## P R O D U C T S

### EXPERIENCE

Sunlight Products has been in business for more than 40 years and during that time we have earned a reputation for excellence and professionalism.

Our expert team is highly trained, their focus is always to customise a solution that meets your needs and to make your experience seamless and hassle-free.

### MADE TO MEASURE

Attention to detail is the key, which is why all products are made to measure to your exact measurements, ensuring the right fit every time.

### ENVIRONMENT

Sunlight Products believe responsible environmental management is a non-negotiable by endeavouring to use sustainably sourced materials where possible.

### MANUFACTURED LOCALLY

We are committed to producing quality made products, manufacturing and assembling many of our products in our factory in Prospect NSW.

In addition to supporting local suppliers and employment, this also enables us to control quality and deliver only the best to our customers.

### CHILD SAFETY

We are parents ourselves, so we know how important it is to keep your children safe. That is why all our blinds come with a choice of child-safe operating systems that are designed to ensure there are no choking or strangling hazards.

### COMPONENTS

We can accommodate all your own manufacturing needs through our network of suppliers, allowing us to offer a wide range of components and fabrics at a very competitive price within the market.

# ROLLER BLINDS

## SIMPLE & STYLISH

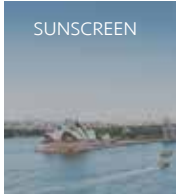

Roller blinds give your home a clean, modern appearance. At the same time, they're one of the most practical solutions for managing light, heat, cold and privacy. They are especially useful if you don't have much space.

This product has many practical options which allow them to be one of the most versatile blinds in the market.

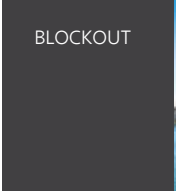

A quality range of fabric to choose from covering most needs, with many patterns and texture that will suit most décor or more practical fabrics that are soil and stain resistant and can be simply wiped clean.

Fabric also comes in different opacity which giving you control on how much light and privacy you are after. See note beside on what each type offers.

## FABRIC OPACITY

<p>SUNSCREEN</p> 		<p>Control heat and light without losing your view, and increase night-time privacy by layering with blackout fabrics.</p>
---	---	--

<p>LIGHT FILTERING</p> 		<p>Use Light filtering fabrics to filter out the sunlight whilst maintaining day and night time privacy. Light filtering fabrics do not allow a clear view through but bring textures</p>
---	---	---

<p>BLOCKOUT</p> 		<p>When privacy is your goal, blackout fabrics are the answer. Night or day, they'll keep prying eyes out, and they'll also help you insulate your room.</p>
--	---	--

Motorised blinds add a level of ease and convenience with the touch of a single button. Your entire home can be synced to a single remote control to open and close your interior blinds. There are other benefits that come with having automatic blinds beyond just the comfort.

## WHY SHOULD YOU CONSIDER MOTORISED BLINDS?

**Convenience :** With the simple touch of a button, you can move your blind to a position you like. You can also add sensors and timers so your products work for you even when you're not at home.

**Energy efficiency :** Reduce your energy usage by controlling the amount of heat and light entering your home.

**Safety :** The cords and chains are completely removed, providing a safer environment for your kids.

## ROLLER OPTIONS

- Remote Control (Hardwired & Rechargeable Battery) Switch Operated
- Bracket Options: Single, Extension, Double, Linked, Double Linked.
- Finishes : Bottom Rails in various styles and the older style valance shaped bottoms

**VERTICAL BLINDS**

## MAKE IT VERSATILE

For the perfect blend of privacy, light control and style, take a look at our range of Vertical blinds. The crisp, sleek simplicity and modern lines of Vertical blinds from Sunlight Products will complement any decorating style. Choose from our extensive range of durable, low maintenance fabrics in exciting new-season colours, textures and patterns.

Made to measure, Vertical blinds are a great choice for controlling the direction and amount of light coming into your home.

Vertical Blind can be set to stack different ways to make sure they work with most door or window setups. Options are Centre Stack, Split Stack, Left, Right with either Wand or Chain Control.

- Economical solution for large windows, particularly sliding doors
- Can be made to fit sloping windows
- Range of blade widths available – 89mm & 127mm
- Match your drapes with a coordinated pelmet, with or without a fabric insert

## BOTTOM WEIGHT OPTIONS

CHAINLESS BOTTOM WEIGHTS

CHAINED BOTTOM WEIGHTS

SEWN IN ALL SIDES BOTTOM WEIGHTS (OPTIONAL EXTRA)

## ALUMINIUM VENETIAN

Available in both 25mm & 50mm these blinds are durable, efficient and economical while still being decorative. With a choice of popular colours this product would suit most applications.

## WOODEN VENETIAN

Wooden Venetian blinds are a popular choice for their natural insulation, which helps manage Australian temperatures, leading to lower energy costs. With the choice of 50mm or 63mm slat they offer exceptional light management, privacy and a timeless aesthetic warmth to homes.

## MOCKWOOD VENETIAN

Mockwood Venetians give you a beautiful organic appearance with low-maintenance convenience. Available in both 50mm and 63mm slat and manufactured using PVC these blinds are water-resistant, durable and easy clean.

## CURTAIN COLLECTION

Curtains are the perfect choice for creating an evocative space that can provide movement and flow into any room.

The options are limited only by the mood you want to create to complete your home. A sheer to soften the look, an uncoated fabric to add texture and body. Blackout or lined for a more dramatic formal effect.

We offer a wide variety of fabric choices from Australian and overseas suppliers

Our relationship with Wilson & Basfords allows us to offer a coordinating story with your drapery and blinds having matching fabrics.

# PANEL BLINDS

©Uniline Australia 2016

## KEEP IT PRACTICAL

Designed as a modern alternative to vertical blinds, the panel glide blind is an innovative shading solution for larger windows and patio doors. Choose your preferred panel size - from 400mm right up to 1,000mm, they can be free-floating or connected, and can stack left or right when opening (or both).

- Can be used as a room divider
- One-way draw or centre-open
- 3, 4 and 5 channel track options, and up to 9 individual panels
- Velcro allows for ease of fabric attachment & detachment
- Fabric panels easily changed to keep room décor current

© Veri Shades

Veri Shades® are a window furnishings range that combines the sophisticated elegance, softness and style of curtains with the versatility of blinds.

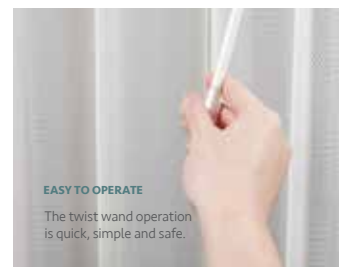

The unique patented design is made from a soft, yet durable fabric that hangs luxuriously like curtains, while the supple folds operate like blinds to provide privacy, superior light and airflow control.

There are no weights or chains to worry about, so you can walk through Veri Shades freely – whether they're open or closed.

Their versatility, functionality, durability, easy care low maintenance and chic classy styling make them perfect for any home or office environment. The two sided individual folds transition from translucent to opaque at the simple turn of a wand.

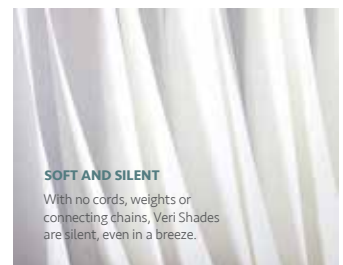

Veri Shades® are child and pet safe and are available in a variety of high quality, stylish fabrics, colours and sizes to suit any space or décor.

Talk to your Veri Shades expert today and enjoy a better way of living, the Veri Shades way!

**EASY TO OPERATE**

The twist wand operation is quick, simple and safe.

**SOFT AND SILENT**

With no cords, weights or connecting chains, Veri Shades are silent, even in a breeze.

**FUNCTIONALITY**

The unique patented design allows the ability to have translucent or opaque fabric at the turn of a wand.

# CELLULAR BLINDS

## EFFORTLESSLY BEAUTIFUL

Cellular Blinds are comprised of a distinctive honeycomb design that capture pockets of air. These pockets of air reduce noise and also provide insulation, helping you keep your home warm in winter and cool in summer, reducing your bills.

- Available in single cell and double cell
- Top-down bottom-up
- Day and Night
- Cordless
- Motorised
- Skylight
- Vertical

## BE IN CONTROL

Cleverly designed to operate much like a roller blind, Lumens are simple to use, and because their fabric combines translucent and opaque horizontal strips, layered at the window, you gain better control over the balance of light and privacy.

Each blind comes with a control cord that moves individual translucent and opaque strips past each other. The more translucent strips you leave exposed, the more filtered light you let in. It's a revolutionary design that

makes Lumen blinds perfect for letting in the light you want without compromising on privacy.

- Contemporary design provides a striking look
- Stunning alternative to the classic venetian or roller blind
- Combines opaque and translucent fabrics
- Available in a beautiful range of fashion shades

# SUNLIGHT SHUTTERS

## PVC

PVC shutters are a versatile solution, ideal for a wide range of applications—including most interior spaces and high-moisture areas such as kitchens and bathrooms.

They beautifully designed while delivering a clean, modern aesthetic combined with everyday practicality.

Our PVC range includes two premium options:

A trusted PVC shutter featuring aluminium core louvres, specifically designed to perform in demanding Australian conditions.

## *EVOLVE*<sup>®</sup> PVC SHUTTERS

An advanced engineered PVC with built-in thermal pockets. Lightweight and highly efficient in temperature conduction, Evolve provides outstanding value, helping you stay competitive while maintaining strong margins.

## WOOD SHUTTERS

Crafted from natural timber, our wood shutters showcase the beauty and character of premium materials.

Each timber is carefully selected for its durability, warmth, unique grain pattern, and rich colour, ensuring a timeless finish that enhances any interior.

Our wood shutters are responsibly sourced and available in an extensive range of contemporary paint colours and stains—perfect for adding elegance, charm, and long-term value to your home.

## ALUMINIUM

Engineered for strength and style, our aluminium shutters are manufactured to the highest quality standards.

Designed as a modern plantation shutter solution, they are ideal for exterior living spaces, combining sleek aesthetics with exceptional functionality.

Highly durable and virtually maintenance-free, aluminium shutters are built to withstand harsh environmental conditions while elevating the look of your home, office, or commercial space.

Perfect for a variety of installations, including:

- Patios
- Verandas
- Alfresco areas
- Balconies

Awnings provide vital protection from Australia's harsh UV rays and allows us to make the most of our outdoor living, reducing indoor temperature and enhancing the aesthetic value of our homes or commercial properties.

They come in many styles and fabrics so that you can find the right awning for your home and needs.

## TRADITIONAL AWNING

These are a practical exterior addition to your home design to block solar heat and UV ray before they reach the glass. Available in Canvas, Acrylics and Screen fabric options

## FOLDING ARM

Folding Arm Awnings are retractable shading system that extend horizontally using spring-loaded arms that do not require post or support. Ideal for decks or patio or any space that requires a unobstructed floor space. Available in Acrylic or screen fabric options

## STRAIGHT DROP

Straight Drop Awnings are designed to fall from a top roller, providing sun, wind and privacy protection for Patios, Balconies and Windows. available in Canvas, Acrylic or Screen Fabric

## MOTORISATION

Most awnings can be motorised and operated easily with a remote control, tablet or smartphone, adding comfort and convenience to your outdoor living. For added comfort consider adding sensors, the sun sensor that will lower your awnings automatically to keep your living room cool and for peace of mind when you're away a wind sensor will automatically retract your awning when the wind picks up to protect your system.

# TRADITIONAL AWNINGS

## CONVERTIBLE AWNINGS

This is the most popular type of Awning due to its versatility. Convertible awnings are suitable for both ground floor and upper level applications and can be operated externally with rope, tape, winch or internally with a taped cordlock or a smaller winch.

Optional hoods are available in a selection of colours to protect the fabric when retracted.

Florentine Awnings are based on the convertible awning and have guide rails connected flush to the wall. Ideal for doorways and balconies, the pivot arms are designed to allow more clearance under the awning.

## AUTOMATIC AWNINGS

Automatic awnings are hand operated with self-locking arms that slide along vertical rails. Great for all exterior uses, especially covering windows and doors, these awnings can include a headbox to protect the roller mechanism and the fabric from harsh weather. Automatic awnings come in a number of different fabrics including sunscreen, canvas and acrylic.

## PIVOT ARM AWNINGS

System 2000 Pivot Arm Awnings are ideal for shading a huge variety of windows. Pivot Arm Awnings will shade the window yet allow the air to flow around it, making them ideal for those hard to reach windows. They can be operated internally or externally via cord lock, winch or motor.

Among our most popular pivot arm awnings are the Robusta Pivot Arm Awnings. These are designed for high wind areas or larger windows and can be operated using a motor or a crank, both internally and externally.

## STRAIGHT DROP AWNINGS

Straight Drop awnings drop down at a right angle to the ground, providing shade for outdoor areas including windows, decks and patios. These awnings are very versatile and come in a range of different fabrics.

We supply straight drop blinds in a number of styles:

### CHANNEL GUIDE MULTI STOP

Their spring tension system makes these Awnings easy to operate by hand and with no gaps or messy cords you can achieve a wonderfully clean look. The bottom bar is spring loaded and locks into position at any point when it is turned and released.

### GEARBOX OPERATED

A good value for money option, gearbox operated blinds work with a crank handle that is hooked into the gearbox to wind the awning up and down. Because they have no cords they enjoy a clean finish while still being as easy to operate as a roller blind.

## ZIP-STYLE AWINGS

Zip-style awnings (also known as zip track blinds or side-retention system) are modern outdoor shading solutions where the fabric is securely locked into the vertical side channel using a zipper or spline.

Creating a gap free seal preventing flapping in the wind and more protection from insects, rain and debris.

### WIRE GUIDE

Also known as stainless steel wire guide awnings, the wire guide lets the awnings move up and down easily and with a very close fit. These are very popular due to their ease of use, versatility and sleek modern appearance. Cables are 316 marine grade, making them ideal for coastal locations. These Awnings are usually crank operated but they can be motorised for extra convenience.

### CORD AND REEL

Available in all fabric types, these awnings are very popular, especially for verandahs and pergolas.

## FOLDING ARM

Folding Arm Awnings are the perfect solution for providing continuous shade and protection from the sun's harmful rays. These retractable systems are ideal for large areas such as deck and outdoor entertaining areas.

These awnings are available as Standard (open style), semi or full cassette. The semi and full cassettes conceal the mechanism inside the headbox when retracted. Standard operation is by crank (gear operation) or the awning can be motorised and linked with optional sun and wind sensors.

## DOORS

Finding the right balance between appearance and performance is not always easy. At Sunlight Products we offer a range of designs that ensure the needs of the home are met.

Our doors are made up of an aluminium frame combined with a screen and can be broken up into 3 categories

### SCREEN PRODUCTS

Primary function is to exclude insects, they provide no resistance to potential break in or burglary

### SAFETY (BARRIER) PRODUCTS

These products are manufactured in a manner which provides excellent 'occupied safety', but do not comply with the requirement to be classified as security rated.

Mesh can be supplied as either fibreglass, Pawproof, Aluminium, Stainless Steel, Mesh and a 0.7 Stainless Steel Rigid Mesh

### SECURITY PRODUCTS

These products are manufactured in a manner that is suitable for Security rated requirements.

All components and assembly procedures have also been tested and have passed the requirements for Australian Standard AS5039-2008 and AS5041-2003

## BASIC (FLYSCREEN) DOOR & FLYSCREEN

These door and screens are designed to allow fresh air and natural light into a home while keeping insects and debris out. Doors are supplied with a non keyed latch.

### OPTION AVAILABLE

- Optional Mesh - Pawproof, Aluminium, Stainless Steel
- Doggie Door - Available in 3 size
- Single Lock
- Triple Lock
- Closer & Bugseal

## SAFETY DOOR & GRILLES

### HEAVY DUTY DIAMOND GRILLE

This safety product is supplied with a fibreglass mesh and a 0.7mm Stainless Steel Diamond shaped grill and a keyable lock, it is useful as a visual deterrent at a more budget conscious price point.

Available in a range of popular colours for both the grille and frame but can be powder-coated to suit any decor.

### ULTRA BARRIER

Manufactured with 0.7mm 304 stainless steel mesh and a single keyable lock, it provides peace of mind and keeps the bugs out while still letting the cool breeze in. This door has the added benefit of looking like a security door without the extra cost.

### OPTIONAL EXTRA

- Doggie Door
- Triple Lock
- Other Mesh type - Diamond Grille only

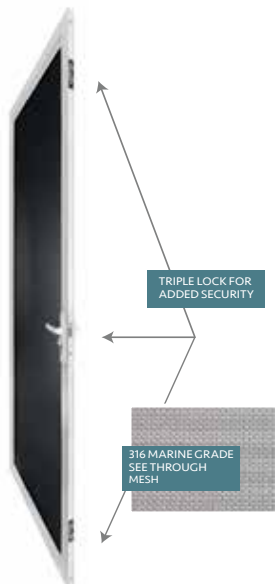

## SECURITY DOORS

Our security doors combine sophisticated technology, disciplined manufacturing, unmatched quality and attractive design, giving you the ultimate security, style and peace of mind. Constructed with a heavyweight extruded aluminium frame, high -strength marine grade 316 stainless steel mesh and a 3 way locking system, ensuring maximum protection of your property and family. When buying this type of product security would be your chief concern which is why it has been rigorously tested to ensure that it meets all relevant Australian and Industry Standards and has passed the following tests.

- Dynamic Impact Test
- Lock and Hinge Lever Test
- Knife Shear Test
- Fire Test
