Mimaki

**PROMOTING
CREATIVITY**

Mimaki is proud to offer Australia's widest range of on-demand inkjet printing and cutting solutions.

Backed by quality Japanese engineering and leading-edge industry innovation, Mimaki products are designed and built to inspire creativity and boost productivity – a cut above anything else in the market today.

For excellence, versatility and reliability, make Mimaki your first choice!

GREENGUARD

Mimaki's inks are nickel-free, have low VOCs, high colour density, scratch and chemical resistance and are GREENGUARD Gold certified. Products that are GREENGUARD Gold certified meet the rigorous standards for low emission of volatile organic compounds (VOCs) and ensure that a product is acceptable for use in environments such as schools and healthcare facilities.

Mimaki™

Spicers 

A range of printers specifically designed for the sign and graphics market. Leading-edge technology, capability and flexibility for customers and end-users, from retailers and copy shops to professional sign makers and print service providers.

Mimaki sets the standard for quality and speed to market!

With Mimaki inkjet solutions, you can create highly effective visuals, including advertising, point-of-purchase signs and displays, window graphics, vehicle wraps and soft signage. Using proprietary inkjet technology, Mimaki printers generate vibrant and compelling images on a variety of materials.

MAIN SUBSTRATES

PVC sheeting, banner sheeting, window film, as well as specialty materials such as wood, metal and glass.

Contact your local Spicers representative for enquiries.

SIGN GRAPHICS

PRINT & CUT

UCJV SERIES

Leading the future of sign graphics through LED UV innovation.

The UCJV Series is a versatile inkjet printer family, having a combined function of both printing and cutting mounted with LED UV-curable ink.

- All-round LED UV printer/cutter
- Instantly dry ink
- Wide range of media

The UCJV300 Series are high-spec models equipped with a 5 layer print function in addition to being a LED UV Printer/Cutter in one.

It is a versatile model designed to support jobs with short delivery times.

CREATE

Outdoor signage, posters, illumination signboard (with the UCJV300-160 only), banners & flags, swing P.O.P. (PET film), labels and wallpaper.

UCJV300-75

Small foot-print and versatile model covering a wide range of stickers, labels and point of sales marketing materials.

UCJV300-160

Applicable for large format signs, large sized stickers, vehicle wrapping films. Reliable functions for Print & Cut to wide sized print production.

UCJV330-160

UCJV330 Series is a Print & Cut UV-LED inkjet printer that combines the high productivity and high image quality of our flagship "330 Series" with our UV printing technology to significantly improve productivity and image quality compared to previous models.

- Mimaki UV High Image Quality Technology: 5 Key Points Supporting Mimaki's High Image Quality
- UV-LED printing requires no drying time for quick delivery
- Realise overwhelmingly high image quality with fast printing speed
- Deliver highly profitable applications with clear ink that further expands creative opportunities
- Mimaki's UV printers are friendly to both operators and the environment
- Print&Cut: Proven cutting functionality - Supports for Various Output Operations

CJV330

330 Series is a flagship model that combines Mimaki Engineering's technological expertise accumulated over more than 20 years to deliver beautiful image quality, high productivity, and high value added functions that assist in saving work.

CJV330 Series is a mid to high-end eco-solvent inkjet printer (print & cut) that has been added to the line-up to meet customer needs.

The 330 Series further enhanced the chassis rigidity upon overall review of the hardware design from ground up, also improving the accuracy of droplet placement up to 650%* in comparison to our conventional product through innovative waveform control technology. And also features a new drop technology to suppress banding, meeting the professional requirements of our customers to achieve overwhelming high image quality and high productivity.

CJV300Plus

With the latest Mimaki Advanced Pass System (MAPS4), the new CJV300Plus Series enables high quality printing at a faster printing speed. This high-performance inkjet print & cut printer comes equipped with eco-solvent ink, offering both ecological and economical benefits. Adding barcodes in the lay-out of print & cut jobs for uninterrupted workflow is now also fully supported by our RIP software Rasterlink6 Plus.

- High speed production
- Adoption of ID cut
- Sustainable and economical efficiency

JV300Plus

ETHERNET

NCU

NRS

With the latest Mimaki Advanced Pass System (MAPS4), the new JV300Plus Series produces high quality printing at a faster printing speed. The enhanced work efficiency combined with eco-solvent inks, offers both ecological and economical benefits. It also comes with a new take-up device capable of handling rolls up to 45kg, which prevent media shifting and ensure smooth production.

