**CARNILOVE** has been designed with careful consideration for the historical continuity of cohabitation between dogs and humans.

The ingredients and their proportions have been developed according to the diet of dogs prior to the advent of agriculture, but production is based on the latest processes and technologies.

- 60% fresh meat
- Grain-Free
- Potato-Free
- Complete dog food

**GUARANTEED COMPOSITION  
CONTAINING NO CHEMICALS,  
PRESERVATIVES, OR  
COLOURANTS**

Comprehensive food forms the basis of daily nutrition for dogs. We understand that the quality and nutritional composition of dog food has a direct impact on overall health and wellbeing. The diet of wild dogs contains no chemical substances and no artificial additives, both of which can accumulate in the body and cause serious health problems. Carnilove contains the **highest-quality ingredients** and maintains excellent digestibility and usability through careful processing.

**GRAIN-FREE \* POTATO-FREE**

Grains are a common ingredient in commercial dog foods, where they serve as a cheap filler and source of energy. They do not, however, form a natural part of the canine diet. **Because dogs can't use the excess energy contained in grains and potatoes, it is stored in the body as fat and leads to the onset of obesity and related illnesses, such as diabetes.** Carnilove is a return to the natural food sources of wild dogs. Therefore, it contains no common grains or potatoes.

**FOR FULL INGREDIENTS  
AND NUTRITION VALUES,  
PLEASE VISIT  
[CARNILOVE.CO.UK](http://CARNILOVE.CO.UK)**

**WILD-ORIGIN MEATS**

Meat and other animal tissues are **sources of proteins**, the building blocks of muscle. It is very important to ensure that dogs have the **required daily intake of quality proteins**. The wide spectrum of carefully selected and unique sources of proteins in the Carnilove formulas, such as **reindeer, duck, pheasant, turkey, lamb, wild boar, and salmon**, respect the natural dietary choices of wild dogs. All of the meat and animal ingredients in Carnilove are selected with the greatest possible emphasis on quality and come **from regulated farms in the Czech Republic, Germany, Sweden, Scotland, Norway, and Australia.**

## SEA BUCKTHORN

A powerful superfruit rich in antioxidants, which help fight against free radicals, and vitamin C, an all-round body booster that supports wound healing and recovery.

## PUMPKIN

A natural source of high-quality fibre, which supports digestive tract health and ensures efficient absorption of important nutrients.

## CHICKPEAS

An excellent natural source of plant protein and minerals, such as sodium, iron, and magnesium, which are necessary for proper metabolism, and calcium, which plays an important role in bone mineralization.

## GINGER ROOT

A powerful natural wonder that supports the body against inflammation and provides the foundation for immune system health and efficient metabolism.

## SAGE

Helps reduce flatulence and supports digestion. It also has anti-inflammatory and antibacterial properties that help maintain healthy teeth and gums.

## YEAST, PSYLLIUM & YUCCA

To support digestion, increase the usability of nutrients in the body, and provide necessary insoluble dietary fibre to support a healthy digestive tract. Brewer's yeast also acts as a natural antiparasitic, while yucca supports a healthy digestion and reduces the volume and odour of stools.

## SALMON OIL

Rich in Omega 3 fatty acids supporting the nervous and cardiovascular system and promoting hair and skin quality. The oil in Carnilove comes from Scottish salmon and contains high levels of DHA and EPA, both of which support mental and learning capabilities.

## CHICORY ROOT AND MARINE ALGAE

Supporting health and immunity. Chicory root is a source of mannan oligosaccharides, which suppress negative bacteria in the bowel and have a positive effect on the composition of intestinal microflora. Marine algae are a natural source of minerals, trace elements, and amino acids.

## GREEN LIPPED MUSSEL AND CARTILAGE EXTRACT

Supports mobility and flexibility of joint, tendons and ligaments.

## FOREST FRUITS VEGETABLES AND HERBS

A source of nutrients, fibre and necessary vitamins. Carnilove contains fruits and herbs rich in antioxidants, which support natural cell protection, boost the immune system, and prevent premature aging.

RESPECT THE NATURAL ORIGIN OF  
DOGS AND GIVE THEM WILD-MEAT  
CANS BALANCED TO SATISFY THEIR  
INSTINCTIVE LOVE OF MEAT.
