Case Studies

The Client

Champneys is one of the UK's leading wellness destination spas. A spa pioneer since 1925, the four elegant countryside health spa resorts and two luxury spa hotels have helped guests to rest and reenergise for generations.

The Brief

With a drive to be more environmentally focused, Champneys were looking to move away from offering plastic carrier bags within the business. At the same time, it was imperative to maintain an element of luxury and quality when looking at paper alternatives. The colour palette also provided a challenge as it was based on coated substrates which can be impacted when moving to uncoated paper.

The Solution

The result was an elegant and simple twist handle carrier bag. We worked with colour experts to draw down colour references from their existing products and created a new uncoated colour reference to exactly match their boutique style gift bags allowing them to make the move from plastic to paper without compromise.

Testimonial

“Having worked with the Carrier Bag Shop for years on our luxury paper carrier bags, this project has been a seamless transition as we have moved away from plastic. We were initially concerned that we might not have the bag strength we needed in a paper alternative but the twist handle carrier bag was the perfect combination of function and design. It has allowed us to offer a fully recyclable option in our boutiques and enabled us to continue our drive towards greater sustainability across all levels of our business.”

The Client

Royal Museums Greenwich is an organisation comprising four museums in Greenwich, London. The National Maritime Museum, Queen's House, Royal Observatory, Greenwich and Cutty Sark. They wanted to collaborate with us to create a bespoke paper bag that featured their iconic logo.

The Brief

To replace the plastic bags for the retail shops with a new range of paper carrier bags. The design was to be sophisticated and attractive and to adhere to the corporate colours and guidelines incorporating the RMG branding.

The Solution

Knowing that the RMG were looking to reduce their use of plastic packaging we designed and manufactured for them a range of paper bags made with 100% recyclable FSC kraft with part recycled content. Also RMG were also looking to encourage their customers to reuse their packaging and so we printed the "Reduce, Reuse, Recycle" message on the base to discourage from single use.

Testimonial

"It was a pleasure to work with Rocaba on our bespoke paper bag project at Royal Museums Greenwich. Rocaba were keen to collaborate and took time to understand our brief, offering design support and following up efficiently through a number of revisions to arrive at the final product. We're thrilled with the end result and have received excellent feedback both internally and externally."
