Fencing Guide

Key Terms and Usage Information

Gauge (Ga.)

A measure of wire thickness. The lower the number assigned to a wire the larger its diameter. For example, Gauge 1 is 0.2830 inches thick. Gauge 36 is .00990 inches thick.

Our full line of products come in a variety of gauges ranging from 9 Ga. up to 27 Ga. Thicker wires are generally stronger, heavier and more difficult to bend. The chart below shows you the size of each gauge (Ga.) wire used.

Minimum Coating Weight (Gauge Sizes)

Class 1

Class 2

Ga.	Coating Wt.	Ga.	Coating Wt.
9	.35 oz/ft ²	9	.90 oz/ft ²
10	.30 oz/ft ²	10	.85 oz/ft ²
11	.30 oz/ft ²	11	.85 oz/ft ²
12.5	.28 oz/ft ²	12.5	.80 oz/ft ²
14	.28 oz/ft ²	14	.70 oz/ft ²

Zinc Coating and Galvanization

Zinc coating prevents corrosive substances reaching the underlying steel or iron wire.

Class 1 Galvanization

Wire coating that is typically found on basic barbed wire and field fence. Class 1 wire will typically last 2 to 11 years in most non-coastal climates.

Class 3 Galvanization

2.5 times thicker than Class 1 and may last approximately 13 to 30 years before rusting in non-coastal climates.

Fencing Gauge Sizes

YardGard® fence is made of various gauges of wire. The lower the number assigned to a wire the larger its diameter. The chart and graphics accurately show the size to scale of each gauge (Ga.) used in our fencing.

Gauge Size Chart			
Wire Ga.	SWG (Inch)	Top	Side
9	0.1483"	●	██████████
10	0.1350"	●	██████████
11	0.1250"	●	██████████

23	0.0258"	●	██████████
27	0.0173"	●	██████████

Hinge Joint

Vertical stay wire wraps around horizontal line wire to form a hinged joint. This joint enables the fence to give under pressure and spring back into shape. The hinge joint, along with special expansion crimps, allow the product to expand and contract with weather changes and to stretch and conform to land contours.

Proprietary Rust Resistance

YardGard® utilizes a stringent third party testing to rate rust resistance as compared the leading brand competitors to qualify their industry leading protection.

UV-Resistance

UV-resistance refers to a substance's ability to resist ultraviolet (UV) light, including sunlight. UV light can cause discoloration or degradation.

PVC Coating

Refers to a polymer-based coating made from polyvinyl chloride (PVC), a synthetic plastic. PVC is a hard, rigid solid that can be softened and made flexible by adding plasticizers. The resulting plasticized PVC is a clear film that's resistant to abrasion and has low permeability.

Hardware Cloth

Double zinc-coated and galvanized prevents corrosive substances reaching the underlying steel or iron wire. Hardware cloth is made of closely-spaced mesh wire openings of 1/8", 1/4", and 1/2" with an option of PVC coating. Explore the endless uses:

- Gutter guards
- Soffit protection
- Filters and strainers
- Shrub and tree protection
- DIY projects and home improvement projects
- Craft projects and industrial art
- Animal protection and pest control
- Reinforcement for structures and materials
- Compost bins
- Greenhouse covers

Welded Wire

A versatile, low-cost alternative to chain link fencing. Welded wire maintains the integrity of the structure if a few wires are broken, where chain link will unravel when wires are cut. Roll lengths vary from 50' to 100' and are available in a wide variety of spacing, gauge and height to satisfy any requirement.

Safety Fences

Controls pedestrian and vehicle traffic around temporary hazards. Safety fences are easy to install and remove and roll up for easy transport.

