# Company history

IT ALL STARTED BACK IN 1994...

1994	June	Entered the DJ equipment business as one of Pioneer Corporation's businesses
2013	Aug.	Announced entry into professional audio equipment business
2014	Oct.	Started offering KUVU, a club culture entertainment service, as one of the related services businesses
2015	Mar.	Independent from Pioneer Corporation as "Pioneer DJ Corporation" through a stock split Head Office established in the former Kawasaki Head Office of Pioneer Corporation
	Nov.	Head office moved to the current location of Yokohama City.
2016	Aug.	Announced entry into the music production business
2019	Oct.	Opened Pioneer DJ Yokohama DJ Lab, a DJ school in Yokohama City, as one of the related services businesses
2020	Jan.	Company name changed from Pioneer DJ Corporation to Alpha Theta Corporation

## DJ Equipment/Application

Since we launched the world's first flat-top CD DJ player in 1994, the CDJ-500, we've worked tirelessly to fulfill our motto of providing "surprise and excitement" to our customers.

In recent years, we've aimed to further improve our customers' experiences by providing integrated value through a combination of hardware and software applications, including subscription services. This has drawn high praise for us from numerous DJs and partners around the globe. Also, with the increasing number of people who've started DJing at home as a hobby, we're striving to provide a range of products for people of all ages and skill levels.

We'll continue to innovate and contribute to a world where more customers can enjoy a lifetime of music through DJing.

## Audio equipment

In 2002 we launched the HDJ-1000, our first model of DJ headphones. In 2011, we launched the SDJ Series of monitor speakers, and this product range - developed with the constant pursuit of maximizing the creativity and performance of DJs - is still favored by many customers around the world.

In 2013, we launched the XY Series of professional PA/SR speakers, contributing to our creation of a complete entertainment space that goes beyond DJ equipment. We will continue our efforts to offer new value that meets customer need through high-quality sound and technology.

## Music production equipment

Based on the brand concept of "Inspiration Tools, where new sounds are generated one after another", in 2016 we released the "SP-16" stand-alone sampler, the monophonic analog synthesizer "AS-1", the multi-track sequencer "SQUID" as well as the "TORAIZ" series with an intuitive workflow and high performance, which is widely used not only for music production in studios, but also for live performances.

In addition, we will strive to create new values that are unique to Alpha Theta and resonate with the sensibilities of artists.

# Business Overview

**Music production equipment**  
Based on the brand concept of "Inspiration Tools, where new sounds are generated one after another", in 2016 we released the "SP-16" stand-alone sampler, the monophonic analog synthesizer "AS-1", the multi-track sequencer "SQUID" as well as the "TORAIZ" series with an intuitive workflow and high performance, which is widely used not only for music production in studios, but also for live performances.

**Digital Audio Analysis and Processing Technologies**  
Waveform display for detailed understanding of songs and smooth mixing  
DJs make their mixes sound smooth and exciting by understanding the composition of the songs they play. Analysis technology quickly analyzes the music and displays crucial information for DJs in a waveform – a visual format that's easy to understand. Digital audio processing technology makes mixing songs easier, even when they have vastly different tempos and keys.

**High-Quality Sound Technology**  
Club sound that knows the scenes  
Ever since the introduction of our first DJ mixer in 1995, our unique design knowledge has enabled us to achieve tight low-frequency, realistic mid-range, and high-resolution high-frequency audio ranges. We often conduct field tests at the world's top venues to help us create a club sound that evokes a sense of euphoria.

# CDJ-3000

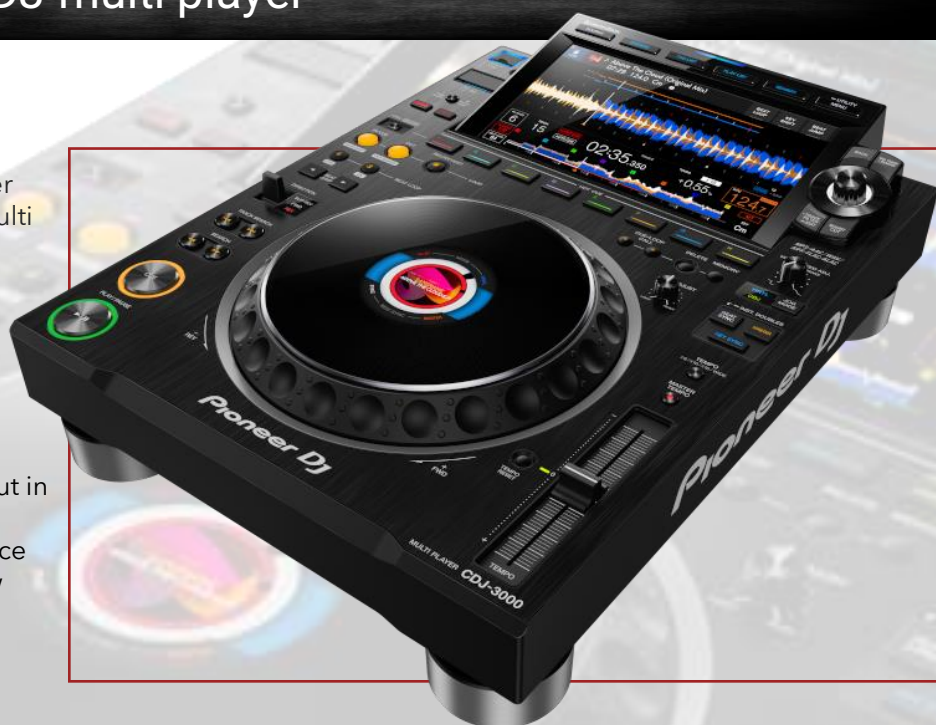

PLAYER

Professional DJ multi player

## A New Dimension

Enhance your creative power with our evolved flagship multi player, the CDJ-3000. This robust unit is powered by a new MPU and packed with specially developed high-quality components and innovative features.

The MPU (micro-processing unit) is the first we've ever put in a CDJ. It drives the unit, delivering stable performance and enabling advanced new features, and creates a smoother overall DJ experience.

## Enhanced performance and rock-solid stability

Have faith in the decks. As well as expanded creative options, the CDJ-3000 brings even more stability and reliability to your setup.

## Enhanced audio design

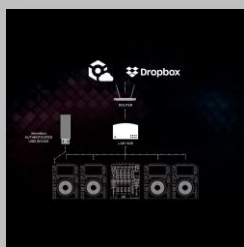

We've poured more than 25 years' worth of experience into creating the ultimate DJ sound, which faithfully reproduces the audio of each track as the producer intended it to be heard while also reflecting the most intricate details of your performance.

## 9-inch, high-resolution touch screen

With its bigger and clearer touch screen, we've added extra info, shortcuts, and buttons for useful features such as Playlist and Search. Customize the info you want, set your own preferences and swipe to navigate. The improved workflow makes track browsing easier.

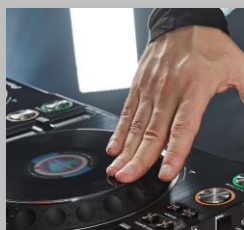

## Key Sync and Key Shift

Hit the Key Sync button and the CDJ-3000 will automatically adjust the key of the next track to match the one on the master deck, helping you craft a smooth and harmonic mix. With Key Shift on the touch screen, you can manually shift the key of a track up or down.

### Compatible with rekordbox CloudDirectPlay

Simply connect the CDJ-3000 to the internet via a Pro DJ Link connection with a LAN cable to start using rekordbox CloudDirectPlay. In advance, you'll export an authentication key from rekordbox to a USB storage device which, when plugged into the CDJ-3000, enables you to browse and play all the tracks in your cloud-based library.

### Our smoothest-ever jog wheel

Effortlessly scratch and smoothly bend the pitch of tracks. We've redesigned the jog wheel so it feels slicker than ever, with a reduced touch latency. The LCD screen in the center shows playhead position and artwork for a quick visual reminder of loaded tracks.

### Rebuilt range-leading performance interface

Get hands-on with the redesigned controls and new features of the CDJ-3000 - all arranged in a way that lets you play the CDJ like it's a musical instrument.

### Flexible performance options

Play rekordbox-analyzed music from USB drives via Export mode. Connect a laptop with USB-HID control to use Link Export or use Performance mode for free. Or connect your iPhone to the CDJ-3000 via a USB cable with a Lightning to USB3 Camera Adapter (sold separately) and mix from rekordbox for iOS.

### Sync sound and visuals for better performances

You can sync lighting, video displays, and pyrotechnics in real-time with audio played on the CDJ-3000, enabling you to craft more engaging performances.

#### Serato DJ Pro

The CDJ-3000 supports the USB-HID control of Serato DJ Pro. Use the multi player to browse your Serato DJ Pro playlists plus the catalogs of linked streaming services.

#### TRAKTOR PRO 3

The CDJ-3000 supports USB-HID control of Native Instruments' TRAKTOR PRO 3. Use the multi player to browse your TRAKTOR PRO 3 playlists plus the catalogs of linked streaming services.

#### djay PRO AI for Mac

The CDJ-3000 supports USB-HID control of Algoriddim's djay PRO AI for Mac. Browse your djay PRO AI playlists plus the catalogs of linked streaming services.

# PLX 1000

## TURNTABLE

Professional direct drive turntable

### A reborn classic

The PLX-1000 is precision engineered for the booth, drawing on 50 years' experience of making high-end turntables. The result is a familiar layout with some next generation improvements, including a high-torque direct drive system, multi-pitch control, club-grade build and sound quality, and detachable power and audio cables.

### Turn the tables

The high-torque direct drive ensures stable rotation and exceptional control - and it reaches  $33\frac{1}{3}$  rpm in just 0.3 seconds thanks to a starting torque of 4.5kg/cm (or more).

### Pick up the pace

Multi-tempo control lets you instantly pick up or slow down the track to  $\pm 8\%$ ,  $\pm 16\%$  and  $\pm 50\%$ , while a simple reset button instantly reverts to  $\pm 0\%$ .

### Flexible connectivity

Interchangeable power and audio cables can be easily connected and replaced, and pro-grade gold-plated RCA jacks ensure low impedance and an amazing sound quality.

### Excellent sound design

The PLX-1000's heavy-mass, die-cast zinc chassis prevents resonance and vibrations. The lower part of the unit is reinforced with 8mm-thick resin, plus 9mm-thick, vibration-damping material at the base.

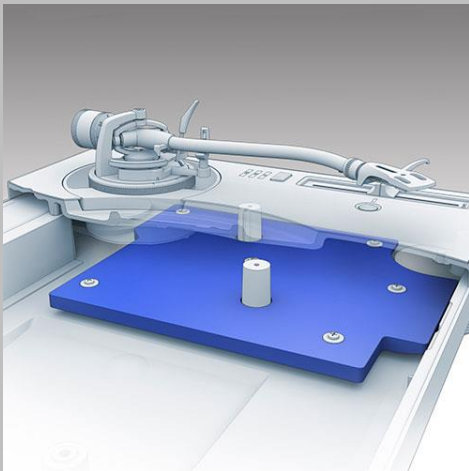

Plus the rubber-insulated tone arm reduces howling effects, while rubber and springs on the dampening parts of the insulator absorb external vibrations.

The high-torque direct drive ensures stable rotation and exceptional control - and it reaches 33 $\frac{1}{3}$  rpm in just 0.3 seconds thanks to a starting torque of 4.5kg/cm (or more).

# PLX-CRSS12

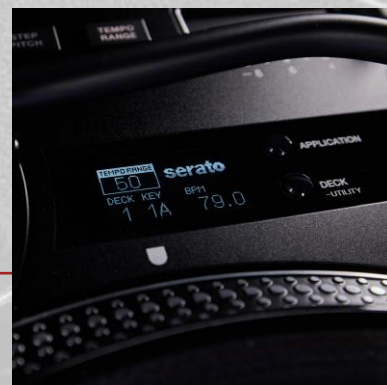

## TURNTABLE

Professional direct drive turntable with DVS control

The PLX-CRSS12 is the world's first turntable that supports both analog record playback and tone-arm-free DVS control, making it the ultimate deck for DJs who want to maximize their creativity.

The built-in OLED display also helps you focus on the deck.

### **Tone-arm-free DVS control eliminates skipping in digital playback**

No matter how hard you scratch, you'll never experience needle skipping when you use the PLX-CRSS12 in Digital Vinyl mode, thanks to the tone-arm-free system. The new MAGVEL CLAMP holds a record firmly in place when you touch it, enabling it to directly control the digital music file, giving you the true feeling of vinyl with no need to use the tone arm. When playing analog records, the experience will be just like using the popular PLX-1000 deck.

### **Customizable torque level**

It's easy to change the turntable rotation torque level in the utility settings to suit your preference. You can choose from "High" for quick startup when you press PLAY, "Low" for the traditional torque speed that many DJs are familiar with, and "Mid" for a balance between the two.

### **Feeling adjustment to suit your style**

You can quickly adjust the record's "weight" with the dial on top of the MAGVEL CLAMP. This means you can effortlessly continue your performance without the hassle of changing slip mats or slip sheets.

### **Adjustable stopping speed**

Use the switch on the front of the deck to adjust the time it takes for the turntable to stop when you press STOP. The "Min" is sharp. The "Mid" uses a traditional stopping speed that's familiar to DJs. And the "Max" creates the longest stopping speed for a gradual and dramatic finish to a track or performance.

### **Performance Pads for accurate and rapid control**

The PLX-CRSS12 inherits classic turntable layout elements, but a new addition is the 4 built-in MIDI-mappable Performance Pads which put your favorite features at your fingertips. They're right where you need them - just below the platter - so you can fire off Hot Cues and samples quicker than ever, which comes in handy even more if you're performing on a mixer that has no pads.

