## A Message from Intricate

Intricate is an energy services provider of regulatory consulting, field services, and software. Our company is strategically designed to provide sustained value and end-to-end solutions.

We have grown into a diverse company with a flourishing portfolio of service offerings and a growing reputation for Effective Solutions, Exceptional Results.

Our purpose is to create long-term value for our employees and customers through innovative service and products that cement us as a generational, impactful, and diverse company.

At Intricate, we strive to foster growth, improve, and innovate by maximizing the contributions of our employees and customers alike. We are committed to providing the best systems and solutions in all areas of the business, while embracing diversity of thought.

We are dedicated to be a company that grows with our customers and makes a positive contribution to society.

Thank you for your business!

Greg Howell | Founder & CEO

## Who We Are

Founded in 2007, Intricate's corporate office is in Sherwood Park, AB. We strive to deliver quality and cost-effective services to our customers, allowing them to maximize their operational performance.

## What We Do

Intricate offers regulatory consulting, field services, and software. These services and products deliver value-added solutions that improve quality, efficiency, and reduces cost.

## Who We Serve

Intricate services clients in the oil and gas industry. Our expertise and experience in the energy sector enables us to provide tailored solutions to help our clients succeed and reach their goals.

## Our Purpose & Core Values

Our purpose is to create long-term value for our employees and customers through innovative services and products that cement us as a generational, impactful, and diverse company.

Regulatory Consulting

# Measurement & Regulatory

Intricate provides comprehensive measurement and regulatory consulting services that help organizations maintain compliancy and uncover savings through improved accuracy and efficiency.

We specialize in the following areas of measurement and regulatory consulting:

- Directive 017 Support and Advisory
- Directive 060 Support and Advisory
- Drafting
- EPAP
- Field Measurement Coordination
- Measurement Exemptions
- Measurement Reviews
- Measurement Schematics
- Resource Placement

# Emissions

Intricate provides comprehensive emissions consulting services to help ensure companies are fully compliant with federal and provincial regulations. Our innovative solutions are tailored to meet the individual needs of our clients.

- Carbon Offset Project Development and Coordination
- Emissions Program Development and Management
- Emissions Reporting (NPRI, GHG, TIER, One Stop, MSAPR)

# Carbon Credits

Intricate can help you turn your emissions reduction efforts into a revenue stream while making a positive difference for the environment and improving environmental, social, and governance (ESG) standards leading to increased investor value, with their carbon credits services.

With Intricate's help, companies can develop carbon credits and navigate the carbon credit landscape with services such as project design, protocol selection, project implementation, verification, and credit trading.

Let Intricate help you turn your emissions reduction efforts into a revenue stream and make a positive difference for the environment.

### Offset Project Quantification Includes:

$$\text{Emission Offset (tCO2e)} = \text{Baseline Emissions (tCO2e)} - \text{Project Emissions (tCO2e)}$$

Energy Services Provider of Regulatory Consulting, Field Services and Software

# Carbon Credits

## Discover New Opportunities

Identify new areas for growth and uncover previously unrealized revenue streams within existing operations.

## Receive Guided Support

Identify a route to generate revenue and direct access to international carbon trading markets.

## Drive Your Revenues

Creating recurring revenue streams is achievable through the utilization of production solutions that are both secure and scalable.

## Use Our Proprietary Technology

Streamline and quicken the credit creation process while still upholding the highest standards by utilizing our software solutions.

# Instrumentation & Measurement

With years of experience and a commitment to quality, safety, and reliability, our team of experts provides everything from selection and installation of the right instruments and sensors for the application, to calibration and testing, to ongoing maintenance and repair.

- Emission Sources
- Field Data Collection
- Meter Calibrations
- Meter Inspections
- Meter Proving
- Sampling and Analysis
- Schematic Updates
- Shutdown Checks

# Emissions

Our team of experts are dedicated to providing high quality, efficient, and cost-effective solutions. This helps our clients reduce their carbon footprint and meet their sustainability and regulatory objectives and goals.

Intricate offers the following emissions services:

- Carbon Offset Project Delivery
- Compressor Seal Vent Testing
- Emission Source
- Field Data Collection
- Fugitive Emission Surveys (LDAR)
- MSAPR Engine Testing

## What Are Bundled Services?

Our focus is to add value to our clients through strategic bundling of multiple service offerings. Although we do perform these services individually, Intricate has customized our service equipment, field software applications, and internal staffing to focus on a full-service provider approach.

Taking a strategic approach in completing traditionally required services provides immediate cost savings and efficient delivery of regulatory requirements.

The bundling of services include instrumentation, measurement, and emissions management activities.

i

# Software Modules

We provide customizable software modules and accompanying support and training services to help businesses streamline their processes and increase efficiency.

**DEHY**

## Glycol Dehydrator

Manage dehydrator and refrigerator inventory. Manage schedule, emissions simulations, and DEOS.

**EMIS**

## Emissions

Manage and report the volume, mass and intensities of emissions as well as specific air contaminants.

**FEMP**

## Fugitive Emissions

Schedule surveys screenings and FEMP activities. Gather leak data through the web or mobile application. Manage leak repairs and quantification.

**FFVS**

## Fuel, Flare, and Vent System

Manage inventory and quantification of emitters. Facilitate workflow and approvals for fuel, flare and vent volumetric and mass reporting.

**FTA**

## Field Tech App

Mobile data collection and validation. Data capture online or offline with offline data locally stored for upload later.

**MMMS**

## Meter Maintenance Management System

Management of field meters through scheduling, validation, approval, data management, trending, and reports.

# Software Modules

## **MSAPR**

### **Multi-Sector Air Pollutants Regulations**

Manage testing schedules, inventories, and reporting for stationary combustion engines, heaters, and boilers.

## **MSS**

### **Metering Schematic Management System**

Document control and redlining management tool with interactive interface to sample, meter, fuel-flare-vent, and production data.

## **OE**

### **Operational Excellence**

Management of field sample points through scheduling, validation, approval, data management, trending, and reports.

## **SAMS**

### **Sampling and Analysis Management System**

Management of field sample points through scheduling, validation, approval, data management, trending, and reports.

## **SCADA & CDMS**

### **Supervisory Control and Data Acquisition & Centralized Data Management System**

Field data capture and support daily operations. Manage operations from small to large and complex industrial processes. Centralized data from SCADA and third party systems.