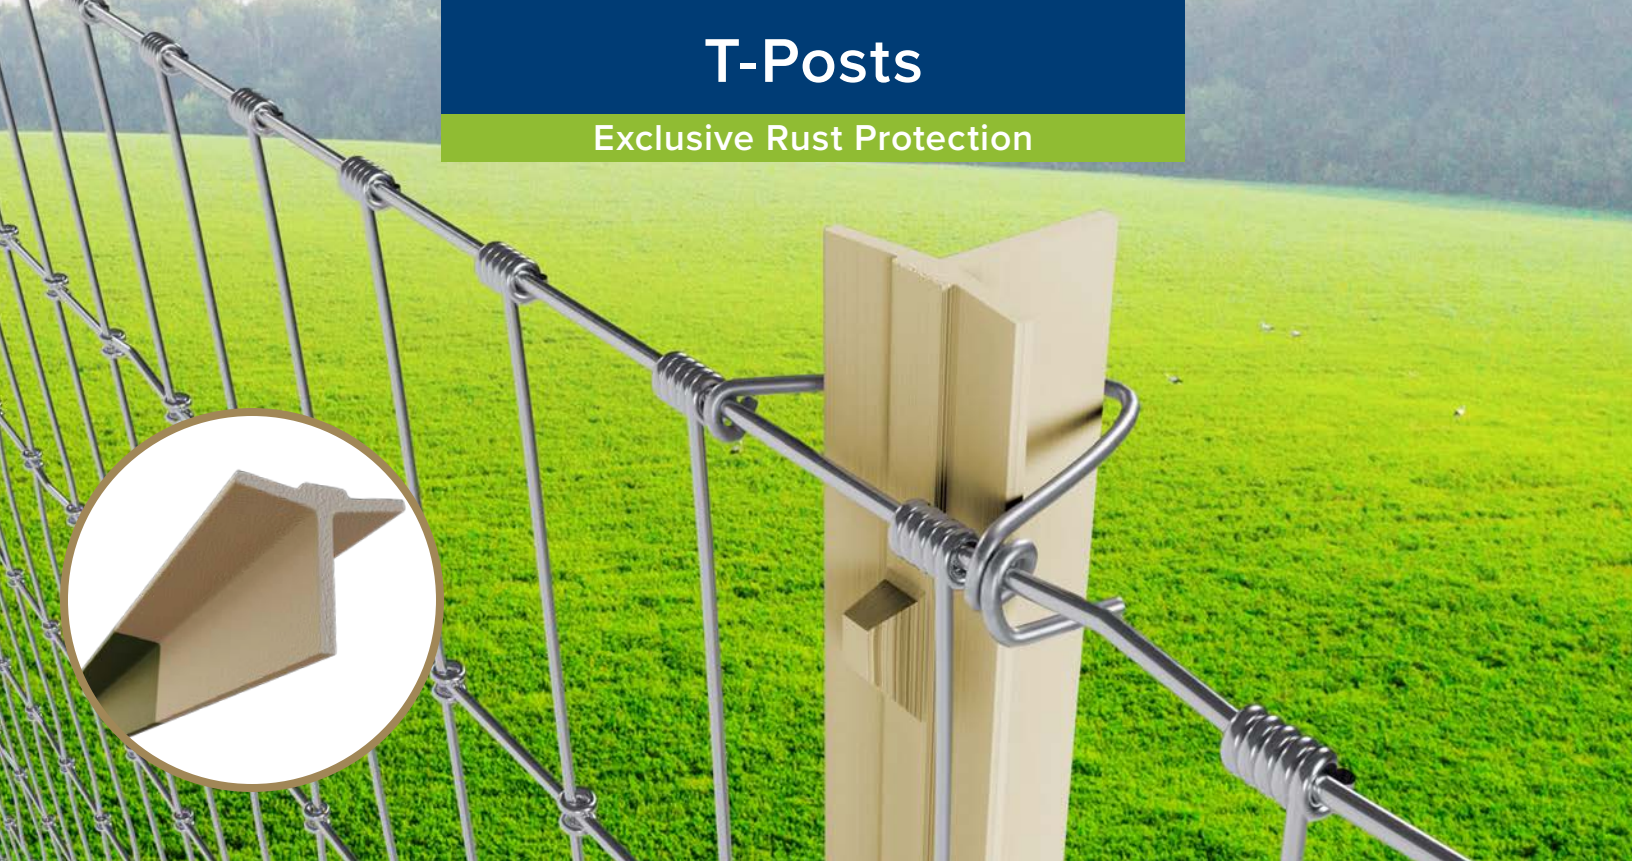

Poultry Netting

Wire coating that is typically found on basic barbed wire and field fence. Class 1 wire will typically last 2 to 11 years in most non-coastal climates.

