HOW TO TAKE GOOD CARE OF YOUR HAIR EXTENSIONS

#safelyextensions

1.

ALL ABOUT CARE

When a client leaves the stylist, you must purchase a special comb suitable for your hair. It's also advisable to ensure you have your usual hair care products in advance.

2.

UNFAMILIAR SENSATIONS

In the first three days, the client may experience discomfort - this is normal. The new hair may feel unfamiliar, and there will be a sensation of tightness on the scalp.

3.

WASHING HAIR

You can wash your hair after extensions no sooner than one day later. Do this carefully: start from the ends and work your way up with a comb, then wash while standing in the shower, tilting your head back.

4.

MORE TIPS

Dilute the shampoo in your palm with water to prevent it from being too concentrated. Apply and wash with a teaser or gently with your fingers. Rinse the shampoo, and then the mask/conditioner only the ends, with smooth motions.

5.

DRYING HAIR

Dry your hair carefully as well. Squeeze with a towel without twisting it into a rope. Then, dry with a hairdryer from the top, in the direction of the cuticles. After that, style as you usually do.

6.

HOW TO SLEEP

It is best to sleep with extension hair by braiding two ponytails or two braids, just behind the ears and slightly below the nape of the neck, where the neck begins. This area has minimal contact with the pillow, making sleep more comfortable.

03. THE PERFECT BLOWDRY

Want that salon-fresh look every day? The perfect blowout awaits you at A2 Beauty Lounge!

Our talented stylists know just how to give your hair the bounce, shine, and volume it deserves. Say goodbye to bad hair days and hello to effortless glam!
