IB DIPLOMA PROGRAMME

What are the key changes to the 2023 DP Biology Subject Guide

Removal of the Options

The removal of the Options is a main contributor to the reduction in the content of the course. However, teachers will note that some topics from each of the former Options are now included in the main syllabus. Content has been reduced in many other areas too, hopefully leaving students more time to reflect and integrate needed concepts.

Guiding Questions

Guiding Questions are a new feature of the syllabus, given at the start of each sub-topic. The questions are purposefully open-ended, lending themselves to increasingly detailed consideration as the understanding of the topic deepens. These questions may serve as openers for a topic, teasing out students' prior knowledge, and perhaps helping to suggest a sequence of what will be covered."

Skill Introduction

'Skills in the study of biology'. This is not intended as a topic to be taught in isolation, but is more of a checklist of skills that students must acquire during the course. It replaces the 'prescribed practicals', (aka 'mandatory labs') of the 2016 curriculum, and clarifies the techniques, technology and mathematical scope that is expected within the course.

Linking Questions

The goal of Linking Questions is to help create enhanced understanding. The content of Linking Questions is often addressed elsewhere in the text as it sometimes encourages a 'revisiting' of material and sometimes a preview of upcoming material.

Four Main Themes

In order to enhance conceptual learning, the syllabus content is now presented in four main themes:

Unity and diversity

Form and function

Interaction and interdependence

Continuity and change

In addition, the syllabus structure now includes four levels of organisation: Molecules, Cells, Organisms, and Ecosystems.

What are the key changes to the DP Chemistry Subject Guide

Removal of the Options

The removal of the Options is a main contributor to the reduction in the content of the course. However, teachers will note that some topics from each of the former Options are now included in the main syllabus. Content has been reduced in many other areas too, hopefully leaving students more time to reflect and integrate needed concepts.

Introduction of Two Main Themes

The syllabus content is now presented in two main themes, Structure and Reactivity. Emphasis is placed on the wide use of models in the study of chemistry, with consideration of their limitations and how they continue to evolve. Reaction mechanisms are classified as only four types, all of which are defined in terms of sub-atomic particle behaviour. At first glance this may give the impression that the syllabus has been drastically changed, but in fact, it is an elegant and stream-lined presentation that reinforces the concept of reactivity depending on structure.

Guiding Questions

Guiding Questions are a new feature of the syllabus, given at the start of each sub-topic. The questions are purposefully open-ended, lending themselves to increasingly detailed consideration as the understanding of the topic deepens. These questions may serve as openers for a topic, teasing out students' prior knowledge, and perhaps helping to suggest a sequence of what will be covered. They could also be used as a tool for assessment, looking for increasing depth and breadth at different stages in the learning. In topics where there are additional Understandings for the Higher Level course, HL students will be able to give a more in-depth answer at the end of the unit. Guiding Questions should be re-visited at the end of each sub-topic as a useful tool for revision

Linking Questions

Linking Questions are another important feature of the new course. They are given in many of the syllabus Understandings, where they show a link to a different but related sub-topic. The goal of Linking Questions is to help create networked understanding, including from Skills in the study of chemistry and with the NOS. They focus on the unifying concepts and patterns, sometimes including anomalies. They may also probe limitations of models and prompt consideration of the application of chemistry in a real-world context. Linking Questions are unlikely to be used as questions in examinations per se, but the related concepts are considered an essential part of the course for assessment.

Skill Introduction

At the top of the 'syllabus roadmap' given at the start of the 2025 subject guide is a new section known as 'Skills in the study of chemistry'. This is not intended as a topic to be taught in isolation, but is more of a checklist of skills that students must acquire during the course. It replaces the 'prescribed practicals', (aka 'mandatory labs') of the 2016 curriculum, and clarifies the techniques, technology and mathematical scope that is expected within the course. This approach gives more flexibility to teachers as to how and when they teach a specific skill. For example, carrying out distillation is an expected technique, but whether this is included as part of the oxidation of alcohols or while considering the separation of a mixture of liquids or anywhere else, is completely open to choice.

What are the key changes to the DP Physics Subject Guide

Key changes

The syllabus content moves from 12 topics (eight of which were required at Standard Level) to 24 compulsory topics, 19 of which are required in full or in part at Standard Level. These 24 topics are grouped under five Themes: | Space, time and motion | The particulate nature of matter | Wave behaviour | Fields | Nuclear and quantum physics Reassuringly, you won't have to make significant changes to how you plan and teach because the important physics ideas like motion and waves are still addressed. However, students will now need to really understand these Concepts, rather than simply picking an equation and plugging in the numbers

Removal of Options

The removal of the HL Options is the main contributor to a reduction in the content of the course. However, you will note that some topics from each of the former Options are now included in the main syllabus. Students no longer pick HL options. All HL students cover the same content. This is to ensure consistency in the content covered.