- Chicken Runs
- Chicken Coops
- Animal Cages

T-Posts

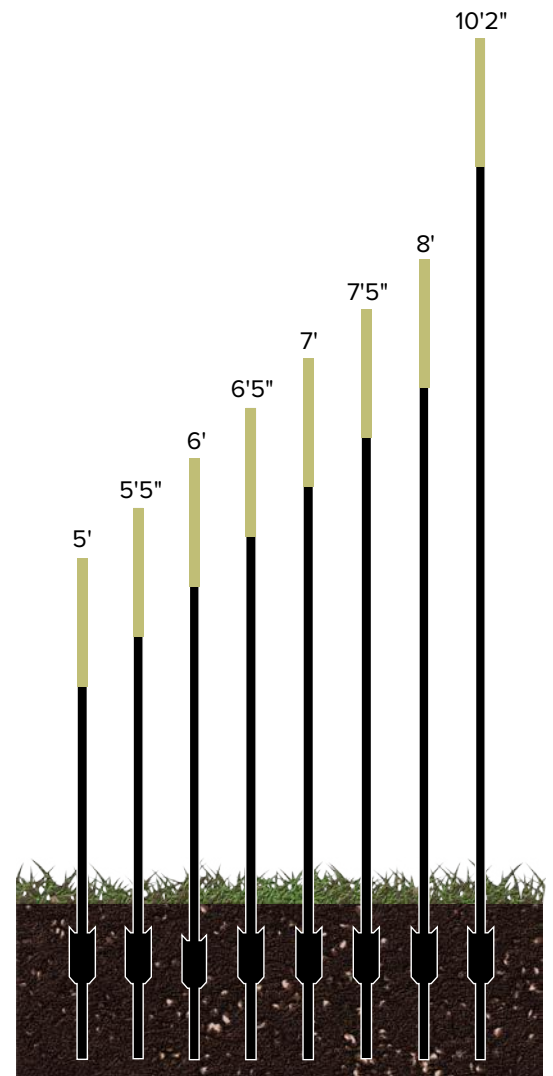

Exclusive Rust Protection

FarmGard® T-Posts with 2 coats of protective enamel rate among the highest quality sold in the U.S. and provide excellent performance and service for residential, farm, industrial, and commercial applications. The studded design adds strength, secures fence fabric, and prevents slippage of clips and insulators. Exceeds ASTM requirements.

- Exclusive prime two coat finish provides maximum rust protection
- FarmGard® beige top provides enhanced night visibility
- Rugged, tight welded anchor plate minimizes sideways and rotational movement