There's native support for various pad modes (see below), and a dedicated button enables you to switch control from pads 1-4 to 5-8. The pads are MIDI mappable too, so you can assign them to other features.

# XDJ-700

Compact DJ multi player

## Hot Cues

Trigger Hot Cues and Hot Loops in perfect time.

## Compact size, great features

The XDJ-700 comes with a large touchscreen, a familiar club layout and it inherits a host of features from its big brother, the XDJ-1000. Its compact size and removable stand offer great set-up possibilities for even the smallest booth or home set-up.

With support for our free rekordbox™ software you can prepare and manage your tracks on a PC or Mac before hitting the booth.

## Large touch screen

The 7-inch, full-colour LCD touch screen gives you instinctive control for ultimate creativity. The GUI is divided into three sections so you can effortlessly access all the features you need.

## More creative freedom

Automatically beat match up to 4 decks playing tracks analysed in rekordbox, leaving you free to focus on adding your unique mark on the mix.

## Beat perfect

Quantize snaps cues and loops to the rekordbox beat grid for a reliable performance every time.

## Faster browsing

Call up the Qwerty keyboard to search by keyword or use the rotary dial to browse. Plus you can choose how you view your tracks: list, artwork or custom view.

## Slip Mode

Keep tracks playing muted during live edits such as loop, scratch or reverse. Release the jog wheel and the track comes back at exactly the right place.

### Enhanced track info

The large, full-colour LCD screen shows all the info you need, including Wave Zoom, beat countdown, phase meter, key analysis indicator and more.

### Advanced connectivity

With ProDJ Link you can connect up to 4 players or laptops via LAN connection and share a single source. Combine this with rekordbox to access pre-prepared loops and cues, sync the beat with the master deck, and access a host of advanced pro-DJ features.

### Let's get digital

Simply plug in your rekordbox USB or connect your iPhone, iPod touch or Android smartphone to load tracks directly to the XDJ. Get access to a multitude of advanced performance features when preparing your tracks in rekordbox or using the rekordbox app.

### Compact design

The XDJ-700 offers DJs and venues unparalleled set-up possibilities. Being our slimmest player yet, it has been designed with the small booth or home set-up in mind. A removable stand helps it to fit into even smaller spaces.

### MIDI controller

Fully MIDI assignable via USB. Send control information to external devices and use the player as a MIDI controller.

### My Settings

'My Settings' allows you to prepare your system's setting preferences in rekordbox™ and save them to USB, SD, smartphones and tablets. This way you can instantly switch to your own settings when alternating DJs in the booth.

### Compatible with performance features

You can use this product with the rekordbox Core plan or above to control rekordbox software via your PC/Mac.

\*Shown with DJM-450 (not included)

# XDJ-1000MK2

PLAYER

Performance DJ multi player

## Digitally refocused

Based on its predecessor, the XDJ-1000MK2 improves usability through enhanced track browsing and support for high-resolution FLAC and ALAC audio files. It inherits the large jog wheel and 7-inch, full-colour touch screen from the CDJ-2000NXS2, as well as features such as 8 Hot Cues and Quantize.

Download the rekordbox™ music management software or the rekordbox app to prepare your sets.

## CDJ-style design

Equipped with the same size jog wheel and a 7-inch LCD touch screen as our CDJ-2000NXS2, you get intuitive control over your mix.

## Faster browsing

Easily browse your rekordbox library using the rotary button next to the display, or use the Qwerty keyboard to search for specific keywords. Advanced features such as Matching and Track Filter help you play the right track at the right time.

## High-resolution audio

Next to MP3, AAC, WAV and AIFF, the XDJ-1000MK2 supports high-quality FLAC and ALAC sound formats up to 48kHz/24-bit. A digital output has been added to send audio without degradation, while the power supply for analogue audio is completely separated from the digital circuit to reduce noise.

## Enhanced performance

8 Hot Cues allow instant playback at a preset point, while Quantize allows you to play cue and loop points in time with the music on tracks that have been beat analysed in rekordbox. Use Beat Jump to jump backwards or forwards 1, 2 or 4 beats from the current playback position.

## Add a DDJ-SP1

Add the DDJ-SP1 to your set-up and access even more performance features. Simply plug in a USB cable and control up to 4 XDJ-1000MK2s using Pro DJ Link.

### Pro DJ Link

Pro DJ Link lets you connect up to 4 players or laptops via a simple LAN connection. Combine this with rekordbox and get your hands on enhanced performance features and track info, such as Beat Sync, Beat Countdown, Beat Jump and Phase Meter.

### Take a short cut

The shortcut button gives you direct access to Browse mode and My Settings on the player's touch display.

### Colour-coded USB port

An illuminated USB port allows you to colour code your tracks in rekordbox allowing you to immediately recognise them in the DJ booth.

### Memory Cue

Set, name and colour-code your cues in rekordbox, for example 'my breakdown', then access the information directly on the player's screen.

### My Settings

'My Settings' allows you to prepare your system's setting preferences in rekordbox™ and save them to USB, SD, smartphones and tablets. This way you can instantly switch to your own settings when alternating DJs in the booth.

### Compatible with performance features

You can use this product with the rekordbox Core plan or above to control rekordbox software via your PC/Mac.

# DJM S3

MIXER

Scratch style 2-channel DJ mixer for Serato DJ Pro

## Mix & scratch with Serato

Thanks to the built-in soundcard, this 2-channel mixer is Serato DJ Pro enabled as soon as you unpack it. Featuring a highly durable Magvel crossfader, inherited from the DJM-900NXS2, the DJM-S3 delivers a smooth and accurate response.

The scratch-friendly layout creates more room for you to be creative in the booth. No need to go easy, the DJM-S3 is built to withstand intense performances. And to bring even more creativity to your performances, you can connect the DDJ-SP1 controller and use its large Performance Pads for tactile control of many Serato DJ Pro features, including its FX.

## Built-in sound card

Connect your PC/Mac with a single USB cable to use Serato DJ Pro and mix and scratch your digital files via turntables and the Serato DVS Control Vinyl or compatible multiplayers.

## Magvel crossfader

Scratching becomes effortless with the highly responsive Magvel Crossfader. Sharing the same quality as the DJM-900NXS2, the fader is accurate, smooth and durable for more than 10 million movements.

### Independent channel filters

Turn the filter knob on each channel to create unique textures. By twisting the parameter knob you can adjust resonance and add tension to your performances.

### High quality sound

Hear the true, high-quality sound of your tracks whether you're playing from digital or analogue sound sources thanks to the mixer's dithering technology.

### Flexible connectivity

The XLR terminals delivers premium sound quality. And the signal GND firmly holds ground wires from analogue turntables.

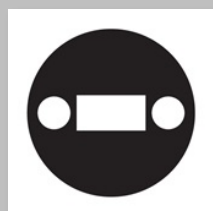

### Two headphone outputs

The DJM-S3 lets you plug both an 1/4-inch stereo jack and 3.5-mm mini jack. Pick your size or attach 2 headphones when playing back-to-back.

### Serato DJ Pro

Get involved with plug-and-play control of Serato DJ Pro with dedicated buttons for FX and advanced features such as Beat Jump, Slip mode and Quantize. Simply connect your PC/Mac and start playing.

### Serato DVS

This mixer supports DVS control of Serato DJ Pro software. Plug your PC/Mac into the unit and use the Serato DJ Pro control media - control vinyl or CDs - to intuitively control and scratch with digital audio files stored on your computer.

# DJM S5

## MIXER

### Scratch-style 2-channel DJ mixer

#### Passion for scratching

This new scratch-style 2-channel DJ mixer for Serato DJ Pro is ideal if you've experimented with battle mixing and scratching and want to expand your skills, or if you're completely new to the scene and want to dive straight in.

#### MAGVEL FADER PRO crossfader

Find your perfect scratch feeling with the popular MAGVEL FADER PRO crossfader, which features Feeling Adjust so you can tweak the "weight" and get the level of resistance you like best. You can be confident in the fader's robust design too; the knob mounting axis is highly rigid in the vertical direction so it can handle energetic scratch techniques.

#### Crossfader Hot Cue

Turn on the Crossfader Hot Cue feature and you can quickly move the crossfader to create scratch-like sounds with a sample or track. Every time you move the fader away from the edge, the track or sample on the relevant deck plays from the most recent Hot Cue point. So, you can quickly repeat the action to rapidly play the Hot Cue in the rhythm you use to move the crossfader - creating a scratch-like sound without the need to move the control vinyl on the deck.

#### Scratch Cutter

Start scratching straight away - even if you've never tried before. Simply choose one of the 6 cutting patterns and turn on the Scratch Cutter function with the effects lever, then move the control vinyl or jog wheel (when using DVS control) forward and backward on the deck and the DJM-S5 will do the rest. The mixer applies a cutting effect to the music in perfect time, emulating the popular transformer scratch technique without you moving the crossfader. This feature offers a great way to start learning to scratch; you can concentrate on getting your timing right with the control vinyl before moving on to the more challenging technique of using the crossfader.

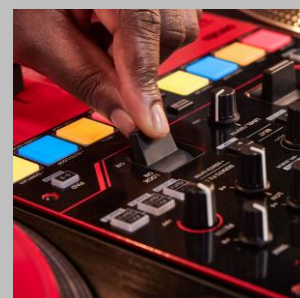

### USB bus power and standalone mixer versatility

The DJM-S5 is the first-ever Pioneer DJ mixer that you can power via the USB connection to your computer. Enjoy the extra flexibility this offers and, if you use portable turntables, the freedom to practice and perform literally anywhere you can carry your decks to: your garden, a park, or even the beach. It works as a standalone mixer too, so you can play music from a variety of sources such as analog vinyl records. And even though the mixer is USB powered, it produces a wide-ranging bright sound that brings out the best of all music genres.

### Performance Pads

Get creative and experiment with 13 pad modes including Hot Cue and Sampler. Using the 4 Performance Pads on each deck, which measure 20.6 mm x 20.6 mm, you can trigger samples and find all kinds of new ways to "remix" your tracks live and add texture to the music.

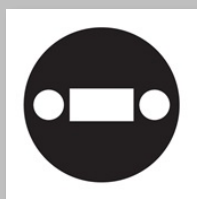

### Effect levers

Use the 2 large effect levers to control up to 57 effects in Serato DJ Pro (including paid Expansion Packs). The levers are the same size as those on the flagship DJM-S11 and you can hold them down or release them to turn the effect on / off, or lock them on so your hands are free to browse and scratch tracks while the effect is still applied. There are also 2 banks where you can save effects, giving you quick access to your favorites.

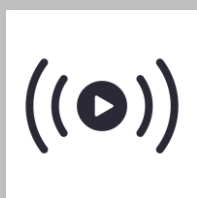

### Serato DJ Pro

Simply plug the DJM-S5 into a PC / Mac running the Serato DJ Pro application and you can use the software for free, including a host of professional performance features.

### Serato DVS

The mixer offers free support for Serato DVS, so you can use analog turntables with control vinyl or DJ players to play and scratch the tracks in your Serato crates.

### Stream your set easily

There's no need for external equipment such as a soundcard if you're streaming your set and want to add speech or vocals to your performance. All sounds are sent to the stream via Serato DJ Pro.

# DJM S7

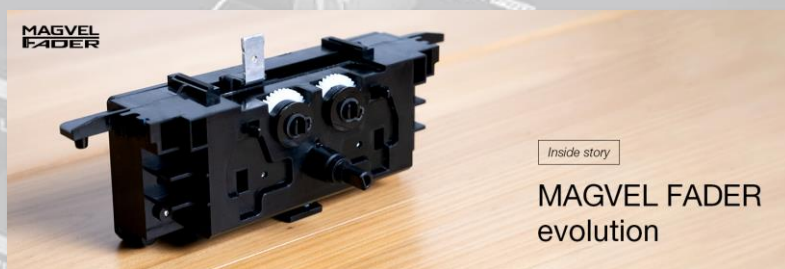

## MIXER

### Scratch-style 2-channel DJ mixer

#### TURNTABLI7M

This new 2-channel battle mixer gives you the freedom to customize your setup and bring your own unique style to every performance. The unit enables free use of Serato DJ Pro and it's a Hardware Unlock device for rekordbox, so you can use performance features in either application.

Inside story

#### MAGVEL FADER evolution

#### Magvel Fader Pro

We've enhanced the feeling of the Magvel Fader Pro and boosted the rigidity of the knob mounting shaft in the vertical direction by 30 percent so you can scratch with even more confidence.

#### Large Performance Pads

The 8 large Performance Pads on each channel are easy to hit when you want to rapidly fire off Hot Cues and samples. And with independent pad modes, you can use 2 different features - one on each channel's set of pads - at the same time.

#### Large effect levers

Twist sounds on the fly by adding effects with the large levers. The DJM-S7 includes all 22 built-in Beat FX from the DJM-S11 so you can get creative with these, as well as software effects in Serato DJ Pro and rekordbox. It's easy to change the 6 effects assigned to the FX Select buttons and you can keep an eye on the name and beat value of the one you're using by glancing at the OLED display.

**Bluetooth input: Wirelessly add audio from your phone**

Simply pair your phone with the DJM-S7 via Bluetooth and you can drop sounds straight into your set. You can play loops to scratch over or use a music app to play a track requested by someone in the audience.

Or simply have your mobile device connected and ready as a backup in case your laptop fails. You can play the sound directly through the master output or either of the channels.