Nature of Science

The Nature of Science (NOS) continues to be an important thread that runs through the course. Some references are made to NOS in the syllabus, but mostly, you are encouraged to provide your own examples, including drawing on topical developments.

Guiding Questions

Guiding Questions are a new feature of the syllabus, given at the start of each sub-topic. These questions are purposefully open-ended, lending themselves to increasingly detailed consideration as understanding of the topic deepens. Guiding Questions may serve as openers for a topic, teasing out students' prior knowledge, and perhaps helping to suggest a sequence of what will be covered. They could also be used as a tool for assessment, looking for increasing depth and breadth at different stages in the learning.

Linking Questions

Linking Questions are another important feature of the new course. They are given in many of the syllabus Understandings, where they show a link to a different but related sub-topic. The goal of Linking Questions is to help create enhanced understanding and a network of knowledge. The content of Linking Questions is often addressed elsewhere in the text as it sometimes encourages a 'revisiting' of material and sometimes a preview of upcoming material. Linking Questions are unlikely to be used as questions in examinations per se, but the related concepts are considered an essential part of the course

Skills in the Study of Physics

The Subject Guide includes a section titled Skills in the Study of Physics. This is not intended as a topic to be taught in isolation, but is more of a checklist of skills that students must acquire during the course. It replaces the Prescribed Practicals (or Mandatory Labs) from the 2016 curriculum. The Measurements and Uncertainties topic has been taken out of the main learning points, instead three categories are listed: | Experimental techniques | Technology | and Mathematics

The NEW DP sports, exercise, and health science (SEHS) course will be launched in February 2024 for first teaching in August 2024. First assessment will take place in May 2026.

Overview of the new course:

A relevant and effective science education needs to reflect societal change with a greater focus on skills and the interconnectedness of concepts, contexts and content, and to facilitate deep learning and student understanding. Developments have taken place to address these needs.

The SEHS curriculum explores three themes:

exercise physiology and nutrition of the human body
biomechanics
sports psychology and motor learning

Through these, SEHS students will develop long-enduring knowledge and understanding of the science at play in human physiology, biomechanics and psychology. The study of their interconnections will provide students opportunities to explore different perspectives and conceptual frameworks.

IB DP Sports, Exercise, & Health Science

NEW DP Exercise, Health Science (SEHS) Teacher Toolkit (Version 2.0)

Digital Course ISBN: 9781954760516 Price: \$99
Publisher: IBTrove

Practical tools, classroom examples, and content from IB regional workshop leaders and experienced DP SEHS teachers.

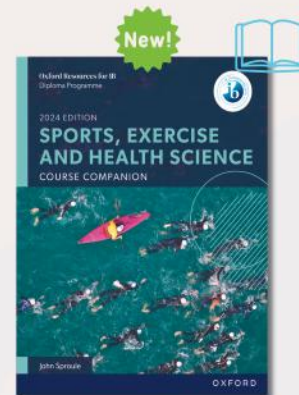

- Scope & Sequence and unit plan support to help you plan your course
- Assessment examples so you can accurately grade your students
- Classroom examples and downloadables to use in your own classroom

Easy-to-understand explanations for the core and HL topics, plus the Options to help you improve your knowledge.

65+ printable downloadable resources and informative graphics to use in your classroom and deepen your knowledge.

Student assessment samples of the EAs and the IA to help you mark your students' assessments more accurately.

Plan your scope & sequence after reviewing classroom examples from experienced DP SEHS teachers.

NEW IB DP Sports, Exercise and Health Science Course Companion (Not Yet Published March 2024)

Print ISBN: 9781382042642 Price: \$89
Publisher: Oxford University Press

Developed in cooperation with the IB and matched to the first teaching 2024 subject guide, the comprehensive Course Book and Kerboodle course offer support for key concepts, theories, and skills.

Features:

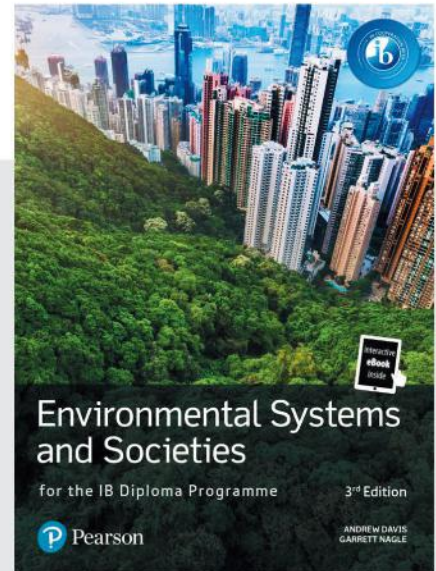

- Published in cooperation with the IB so you can be assured the content is aligned, reviewed, and approved
- Focus on both knowledge and skills with high-quality content created by an experienced IB author.
- Build interconnected knowledge of the subject through linking questions included for every topic.
- Aid learner understanding with case studies, topic summaries, self-study, and data-based questions based on the latest research
- Support students at SL and HL through clear indication of AHL content
- Encourage skills development with a dedicated ATL skills feature, as well as dedicated sections for the tools and inquiry process