U-Posts

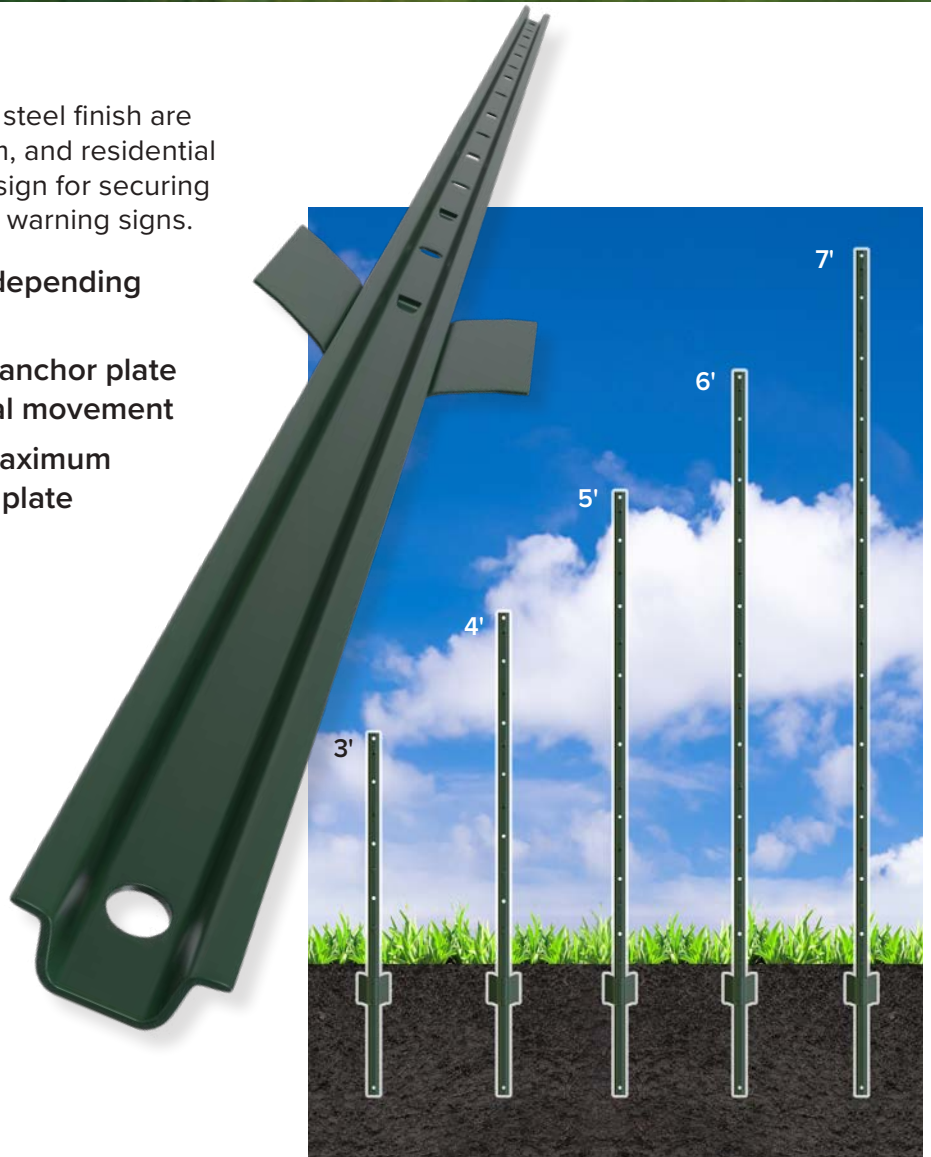

Powder-Coated Steel Finish

YardGard® U-Posts with powder-coated steel finish are an excellent choice for garden, light farm, and residential applications. They feature a notched design for securing fence to post. A great option for posting warning signs.

- Suggested spacing of 5 to 10 feet depending on the type of fencing
- Designed with a riveted or welded anchor plate to minimize sideways and rotational movement
- U-channel construction provides maximum strength along with riveted anchor plate

T-Post Accessories

Increase Utility of Your T-Posts

Horizontal and Vertical T-Post Brackets

These easy to install brackets provide a convenient way of increasing the utility of T-Posts. The brackets slide over the top of a T-Post and lock onto the notches. Once in place, these brackets provide stable support. Tilt the brackets up to quickly adjust to the desired height. Brackets are available in either horizontal or vertical arrangements for a variety of applications to a T-Post.

- Use 2" brackets for lighter applications
- Use 3" for more robust installations

SKU	Length	Weight
901191EFL	2" Horizontal	.38 lbs.
901193EFL	3" Horizontal	.58 lbs.

SKU	Length	Weight
901192EFL	2" Vertical	.38 lbs.
90119EFL	3" Vertical	.58 lbs.

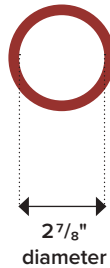

Fence Post Driver

Eases work of driving T-Posts into the ground and is designed to minimize damage to fence post tops. Handles are conveniently tapered for comfortable hand placement.

- 23.5" length with weighted, reinforced steel head
- 2-7/8" Inside driver diameter

SKU	Size	Color	Weight
901147A	23.5"	Red	14 lbs.

Galvanized Steel T-Post Fence Clips

12 gauge galvanized steel clips are designed to keep fencing wire taut and firmly fastened to a T-Post.

- Easy installation
- Withstands tough weather conditions
- Rust-resistant

SKU	Gauge	Quantity
9011698	12	25/bag

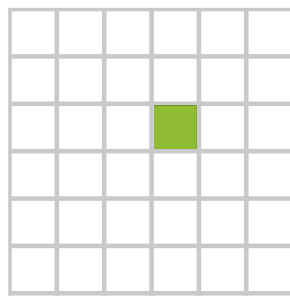

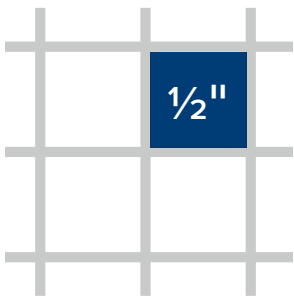

Hardware Cloth

Galvanized and PVC Coated

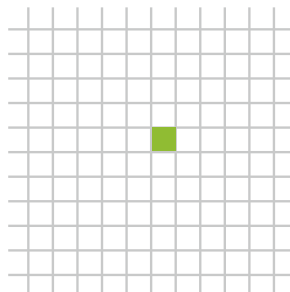

YardGard Hardware Cloth is ideal for screen doors, gutter guards, animal control, cages, tree guards, gardening applications, craft projects and much more. Lightweight, flexible and economical. Green PVC offers an environmentally pleasing appearance and additional weather protection.

