Redefining Security with
HikCentral Professional v3.0

2017
The Dawn of HCP v1.0

made its global debut as a VMS platform. It seamlessly integrated access control, alarms, and intercom system, evolving into a comprehensive **security management solution**.

2020
The Evolution to HCP v2.0

expanded its capabilities by integrating parking systems, portable enforcement, onboard security and more features. This addressed the growing demands of increasingly complex **security scenarios**.

2023
The Rise of HCP v2.5

introduced **20+ versatile add-ons** for specific vertical industries. Its flexible mechanisms allowed for seamless integration into various environments.

Parking Lot
Portable Enforcement
Time & Attendance
Guard Wall
Visitor
...

2025
The Leap to HCP v3.0

HCP is set to break new ground with a major **clustering architectural upgrade**. With expanded capabilities, HCP v3.0 is redefining the future of security management for large-scale applications.

Empower Your Future, Advanced and Growing

- On-demand scalability
- Instant failover
- High concurrency efficiency
- Maximized database capacity
- Visualized management
- Versatile application scenarios

UPGRADED Architecture

v3.0