New from Pearson in 2024

Pearson Environmental Systems and Societies for the IB Diploma Programme

Download
free samples

Fully revised in line with the 2024 Subject Guide, this updated third edition has been developed in cooperation with the IB to offer comprehensive curriculum coverage and assessment preparation.

- Provides full coverage of all eight topics and the Higher Level lenses.
- Self-contained real-world examples put learning into context, encouraging critical thinking and building awareness of environmental issues.
- Prepares students to achieve the best possible grades with exercises and practice questions throughout, including past-paper questions.
- Includes chapters dedicated to TOK, the Internal Assessment, the Extended Essay, and exam strategies.
- Digital resources at no extra cost.

**The NEW DP environmental systems and societies course will be launched in February 2024 for first teaching in August 2024.
First assessment will take place in May 202 DP**

Overview of the new course:

Environmental systems and societies (ESS) is an interdisciplinary course that combines a mixture of methodologies, techniques and knowledge associated with both the sciences and individuals and societies. Starting in 2024, it will be offered at both standard level (SL) and higher level (HL). ESS is a complex and contemporary course that engages students in the challenges of 21st century environmental issues. It requires students to develop a diverse set of skills, knowledge and understanding from different disciplines. Students develop a scientific approach through explorations of environmental systems. They also acquire understandings and methods from Individuals and societies in social, cultural, economic, political and ethical contexts of sustainability issues.

The interdisciplinary nature of the course means students produce a synthesis of understanding from the various topics studied. It also emphasizes the ability to perform research and investigations and to participate in philosophical, ethical and pragmatic discussions of the issues involved from the local through to the global level.

The third edition of our Environmental Systems and Societies for the IB Diploma Programme student book, fully revised in line with the 2024 Subject Guide and developed in cooperation with the IB.

- Written by experienced IB teachers and examiners.
- Complete coverage of all eight topics and the Higher Level lenses.
- Guiding Questions were identified and explored.
- Connections between concepts and topics are highlighted.
- Exercises for formative assessment and practice questions, including past paper questions, for summative assessment.
- Includes chapters dedicated to TOK, the Internal Assessment, the Extended Essay, and exam strategies to help prepare learners for their assessments.
- Tried and tested feature boxes to improve understanding and engagement including TOK, global contexts, hints for success, interesting facts, key facts, challenge questions, and weblinks.
- Skills boxes identify opportunities to demonstrate the skills required.
- Ideas for engagement activities.
- eBook resources including full answers to exercises and practice questions, downloadable activities, and auto-marked quizzes
- Links to videos

Developed in cooperation with the IB and matched to the first teaching 2024 syllabus, these inquiry-based resources offer complete coverage of the 2024 Subject Guide and motivate learners to build interconnected subject knowledge.

Features:

- Published in cooperation with the IB so you can be assured the content is aligned, reviewed, and approved
- Focus on both knowledge and skills with high-quality content created by experienced IB authors, examiners, and teachers.
- Develop a holistic view of the subject via a wealth of contemporary case studies.
- Truly engage learners with scientific concepts - the inquiry-based approach drives active exploration, investigation, and critical thought.
- Support students at HL with a dedicated chapter exploring the HL lenses in detail
- Cement the three key concepts in students' minds with a chapter on the foundations of the course
- Build student confidence with end of topic questions drawn from past exam papers

Developed in cooperation with the International Baccalaureate®

Ensure full coverage of the updated syllabus with a coursebook that implements inquiry-based and conceptually-focused teaching and learning, written by highly experienced global authors.

- Explore the three key concepts in the new course: perspectives, systems, and sustainability, which allow students to deepen their understanding and make interdisciplinary connections throughout, with HL content clearly signposted.
- Prepare students for assessment with various options: Knowledge tests, exam-style questions, top tip boxes, and hints to help avoid common mistakes.
- Interactive case studies that engage learners and guide students to analyze each component
- Integrate TOK into lessons and create opportunities for cross-curriculum study with case studies, real world examples, and up-to-date data.
- Provide plenty of practice with activities, review questions, and chapter summaries, allowing students to recap themes and test knowledge.