- Offered in 19, 23 and 27 gauge sizes
- Double zinc-coated for maximum rust-resistance

Residential Fencing Products

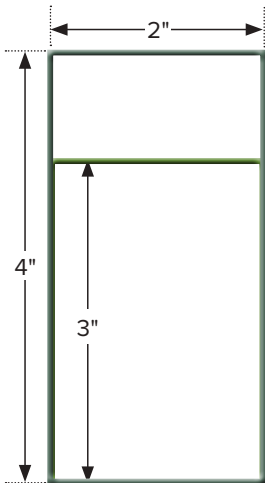

PVC Welded Wire

Uniformly Galvanized

Our PVC Welded Wire has all the benefits of welded wire but is coated to enhance the longevity and appearance. It serves as a versatile, lighter weight and economical solution to ornamental fencing. Adds a rich look by complimenting the natural surroundings.

- Available in 2" x 4" and 2" x 3" mesh
- Virtually maintenance-free
- Uniformly galvanized prior to coating for reinforced rust and wear protection

SKU	Description	Size	Weight
308357A	Green, 14 Ga., 2" x 4" mesh	36" x 50'	16.9 lbs.
308358A	Green, 14 Ga., 2" x 4" Mesh	48" x 50'	22.5 lbs.
308350B	Green, 16 Ga., 2" x 3" mesh	24" x 25'	5.9 lbs.
308349A	Green, 16 Ga., 2" x 3" mesh	24" x 50'	13.2 lbs.
308351B	Green, 16 Ga., 2" x 3" mesh	36" x 50'	16.7 lbs.
308352B	Green, 16 Ga., 2" x 3" mesh	48" x 50'	22.4 lbs.
308354B	Green, 16 Ga., 2" x 3" mesh	60" x 50'	28.0 lbs.
308381B	Black, 16 Ga., 2" x 3" mesh	36" x 50'	16.7 lbs.
308382B	Black, 16 Ga., 2" x 3" mesh	48" x 50'	22.4 lbs.

Welded Wire

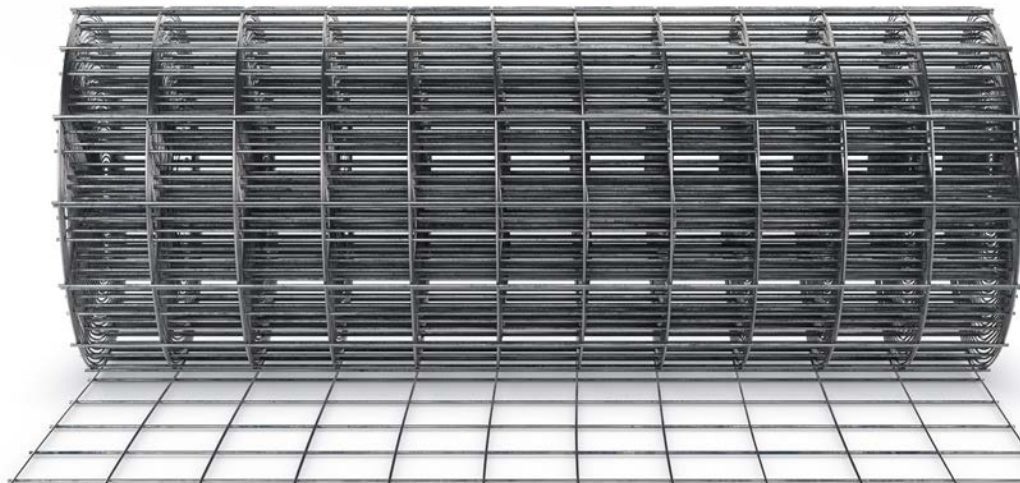

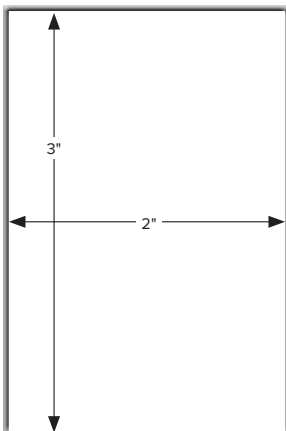

Economy Fencing

YardGard Economy Fence (Welded Wire) is an ideal backing for post and rail fencing. It is also a great for fencing vegetable and flower gardens, making compost bins, and protecting seedlings.

