**Arcusd on ArchieChain**

Our ArchieVault dApp is made exclusively for our ArchieChain for our holders to Buy & Sell ArcCoin (SARC), native coin of ArchieChain in Defi.

**Why Archie Vault ?**

We are not listed in any CEX and our holders are not able to buy our native coin \$ARC. So, we created our own Defi Exchange of Archie Vault.

In the first phase, you are able to swap your ETH (Ethereum Network, BNB (BSC Network) and MATIC (Polygon Network) and paying a low 1% fee to convert to ARCUSD (stable coin of ArchieChain).

Upon enabling the transaction, you will receive your ARCUSD in your Archie Network Wallet (see pdf how to add archie net work to your metamask wallet) along with 10 ARC (you must have ARC on ArchieSwap to fuel the transaction) as a reward. You must import ARCUSD contract (copy contract here) and ARC does not need a y contract since it is native coin of ArchieChain.