IB DP Design Technology

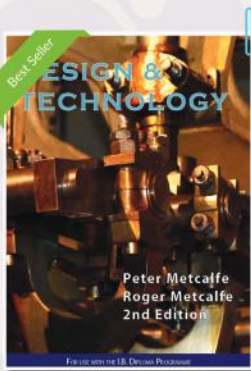

DP

Both science and technology have a fundamental relationship with design. Technology preceded science, but now most technological developments are based on scientific understanding. Traditional technology comprised useful artifacts often with little understanding of the science underpinning their production and use. In contrast, modern technology involves the application of scientific discoveries to produce useful artifacts. The application of scientific discovery to solve a problem enables designers to create new technologies and these new technologies, in turn, can impact on the rate of scientific discovery.

The aim of the DP design technology course is to foster the skill development in students required to use new and existing technologies to create new products, services and systems.

Source: IBO.org

This is the second edition of this popular text supporting students and teachers of the IB Design & Technology course (Core and AHL). Closely following the IB Design & Technology syllabus, the book contains hundreds of photographs and is extensively illustrated to enhance the understanding of key concepts. Case studies based on contemporary design innovations and historic design icons are distributed throughout. Every chapter provides references for topic specific further reading, worked examples and student review exercises in the form of sample questions. Theory of Knowledge and International Mindedness perspectives are integrated into every topic with research guides, examples and exercises provided to enhance student learning.

**The new DP global politics course will be launched in February
2024 for first teaching in August 2024.
First assessment will take place in May 2026.**

Overview of the new course

DP global politics is for students who want to understand more about how the world they live in works and what makes it change (or prevents it from changing). The course draws on a variety of disciplinary traditions in the study of politics and international relations, and more broadly on the social sciences and humanities. Students build their knowledge and understanding of the local, national, international and global dimensions of political activity and processes by critically engaging with contemporary political issues and challenges.

Pearson Global Politics for the IB Diploma Programme has been developed in cooperation with the IB to provide full coverage of the subject guide for first assessments in 2026.

The book includes the following features:

- opportunities for flexible teaching of the syllabus
- comprehensive coverage of the syllabus written by experienced IB teachers, examiners and curriculum specialists, and reviewed by the IB's subject matter experts
- full coverage of the Core, Thematic studies, the Internal Assessment Engagement Project and the HL Extension
- learning outcomes linked to the key concepts listed at the start of each chapter to help focus learners' minds
- feature boxes to add extra support, context and interest, including: TOK, hints for success, interesting facts, key facts, weblinks
- case studies with room for additional individual research
- concepts and HL themes tagged to help learners identify links between different parts of the course
- additional chapters dedicated to Paper 1, Paper 2, Paper 3, TOK and the Extended Essay
- practice questions to help prepare learners for their assessments
- eBook resources including additional teacher support and auto-marked quizzes. Links to videos.

Trust an experienced team of IB educators to help develop the key skills needed to understand global politics with a range of contemporary case studies, different perspectives on political issues provided throughout, and extensive assessment support.

- Build analytical skills with engaging content comprising of case studies and pedagogy to write them.
- Improve performance with knowledge-checking quizzes at the end of each chapter, along with essay writing and exam guidance that includes case studies that can be deployed as examples and evidence for Paper 2 responses.
- Engage students with interactive knowledge tests and case studies provided in the Boost eBook.
- Build inquiry skills through class discussion questions that foster intercultural understanding, open-mindedness and respect.
- Integrate Theory of Knowledge into your lessons with TOK links and Inquiries, written by our bestselling TOK author John Sprague, that provide real-world examples, case studies, and questions.
- Develop ATL skills with a range of engaging activities.

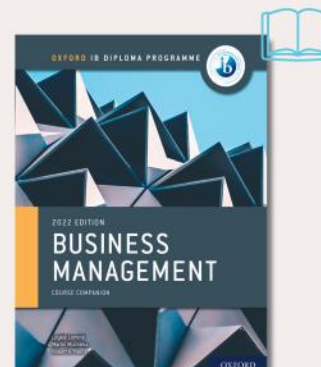

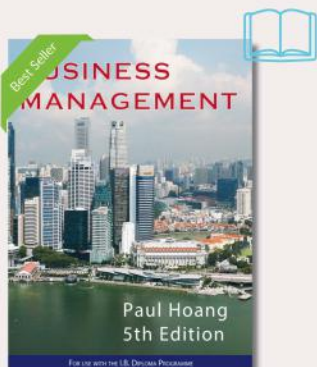

IB DP Business Management

The business management course is designed to develop students' knowledge and understanding of business management theories, as well as their ability to apply a range of tools and techniques. Students learn to analyse, discuss and evaluate business activities at local, national and international levels. The course covers a range of organizations from all sectors, as well as the socio-cultural and economic contexts in which those organizations operate.

