Prep Type

STSC - Prepared through Sterile Repack of commercially available products

API - Prepared through In-Process Sterilization of active pharmaceutical ingredients (API)

STSD - Prepared through dilution, or reconstitution followed by dilution, of a sterile-manufactured product, or through in-process sterilization of manufactured products

Storage Conditions

RT - Controlled Room Temperature (20°C to 25°C)

R - Refrigerated Cold Storage (2°C to 8°C)

Expiration Date is established from the date prepared.

PF - Preservative Free

SyrSpend® SF

Fagron's range of oral suspending vehicles, SyrSpend® SF, offers a solution for different patient groups by providing pharmaceutical stability, dosage consistency, and patient comfort with each preparation.

Consistency You Can Rely On, Comfort Patients Appreciate

- **Active Suspending Technology** – Ready-to-use, starch-based suspending system developed to create a homogenous oral suspension for consistent dosing throughout use
- **Proven API Compatibility** – Supported by scientific stability data demonstrating compatibility with a broad range of active APIs
- **Ingredient-Conscious Formulation** – Carefully selected ingredients to support patient safety and help minimize side effects and allergic reactions
- **Patient-Friendly Experience** – Light texture, easy-to-swallow consistency, and no medicinal aftertaste to support patient acceptance