**Loop MIDI: Automated control of DJ software functions**

This feature in the effects section of the DJM-S7 can control various functions in your DJ software by repeatedly sending a MIDI signal to the software in a set beat cycle. Functions including Hot Cue, sampler, and key shift-up are preassigned so you can start using Loop MIDI straight away.

**Loop MIDI: Pattern A**

You can create a buildup by gradually shortening the beat cycle of a snare sample which is playing in a loop.

**Loop MIDI: Pattern B**

You can also raise or lower the key of deck 1 or 2 track, activate sampler slot 1 or Hot Cue 1 / A, or mute the deck.

**USB Type-A**

**USB hub**

Plug your DJ controllers and other devices - including selected units from other brands - into the dual USB-A ports to play with them.

**USB Type-B**

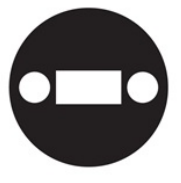

**MIDI controller**

This device is fully MIDI assignable via USB. Send control information to external devices and use the mixer as a MIDI controller.

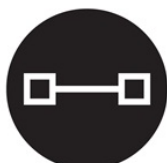

**Serato DJ Pro**

Connect your PC/Mac to use Serato DJ Pro (the mixer unlocks the software for free). Use dedicated buttons for effects and advanced Serato features including Beat Jump, Slip mode, and Quantize.

**Serato DVS**

Use Serato DVS to control and scratch with CDJs or turntables.

**Pitch 'n Time DJ**

Serato DJ Pro Expansion Pack Voucher (Pitch 'n Time DJ) is included. Use Pitch Play, Key Shift, and more features. The mixer is fully MIDI mappable too.

**rekordbox**

Connect your PC/Mac to unlock performance features in rekordbox for free and use DVS mode with the dedicated control vinyl (available separately).

# DJM S11

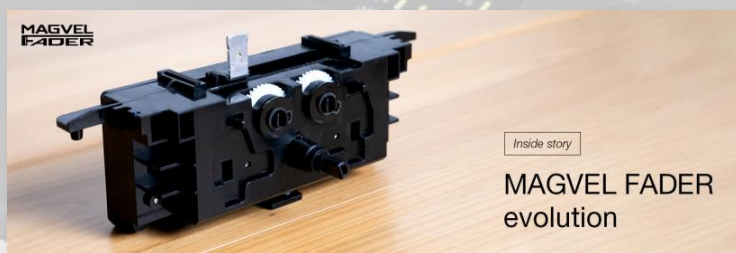

MIXER

Scratch-style 2-channel DJ mixer

## TURN IT UP TO 11

Raise your game with the DJM-S11. This new professional 2-channel, 4-deck control battle mixer enhances various elements from its predecessor, the DJM-S9, and offers a host of brand-new features to help you perform more freely with Serato DJ Pro or rekordbox.

Inside story

MAGVEL FADER evolution

## Enhanced MAGVEL FADER PRO

We've enhanced the feeling of the MAGVEL FADER PRO and boosted its vertical rigidity by 30 percent. This means you can scratch with more confidence, while the tougher coating around the crossfader area reduces wear and tear.

## Customizable touch screen

A 4.3-inch customizable touch screen gives all the information you need. Browse tracks, check waveforms, and dynamically change the texture of the music with TOUCH FX. With Touch MIDI you can directly control functions in your DJ software without touching your laptop.

### Crystal-clear sound quality

The DJM-S11 inherits the raw and high-density sound from the DJM-900NXS2 thanks to studio-quality 64-bit mixing and dithering processing inside the DSP, and a low-jitter clock circuit and 32bit high-quality D/A converter in the master output section.

### Improved Performance Pads

The 8 Performance Pads are bigger, making them easier to hit in energetic battles. In Serato DJ Pro, use Combo Pad mode to combine up to 4 different pad modes at once, and use Scratch Bank to call up assigned scratch samples by just tapping a pad.

#### USB Type-A

#### USB hub

Plug your DJ controllers and other devices - including selected units from other brands - into the dual USB-A ports to play with them.

#### USB Type-B

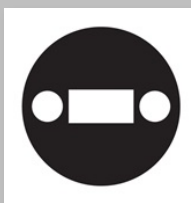

#### MIDI controller

This device is fully MIDI assignable via USB. Send control information to external devices and use the mixer as a MIDI controller.

#### Serato DJ Pro

Connect your PC/Mac to use Serato DJ Pro (the mixer unlocks the software for free). Use dedicated buttons for effects and advanced Serato features including Beat Jump, Slip mode, and Quantize.

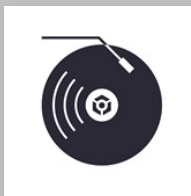

#### Serato DVS

Use Serato DVS to control and scratch with CDJs or turntables.

#### Pitch 'n Time DJ

Serato DJ Pro Expansion Pack Voucher (Pitch 'n Time DJ) is included. Use Pitch Play, Key Shift, and more features. The mixer is fully MIDI mappable too.

#### rekordbox

Connect your PC/Mac to unlock performance features in rekordbox for free and use DVS mode with the dedicated control vinyl (available separately).

# DJM 750MK2

## MIXER

### 4-channel performance DJ mixer

#### Rise up

Take the step to the DJ booth seamlessly with the DJM-750MK2, a 4-channel mixer which inherits key features and design elements from the DJM-900NXS2, creating a club-style setup when combined with our professional CDJ or XDJ multi players.

You can perform seamless mixes on the DJM-750MK2 thanks to the smooth curves on the EQs and channel faders. The Magvel crossfader, inherited from the DJM-900NXS2, gives a precise response and assured feel during even the most complicated scratch techniques.

#### Two headphone outputs

The DJM-750MK2 lets you plug both an 1/4-inch stereo jack and 3.5-mm mini jack. Pick your size or attach 2 headphones when playing back-to-back.

#### Independent MIC section

Use a microphone and the AUX input at the same time.

#### Flexible connectivity

The XLR terminal and RCAs deliver premium sound quality on all connections. And the signal GND terminal easily attaches ground wires from analogue turntables.

#### TRAKTOR DVS control

This mixer supports DVS control of Native Instruments' TRAKTOR PRO 3 DJ software. Plug your PC/Mac into this unit and use the TRAKTOR SCRATCH control media to intuitively control and scratch with digital audio files stored on your computer.

### Professional layout

Mixing on the DJM-750MK2 feels instinctive thanks to the layout design with 4 channels and a display that draws on traits from the DJM-900NXS2 professional mixer, allowing you to practice in club conditions.

### Pro FX with detailed control

Add texture and flair to your mixes with professional FX inherited from the DJM-900NXS2. 2 effects units combine Sound Color FX and Beat FX - including FX Frequency - giving you the freedom to be creative with sound while always in control.

### Independent send/return

Choose from Aux or Insert send/return to connect different types of FX units on iOS devices such as FX apps, synthesisers and samplers, and combine them with the mixer's internal FX. A simple USB connection will ensure high-quality sound, which you can efficiently record and easily archive via the DJM-REC app on your iPhone or iPad.

### Professional sound quality

Whether you're playing with digital or analogue sources, high-quality sound is created by the 64-bit digital signal processor and dithering technology.

### Smooth EQs & faders

The EQs and channel faders on the DJM-750MK2 feature curves equivalent to those on the DJM-900NXS2, which also inspired the Magvel cross fader. The latter is smooth, accurate and durable for more than 10 million movements and its cut lag has been improved for more assured and responsive performance

### Performance features

Unlock rekordbox performance features by simply connecting the unit to your PC/Mac. And, if you subscribe to the Creative plan, use Cloud Library Sync for seamless library management across multiple devices, and easily make custom versions of tracks in Edit mode.

### DVS control

Make full use of rekordbox's low-latency DVS control for intuitive, smooth scratching.

# DJM V10

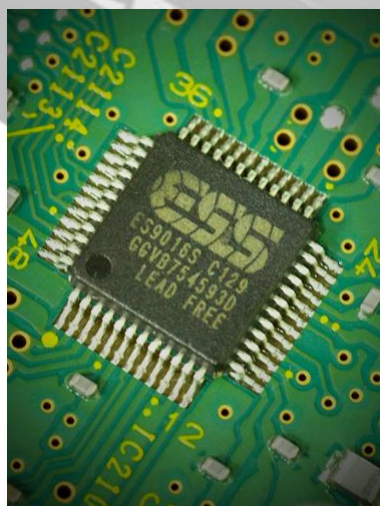

## MIXER

### Creative style 6-channel professional DJ mixer

#### Craft your sound

Forge a new sound with the DJM-V10; a new breed of mixer, born of fresh thinking. It's built to allow the most creative DJs to craft original soundscapes. This 6-channel unit - loaded with unique features - produces warm audio full of energy and presence. Take full control of your mix and get ready to create something the crowd has never heard before.

#### Elite sound quality

Feel the warmth of natural sound and hear every detail. Studio-quality 64-bit mixing and dithering processing, 32-bit high-quality A/D and D/A converters, a low-jitter clock circuit, and many other components all work to produce a full low-end, vibrant mids, and precise highs.

#### 6 channels with a wide range of inputs

You're free to create your perfect setup with 6 channels and a host of different input types.

#### 4-BAND EQ and compressor

Take full control of your mix with the newly developed 4-band EQ. A built-in compressor enables further adjustment of the loudness of your tracks.

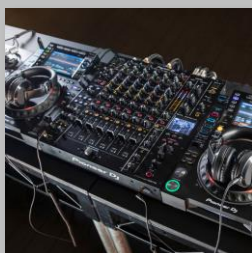

### Effects for more creative expression

The expanded send/return section enables you to add external FX, or even combine them with built-in FX. Create unique sounds; the possibilities are nearly limitless

### 3-band master isolator

Effortlessly control the tone of your entire mix with the 3-band master isolator, featuring new boost/cut curves and adjustments to the crossover frequencies and other parameters. Grab the large dials and drive the crowd wild by drastically changing the sound.

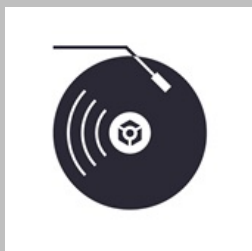

### Dual headphones output and booth EQ

The DJM-V10 makes back-to-back monitoring simple and comfortable. You can tweak the sound in the DJ booth just the way you like.

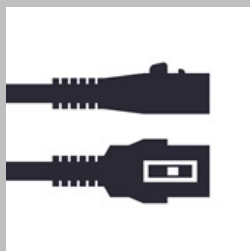

### TRAKTOR DVS-ready

Enjoy DVS control via Native Instruments' TRAKTOR PRO 3 (available separately). Use it to intuitively control and scratch with digital audio files stored on your computer.

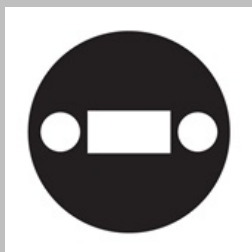

### rekordbox

Make full use of rekordbox's low-latency DVS feature for intuitive, smooth scratching.

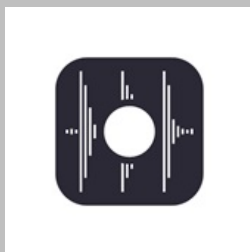

### Lockable power cable

A lockable power cord is included for added reliability and to avoid accidental disconnections.

### Serato DVS-ready

Use Serato DVS to control and scratch with CDJs or turntables (Serato DJ Club Kit license required, available separately).

### DJM-REC compatible

Record and archive your mixes via iPhone or iPad, upload your sounds to cloud services or effortlessly live-stream your sessions.

**ShowControl**  
The DJM-V10 supports the extended PRO DJ LINK ShowControl protocol. This enables DJs, technical producers, LJs, and VJs to use all the key information from the DJM-V10, such as fader and knob positions, to align sound and visuals to create shows that blow audiences away.

# DJM V10 LF

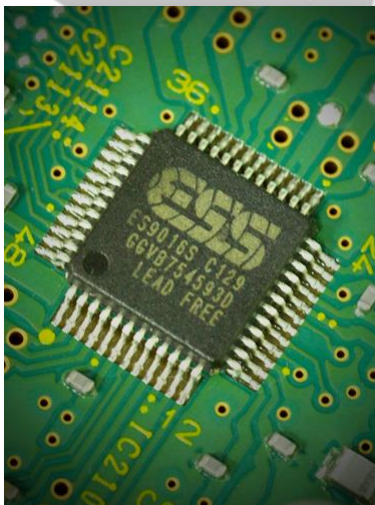

## MIXER

Creative style 6-channel professional DJ mixer with long fader

### Craft your sound

The DJM-V10-LF features new, longer channel faders with optimized curves and a new custom-designed curve preset to enable you to perform smooth and accurate mixes. The 60 mm shaft slide faders enable you to control the volume of the audio source from each channel precisely.

### Elite sound quality

Feel the warmth of natural sound and hear every detail. Studio-quality 64-bit mixing and dithering processing, 32-bit high-quality A/D and D/A converters, a low-jitter clock circuit, and many other components all work to produce a full low-end, vibrant mids, and precise highs.

### 60 mm shaft slide faders

If you like to perform smooth, detailed mixes, you can enjoy a high level of control with the DJM-V10-LF. The crossfader from the DJM-V10 has been removed and brand-new 60 mm shaft slide faders have replaced the 45 mm ones on the channels.

**6 channels with a wide range of inputs**

You're free to create your perfect setup with 6 channels and a host of different input types.

**4-BAND EQ and compressor**

Take full control of your mix with the newly developed 4-band EQ. A built-in compressor enables further adjustment of the loudness of your tracks.

