achieve more

Welcome Note:

A defining year in the journey of Unnati 2022-23

There is a phrase commonly used "Differentiating the men from the boys". This moment I believe has arrived for Unnati. There are many skilling programs across the country and the need is for many more. Many issues faced by the country and its citizens can be addressed easily through economic independence. Hence, having a livelihood becomes that much more important.

Over the years Unnati has been able to not just identify the gaps and the requirement in the employability space, but also systematically plug it and deliver results. The ease with which it has been done is refreshing. The speed at which we do it is encouraging (35days). The effectiveness with which it has been executed is inspiring and enriching.

There has been a lot of focus on the primary education and secondary education space over the last many decades- Improving infrastructure, attendance in schools through mid-day meals, focus on teachers' training and the most recent intervention from the Government. That of making it accessible to all. While doing so, we left out the youth who passed out from these schools ill equipped to secure a good job or a bright future. This, in our opinion is more dangerous. All the more because India is becoming an aspirational country. We are not a poor nation any more. We do not have a large population who are struggling for the basics of roti, kapada aur makaan. The youth want to have the best, and quick in time. The value systems are deteriorating and the social and mental unrest is quite evident. This needs to be addressed at the earliest.

This year, we, through our UNXT program and Unnati vocational training program, are attempting to help over 25000 youth across a few States. UNXT is a 165-hour training program offered to the Government college youth (in the final year) to equip them to be employable. It addresses a few areas like communication, life skills, soft skills and values, lifelong learning and the confidence to face the outside world. It is a scalable program and very soon it could be expanded to multiple States and ensure delivery to lakhs.

We do not want to end up as a training organisation and hence we shall ensure that these youth will have a job after they graduate from their respective colleges or from the Unnati skill centres. This will remain our focus and we are fiercely committed to the same. We are hiring staff across many locations, making them imbibe our philosophy and training them to deliver the program effectively. Rome was not built in a day as they say! We too are here for the long haul. We are ready to invest our time and effort, but the success of the program this year could be the defining moment in the history of Unnati.

The Utsav - the cultural festival went off very well. We could connect with all our friends, donors and patrons. The newsletter may not give you a glance into the same because there are other activities of Unnati which are covered. The 23 days festival can be seen in the Utsav FB page and on Instagram where a lot of pics and recordings are posted. We are indebted to the artists who have performed for us and have owned Unnati. The relationship is not a commercial one but one of fulfilment. They look forward to giving their best because it is for a cause and in the larger interest of the youth of this country and the Nation.

At Unnati we are all very excited and looking forward to creating history this year for the organisation!