IB DP Economics

DP

Economics is an exciting, dynamic subject that allows students to develop an understanding of the complexities and interdependence of economic activities in a rapidly changing world. At the heart of economic theory is the problem of scarcity. While the world's population has unlimited needs and wants, there are limited resources to satisfy these needs and wants. As a result of this scarcity, choices have to be made. The DP economics course, at both SL and HL, uses economic theories to examine the ways in which these choices are made.

IB DP Psychology

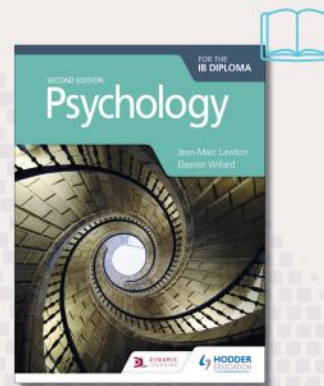

DP

The IB Diploma Programme psychology course is the systematic study of behaviour and mental processes. Since the psychology course examines the interaction of biological, cognitive and sociocultural influences on human behaviour, it is well placed in group 3, individuals and societies. Students undertaking the course can expect to develop an understanding of how psychological knowledge is generated, developed and applied. This will allow them to have a greater understanding of themselves and appreciate the diversity of human behaviour. Source: IBO.org

IB DP History

DP

The Diploma Programme (DP) history course is a world history course based on a comparative, multi-perspective approach to history and focused around key historical concepts such as change, causation and significance. It involves the study of a variety of types of history, including political, economic, social and cultural, encouraging students to think historically and to develop historical skills. In this way, the course involves a challenging and demanding critical exploration of the past.

The DP history course requires students to study and compare examples from different regions of the world, helping to foster international mindedness. Source: IBO.org

IB DP Geography

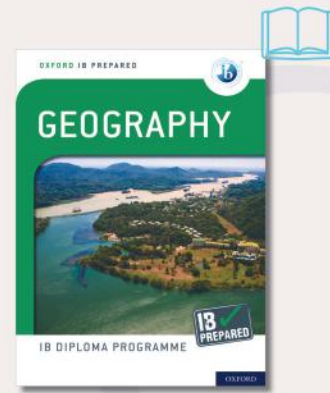

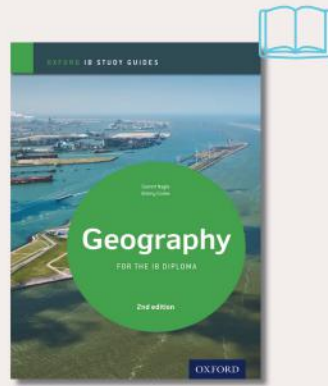

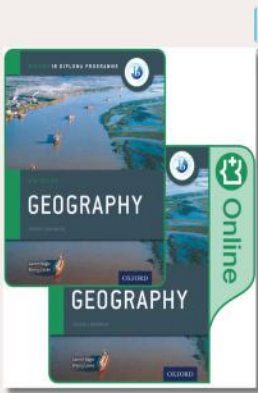

DP

Geography takes advantage of its position to examine relevant concepts and ideas from a wide variety of disciplines. This helps students develop an appreciation of, and a respect for, alternative approaches, viewpoints and ideas.

The geography course embodies global and international awareness in several distinct ways. It examines key global issues, such as poverty, sustainability and climate change. It considers examples and detailed case studies at a variety of scales, from local to regional, national and international.

Developed in cooperation with
the IB for first teaching 2024

Publishing
February
2024

DP Environmental Systems and Societies

These inquiry-based resources motivate learners to build interconnected subject knowledge.

- Develop a holistic view of the subject via a wealth of contemporary case studies
- Support students at HL with a dedicated chapter exploring the HL lenses in detail
- Build student confidence with end of topic questions drawn from past exam papers

DP Sports, Exercise and Health Science

These resources offer support for key concepts, theories and skills.

- Aid learner understanding with case studies, topic summaries, self study, and data-based questions
- Support students at SL and HL through clear indication of AHL content
- Encourage skills development with a dedicated ATL skills feature, as well as sections for the tools and inquiry process

DP Global Politics

These resources cement critical understanding of big picture issues and solutions.

- Nurture outward-looking, reflective learners with student-friendly explanations of key concepts, international case studies, and TOK links
- Engage students with a regularly updated digital bank of relevant and topical case studies
- Prepare learners for assessment with exam-style practice questions and opportunities to hone ATL skills

All 2024 editions available on kerboodle

- Support independent learning anywhere with mobile and offline access to digital Course Books
- Enhance student engagement with activities and auto-marked quizzes
- Boost performance and exam confidence with assessment materials
- Help deliver responsive teaching underpinned by in-depth reports

IB DP Mathematics Applications & Interpretation

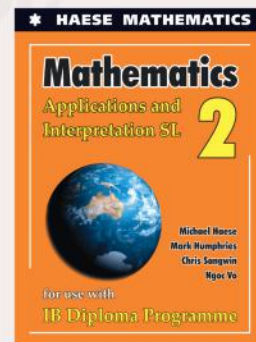

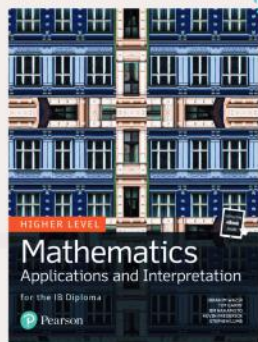

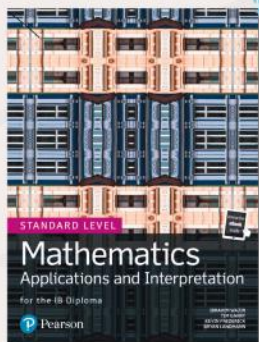

DP

From August 2019 the following courses, with first assessment in May 2021, are available:

- Mathematics: analysis and approaches SL
- Mathematics: analysis and approaches HL
- Mathematics: applications and interpretation SL
- Mathematics: applications and interpretation HL

Students can only study one course in mathematics as part of their diploma.

IB DP CAS and Extended Essay

DP

What do CAS projects involve?

CAS requires students to take part in a range of experiences and at least one project. These should involve:

- real, purposeful activities, with significant outcomes
- personal challenge
- thoughtful consideration, such as planning, reviewing progress, reporting
- reflection on outcomes and personal learning

All students should be involved in activities they've initiated themselves. IB World Schools will then suggest particular projects.

Source: IBO.org

Creativity, Activity, Service (CAS) for the IB Diploma Coursebook with Digital Access (2 Years)

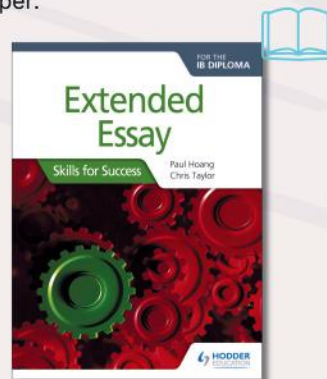

Print+E-Book ISBN: 9781009191586 Price: \$35
Publisher: Cambridge University Press

The extended essay is a required component of the International Baccalaureate® (IB) Diploma Programme (DP). It is an independent piece of research, culminating with a 4,000-word paper.

IB-endorsed resources from Pearson

Pearson Sciences for the IB Diploma Programme

Fully revised in line with the new 2023 Subject Guides for first assessments in 2025, separate Standard Level and Higher Level print and digital student books, developed in cooperation with the IB, ensure every student has the right content for their learning journey, at the right time.

Perfectly
matched to the
2023 Subject
Guides

- A consistent approach to each subject makes it easy for students taking more than one science.
- Dedicated chapters are included for Skills, Internal Assessment, TOK and the Extended Essay.
- Separate downloadable lab PDFs offer full coverage of experimental skills to support the hands-on approach embedded in the IB DP programme.
- Access all interactive features and extra digital resources at no extra cost.

IB DP English B and IB DP Mandarin B

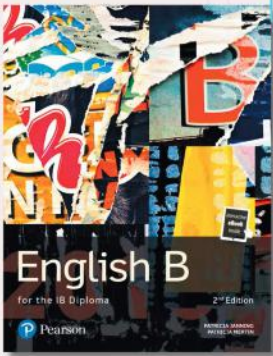

English B

Mandarin B

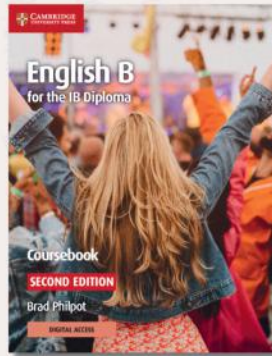

The distinction between language B SL and HL can be seen in the number of recommended teaching hours, the level of competency the student is expected to develop in receptive, productive and interactive skills, and that HL students are required to study two literary works originally written in the target language. Students develop the ability to communicate in the target language through the study of language, themes and texts. In doing so, they also develop conceptual understandings of how language works. Communication is evidenced through receptive, productive and interactive skills across a range of contexts and purposes that are appropriate to the level of the course (and beyond those for language ab initio). IB DP Language A: Literature

DP

The language A: literature course introduces students to the analysis of literary texts. The course is organized into three areas of exploration and seven central concepts, and focuses on the study of literary works. Together, the three areas of exploration of the course add up to a comprehensive exploration of literature from a variety of cultures, literary forms and periods. Students learn to appreciate the artistry of literature, and develop the ability to reflect critically on their reading, presenting literary analysis powerfully through both oral and written communication.