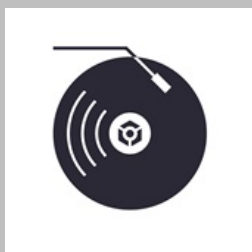

**Effects for more creative expression**

The expanded send/return section enables you to add external FX, or even combine them with built-in FX. Create unique sounds; the possibilities are nearly limitless

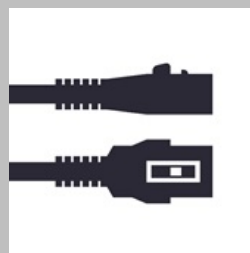

**TRAKTOR DVS-ready**

Enjoy DVS control via Native Instruments' TRAKTOR PRO 3 (available separately). Use it to intuitively control and scratch with digital audio files stored on your computer.

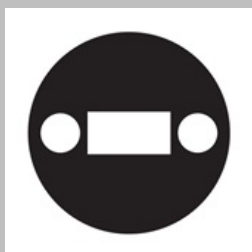

**rekordbox**

Make full use of rekordbox's low-latency DVS feature for intuitive, smooth scratching.

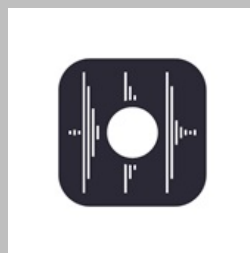

**Lockable power cable**

A lockable power cord is included for added reliability and to avoid accidental disconnections.

**Serato DVS-ready**

Use Serato DVS to control and scratch with CDJs or turntables (Serato DJ Club Kit license required, available separately).

**DJM-REC compatible**

Record and archive your mixes via iPhone or iPad, upload your sounds to cloud services or effortlessly live-stream your sessions.

**ShowKontrol**

The DJM-V10 supports the extended PRO DJ LINK ShowKontrol protocol. This enables DJs, technical producers, LJs, and VJs to use all the key information from the DJM-V10, such as fader and knob positions, to align sound and visuals to create shows that blow audiences away.

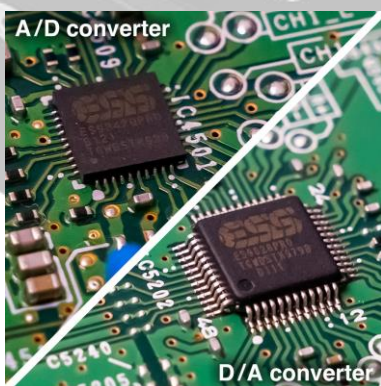

**Unique fader curve**

The unit includes two classic fader curves from its predecessor - optimized to make the most of the extra length - plus an all-new curve preset that enables you to make fine adjustments to the volume of each channel and precisely control the output sound.

# DJM-A9

## MIXER

### 4-channel professional DJ mixer

#### Stunning clear sound quality

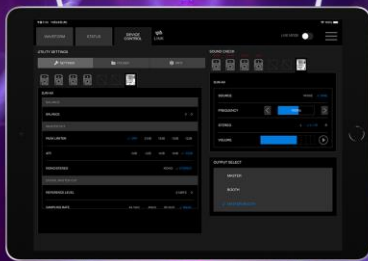

The next-generation club sound of the DJM-A9 comes from extensive development and fine tuning of existing technology from previous units, plus brand-new components. The channel input section is equipped with an ESS Technology 32-bit high-quality A/D converter for crystal-clear, high-resolution sound, while the master and booth output sections employ 32-bit high-quality D/A converters from the same brand so you can experience sound from the booth monitors that's the same as the crowd hears on the dancefloor. Even the sound quality of the microphone input and headphone outputs has been improved with carefully selected new parts and design optimization.

#### Evolved playability

Increased spacing around the EQ knobs gives you the room to twist your fingers and high-grade, bright LEDs in the channel section make it easier than ever to get a visual grasp on sound levels. You can perform more dynamically than ever thanks to the frequency response of the isolators, which have been optimized to make the most of the latest music production traits. And, with higher quality, slicker channel faders than the DJM-900NXS2, plus the third-generation MAGVEL FADER crossfader, you can enjoy silk-smooth mixing and rapid, stable scratching.

## Stagehand

### Support for the brand-new Stagehand app and built-in Sound Check function

The DJM-A9 is compatible with Stagehand, the industry-first PRO DJ LINK remote management app for front of house teams. Using an iPad connected wirelessly to the mixer via a LAN router (available separately), an engineer can keep an eye on things such as level meters and the DJ's use of the mixer's controls, making it easier to maximize the sound system's settings and run a smoother, more impactful show without needing to interrupt the DJ's performance or even enter the booth.

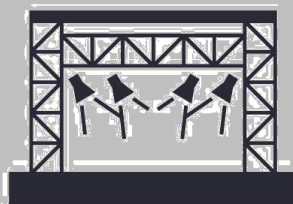

### Dual independent headphone outputs and booth EQ

Plug in your headphones at the same time as another DJ and enjoy the freedom to monitor the channels you want to. With separate cue buttons, volume knobs, and mix balance knobs for each set of headphones, it's easy for 2 DJs to cue up tracks during changeovers and back-to-back sets. Plus, with the 2-band booth EQ, you can change the high and low frequencies to complement the master output and match the mood in the booth to the feeling on the dancefloor.

### Video and Lighting app support

With support for TC Supply's ShowKontrol and the free application PRO DJ LINK Bridge, DJs, event producers, lighting designers, LJs, video creators, and VJs can produce sound and visual coordination with confidence, and create shows that captivate audiences.

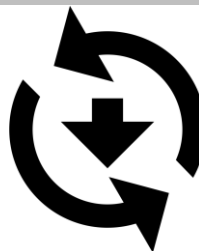

### rekordbox

Make full use of rekordbox's low-latency DVS feature for intuitive, smooth scratching.

### Serato DVS-ready

Use Serato DVS to control and scratch with CDs or turntables (Serato DJ Club Kit license required, available separately).

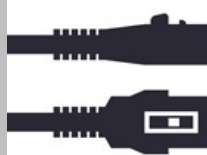

### Firmware Update Manager

You'll be automatically notified when firmware updates become available. You can download the

### DJM-REC compatible

Record and archive your mixes via iPhone or iPad, upload your sounds to cloud services or effortlessly live-stream your sessions.

### Lockable power cable

A lockable power cord is included for added reliability and to avoid accidental disconnections.

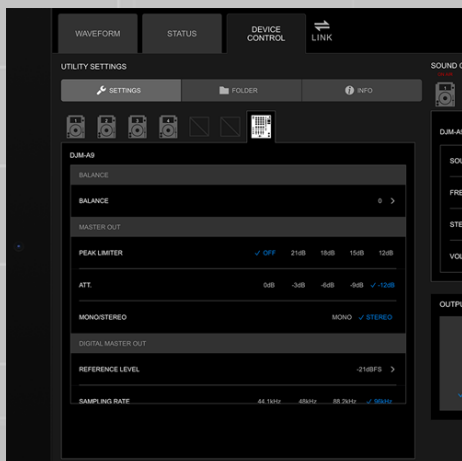

# STAGEHAND

SOFTWARE

## PRO DJ LINK Manager for iPad

This indispensable app, which is the first of its kind, enables you to keep an eye on various information and remotely adjust settings on DJM-A9 and CDJ-3000 units in a PRO DJ LINK network, all from your iPad.

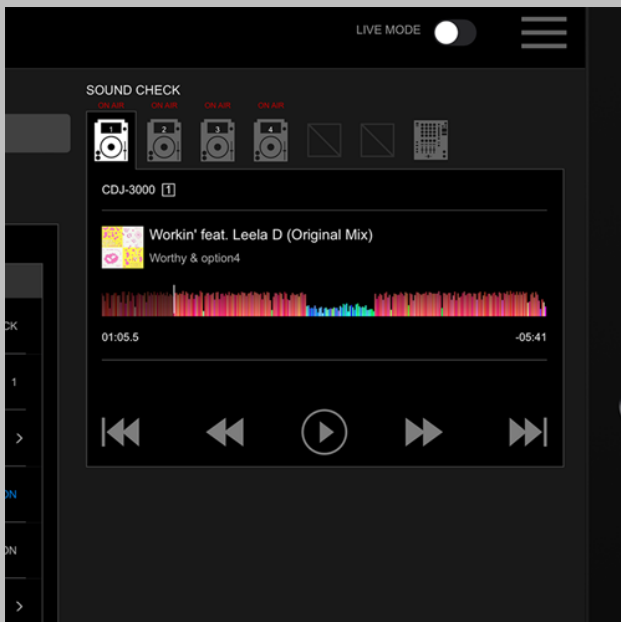

### Device Control - Utility

If you're the designated Admin user of the system, you can easily check and change the Utility settings of the DJM-A9 and CDJ-3000 units in the PRO DJ LINK network via the Device Control screen.

You can create multiple settings files in advance, giving you the option to apply multiple changes in one go if you need to, and you can share them via in numerous ways including via AirDrop or email to make event preparations run smoother.

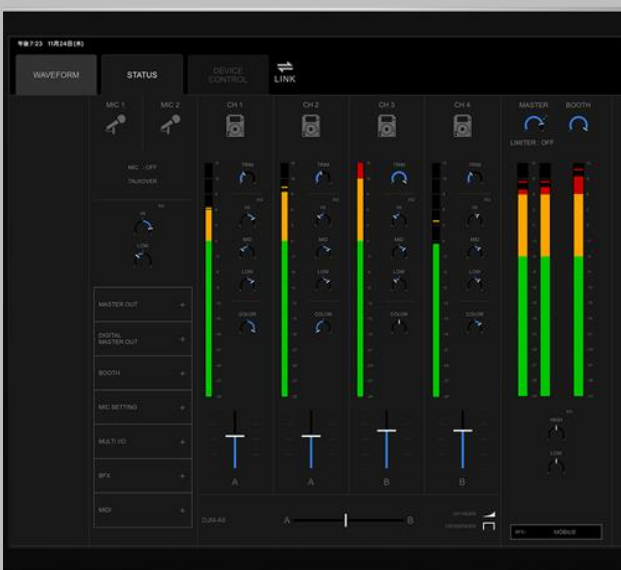

### Device Control - Sound Check

Speed up sound checks with remote control of the CDJ-3000. There's no need to go back and forth between the booth and the dancefloor; simply use Sound Check in Stagehand to load tracks to the decks and play, stop, fast-forward and rewind them.

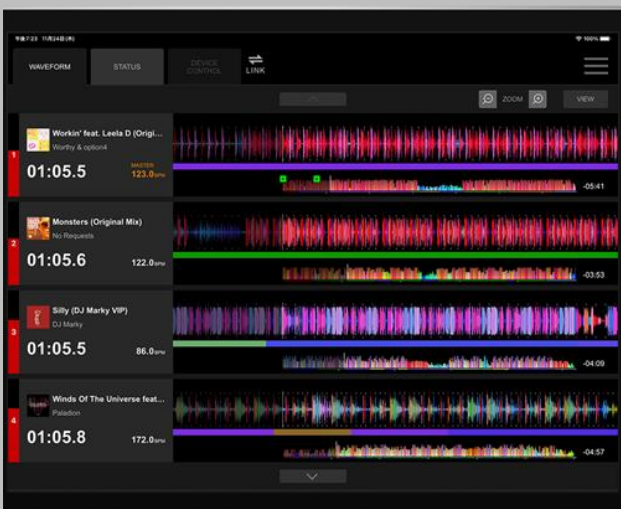

You can also control sine waves and noise from the DJM-A9 to make sure the sound system is set up correctly for the room's acoustics. When the gig starts, turn on Live mode to disable Device Control functions so you can't accidentally interrupt the music in the middle of a DJ's set.

### Status

Keep an eye on a host of information without needing to look over the DJ's shoulder - or even enter the booth. The Status screen gives you a remote view of almost everything happening on the DJM-A9, including the status of Utility settings, enabling you to quickly spot problems such as excessive volume from the trim and master levels so you can troubleshoot effectively.

You can also check the playing information on the CDJ-3000 units from here.

### Waveform

Remotely view a host of track information from your iPad to help you create exciting lighting sequences and visual effects. From the Waveform screen, you can view not only the waveforms of tracks playing on CDJ-3000 units in real time, but also the beatgrid, BPM, and time information.

DJs have a choice of public and private settings in their own rekordbox account for sharing most of the music information, and settings made in advance will be reflected in Stagehand.

# DDJ REV1

## CONTROLLER

Scratch-style 2-channel DJ controller for Serato DJ Lite

### Join the REVolution

The DDJ-REV1 matches perfectly with the free Serato DJ Lite software, boasting a brand-new battle-style layout that's easy to use and perfect for playing like a pro. The design of this 2-channel DJ controller emulates a professional DJM-S mixer + PLX turntable setup, including specialized features for open-format and scratch DJs.

### Brand-new battle-style layout

Get hands-on with an interface designed to emulate 2 x PLX turntables and a DJM-S series mixer - the kind of setup used by pro battle DJs. There's plenty of space to perform mixing and scratching techniques thanks to the new arrangement of the controls on the DDJ-REV1.

The tempo sliders are 60mm - longer than those on the DDJ-SB3 to give you finer control - and they run horizontally above the decks while the Performance Pads have been moved into the mixer section so you can intuitively combine effects, trigger samples, and scratch your tracks.

### Bigger jog wheels

The bigger the jog wheels, the better for scratching. The jogs on the DDJ-REV1 are the same size as the ones on the DDJ-SR2, a popular controller that's higher up in our range.

DDJ-REV1

DDJ-SB3

**Lever FX**

Dynamically add texture to the music with Lever FX. Pull the levers down and hold them to apply effects from Serato DJ Lite in short bursts or push them up to lock on effects and free up your hands for scratching or track browsing.

**Mixed microphone audio: Easily add your voice while you're streaming**

For the first time in a Pioneer DJ controller at this level, the output of the master audio is mixed with the sound from the microphone if you have one plugged in. This means you don't need any external equipment such as a soundcard or separate mixer if you want to add speech or vocals to your performance and route it through your computer. All sounds are sent to Serato DJ Lite so you can stream from there.

**Tracking Scratch: Get a helping hand with scratching**

The Tracking Scratch feature silently takes the music back to the cue point the moment you move the jog wheel from backward to forward or lift your hand away - saving you from closing the fader and finding the right place in the music to start the scratch again. All you need to do is to select the Tracking Scratch Pad mode, press a Performance Pad to choose the Scratch Crossfader Cuts pattern you want to use, then start moving the jog.

**Serato DJ Lite integration: Enjoy full use of the free software**

As soon as you've downloaded Serato DJ Lite to your PC/Mac for free, you can simply connect the DDJ-REV1 via the supplied USB cable and start DJing. Enjoy tactile control of various features and effects in the software by manipulating the buttons, knobs, faders, and jog wheels on the controller.

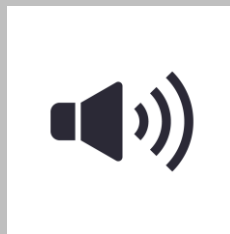

With the Scratch Bank pad mode, you can instantly load scratch samples from 4 banks that you've assigned in Serato DJ Lite or Pro by simply tapping the dedicated Scratch Bank button.

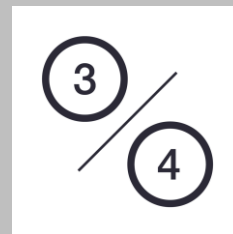

**Support for Serato DJ Pro**

Take your performances to the next level with a free trial of Serato DJ Pro paid permanent upgrade available separately)

**Class compliant**

Plug your DDJ-REV1 into your PC/Mac and start DJing - there's no need to install an audio driver.

**Deck 3/4 control**

Play tracks and sounds loaded on any of the 4 decks in Serato DJ Lite.

# DDJ REV5

## CONTROLLER

Scratch-style 2-channel performance DJ controller

The DDJ-REV5 is a new-generation controller with Serato DJ Pro and rekordbox compatibility. This 2-channel unit offers an authentic scratch experience and innovative features including its large jogs, MAGVEL FADER, dedicated buttons for Stems control, the first-ever Auto BPM Transition, and Piano Play mode.

### Large jog wheels and MAGVEL FADER for dynamic scratching

The large jog wheels are responsive, reliable, and easy to operate – with a feel just like those on classic CDJ units – and they each include a display with playhead position so you'll always know where you are in the track. You can also customize the Jog Feel to find your perfect jog wheel “weight”. The MAGVEL FADER is slick, robust, and ready to translate every tiny movement you make so you can scratch with precision.

### Multiple inputs and outputs plus 2 USB Type-C ports for smooth DJ transitions

You can use the DDJ-REV5 as the center of a larger setup thanks to its wide variety of inputs and outputs, including an XLR master out that's perfect for use in professional environments. There are 2 USB Type-C ports for PC/Mac too, making it easy to swap between DJs with a simple flick of a switch on the controller.

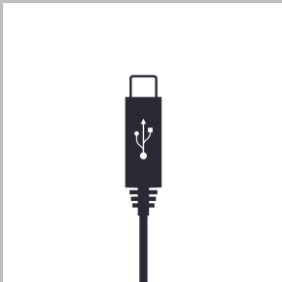

### Serato DJ Pro and rekordbox plug-and-play compatibility

Choose your favorite software and start DJing right away. You can simply plug the DDJ-REV5 into a PC/Mac running the latest version of Serato DJ Pro or rekordbox to use either application for free – you don't need a license key or subscription. A voucher for the Serato Pitch 'n Time DJ expansion pack is also included.

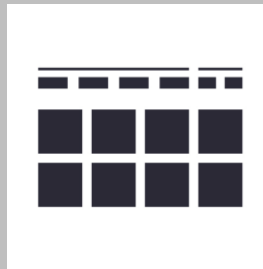

### Scratch-style layout for open-format freedom

The long tempo sliders on the DDJ-REV5 run horizontally above the deck sections while the Performance Pads and Lever FX are placed in the mixer section for dynamic performances, emulating the PLX Series deck + DJM-S Series mixer setups loved by open-format DJs around the world. Thanks to the proximity of the pads, levers, and faders, you can fuse scratching with pad play and effects.

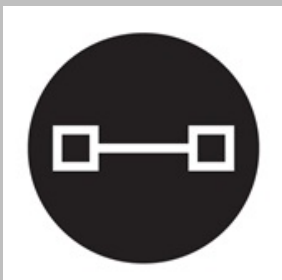

#### USB Type-C

Connect your PC/Mac directly to the controller's USB Type-C terminal with a single cable.

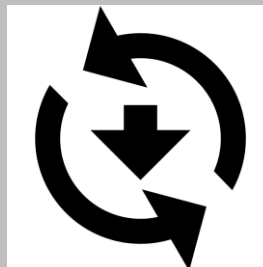

#### Performance Pads

Hit the 8 back-lit rubber Performance Pads to trigger Hot Cues, Pad FX, Beat Jump, and the sampler.

#### Pitch 'n Time DJ

A voucher for the Serato Pitch 'n Time DJ Expansion Pack is included, which enables key shifting and key syncing with perfect audio quality.

#### Firmware Update Manager

You'll be automatically notified when firmware updates become available.

# DDJ REV7

# CONTROLLER

Scratch-style 2-channel professional DJ controller for Serato DJ Pro

reddot winner 2022  
best of the best

## Expand Your REVolution

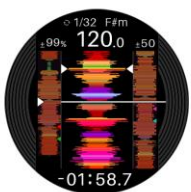

The DDJ-REV7 is built to help you get the most from the Serato DJ Pro performance software and boasts a brand-new design that includes large, motorized jog wheels with On Jog Display to create a tactile connection between you and your music. The layout of this 2-channel unit emulates a professional DJM-S mixer + PLX turntable setup, and includes specialized features for open-format and scratch DJs.

## Brand-new motorized, VINYLIZED JOG: Feel like you're playing with records

At the heart of each deck on the DDJ-REV7 is the new 7-inch motorized jog wheel which features the same rotational stability as a 12-inch turntable and is built to feel like you're playing with real records.

## VINYLIZED JOG: Customize the feeling

The acrylic top plate is finished with a vinyl-like texture for effortless finger grip, and you can choose between low and high torque settings and use the two slip sheets included inside each deck to find your preferred amount of friction. Switch between a rotation speed of  $33\frac{1}{3}$  or 45rpm whenever you like and use the Stop Time setting to adjust how long it takes for the music to end when you press pause.

WAVEFORM MODE

VIRTUAL DECK MODE

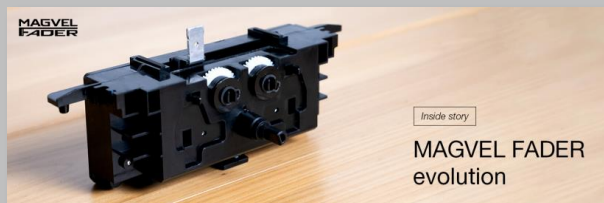

ARTWORK DISPLAY

DJ LOGO DISPLAY

## On Jog Display: Keep an eye on essential information

In the center of each jog wheel, a 3.5-inch LCD keeps important information at your fingertips so there's far less need to switch your gaze between the decks and your laptop. Thanks to an omnidirectional viewing angle, you can see what's being displayed from any angle, and you can turn off the digital marker that indicates the playback position whenever you want. You can also mark each jog wheel with the included stickers if you prefer this method to the digital marker.

### MAGVEL FADER PRO: Scratch freely

Scratch with style and confidence when you use the MAGVEL FADER PRO. As well as being highly robust, it's customizable with various settings to help you find the feel that's right for you.

### Instant Scratch: Rapidly fire samples with dedicated buttons

The DDJ-REV7 has 4 original scratch samples that you can trigger by pressing the corresponding hardware buttons. Because the sounds are built in, you can fire them at any time – even if the controller isn't connected to your laptop. If you want to use your own samples in your set, you can instantly load scratch samples from 4 banks that you've assigned in Serato DJ Pro with the Scratch Bank feature.

### 22 built-in Beat FX including 3 new additions: Dynamically change the sound

Add drama to your track transitions with the 3 brand-new Beat FX. In total there are 22 Beat FX which you can trigger with the dedicated controls (New Beat FX: Duck Down, Fill Out and Helix Out).

You can also pull the effects levers down and hold them to apply effects from Serato DJ Pro in short bursts or push them up to lock effects on and free up your hands for scratching or track browsing.

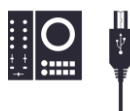

### Portable, sophisticated design: Take your performances anywhere

The DDJ-REV7 is solid and robust, yet still lightweight enough to grab by the handles on the chassis and carry to your next gig. Contrasting matte and hairline finishing in different sections of the aluminum top plate create distinction between the deck and mixer sections, so the layout looks like a traditional 2 x turntable + mixer setup, while the On Jog Displays mimic the label in the center of a vinyl record.

#### Silent Cue

Switch on Silent Cue and avoid the sound of the music speeding up as the platter starts to spin. Simply choose a Hot Cue, then hit play on the deck and it will sound the same as hitting a cue point on a DJ player.

#### Plug and Play

As soon as you've downloaded Serato DJ Pro to your PC/Mac, you can simply connect the DDJ-REV7 via the supplied USB cable and start DJing.

#### High-quality audio

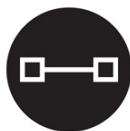

With a digital-to-analog converter from ESS Technologies and improvements to the audio design, the DDJ-REV7 achieves the highest sound quality of any Pioneer DJ controller.

SMOOTH ECHO

ON

#### Smooth Echo

Assign the Smooth Echo effect to your choice from a selection of controls, e.g. a fader or pad. Then, when you turn on Smooth Echo with its dedicated button, the echo will be triggered as soon as you move the relevant control.

#### Pitch 'n Time DJ

A voucher for the Serato Pitch 'n Time DJ Expansion Pack is included, which enables key shifting and key syncing with perfect audio quality.

# DDJ FLX4

## CONTROLLER

2-channel DJ controller for multiple DJ applications

### It's a Vibe

The DDJ-FLX4 is a 2-channel controller with a simple, user-friendly design and a professional feel.

### rekordbox and Serato compatibility

You can use the DJ software rekordbox or Serato DJ Lite for free by connecting your PC/Mac to the DDJ-FLX4 to complete your DJ setup. And if you want to upgrade to Serato DJ Pro, you can buy a license or subscription for the premium version of the software.

### Multi-device support

Whether you want to connect to a PC, Mac, iPhone, iPad, or an Android phone or tablet, the DDJ-FLX4 is versatile in its design. Even better, if you use the controller with rekordbox for iOS/Android when the update becomes available in early 2023, you'll be able to connect to your device via Bluetooth® or USB cable. So, there's nothing to hold you back from giving DJing a try.

### User-friendly portable design and professional layout

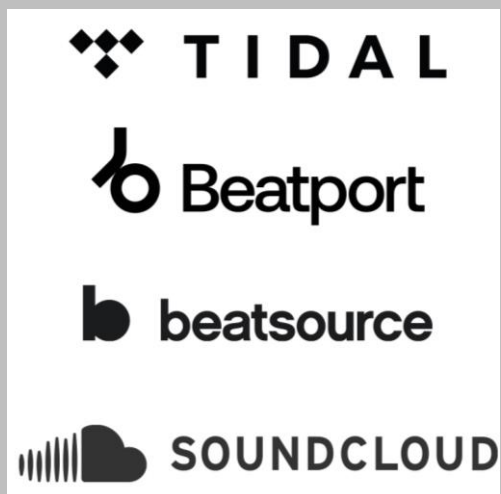

The layout of the controls on the DDJ-FLX4 makes it easy to learn to DJ and is inherited from professional Pioneer DJ products. Everything is simple to use and neatly arranged, which also makes the controller compact enough to take anywhere you want to practice or perform.

### Brand-new Smart Mixing features

Don't know how to mix? Don't worry, you can get started right away with the Smart Fader feature, which automatically adjusts the volume, bass volume, and BPM of the music so you can smoothly transition from one track to the next by simply moving the channel faders or crossfader. Plus, with Smart CFX, you can simply turn a knob to apply a combination of effects that will add drama to the sound.

**Seamless integration with selected streaming services**

rekordbox is compatible with a choice of streaming services. So, you can choose from millions of tracks available on the TIDAL, Beatport Streaming, Beatsource Streaming, and SoundCloud Go+ platforms (subscriptions required) and mix them together on the DDJ-FLX4.

You can also use all the effects and performance features to spice up your favorite songs and create your own sound.

**USB audio output for microphone sound**

The DDJ-FLX4 makes it simple if you're keen to MC or sing over the top of your sets because it mixes the audio for you.

So, you can connect the controller to a single device and hear the sound of your mix together with the sound from the microphone as long as you don't have a Bluetooth® device connected.

This also makes the DDJ-FLX4 an ideal choice if you'd like to live-stream your sets because you can do it all from one device.

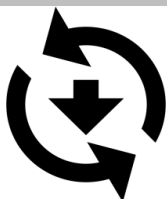

**Class compliant**

Plug your DDJ-FLX4 into your PC/Mac and start DJing - there's no need to install an audio driver.

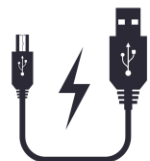

**Performance Pads**

Hit the 8 back-lit rubber Performance Pads to trigger Hot Cues, Pad FX, Beat Jump, and the sampler.

**Firmware Update Manager**

You'll be automatically notified when firmware updates become available.

**USB bus powered**

Simply connect the controller to your computer using the included USB cable.

**Built-in sound card (audio interface)**

Thanks to a built-in sound card, the DDJ-FLX4 connects straight to your speakers or amplifier via a single RCA cable. Plus you can record to rekordbox using the same USB connection.

# DDJ FLX6 GT

## CONTROLLER

4-channel DJ controller for multiple DJ applications

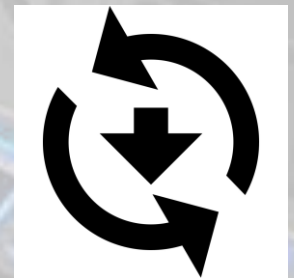

### FLEX IT

The fresh design of the DDJ-FLX6-GT introduces a new look and feel for its full-size jog wheels, which feature a graphite color plus a metallic texture on top and a rubberized coating on the outer ring for improved playability. The new unit adds support for Virtual DJ (license available separately), and retains free compatibility with rekordbox and Serato DJ Pro. TRAKTOR PRO 3 is available to use by downloading its mapping files.

### All-new Merge FX

Add drama to your sets and easily mix different styles of music. No matter what the BPM or key of the next track is, you can create an exciting transition whenever you want. Simply press the knob and turn it as fast or as slowly as you like to start building up the tension in the music.

### Firmware Update Manager

You'll be automatically notified when firmware updates become available.

### Full-size jog wheels with track position display

Pitch bending and scratching feels natural thanks to the large jog wheels, which are the same size as those on the flagship CDJ-3000 multi player. Each one features On Jog Display too, so you can keep an eye on the playhead position.

 rekordbox

 serato DJ Pro

**VIRTUAL DJ**

**Support for Virtual DJ**

Virtual DJ is compatible with the updated unit (licenses available separately), which also offers free use of the rekordbox Core plan and Serato DJ Pro. The DJ controller also comes with license keys for the Serato FX Pack, Pitch 'n Time DJ Expansion Packs and TRAKTOR PRO 3 TSI file, which will be released.

With a built-in sound card, all you need to do is connect the DDJ-FLX6-GT via USB cable to a laptop that's running a compatible software and you can start DJing right away.

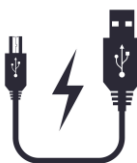

**Updated design with a graphite color brings a sophisticated look**

The layout of the controls on the DDJ-FLX6-GT is the same as its predecessor, echoing club-standard CDJ + DJM setup, so you can perform intuitively. However, a new matt grey body and the graphite color of the jog brings a sophisticated look.

**4-channel mixer**

The mixer section has 4 channels, so you can freely create mashups or scratch on the fly.

**USB bus powered**

Simply connect the controller to your computer using the included USB cable.

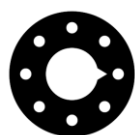

**Class compliant**

Plug your DDJ-FLX6 into your PC/Mac and start DJing - there's no need to install an audio driver.

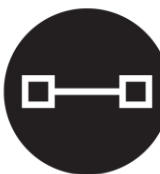

**Performance Pads**

Hit the 8 back-lit rubber Performance Pads to trigger Hot Cues, Pad FX, Beat Jump, and the sampler.

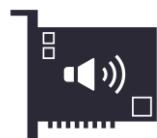

**FX Pack**

The Serato FX Pack is included. Get creative with Single FX mode or Multi-FX mode for in-depth control.

**Pitch 'n Time DJ**

The Serato Pitch 'n Time DJ Expansion Pack is included.

**Built-in sound card (audio interface)**

Thanks to a built-in sound card, the DDJ-FLX6 connects straight to your speakers or amplifier via a single RCA cable. Plus you can record to rekordbox using the same USB connection.

# DDJ FLX10

## CONTROLLER

4-channel DJ performance controller for multiple DJ applications

### SPLIT.MIX.CREATE

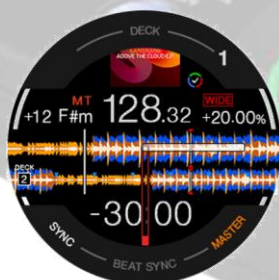

The DDJ-FLX10 is a 4-channel performance DJ controller for rekordbox and Serato DJ Pro. It includes a host of brand-new features including Track Separation technology, which enables new creative possibilities such as the easy performance of mash-ups on the fly with no need to prepare tracks in advance.

### Expanded On Jog Display

Customize the information you see on the jogs so there's no need to take your eyes off the decks. Choose from 4 modes, some of which show 3 Band Waveforms (rekordbox only), and keep an eye on Mix Point Link and rekordbox vocal position analysis information, as well as Performance Pad status.

Deck Info mode

Waveform mode

Artwork Display

DJ Logo Display

- **DECK INFO MODE**  
Shows the information about the deck, including the Overall Waveform. (When using Serato DJ Pro, this mode shows the virtual deck of Serato DJ Pro.)
- **WAVEFORM MODE**  
Shows the Zoomed Waveforms for 2 decks.
- **ARTWORK DISPLAY**  
Shows the artwork for the track that's playing.
- **DJ LOGO DISPLAY**  
Shows your own logo or favorite image on each deck after using the Image Transfer Tool for PC/Mac.

### Evolved MAGVEL FADER 4-sensor system

Improved from the 2-sensor system on the DDJ-1000, the MAGVEL FADER on the DDJ-FLX10 uses a 4-sensor system. This allows you to make the tiniest volume adjustments, no matter how small the movement of the crossfader, enabling more musical performances.

### rekordbox and Serato DJ Pro compatibility

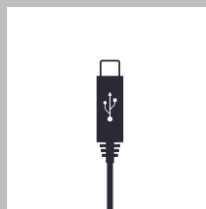

The DDJ-FLX10 offers free plug-and-play compatibility with rekordbox and Serato DJ Pro, giving you hands-on control of your favorite software application. DVS support is available for rekordbox via selected subscription plans, and for Serato via a paid license/subscription to Serato DJ Expansions or Serato DJ Suite.

### Track Separation for innovative performances including live mashups

Load the regular songs from your music library and create remixes and mash-ups on the fly by independently manipulating the 3 key parts of the music: vocals, drums, and inst (other instruments including bass and synths). There are dedicated color-coded buttons to control each part, so you'll always have a clear visual grasp of what's playing.

- **ACTIVE PART & PART ISO**  
Individually adjust the volume for the vocals, drums, or inst, or mute them completely.
- **FX PART SELECT**  
Choose which parts of a track you want to apply effects to.
- **PART INSTANT DOUBLES**  
Isolate a specific part of the track (vocal, drums, or inst) and transfer it to another deck.

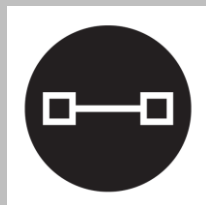

### USB Type-C

Connect your PC/Mac directly to the controller's USB Type-C terminal with a single cable.

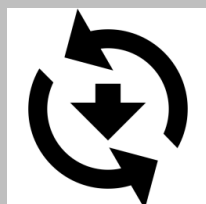

### Performance Pads

Hit the 8 back-lit rubber Performance Pads to trigger Hot Cues, Pad FX, Beat Jump, and the sampler.

### Pitch 'n Time DJ

The Serato Pitch 'n Time DJ Expansion Pack is included.

### Firmware Update Manager

You'll be automatically notified when firmware updates become available.

# DDJ XP2

## CONTROLLER

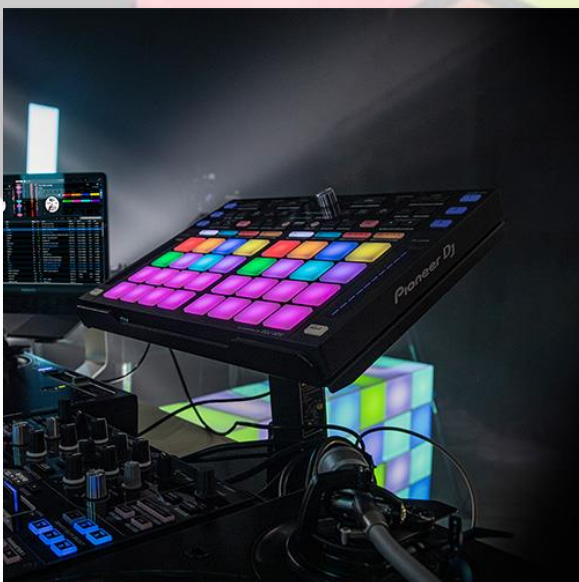

Sub controller for rekordbox & Serato DJ Pro

### Double Trouble

Level up with the DDJ-XP2 add-on DJ controller for rekordbox and Serato DJ Pro. No matter which DJ application you're used to, this DJ hardware will enable you to get more out of it than ever before. This DDJ-XP1 evolution adds to the functionality of the original, without sacrificing the intuitive layout and solid build quality. Its sturdy construction and non-slip rubber surround mean you can hit it as hard as you want during performances.

The DDJ-XP2 enhances your setup with 32 robust, multicolored Performance Pads, and puts powerful pad modes at your fingertips. Assign transport controls like play, pause, cue, and pitch up/down to the pads with Transport mode. Use 16 pads to control a single mode (a first for Serato DJ Pro). Trigger Silent Cue to soundlessly cue up tracks with the faders open on the mixer. Then instantly trigger them from Hot Cue points. And feel confident and in control during DJ performances thanks to the looping controls of our DJM-S9 flagship scratch mixer.

### Compatibility with rekordbox and Serato DJ Pro

The DDJ-XP2 feels natural with rekordbox or Serato DJ Pro. You can easily trigger the popular features of either application such as Hot Cues, Beat Jump, and Slicer. No matter which DJ performance application you choose, you'll craft creative, unique performances.

### Performance pads

Unlock the potential of your application's performance features with this low-latency DJ controller's 32 multicolored pads. They're tactile and built to remain touch-sensitive even if your DJ battles see you hit them hard, night after night.

### Slide FX

Dynamically control your chosen combination of FX by touching the Slide FX strips and moving your finger up and down, without needing to switch the selected FX on or off.

### 16-pad modes

Serato DJ Pro's 16-pad modes enable you to assign 8 pads each to two different features per deck, such as Hot Cues and Sampler mode. This means you can trigger Hot Cues and samples at the same time, without needing to switch.

### Transport mode

With Transport mode in both rekordbox and Serato DJ Pro, you can use the pads as transport controls for your music to play, pause, cue, pitch up/down tracks, and more. With rekordbox, all you need is your laptop.

### Silent cue

Avoid the music speeding up as your turntable starts to revolve by switching on Silent Cue. The music will restart instantly at the correct BPM when you trigger Hot Cues on a muted deck.

### Robust and portable design

You can rely on this controller to finish every battle strong, just like you. With a robust construction and non-slip rubber surround, it was built to withstand energetic finger drumming.

4 BEAT LOOP

1/2X

2X

### DJM-S9 looping controls

The DDJ-XP2 inherits the looping section of our DJM-S9 flagship scratch mixer to help you dominate every show.

### Serato DJ Pro

Enhance your Serato DJ Pro experience. Access advanced features such as Slip mode, Roll, and slicer. Just connect your DDJ-XP2 to DJ controllers or mixers compatible with Serato DJ Pro and start performing.

### Paid upgrade to Serato DVS

Pick up the Serato DVS Expansion Pack to control and scratch with CDJs or turntables.

rekordbox

### Performance features

Unlock rekordbox performance features by simply connecting the unit to your PC/Mac. And, if you subscribe to the Creative plan, use Cloud Library Sync for seamless library management across multiple devices, and easily make custom versions of tracks in Edit mode.

### DVS control

Make full use of rekordbox's low-latency DVS control for intuitive, smooth scratching.

# DDJ 200

## CONTROLLER

2-channel Smart DJ controller

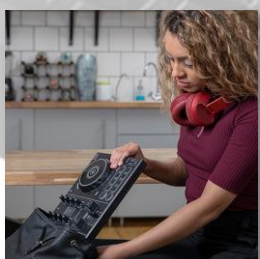

### Stream, Create, Experience

Start DJing with our easy-to-use DDJ-200 smart DJ controller. Lightweight and compact with a pro-style layout, it'll help you learn to mix and, if you want to, develop DJing from a hobby into something more. Put your own twist on the music as you mix for friends at parties.

### Compatible apps

Connect your smartphone, tablet, or PC/Mac to start mixing. A number of software programs and apps - including WeDJ for iPhone, WeDJ for Android, djay, edjing Mix and rekordbox - are compatible with selected devices. You'll also have free use of all the features in WeDJ for iPhone that normally require in-app payments.

### Compact lightweight body

The DDJ-200 is lightweight and portable. Leave the speakers at home and play sound from your smartphone, tablet, or PC/Mac's audio outputs. No outlet handy? No problem. Power the controller via an external battery.

### Transition FX

Just starting out behind the decks? Transition between tracks and make it sound professional with the Transition FX feature in WeDJ for iPhone. Choose from 11 effect styles and simply slide the crossfader to the other side to smoothly switch tunes.

### Split output

While everybody else hears the master sound through the speakers, you'll be listening to and cueing the next track on your headphones. Simply plug in split cables to separate the audio.

### Compatible streaming sites

Depending on your app and device combo, you can mix sounds via streaming services including Beatport, SoundCloud Go+, TIDAL, and even Beatsource.

WeDJ for Android is not compatible with streaming services.

### Tutorial & pop-hint

Our updated WeDJ for iPhone app includes Tutorial and Pop-Hint features. They'll help you learn how to operate the controller, discover the basics of DJing including common DJ terms, and have you mixing in no time.

### Switch tracks naturally

Our Phrase Sync feature will analyze and align the positions of 2 tracks. As a result, it will sound natural when you switch between tunes.

### Performance features

Unlock rekordbox performance features by simply connecting the unit to your PC/Mac. And, if you subscribe to the Creative plan, use Cloud Library Sync for seamless library management across multiple devices, and easily make custom versions of tracks in Edit mode.

# XDJ RX3

## ALL-IN-ONE

### 2-channel performance all-in-one DJ system

#### STATE OF FLOW

The XDJ-RX3 boasts flexibility and practicality while packing in a host of features that come straight from the club-standard CDJ-3000 multi player and DJM-900NXS2 mixer. With the brand-new 10.1-inch touch screen, you can instinctively browse playlists, mix tracks, and apply effects, and the unit's refined design brings a pro look to your setup.

#### 10.1-inch touchscreen with new interface

The 10.1-inch touchscreen is the largest ever on a Pioneer DJ all-in-one system. It features a high resolution and frame rate so you'll see everything clearly, including the smooth waveform. Plus, a fresh GUI design and a host of new features mean you'll enjoy easier navigation for quick browsing and accurate mixing. For example, you can touch any of the stacked icons on the left side of the screen to instantly display the relevant information for each track.

#### Color On Jog Display: Get a visual grasp of track information

The LCD screen in the center of each jog wheel indicates the playhead position and you can choose to display artwork for a quick visual reminder of which track is loaded on the deck. The responsiveness of the jog wheel rotation has been significantly improved compared to the XDJ-RX2 and you can make the 'weight' of each jog feel just the way you like with the Feeling Adjust control.

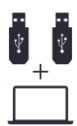

### Release FX: Inject new energy into your performances

By hitting the Performance Pads in Release FX mode, you can instantly change the energy of your mix, whether you want to add drama to a section of a track or create an exciting moment before transitioning to another song on the other deck. Choose from 8 effect types: Vinyl Brake (Short/Long), Backspin (Short/Long), Echo Out, Build Up, Mute, and Ducking.

### More Beat FX and Sound Color FX

The XDJ-RX3 includes all the effects from the XDJ-RX2, plus an extra 6 Beat FX and 2 additional Sound Color FX. So, you can play with the full range of effects from the DJM-900NXS2: 14 Beat FX including Ping Pong, Filter, Phaser, Slip Roll, Vinyl Brake, and Helix; and 6 Sound Color FX including Space and Crush.

#### 3 x USB ports

Perform back-to-back with another DJ and hand over smoothly thanks to the 3 USB inputs (2 top-loading for USB devices and 1 laptop connection).

#### 2 Mic inputs

The mic input circuit produces crystal-clear sound, even with a high input level.

#### Natural audio

Thanks to the new audio design of the circuit board, your audience will experience the music as it was intended to be heard.

LINK EXPORT

#### rekordbox Link Export

Play tracks directly from your laptop as if it were a USB drive via rekordbox Link Export mode.

#### USB Hardware Unlock

The XDJ-RX3 is a Hardware Unlock device, so you can use rekordbox Performance mode for free.

#### 4 x Aux and 2 x line/phono input terminals

Play music from your smartphone or any device with a stereo mini jack output thanks to the dedicated input on the XDJ-RX3. You can also connect CDs, turntables, or any sound source via the 2 x line/phono input terminals.

#### Gate Cue

Experiment with your pad play using Gate Cue, which plays the music from the cue point only when you press the pad. Take your finger off the pad and the music stops instantly, and silently returns to the cue point.

#### Serato DJ Pro

The XDJ-RX3 supports the control of Serato DJ Pro. Use the multi player to browse your Serato DJ Pro playlists plus the catalogs of linked streaming services.

# XDJ XZ

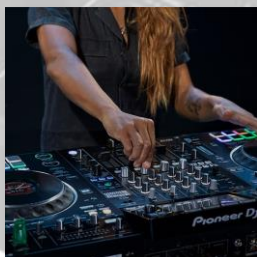

## ALL-IN-ONE

### Professional all-in-one DJ system

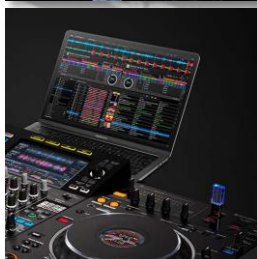

#### **The Powerhouse**

The XDJ-XZ is a professional all-in-one DJ system that's perfect for events, a bar or club, or your private studio. Wherever you take it, the XDJ-XZ gives you all the features you need to get the job done. This 4-channel system features a professional layout - so you'll feel exactly like you're using our club-standard NXS2 setup.

#### **Controls optimized for professional performances**

Feel like you're playing on the NXS2 setup and get hands-on with all the features you need. Full-size jog wheels enable next-level scratching, and color On Jog Display gives you crucial track information. Add flair with 14 Beat FX and 6 Sound Color FX.

#### **Flexible media support**

Enjoy the freedom to play the way you want. Plug in a USB drive loaded with rekordbox-analyzed tracks or connect a laptop to use rekordbox or Link Export mode. Works with Serato DJ Pro.

#### **Superior sound quality and multiple EQs**

Rev up the crowd with crystal-clear audio thanks to the 64-bit digital signal processor. Fine-tune your entire mix using the 3-band master output EQ. The Feedback Reducer feature stops any "howling" from occurring on the mic, keeping things smooth.

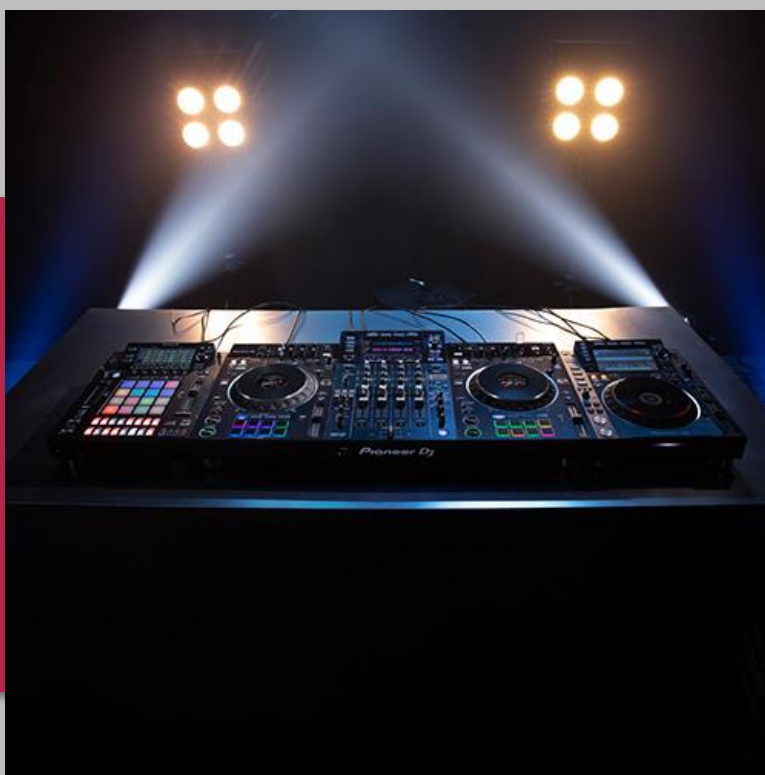

### Touch screen and color On Jog Display

Keep track of all the information you need and focus on your performance. Waveforms, Hot Cues, BPM, and more is displayed via the 7-inch LCD touch screen and the color On Jog Display in the centre of each jog wheel.

### Pro DJ Link expands your creative options

The XDJ-XZ is the first all-in-one DJ system to support Pro DJ Link. Connect equipment like CDJs to the 3rd and 4th channels and sync the audio to your mix. Use the XDJ-XZ's screen to browse the libraries from the external sound sources.

#### LINK EXPORT

### 16 Performance Pads

Trigger software-specific features with 16 multicolored Performance Pads (eight per deck).

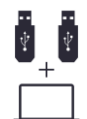

### Easy to carry

Be ready to play at a moment's notice. The single-unit design with grab handles makes carrying and setup easy.

### Link Export mode for rekordbox

Play tracks directly from your laptop via Link Export mode. You can connect up to 2 laptops at the same time.

### 3 x USB ports

Perform back-to-back with another DJ and hand over smoothly thanks to the 3 USB inputs (2 top-loading for USB devices and 1 laptop connection).

### 2 Mic inputs

The mic input circuit produces crystal-clear sound, even with a high input level.

# XDJ RR

2-channel all-in-one DJ system

ALL-IN-ONE

## Bedroom to main room

Take your performances to the next level with the XDJ-RR all-in-one DJ system for rekordbox. This 2-channel DJ solution inherits design traits and essential features from our professional NXS2 multi player and mixer and packs it all into one lightweight, portable piece of kit.

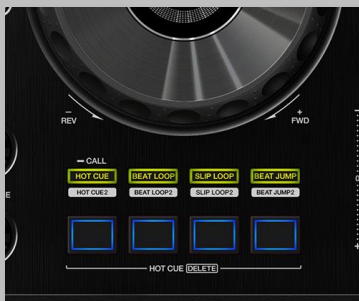

## Play your own way

The XDJ-RR lets you choose how you'd like to perform. You can plug in your USB drive and play tracks directly, use Link Export mode to access your entire rekordbox library via your laptop without needing to export your music to a USB drive, or, if you'd prefer, you can connect your PC/Mac with a single USB cable to harness Performance mode in rekordbox. It's all up to you.

## Large colour screen

See what's happening on both players simultaneously via the 7-inch colour screen. Keep an eye on the playback status, BPM, waveform, and other information vital to performing creative, smooth sets.

### Performance controls

Enhance your mixes using dedicated buttons for performance features. Remix tracks live by triggering Hot Cues in fresh sequences, chop loops on the fly with Beat Loop, use Slip Loop to re-introduce tracks in the perfect place, and bounce to the bar of your choice with Beat Jump.

### Mixer with pro features

Deliver fine-tuned mixes with the help of EQs and channel faders which feature the same curves as those on our professional club mixer, the DJM-900NXS2. You can also customise your routines with the popular Beat FX - Echo, Reverb and Flanger - and dial up the texture and tension with Sound Color FX - Filter, Noise, Dub Echo and Pitch.

### Lightweight and portable

Weighing in at just 5.2kg, transporting your kit to practice sessions, house parties and gigs is a breeze.

### Dual USB-A ports

Connect 2 USB drives at the same time for seamless DJ transitions, back-to-back performances or as a reserve, just in case.

### Press record

Record your mix directly to a USB drive and load it into your rekordbox library for easy editing.

### External audio input

Plug in an AUX cable to play music from your mobile phone or other devices.

### Performance features

Unlock rekordbox performance features by simply connecting the unit to your PC/Mac. And, if you subscribe to the Creative plan, use Cloud Library Sync for seamless library management across multiple devices, and easily make custom versions of tracks in Edit mode.

# OPUS-QUAD

ALL-IN-ONE

Professional all-in-one DJ system

## The Art of Sound

This new professional all-in-one DJ system puts you in control of the music, like the conductor of an orchestra. Creating harmony between beautiful design and musical playability, it includes new and evolved features such as standalone 4-deck playback. All this combines to provide a spectacular DJ experience that you can harness to inspire your audience in any space or location.

## Harmony between brand-new beautiful design and musical playability

The OPUS-QUAD introduces a completely fresh approach to DJ equipment that harmonizes design and playability. Raising the level of elegance in musical direction and the space the music fills, it helps create a special experience for your audience.

## Standalone 4-deck playback for versatile DJ performances

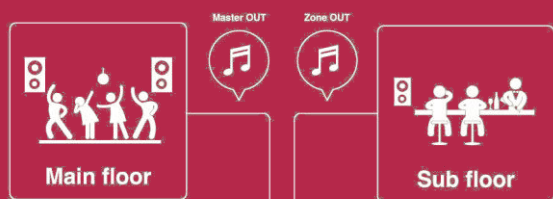

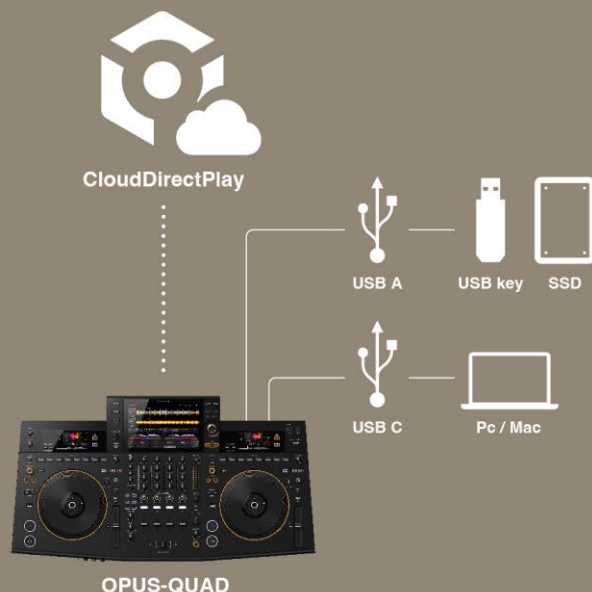

The OPUS-QUAD offers standalone 4-deck playback for versatile DJ performances. This means you can play 4 tracks on 4 different decks simultaneously, cue up tracks in advance, or leave a deck free for dropping requests into your set at a moment's notice - all with just one unit. You can also assign a different color to each deck, which is matched by the jog ring illumination, so you'll always know which deck you're playing with.