- High speed production
- Continuous operation
- Sustainable and economical efficiency

CREATE

Signage, vehicle graphics, POS, banners, posters, fashion and sportswear, promotional, exhibition graphics, stickers, garment marking, canvas prints and much more...

The JV300-160Plus is also available for dye sublimation transfer printing and indoor graphics.

JV100-160

With two newly developed heads, the JV100-160 has pursued high quality, high productivity, and stable operation as an eco-solvent inkjet printer.

In addition to NCU (Nozzle Check Unit), NRS (Nozzle Recovery System), and MAPS4 (Mimaki Advanced Pass System4) that enable stable and high-quality printing, DAS (Dot Adjustment System) is also provided to new "100 series" printers. Dot position correction and feed amount correction, which used to be manual operations and require time and effort, can be automated, reducing the workload on the operator.

CREATE

Vehicle wrapping, Outdoor and Indoor Signage, Window Signage, Backlit, Banners, Posters, Canvas, Wallpaper, Labels & Decals, Floor Stickers, POS-display, Transfer Material and more.

DIRECT TO FILM

The all new TxF Series, including the TxF300-75 and TxF150-75, are Mimaki's first DTF (Direct-to-Film) printers. Packed with Mimaki technology, they have been designed to overcome the common ink ejection and ink sedimentation issues of current DTF printers in the market.

Using genuine Mimaki heat transfer pigment ink, which acquired ECO PASSPORT certification, it assures skin friendly printing at the highest image quality. This unique combination ensures a highly reliable and stable DTF print workflow, and is combined with Mimaki's guaranteed ongoing service and after purchase support.

TXF300-75

Introducing the all new TxF300-75 – While both printers in the series offer the same superior Mimaki technology, the recently released TxF300-75, with 2 staggered printheads, delivers new levels of productivity with speeds up to 3x faster than the TxF150-75 (one printhead), helping to expand opportunities in the market.

CUTTING

CFX

The CFX Series cutting plotters are the latest, fastest, and most productive high-speed flatbed cutting plotters with routing support. With class leading movement speed of 1000mm/s, these cutting plotters achieve high levels of production while maintaining accuracy and precision.

Equipped with the ability to carry four tools simultaneously and a high-pressure capability of 30kg, the CFX Series ensures pristine cutting and creasing results on materials with max thickness of 54mm. It features innovative technology like a camera-guided backside mode that enables accurate cutting and creasing from the backside. Whether you are working with oversized sheets or intricate designs, the CFX Series is a highly versatile production flatbed cutter to meet your needs.

- 1000 mm/s movement speed
- Four simultaneous-carry tool stations
- 5 – 30 kg pressure
- Up to 54 mm material thickness
- Surface tracking for V-cut accuracy
- Camera guided backside cutting
- Field-expandable tables 2.5m Wide x 1.3, 3.2 and 5m Long
- Finecut9 base workflow
- Ethernet & RS-232C communication

JFX200-2513 EX

The JFX200-2513 EX is a successor to the JFX200-2513 and is a large format flatbed UV inkjet printer that combines high-value-added printing and high productivity while being an entry model.

Other improvements include stability and usability.

- High value-added print
- High productivity
- Stability and safety

JFX600-2513

The new JFX600-2513 is the successor model to the JFX500-2131 and is a large-format flatbed UV inkjet printer that improves speed and quality, the two key factors required of large-format printers.

- Extreme productivity with print speeds of up to 200m²/h
- Six colors available, including light colors.
- The UV inks are certified as GREENGUARD Gold due to their environmental friendliness
- Designed with usability in mind: table size & vacuum table, supporting media as thick as 60 mm

TESTIMONIALS

BRAD JONES RACING

"We are thrilled to announce our partnership with Mimaki in the BJR Print Shop! The new JV330 has astounded us with its remarkable speed and superior quality. This cutting-edge technology enables us to produce all our signage and race car wraps faster than ever, delivering truly stunning results."

Brad Jones – Brad Jones Racing

AVON GRAPHICS

"Mimaki printers produce as close to offset quality as I've ever seen on an inkjet machine, and our customers were immediately delighted with the samples we showed them."

BEAR SIGNS & DESIGNS

"Since we saw the first Demo (UCJV300-160) we started to get excited about what we could do with the Mimaki. So far it hasn't let us down."
