NEW FABRIC

## CottonSoft

**Composition:** Our fabric boasts a thoughtful blend of 45% Cotton and 55% Polyester (100% Cotton, 100% Polyester), striking the perfect balance between comfort and durability.

**Inside Layer – Cotton Terry :** The interior layer of our fabric is made from the finest cotton terry. This choice ensures that the skin comes in contact with a soft, breathable surface, ideal for maintaining skin health and comfort. The cotton terry provides a plush, gentle touch, making it perfect for products that require direct skin contact.

**Outside Layer – Polyester Velour:** Encasing the cotton interior, the outer layer is a sleek polyester velour. Renowned for its strength and versatility, polyester adds a layer of durability and resilience to the fabric. This microfleece-like material is not only hard-wearing but also imparts a luxurious velvety feel, enhancing the aesthetic appeal of the final product.

**Skin-Friendly:** The cotton terry inside is gentle against the skin, making it suitable for all-day wear or use.

**Aesthetic Appeal:** The velvety polyester outer layer adds a touch of elegance and luxury to any product.

**Long-Lasting Quality:** Designed to endure, this fabric maintains its integrity and appearance over time, offering great value.
