PROMOTIONAL MERCHANDISE

# HELLO

Welcome to our new and comprehensive catalogue featuring everything you need from the world of promotional merchandise - look out for exciting new products and trusted best sellers just waiting for your branding!

You'll find plenty of new additions as you browse through the catalogue, in particular new eco-friendly items such as the ZC1058 Power Bank (Pg. 70) and RC1138 Cork Coaster (Pg. 127). Where possible, all new items have been selected for their 'green credentials' whether that be the recycled materials used to make them or the sustainable source of which the materials come from.

You will also find a new and exciting addition in the Bags category in the form of eco-friendly apparel brand Three Peaks GBR® who focus solely on using recycled plastic bottles (RPET) or 100% organic materials to produce their products. This exciting new partnership allows us to offer 5 specially selected items from their range, all of which can be personalised with your branding.

We hope you enjoy your new Premium Portfolio and look forward to helping with your promotional merchandise needs.

## MAKE IT PERSONAL

The following guide has been designed to explain the processes involved in the personalisation techniques available for our products throughout the catalogue. For further information please call our sales office.

## PRINTING

Printing is the most popular and cost effective technique and can take the format of pad printing (also known as tampo) or screen printing. Pad or tampo printing involves the use of a pad to apply the ink to the product. Screen printing applies the ink via the use of a stencil placed on a porous material screen.

FOR PLASTIC, PU AND METAL

## ROTARY PRINTING

A type of screen printing in which the product is rolled along the screen so that the print covers the circumference of the product, creating a 'wrap around' print.

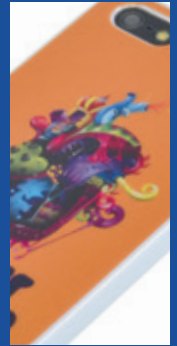

FOR MUGS, FLASKS AND PENS

## DIGITAL PRINTING

Produced using ink jet print machinery. The 4 colours, cyan, magenta, yellow and black, are used in different quantities to produce millions of different colours and shades. It is great for printing photos, four colour process images and more detailed logos

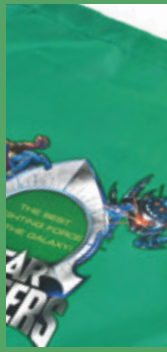

FOR FLAT SURFACES/SOME DRINKWARE

## TRANSFER PRINTING

A printed image is applied to thermal paper which is then transferred to the item via a heat process. This technique is ideal for reproducing four colour process logos onto material based product.

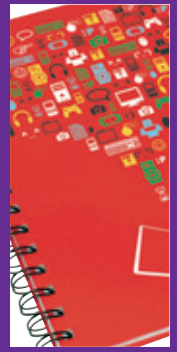

FOR MATERIAL

## LITHO PRINTING

Litho printing is a method used to print text or artwork onto paper. The required image is etched onto a metal plate and then transferred to a rubber roller. The image is then taken from the roller and applied to the item.

FOR NOTEBOOKS

## LABEL/DOMING

Self-adhesive printed label. For doming add an epoxy dome cover made of polyurethane resin; it's durable, tough and long lasting. The label and doming process is often used to achieve four colour process logos and can be more cost effective than other printing methods, as it is the same cost regardless of the number of print colours.

FOR LABELS, JARS, SANITISERS

## ENGRAVING

A very intricate process which involves carving the logo into the item, producing a permanent form of branding. In most cases engraving is performed by specialist computer guided laser engraving machinery.

FOR WOOD AND METAL

## ROTARY ENGRAVING

The principle is much the same as standard engraving but specialist machinery enables the item to be rolled as it is marked, allowing the branding to cover the circumference of the item.

FOR METAL

## DEBOSSING

Debossing is a technique that leaves an impression of the logo on an item. A heated, metal plate is applied to the surface of the item and when removed it leaves behind a recessed imprint.

FOR PAPER AND PU

## FOIL BLOCKING

Similar to debossing (and using the same machinery), foil blocking leaves an imprint in the item, but the difference is that it can add colour to the impression. The colour is added by putting a colour foil between the dye and the product. The most popular colours to use are silver and gold.

FOR PAPER AND LEATHER

## EMBROIDERY

Stitches one or multi-coloured logos onto material products using a needle and strands of thread or yarn.

FOR MATERIAL

## IRON STAMPING

A heated metal dye is pressed into the surface of the item which leaves behind an impression. The impression is then filled with colour.

FOR SOLID METALS

## PVC

PVC (polyvinyl chloride) is a type of plastic which is easy to mould and can be produced in many colours. A bespoke mould is created incorporating a logo in various shapes and designs and is then filled with the liquid PVC and left to set and harden. Set up costs are low, allowing small order runs.

FOR PLASTIC

## DYE SUBLIMATION

Printing starts with films that contain dyes; these are placed on the material and heated up by the print head. This causes the pigments to leave the film and enter into the material where it cools and re-solidifies. This creates a gentle gradation at the edge of each pixel and because the colour infuses, it is less vulnerable to fading and distortion over time.

FOR LANYARDS