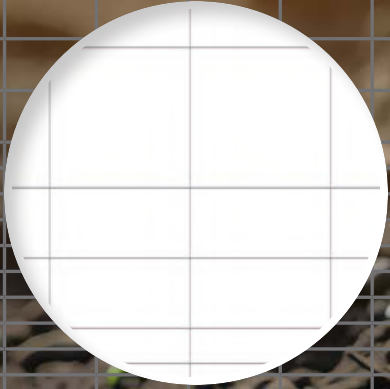

- Available in 2" x 3" mesh opening
- 16 gauge
- Most economical option for home and garden applications

SKU	Description	Size	Weight
308360B	16 Ga., 2" x 3" mesh	24" x 25'	10.4 lbs.
308361B	16 Ga., 2" x 3" mesh	36" x 50'	15.1 lbs.
308362B	16 Ga., 2" x 3" mesh	48" x 50'	20.0 lbs.

Garden Fence

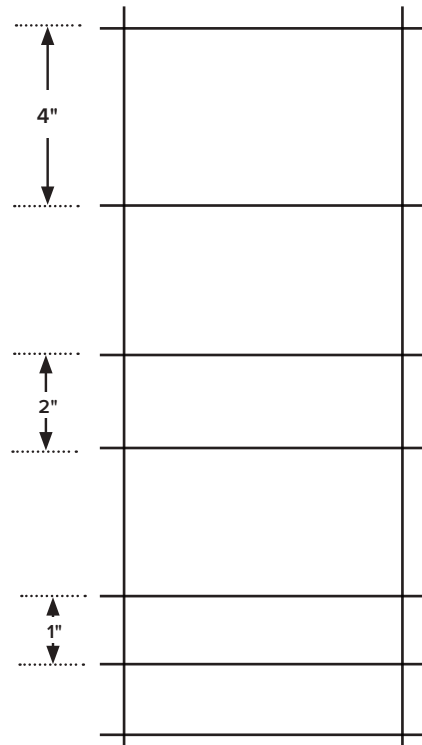

Galvanized Rabbit Fence

YardGard Garden Fence is specifically designed with graduated opening sizes to keep out rabbits and other nuisance varmints.

- Virtually maintenance-free
- Uniformly galvanized prior to coating for reinforced rust and wear protection

Features graduated opening sizes with closer spacing at the bottom:

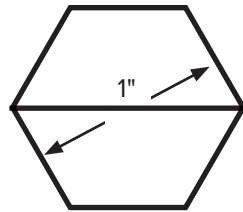

SKU	Description	Size	Weight
308374A	Galvanized, 16 Ga. roll	28" x 25'	6.6 lbs.
308371B	Galvanized, 14 Ga. roll	28" x 50'	12.7 lbs.
308372A	Galvanized, 14 Ga. roll	40" x 50'	16.1 lbs.
308376B	Green, 16 Ga. roll	28" x 50'	14.3 lbs.

Rabbit Fencing

Galvanized with Horizontal Strand

Hexagonal
Recommended
by Forestry
Commission

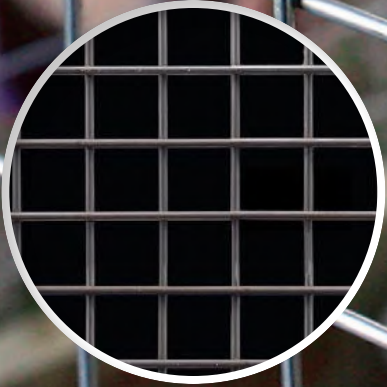

An effective protection against grazing rabbits. It is great for rabbit hutches or chicken runs.

- Similar to poultry netting with added horizontal wire strand for extra protection

SKU	Description	Size	Weight
308481B	20 Ga. mesh roll	28" x 25'	3.9 lbs.