### Support for multiple media sources to match different playing styles

How do you like to play? From USB thumb drives or huge SSD drives? By plugging in your PC/Mac that's running DJ software? By connecting via Wi-Fi® to wirelessly play tracks from your smartphone using rekordbox (coming April 2023), or by using rekordbox CloudDirectPlay?

You can draw from various music libraries with just 1 OPUS-QUAD and you can even pair a mobile device via Bluetooth®/MD wireless technology - perfect if you want to quickly drop a request into your set.

**OPUS-QUAD**

### Zone output for playing different music in different spaces

Thanks to the zone output - which can output sound that's separate from the master - you can play different music in different rooms from just 1 OPUS-QUAD.

For example, you could connect a phone to the unit via Bluetooth and set a playlist of background music to play quietly in a bar area or second room where people are socializing while you mix tracks from a USB device in the main room.

#### Beat Loop knob

Using just one knob, you can turn on/off and change the length of a Beat Loop.

#### Firmware Update Manager

You'll be automatically notified when firmware updates become available. You can download the Firmware Update Manager [here](#).

#### 2 mic inputs

The mic input circuit produces crystal-clear sound, even with a high input level.

#### LINK EXPORT

#### rekordbox Link Export

Play tracks directly from your laptop as if it were a USB drive via rekordbox Link Export mode.

#### SMOOTH ECHO

#### Smooth Echo

Assign the Smooth Echo effect to your choice from a selection of controls, e.g. a fader or pad. Then, when you turn on Smooth Echo with its dedicated button, the echo will be triggered as soon as you move the relevant control.

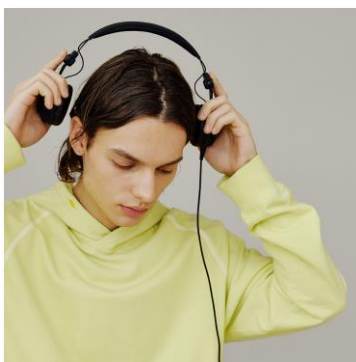

# HDJ CX

## HEADPHONES

### Professional on-ear DJ headphones

#### ESSENTIAL AUDIO

These brand-new super-lightweight professional on-ear DJ headphones are so lightweight you might forget you're wearing them. Specially designed for absolute comfort and tuned to deliver outstanding sound quality for mixing and monitoring music, they're also built to last.

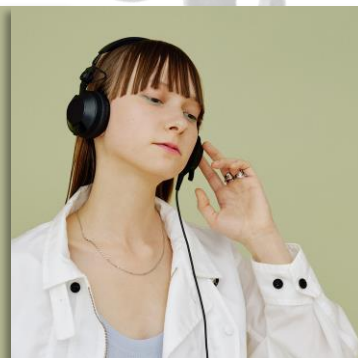

#### Highly robust construction

Don't let the lightweight feel of these headphones fool you - they're rugged and built to last. All the components are extra tough, including the steel core of the headband. Made to withstand the rigors of constant use on the road, they've passed demanding tests that other professional Pioneer DJ headphones are subjected to, as well as the stringent US Military Standard MIL-STD-810H Shock test.

#### Lightweight and flexible design

You can wear the HDJ-CX comfortably from your first mix to your last. Weighing just 136 g without the cable, they're ergonomically designed to minimize any stress to your head, neck, or shoulders. What's more, the stainless steel headband features a ladder-like structure for extra flexibility and stress resistance so you can easily find your perfect fit.

#### Tight, wide-ranging sound and superior insulation

The new PEEK-PU-PEEK composite film diaphragm provides tight sound with a frequency response of 5 Hz to 30 kHz. This means you can clearly hear the kicks, snare drums, and hi-hats for precise monitoring and mixing in any environment. The  $\phi 35$  mm driver units realize the input power to reach 2,000 mW and the bass reflex chambers in the housings improve low frequency response even further while the sound insulators create a higher level of audio insulation, so you'll hear the full bass sound along with every nuance in the music.

# HDJ CUE1

## HEADPHONES

Monophonic analog synthesizer

### **My Style, My Cue**

Start your DJ journey with HDJ-CUE1 headphones. These styled DJ headphones are built on DNA from our pro models but are available at a much more modest price.

While these entry-level cans are our most affordable pair yet, they match many of the feature and quality benchmarks set by our professional headphones range. Choose the HDJ-CUE1 for a pro look and feel, rich sound, compact and flexible design, and high-quality finish. Enjoy specialist sound tuning inherited from the pro-level HDJ-X5; perfectly hear low frequencies in the bass and kick drums so you can mix precisely and know exactly what your friends will hear when you drop the next track.

### **Customizable look**

Personalize your look and express yourself by switching out the cable and earpads for one of 5 brightly colored replacements. Our separately sold HC-CP08 accessory pack is available in orange, yellow, green, blue, and pink.

### **High-quality sound**

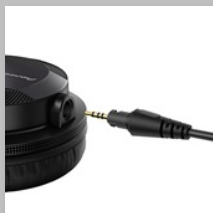

Hear the full richness of your music when DJing or just listening to a favorite track. Dynamic drivers enable you to feel the bass and hear mids and high-end sounds with crystal clarity, helping you to mix with pin-point precision.

### **Built to last**

Each HDJ-CUE1 model can handle the heavy stress that DJing places on headphones. All moving parts have passed our strict-in house durability tests and extra-strong metal sliders in the headband bring added reliability.

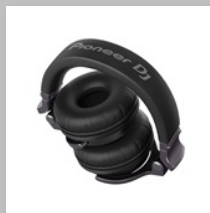

### **Comfortable pro-style design**

With ear cups that turn a full 90 degrees and a flexible, cushioned headband, you can comfortably monitor your mix your way. Listen with one ear while the other cup rests on the back of your head, or while your headphones are draped around your neck.

### **Detachable cables**

A detachable 1.2m short-coiled cable is included, giving you freedom to move while performing, and its bayonet connector prevents accidental disconnections.

### **Compact and portable**

The lightweight, folding design means you can easily take your headphones wherever you go.

# HDJ X5

Over-ear DJ headphones

HEADPHONES

## Prime sound quality

Hear your tracks loud and clear in the booth and on the move with the HDJ-X5. By taking on board feedback from DJs and analysing many different styles of monitoring, we've made sure our new DJ headphone range includes all the features needed for performing at every level. Thanks to the high-quality audio design inherited from our previous professional DJ headphones, you can enjoy distortion-free monitoring, even at high volumes, wherever you go.

The HDJ-X headphones are designed to be flexible. Their swivel mechanism allows you to wear them comfortably, whichever way you prefer, for long periods of time. No need to worry about bumps and knocks during transport as these DJ headphones can handle severe conditions and heavy use. They even cleared the US Military Standard Shock test.

## Outstanding sound

With a new 40-mm driver, hear your tracks loud and clear. The 4-core twisted-structure cable gives superior left and right channel separation and the magnetic circuit is optimised so, thanks to fine noise suppression and elaborate tuning, you can enjoy distortion-free sound.

## Comfortable fit

These headphones are comfortable to use no matter how you wear them. The housing design reduces pressure on your head, while its outside texture enhances grip. To help you find the perfect fit, they also feature a flexible, durable headband and a flexible swivel.

## Solid, refined design

All the HDJ-X headphones feature a refined look and durable construction. Choose from black or silver versions to complete your desired look.

## Excellent portability

A compact carry pouch fits snugly around your folded headphones to save space in your luggage and reduce the risk of damage on the road.

## Replacement parts available

Easily renew the detachable cables and ear pads with replacement parts (sold separately).

## HEADPHONES

### Flagship over-ear DJ headphones

#### The professional standard

Stay on top of your game with the flagship HDJ-X10 over-ear headphones. Refined with input from professional DJs to serve you at festivals, clubs and everywhere in between, they'll change the way you experience music. Producing high-resolution sound ranging from 5 Hz to 40 kHz thanks to a new 50mm driver, they're ideal for DJ monitoring, delivering clear left and right channel separation as well as greater separation of rich bass tones and crisp mid to high frequencies.

Designed to be flexible and wearable for long periods of time, their swivel mechanism allows you to wear them comfortably, whichever way you prefer. The polyurethane leather ear pads and headband cushion are resistant to deterioration thanks to the use of nano coating, so you can easily wipe off sweat and dirt. Don't worry about bumps and knocks during transport - these DJ headphones can handle severe conditions and heavy use. They've even cleared the US Military Standard Shock test\* to ensure they withstand whatever the tour throws at you.

#### Outstanding sound

The HDJ-X10 headphones come with a detachable 1.2 m coiled cable and a 1.6 m straight cable, plus an L-type mini-jack to prevent accidental disconnection.

#### **Excellent portability**

A flat carry case designed to easily fit in travel bags protects your headphones from any damage on the road and provides room to store USB devices and SD cards.

## MONITOR SPEAKERS

### Class D amplifier

Each DM series speaker produces pure, balanced bass sound thanks to a new Class D amplifier with 96kHz sampling DSP.

### Grooved ducts

The grooves on the ducts reduce air friction so bass is tight and punchy, even if you position the speakers against a wall. Plus, the curved front edges provide maximum rigidity and minimum resonance for clean audio at any volume level.

### SET THE SCENE

The DM series speakers deliver balanced, punchy bass sound and they can pump out extra power thanks to the new Class D amplifier and 4-inch woofer in each unit. Flick the switch to change from DJ mode to Production mode and the DSP settings will automatically create the best sound for each application.

### 2-way sound mode - optimized for DJing and music production

There's no need to decide whether you want a set of monitors that are best for DJing or making music, because the DM series speakers are perfect for both. Just flip the switch to choose either DJ mode or Production mode and the DSP settings will be optimized for the task, leaving you free to concentrate on your mix.

### Easy to use with different DJ or production equipment

With RCA and mini jack terminals you can connect different kinds of gear such as DJ controllers and mixers, or the laptop or soundcard you use. Connecting your headphones is simple via the socket on the front panel and the level knob is right in front of you too.

### DECO convex diffusers

Another advancement from the DM-40 model comes in the updated design of the DECO convex diffusers which help deliver crystal-clear high frequencies in every direction, so you can enjoy a wide sweet spot and 3D stereo sound wherever you are in the room.

# VM 50

5" active monitor speaker

## MONITOR SPEAKERS

Clear, low-distortion audio with fast-attacking bass: Recreate club-style sound.

### FIND YOUR FREQUENCY

The active VM-50 produces clear audio with fast-attacking, punchy bass. The speaker can be tuned to suit the characteristics of any room, making it perfect for recreating a club sound when you're DJing or providing a flat frequency response when you're producing music in a home or professional studio setting.

Class D with 96kHz DSP

LF: 30 W / 4 Ω

HF: 30 W / 4 Ω

### High-quality components

Every VM series speaker includes a Class D amplifier with 96 kHz sampling DSP to enable wide-bandwidth audio reproduction. Its highly efficient performance results in low distortion and high-energy sound. The 4-mm-thick rigid aluminum front baffle further suppresses resonance and vibrations, delivering sound that's authentic to the original source.

### Constant directivity horn

Mid and high-frequency horn sounds are delivered with power thanks to the constant directivity horn, which also creates a broad, uniform listening space. The shape of the horn and the woofer edge are specially designed so the flat playback frequency crosses over to the tweeter easily, resulting in a natural sound.

### DSP control

All VM series speakers are voiced flat to ensure you hear the natural sound of the music. To help you tweak the output and find the sound that's perfect for the room you're working in, each speaker includes DSP settings. On the rear panel, you'll find 2 knobs: Low EQ and High EQ. Without needing to look, you can click the knobs into 4 different positions each, giving you 16 possible EQ settings that are simple to engage. Choose the one that sounds best for DJing or producing music in your home or studio, depending on the shape, size, and construction of the room.

HF: 30 W / 4 Ω

## Aramid fiber woofer cones and Vortex Bass Accelerator

Aramid fiber woofer cones provide outstanding punch that you'll feel in the bass and low-mid frequencies. These newly developed cones are 30 percent lighter than conventional paper-lined Aramid cones, making them stronger with deeper sound.

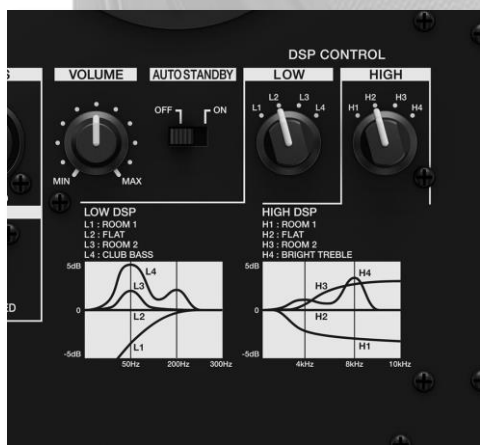

The Vortex Bass Accelerator ensures that low-end audio is tight and free from unwanted vibrations, as ribs in the bass reflex port mean that air flows freely from the speaker to deliver pure sound.

## Constant directivity horn

Mid and high-frequency sounds are delivered with power thanks to the constant directivity horn, which also creates a broad, uniform listening space. The shape of the horn and the woofer edge are specially designed so the flat playback frequency crosses over to the tweeter easily, resulting in a natural sound.
