**CPML**  
CONTRACTORS LTD.  
*Leaders in Post Tensioning Technology*

# Leaders in Post-Tensioning Technology

Are you seeking a construction partner in Trinidad & Tobago (and the wider Caribbean) who brings the full package — from conception to completion — with a reputation for innovative engineering, reliable execution and value-driven solutions?

## Why Partner with CPML?

- ✓ Proven track record across Trinidad & Tobago and the Caribbean.
- ✓ Innovative leadership in post-tensioning and modern construction technology.
- ✓ Fully integrated service offering — design, engineering, construction, equipment supply.
- ✓ Strong commitment to safety, integrity, teamwork and results.

### Our Services:

- Engineering Consulting
- Architectural & Design Engineering
- Project Management
- Civil Engineering & Construction
- Specialized Technologies such as Post-Tensioning Technology, Earth Anchoring / Slope-Stabilization Systems, Engineered Formwork Systems
- Equipment Rental & Transportation
- Value Engineering

# WHO WE ARE

The Trinidad and Tobago Contractors Association (TTCA) was founded in 1968 by visionaries Mr. Granville Johnson, Mr. McDonald Murrell, Mr. Lepold Arthur and Mr. Emile Elias. The Association is a medium through which members and the greater society benefits from construction related training and adherence to agreed to standards by members. The TTCA lobbies for issues affecting contractors and continuously pursues the various publics for the improvement and development of the sector.

After 50 years, the Association continues to strive for excellence in the Industrial, Residential, Commercial and Institutional Sectors. Members include small, medium and large firms and make up a spectrum of general contractors, manufacturers and specialty construction suppliers.

The affairs of the TTCA are overseen by a Board of ten (10) Directors, inclusive of a President, Vice President and a Secretary, all of whom are business owners or senior

executives/officers employed by companies operating within the construction sector.

Members are elected to the Board at the company's Annual General Meeting and it should be noted that, at present these positions are held strictly on a volunteer basis and there is no remuneration involved. Nonetheless, to date the TTCA Board of Directors has always proven to be a committed and dedicated group of individuals who bring high levels of skill, knowledge, training and professional experience to bear in providing the required guidance and direction for the Association.

The day to day operation of the TTCA Secretariat is overseen by a General Manager who is ably assisted by a small complement of staff. Notwithstanding the size of the team, the Association champions many huge initiatives that are of vital importance to the entire construction industry and by extension, to the development of Trinidad and Tobago as a whole.

# WHAT WE DO

## OUR VISION

The Trinidad and Tobago Contractors Association strives to serve our nation's construction sector by promoting the skill, integrity and responsibility of those who build Trinidad and Tobago.

## MISSION STATEMENT

We are dedicated to meeting the needs of our members in an ever changing political & economic climate through active training, advocacy, improving job site safety, expanding the use of cutting edge technology and strengthening relationships between all associated member groups and owners.

## The TTCA carries out its mission by serving the construction industry in the following key areas:

- Promote integrity amongst contractors
- Provide a strong and united voice on matters affecting members
- Stand as a supervisory body for our members
- Support the development and application of industry related skills through training
- Continuous pursuit of fair practices and policies for the industry
- Mandate excellence in health and safety practices
- Ensure the provision of quality service to members and the public where applicable
- In the 1990's, once again through its lobbying efforts, the TTCA was instrumental in bringing about a commission of enquiry to investigate corruption in the award of contracts with respect to the Piarco Airport Construction Project and more recently, played a significant role in helping to influence the Government's decision to conduct a Commission of Enquiry into UDECOTT and the Construction Industry, more often referred to as "the UFF Commission of Enquiry".

## Key Accomplishments

- One of the TTCA's most important achievements over the last 49 years is the successful lobbying for the public opening of tenders in the 1960's which eventually became public policy in 1987.
- In the 1970's the TTCA successfully lobbied the Government for concessions that allowed for the increased participation of locals on large projects. This encouraged more people to enter the industry thus increasing the number of contractors in Trinidad and Tobago.
- The Association also played a major role in the introduction of the Civil Engineering Technical Certification into the BSc Engineering Degree at the University of the West Indies.