Computer Science

DP

Core Computer Science: For the IB Diploma Program

Print ISBN: 9781471542091 Price: \$45

Publisher: Express Publishing

Core Computer Science: For the IB Diploma Program is an educational resource for all students who need to understand the core themes of Computer Science. The book references the assessment statements in the 2014 IB Computer Science subject guide, while remaining flexible enough to be used in any educational setting, including programming courses.

The book comprehensively presents all core Computer Science aspects in plain English, allowing native and non-native English language users to gain the maximum benefit.

Features include:

- Plain English language
- Diagrams and illustrations for key concepts
- More than 200 examination-style questions with answers
- Use of flowcharts, pseudo-code, as well as the creation of actual working code in the Java Programming Language
- References to the assessment statements in the IB Computer Science subject guide

This book allows both students and teachers to follow the wide-ranging IB Computer Science syllabus, confident that all aspects of theory and practice have been covered.

Advanced Computer Science for the IB Diploma Program is a new educational resource for all students who need to understand the High Level topics of Computer Science. This book references all the assessment statements in the 2014 IB Computer Science subject guide while remaining flexible enough to be used in any educational setting, including programming courses of moderate to advanced difficulty.

The book uses plain English allowing native and non-native young learners to master the IB computer science High Level course. Advanced Computer Science for the IB Diploma Program builds upon the successful Core Computer Science book and facilitates High-Level students to master the necessary topics.

- Diagrams and illustrations for key concepts
- Examination-style questions with answers for all topics
- Use of IB style pseudocode, as well as actual working code in the Java Programming
- Language
- A complete and efficient working Java solution that addresses a real-life scenario

IB MIDDLE YEARS

IB MYP Individuals & Societies

A concept-driven and assessment-focused approach to Individuals and Societies teaching and learning.

- Approaches each chapter with statements of inquiry, framed by key and related concepts, set in a global context
- Supports every aspect of assessment using tasks designed by an experienced MYP educator
- Differentiates and extends learning with research projects and interdisciplinary opportunities
- Applies global contexts in meaningful ways to offer an MYP Individuals and Societies programme with an internationally-minded perspective.

IB MYP Language & Literature

Middle Years Programme (MYP) language and literature courses develop skills in six areas:
The six skill areas are:

- Listening.
- Speaking.
- Reading.
- Writing.
- Viewing.
- Presenting.

Inquiry is at the heart of MYP language learning, and aims to support students' understanding by providing them with opportunities to independently and collaboratively investigate, take action and reflect on their learning.

MYP

Drive achievement in the MYP and strengthen scientific confidence. Equipping learners with the confident scientific understanding central to progression through the MYP Sciences, this text is fully matched to the Next Chapter curriculum. The inquiry-based structure immerses learners in a concept-based approach, strengthening performance.

Features

- Develop comprehensive scientific knowledge underpinned by rich conceptual awareness, equipping learners with the confidence to handle new ideas
- Fully integrate a concept-based approach with an inquiry-based structure that drives independent thinking
- Build flexibility interwoven global contexts enable big picture understanding and ensure students can apply learning to new areas
- Fully mapped to the Next Chapter curriculum and supports the Common Core
- Strengthen potential in the MYP eAssessment and prepare learners for confident progression into MYP Years 4 and 5

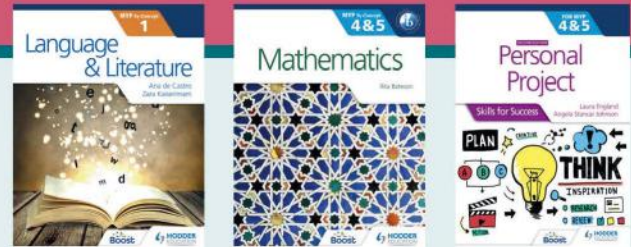

Elevate your IB Curriculum with Hodder Education's innovative resources

Primary Years Programme

Implement the PYP with flexible inquiry-based resources.

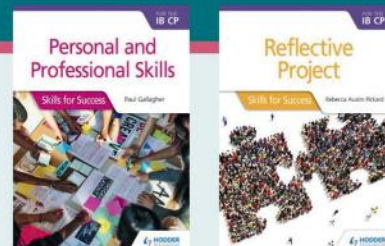

Middle Years Programme 1-5

Drive meaningful inquiry through unique concept-driven narratives and support every aspect of assessment.

Diploma Programme

Resources written by top international educators to match the latest IB Diploma guides.

Career-related Programme

Develop critical skills for the workplace and ongoing career development.

WHAT OUR TEACHERS SAY...

