## GIFTS FROM THE NORTH.

While there's widespread hope that this festive season will at least be *a little bit* jollier than last, these are still very uncertain times. As we strive to put our best foot forward and remain cautiously optimistic for the future, it's important to make sure we keep the values that the past few years have taught us front and foremost. Kindness, compassion, and a renewed love and appreciation for our local Northern surrounds.

As much as the news may have you believe that Christmas is under threat because of stranded cargo ships in the English Channel, rest assured, the work of your local artisans and producers is (generally) just up the street, offering far more diverse, unique and valuable options than anything you might have found on a high street store shelf.

In the fourth issue of 'Gifts from the North', a companion to [the online directory](#), you will find a wide selection of beautifully crafted, considered and ethically made gifts that will not only delight your loved ones, but also the small business owners you're purchasing from. People who will likely reinvest in the local community themselves, and help spread your spirit of goodwill even further.

I wish you all a healthy, harmonious & joyful holiday season.

With love,

Founder & Editor  
FABRIC OF THE NORTH