Cage Wire

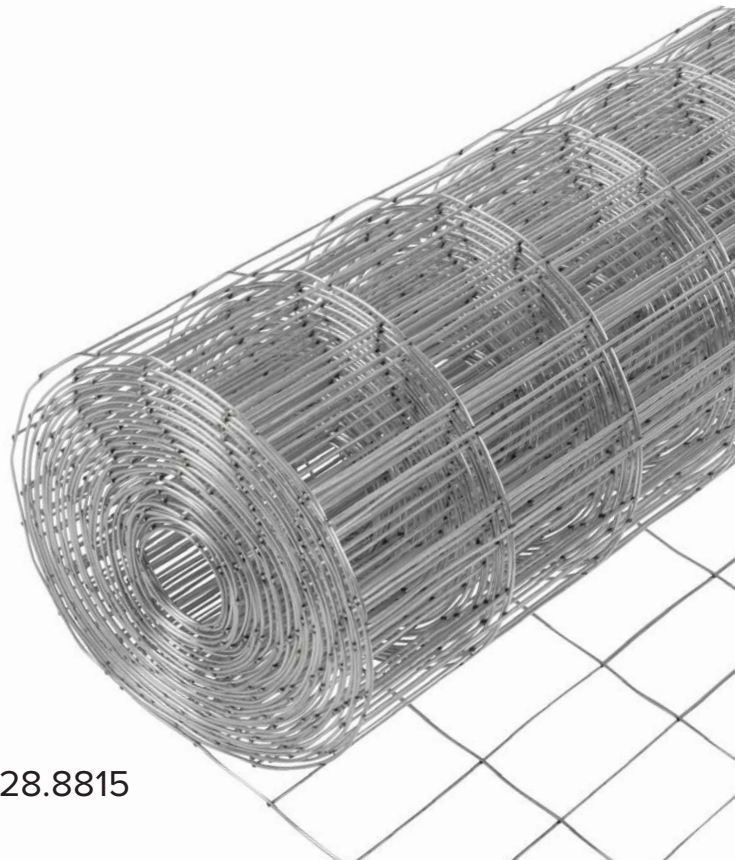

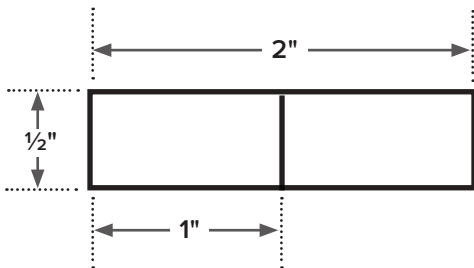

Galvanized (16 Ga.)

YardGard Cage Wire is a high-quality, galvanized steel, with welded cross wires for added strength. It is ideal for pet cages, rabbit hutches, plant holders and window well screens.

