovered from solid waste. Buying recycled-content products ensures that the materials collected in recycling programs will be used again in the manufacture of new products.

Green Part 2: Our 100% recycled products scores 3 points in United States Green Building Council's Leadership in Energy and Environmental Design (LEED's MR 4.1-4.3) for Sustainable Cleaning Products and Materials. That is disposable paper and trash can liner that meets the minimum requirements of USA's EPA Comprehensive Procurement Guidelines.

Green Part 3: Our paper manufacture process of recycled products is non-chlorine bleach. We use Hydrogen Peroxide to whiten the paper.

Green Part 4: The premium tissue, towel, and napkins are made with 60% sugarcane, 9% Bamboo, 7% eucalyptus, and 25% post industrial recycled paper that meets one of the criteria for rapidly renewable materials of on-going consumables that scores 5 points in LEED's certification MR Credit 2.1-2.5.

Green Part 5: The premium tissue, towel, and napkins have just been Certified by USDA Bio Preferred Program under USDA BioBased Product label. USDA has established minimum biobased content standards for many product categories. A product or package must meet or exceed the minimum biobased content percentage in its given category in order to use the Certified Biobased Product label. To the extent that the BioPreferred® program achieves its purpose, the increased purchase of biobased products will also be expected to reduce petroleum consumption, increase the use of renewable resources, better manage the carbon cycle, and may contribute to reducing adverse environmental and health impacts.

Value: Our production is fully equipped to serve away from home markets include janitorial, sanitation, food service, and disposable products. We offer private label product with your specification and customized products. Our engineering capability couples with our merchandising are part of our capability in providing you with competitive edge in the market place. All these advantages will allow us to become a trusted partner for all of your paper needs.

	Green Value Paper Product	Case Dimension	Case Cube	Case Net Weight
