Enterprise company

Aruba wireless access points

Boost IT, user, and IoT experiences with enterprise connectivity that's simple, fast, and secure.

Simplify network operations while keeping everything secure

With a high-performance AP portfolio that covers all sorts of use cases and price points.

Cover your bases

Aruba Wi-Fi 5 and Wi-Fi 6 APs include enterprise, branch, plug-and-play for remote workers, outdoor, and hardened versions for a wide-range of use cases and price points.

Simplify network operations

Built-in network intelligence supports advanced capabilities like AI-powered RF optimization, dynamic segmentation, service assurance, and smart management options for improved IT and user experiences.

Secure the network

WPA3 and Enhanced Open (PDF) improve user and guest encryption, while PEF uses role-based access control and DPI to isolate and segment traffic. Aruba ESP enables Zero Trust Network Security (PDF) for devices and IoT.

High-performance APs

Discover AI-powered RF optimization, rich intelligence, and smart management options via cloud or on-premises.

Indoor access points

When performance and simplicity matter, Aruba APs support AI capabilities, the latest Wi-Fi 6 standards, and multiple form factors for deployment in any environment. Ruggedized models also support extreme temperature and humidity requirements.

Outdoor access points

Aruba outdoor APs provide seamless connectivity for large public venues, as well as pop-up sites and loading docks. Point-to-point wireless options provide Wi-Fi mesh backhaul and 60GHz speed to adjacent buildings.

Remote access points

Work from home or set up a temporary site with a solution that's easy to deploy and manage. Aruba access points are automatically configured, so employees just plug them into any existing Internet connection and they're ready to go.