- 16 gauge galvanized steel

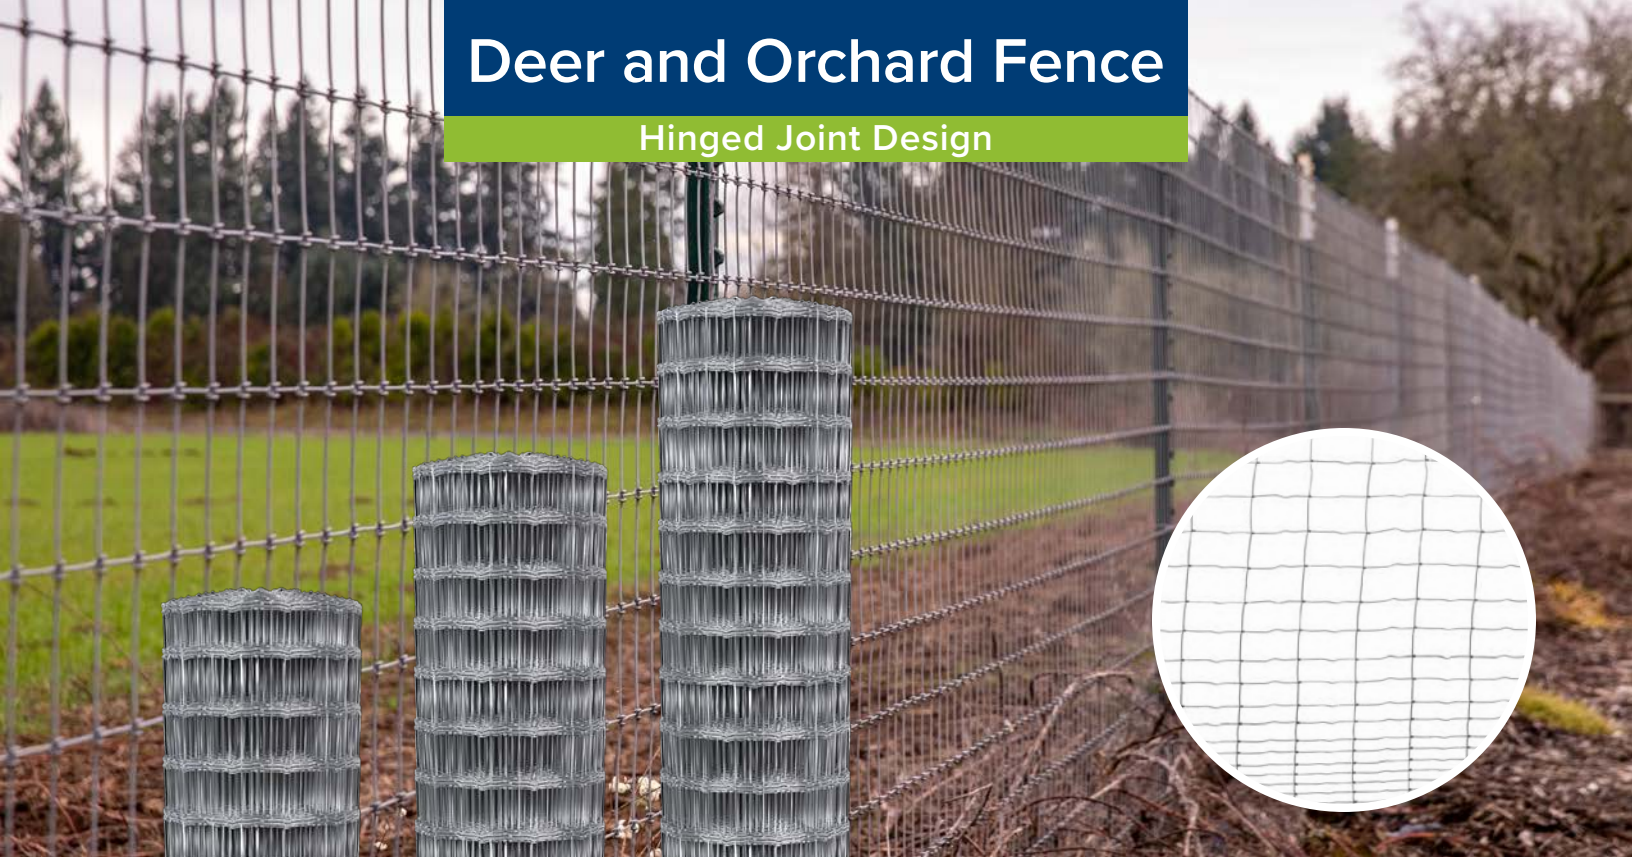

SKU	Description	Size	Weight
309302A	1/2" x 1" mesh roll	30" x 10'	8.8 lbs.
309321A	1" x 1" mesh roll	36" x 25'	13.1 lbs.
309311A	1" x 2" mesh roll	24" x 15'	7.6 lbs.

1.800.628.8815

Deer and Orchard Fence

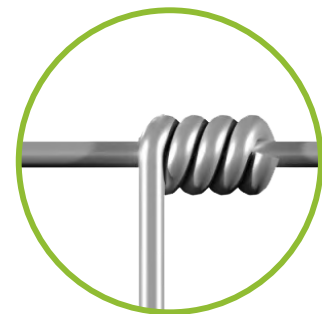

Hinged Joint Design

FarmGard® Deer and Orchard Fence is a specialty fixed-knot woven wire product with flexible durability designed to help protect orchards, gardens and vineyards from deer and other large game.

- Class 1 galvanized fencing with 14.5 gauge wire
- Expands and contracts to conform to land contours

Poultry Netting

Hexagon Mesh Weave

A favorite of farmers, pet owners and gardeners, and recognized by its trademark hexagon mesh weave. An economical, lightweight netting is often used in pens to confine poultry, rabbits and other small animals. Additional uses include plant protection, and support, soil erosion prevention and compost pile refinement. Made of strong but flexible 20 gauge steel.

- Galvanized prior to weaving for longer lasting rust protection
- Use PVC coated for enhanced longevity and appearance
