Wetherby Racecourse - 24th September 2025

We're proud to welcome you to the DCS Technology Showcase - a one-day event bringing together customers, partners and technology leaders in the unique and inspiring setting of Wetherby Racecourse.

This event is more than just a showcase of services and products. It's an opportunity to experience the partnerships and technologies that are driving digital transformation across every industry. Whether you're an existing customer, a new face, or a strategic partner, today is about connection, conversation and exploring the real-world value of smarter IT.

Throughout the day, you'll have the chance to meet our team, engage with live product demonstrations and hear directly from our key technology and software solution partners. From cybersecurity and cloud strategy to business continuity, AI, next generation accounting/ERP software, accounts payable automation, mobile sales solutions, web-shop and warehouse management systems to enhance productivity; we've designed this event to be relevant, practical and forward-thinking.

We're joined today by leading vendors from across our partner network to share their insights, solutions, and innovations with you. This is your opportunity to ask questions, see systems in action, explore how we can help your organisation stay protected, be productive, and prepared for the future.

We'd also like to thank our partners for their continued collaboration and our customers for trusting us to deliver technology solutions that make a difference. Events like this don't happen without people - and today is about the people behind the tech.

From all of us at DCS, thank you for joining us - we hope you enjoy the day.

“It's a real pleasure to welcome you to our Technology Showcase at Wetherby Racecourse. This event is all about people - the customers we support, the partners we trust, and the team that brings it all together. Technology is moving fast, but great relationships move businesses forward. Thank you for being here - we're glad to have you with us.”

Peter Rogerson - Chairman

Meet Our Partners & Exhibitors

We are joined by a selection of leading technology vendors and solution partners who play a vital role in the services we deliver at DCS.

Each partner attending today brings specialist expertise - from cybersecurity and backup to cloud productivity, software and infrastructure. Whether you're here to explore new capabilities, ask questions, or simply connect with the people behind the platforms; our exhibitors are here to help.

You'll find vendor representatives across the exhibition space, ready to share insights, demonstrate solutions and discuss how their technologies support your business goals. Don't hesitate to start a conversation - today is all about collaboration.

You'll find a diverse range of industry specialists across the event space - from software developers and mobile solution providers to cloud platforms, cybersecurity experts and telecoms partners. Each one brings something unique, whether it's helping businesses work more efficiently, stay connected, or protect their people and data.

These partners play an essential role in delivering the services and solutions our customers rely on every day. Their technologies power everything from finance systems and workforce management to email protection, collaboration tools and mobile sales enablement - all supported by a shared focus on reliability, innovation and real-world business value.

What makes this group stand out is their ability to meet the needs of modern organisations - not in isolation, but as part of a wider ecosystem. Many of today's challenges require solutions that cross over departments, platforms, and teams. The vendors here understand that, and their products are built to work alongside the systems you already use.

We're proud to work with each of them, and even prouder to have them here with us today. Take the time to speak with them, see their solutions in action and discover how they can support your business - not just today, but into the future.

Intact

Established in 1992, Intact is an independent ERP provider supporting merchants, wholesalers, and retailers across the UK. Its flagship platform, Intact iQ, is a flexible, end-to-end solution with mobile access and industry-specific features that adapt to each business. With expert implementation and ongoing support, Intact delivers a personalised ERP experience built for growth.

Pegasus Software

Established in 1981, Pegasus develops powerful and secure business software built on Microsoft technologies. Their newly released Data Connector enables deep data interrogation via AI tools, Power BI, and Power Apps. With flexible deployment options, Pegasus solutions are designed to future-proof your business -from Financials and Supply Chain to Payroll and Contract Costing. Their flagship AP Automation for Opera SQL SE also transforms accounts payable and online purchasing processes.

iplicit

iplicit is a true-cloud finance and accounting platform built for mid-sized organisations that have outgrown entry-level systems. It offers powerful financial management, including multi-entity consolidation, automated bank reconciliation, and real-time reporting—all accessible from any modern browser. Designed to simplify complex finance processes, iplicit enables custom workflows, multi-currency handling, and seamless integration, helping finance teams save time, reduce manual work, and focus on strategic growth.

Skynamo

Skynamo is the all-in-one field sales ordering and CRM app that makes sales make sense. For manufacturers, wholesalers, and distributors with reps who make regular customers visits, Skynamo cuts admin by 50%, boosts productivity by 25%, and increases sales by 30% in the first year! From real-time order capture from your full-colour digital catalogue, to customer visit tracking and automated reports, Skynamo also seamlessly integrates with your ERP so you get more sales -simplified, streamlined, and finally making sense.

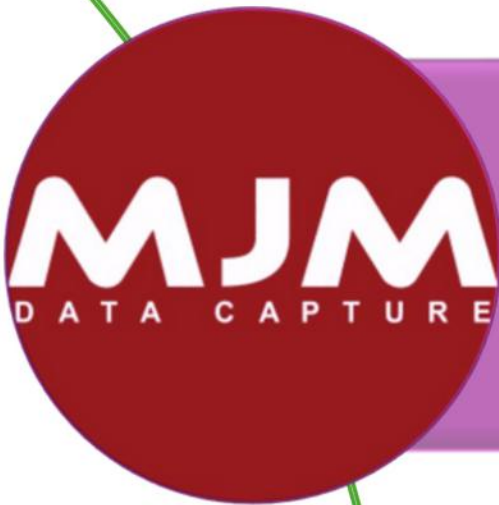

Enterprise Imaging Systems

EIS specialises in digital transformation for document and accounts payable management. Their TraX platform automates key processes; capturing documents, routing approvals, and integrating with ERP and accounting software, while offering secure, cloud or on-premise storage and mobile access. Used by over 1,000 organisations, their scalable solutions streamline workflows, boost visibility, and significantly reduce manual effort across finance and operations.