"Hodder Education is making our lives so much easier! Your books and Teaching & Learning Resources are one of the best investments we ever made in our implementation of the MYP."
Gabriela Deambrosio, Monterey High School, California, USA

Includes selected DP coursebooks and MYP by Concept 4&5 titles developed in cooperation with the International Baccalaureate. Look out for the co-published logo on our covers.

A new Student Book developed in cooperation with the IB to provide full coverage of the new 2024 Subject Guide for first assessments in 2026.

- Expands on the expertise and support already offered by the popular Global Politics Essentials Guide in a complete textbook.
- Matched to the syllabus outline with full coverage of the Core, Thematic studies, the Internal Assessment Engagement Project, and the Higher Level (HL) Extension.
- Dedicated chapters on Paper 1, Paper 2, Paper 3, TOK and the Extended Essay, as well as past-paper questions and answers.
- Cases give specific real-world examples to help learners make connections with the practical application of global politics issues.
- Digital resources at no extra cost.

IB PYP Resources

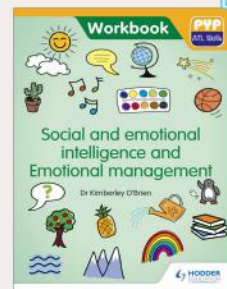

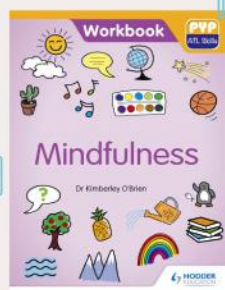

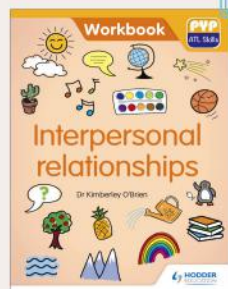

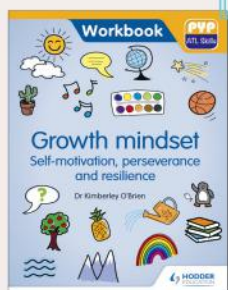

The PYP encourages students to learn to appreciate knowledge, conceptual understandings, skills and personal attributes as a connected whole.

Each school collaboratively develops a programme of inquiry to reflect the unique aspects of that school's community. The programme of inquiry is organized and framed by six transdisciplinary themes:

- Who we are.
- Where we are in place and time.
- How we express ourselves.
- How the world works.
- How we organize ourselves.
- Sharing the planet.

IB WELLBEING AND MINDFULNESS JOURNALS

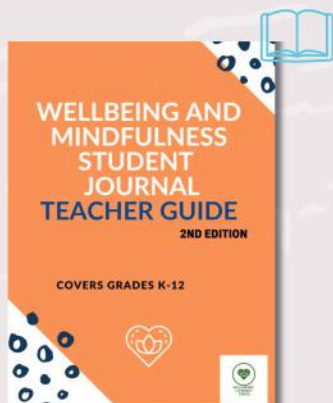

Wellbeing and Mindfulness Journals

Use these colorful Wellbeing workbooks to help your students learn more about wellbeing and social-emotional topics. The goal of Wellbeing Journals is to support the whole child: students' mental, emotional, social, and physical health by focusing on a theme each week.

These thoughtfully sequenced journals start with teaching students how to create their wellbeing, then progress to doing activities to grow their wellbeing both personally and academically, and end with developing abilities and skills to extend their wellbeing.

Each journal includes a weekly theme that ties into the activities for that week, so students have the opportunity to practice using what they are learning.

Using this Planner

What training does a teacher need to use this planner?

This SEL planner is classroom-ready and requires no SEL training on the teacher's part.

If teachers are interested in getting more SEL training, we have SEL Workshop Toolkits [here](#).

How long is each lesson?

Lessons take about 10-15 minutes to complete. Each lesson also includes extension activities that are optional.

Lessons are designed to flow easily into busy school days and easily integrate into busy teacher's schedules.

How do my students use this planner?

Lessons can be completed during class time individually, in small groups, or as a class. They are also designed to be done at home with minimal parent/guardian support.

Students learn all 5 CASEL competencies including:

- **Self-awareness** through songs, art, and physical activity that teach emotional vocabulary and growth mindset.
- **Self-management** with an emphasis on learning tools to listen to your body and breath before making decisions.
- **Responsible decision-making** by practicing how they would respond with relevant examples and social stories.
- **Relationship skills** through acting, reading, and art activities that support the beginnings of building and maintaining friendships.
- **Social awareness** with an emphasis on recognizing differences in others and accepting these differences, and empathy.
- **Key settings** are supported through a home-school connection in the learning log.

All lessons are accessible and appropriate for a range of diverse learners in a multitude of school settings.

No teacher preparation is required to use these SEL planners!

DP AND MYP TEACHER TOOLKITS