JustApplications

Founded in 2005, JustApplications is a UK-based agency specialising in bespoke software and mobile apps. Their in-house team delivers tailored web, desktop, and mobile solutions using technologies like Flutter, .NET and Python. Covering the full project lifecycle; from prototyping to support -they focus on quality, UI/UX and clear communication to help businesses bring digital ideas to life.

MJM Data Capture

Founded in 1982, MJM specialises in warehouse management, mobile computing, and data collection. Based in Northampton, they deliver barcode-driven solutions using tailored software and reliable hardware. With experience across healthcare, education and commerce. MJM helps businesses streamline stock control, batch tracking, WIP and activity recording; improving productivity and reducing costs.

Auto Time Systems

Established in 1981, Auto Time Systems provides workforce management and access control solutions, with over 6,000 installations across the UK. Their systems include time and attendance, biometric clocking, visitor management and cloud-based workforce tracking; all designed to streamline HR and payroll. With flexible deployment options and expert support, they deliver scalable, reliable solutions nationwide.

ESET

ESET offers a fully integrated cybersecurity platform with advanced endpoint protection and 24/7 Managed Detection & Response. The Protect Elite suite includes multi-layered threat prevention, 2FA, encryption, cloud security and vulnerability management, all through a single console. With round-the-clock monitoring and expert response, ESET delivers enterprise-grade protection without the need for an in-house security team.

INFOSEC

InfoSec

Since 2004, InfoSec has delivered cybersecurity training and awareness solutions for both employees and IT professionals. Their platform combines phishing simulations, role-based education, and technical certification training. With hands-on courses, cyber ranges, and continuous skill development, InfoSec helps organisations build stronger security cultures and stay ahead of evolving threats.

Pentest People

PentestPeople is a UK-based cybersecurity firm specialising in penetration testing and incident response. Their PTaaS model, delivered through SecurePortal, combines expert-led testing with live vulnerability tracking and 24/7 support. CREST and NCSC-accredited, they help businesses proactively reduce cyber risk and strengthen security posture.

HORNETSECURITY

Hornet Security

Hornet Security provides comprehensive protection for Microsoft365, combining advanced email security, backup, compliance, and awareness training in one platform. Their 365 Total Protection suite includes spam and malware filtering, encryption, archiving, AI threat detection and M365 backup. With a focus on simplicity, automation and centralised management, Hornet Security helps organisations secure their cloud environments with minimal overhead.

AmberVault

AmberVault provides secure, cloud-based backup and recovery powered by Veeam technology. Designed for businesses using Microsoft 365, servers, or endpoint systems, it ensures automated, encrypted backups with options for immutable retention to defend against ransomware and deletion. With fast recovery capabilities and comprehensive compliance features, AmberVault delivers reliable data protection and peace of mind for organisations of all sizes.

Yorkshire & Humber Regional Cyber Team

The Yorkshire & Humber Regional Cyber Protect team provide advice on risk management, incident response, preparedness, safeguarding, and victim care around cyber issues, including tech-facilitated abuse and NCSC-approved security guidance. They also lead initiatives such as Cyber Blue Line, Cyber Switch Up, Spotlight Virtual Reality and the Young Cyber Security Ambassador Programme.

iThink 365

Established in 2007 and based in Leeds, iThink365 is a Microsoft 365 and Azure specialist. They help organisations maximise their investment through intranet development, Power Platform apps, Copilot-powered agents, and Viva engagement tools. With over 40+ Power Platform implementations, iThink365 blends consultancy, agile development and user-focused design to transform business workflows and promote digital workplace success.

Integral Networks

Integral Network Solutions are specialists in the design and installation of structured cabling and fibre optic systems, providing the backbone for fast, reliable, and secure connectivity. With over two decades of experience, they deliver data and voice cabling, wireless solutions and network health checks to businesses across the UK. All installations are backed by a 25-year manufacturer warranty and their unique "no-charge" satisfaction guarantee, ensuring long-term performance and peace of mind. Whether it's a small office fit-out or a large-scale infrastructure project, Integral focus on quality, flexibility and customer care.

Excel Telecom

With over 20 years of experience, Excel Telecom delivers reliable business communication solutions across VoIP, SIP, broadband, mobiles and intelligent numbering. They also provide CCTV, 4G data, and 24/7 support services. Known for hands-on customer care, Excel manages everything from consultation to installation and support; helping businesses stay connected, secure and in control of their communications.

Meet the DCS Team

Our team is here to guide, support and answer any questions you may have throughout the day. Whether you're looking for advice on IT support, cloud solutions, cybersecurity, business software or telecoms, there's someone here who can help.

You'll find us across the venue - chatting with customers, hosting demos, introducing partners, or simply catching up with familiar faces. We're a hands-on team and today is as much about listening as it is showcasing.

From technical specialists and solution architects to account managers and support leaders, every member of the DCS team is focused on helping you make the most of your technology. So don't be shy - come and say hello.

Thank You & What's Next?

Thank you for joining us at the DCS Technology Showcase. It's been a pleasure to share the day with our customers, partners, and vendors - and we hope you've left with new ideas, valuable conversations, and a clearer view of how technology can support your business goals.

If something today has sparked your interest - whether it's a solution you'd like to explore further, a product demo you want to revisit, or just a deeper conversation about your current setup - we'd love to continue the discussion.

You can arrange a follow-up meeting with your account manager or book a no-obligation and **FREE IT review or technology audit** with one of our specialists. We'll help assess your current environment, identify risks or opportunities and recommend practical next steps based on your goals.

To book a follow-up or review, please get in touch with us at:
