# SHANETTE SUPERIOR SPACE

Shanette is the original off-site, sectional-built steel buildings manufacturer based in Westmeath. Established in 1983, we are the largest and longest-established fully CE certified manufacturer of sectional (panel form) steel buildings in Ireland. As professional steel building manufacturers, we have a proven, reliable track record.

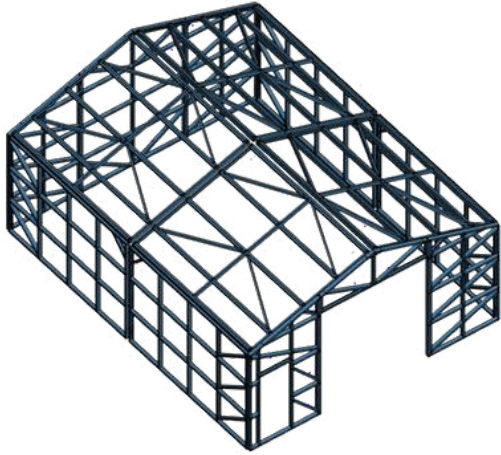

Over the last 40 years, we have continuously developed our products and company, always prioritising strength, safety, and quality in our designs. We have made a name for ourselves by supplying exactly what the customer needs, precisely when they need it.

We hold an impressive portfolio of previous projects for domestic, commercial, and industrial clients. Due to our extensive experience in all aspects of off-site manufacturing, we have successfully guided thousands of clients from idea conception to the end product with minimal fuss or disruption, delivering and installing quality buildings throughout Ireland.

## CERTIFICATIONS

All Shanette materials are CE marked and certified. The entire design, manufacturing and supply process is managed by our dedicated and skilled team, who use a fully integrated system which incorporates quality, environmental and health & safety management prerequisites into your project.

Our structural grade steels are extremely strong and can take snow load bearing weight and prove impressive with strong wind performance to European Standards.

## Our Certification and Commitment to Excellence

Our certification and commitment to excellence are the pillars that support our vision for innovative and quality-driven steel building solutions. We proudly hold two essential certifications.

### 1. EN 1090 - 1 (EXC 2) Certification:

This certification ensures that our steel buildings meet the highest safety and quality standards established by European regulations. In simple terms, it means our structures are built to last, ensuring your peace of mind.

### 2. ISO 9001 - 2015 Certification:

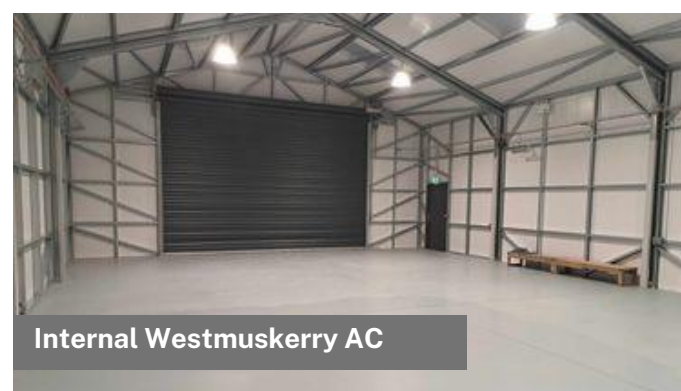

ISO standards are internationally recognised as a mark of quality management. To achieve ISO 9001 certification, a company must undergo a thorough evaluation by an accredited certification body. At Shanette, it signifies our unwavering commitment to continuous improvement in our design, manufacturing, and supply processes, as we constantly strive for excellence.

To comply with Fire requirements, Shanette can also offer buildings that will achieve REI 60:60:15

- **60mins R- Resistance**, the ability of a construction element to preserve its mechanical characteristics during a normal Fire load.
- **60mins E- Integrity**, the ability of a construction element to prevent gas or vapour pass through it, during a normal Fire load.
- **15mins I- Insulation**, the ability of a construction element to allow the transfer of heat through it, during a normal Fire load.

*Shanette Sports Facilities*

# Gold Range Steel Buildings for Sports Facilities

Our Gold Range is crafted using high-quality insulated composite panels, boasting a minimum of 40mm of insulation for both the roof and walls and perfect for a sports facility. These panels are designed to endure various weather conditions, thanks to their PVC-coated exterior sheet, ensuring long-lasting climate protection. On the interior, both the walls and the roof feature a smooth, easy-to-clean, white metal finish. These units have the advantage of retaining heat when they are heated. We recommend heating all Gold Range units for optimum dry storage conditions.

We have two options in our GOLD RANGE – Horizontal Flat Panel and Kingspan Box Profile Panel

Horizontal Flat Panel Unit

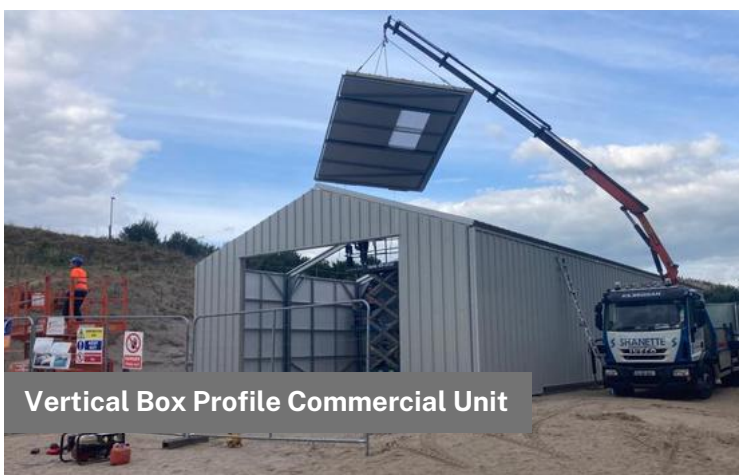

Internal Gold Range Sports Facility

## Key FEATURES

- Choose from 40mm or 80mm insulated composite panels in both roof and wall structures.
- White metal interior wall finish.
- 100mm Heavy duty fully galvanised CE certified steel framework.
- Pre-fabricated roof & wall panels for easy site installation.

## 2 AVAILABLE OPTIONS

- 40mm or 80mm Horizontal Flat Panel Cladding.
- From 40mm up to 120mm Vertical Box Profile Cladding.

Vertical Box Profile Commercial Unit

Insulated Roller Door

Insulated Box Profile Roof Panel

Kingspan Roof Panel

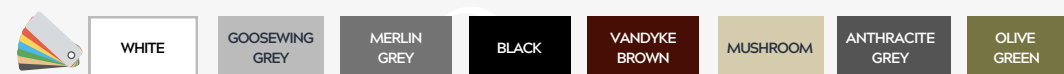

### HORIZONTAL FLAT PANEL COLOUR RANGE

ROOF COMES IN ANTHRACITE GREY AS STANDARD

### VERTICAL BOX PROFILE COLOUR RANGE

More colours available upon request & subject to availability.

The prices for the Gold Range high storage units include a 3m wide x max height electric heavy duty insulated roller door & 10pt locking pedestrian door, full length clear-lights, gutters & down-pipes.

We've been involved in designing and manufacturing units for sports facilities for over 40 years and have worked on many different projects, including Athlone GAA. For Athlone GAA, we created an 80mm roof and wall insulated unit, measuring 24m x 10m with 3m side walls. This unit was installed on site in just three days for use as a gym and changing rooms for the club.

As with all Shanette units, we build to the client's specific requirements, including any additional features required, such as louvred vents, custom-sized doors, and windows. With the flexibility to manufacture units to the customer's specifications, we can provide a unit tailored to suit you.

Our buildings are designed using some of the most advanced 3D computer modelling software systems to withstand the forces of wind and snow to European construction standards, using high-strength structural steels. We produce quality steel buildings at competitive prices, direct from our manufacturing base in the Midlands.

# Gavigans Sports & Therapy Clinic

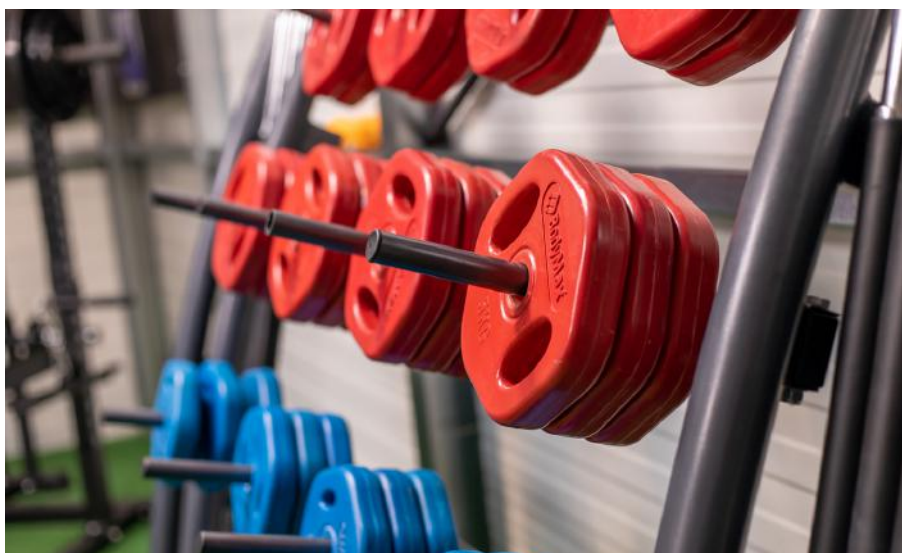

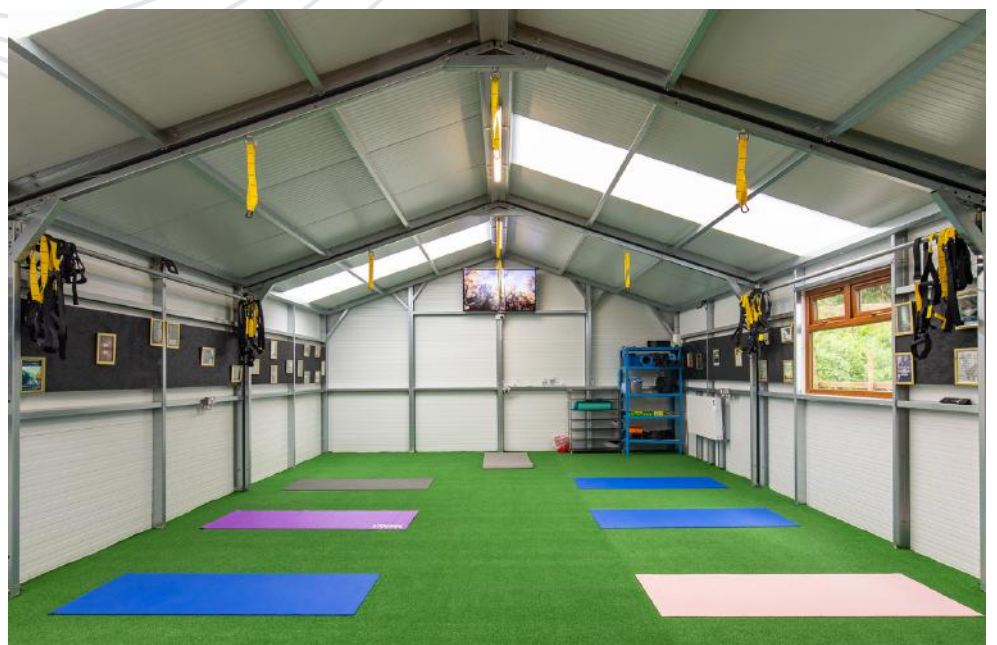

Horizontal flat panel

## Sports and Training Facilities Room to expand!

One of the great advantages of a Shanette steel building is that as your business grows, you can extend your workspace to suit your needs.

Gavigan Sport & Injury Clinic had a 9m x 6m, 80mm insulated therapy room installed in 2018. Due to an increase in demand for sports injury therapy, the clinic needed to extend its building.

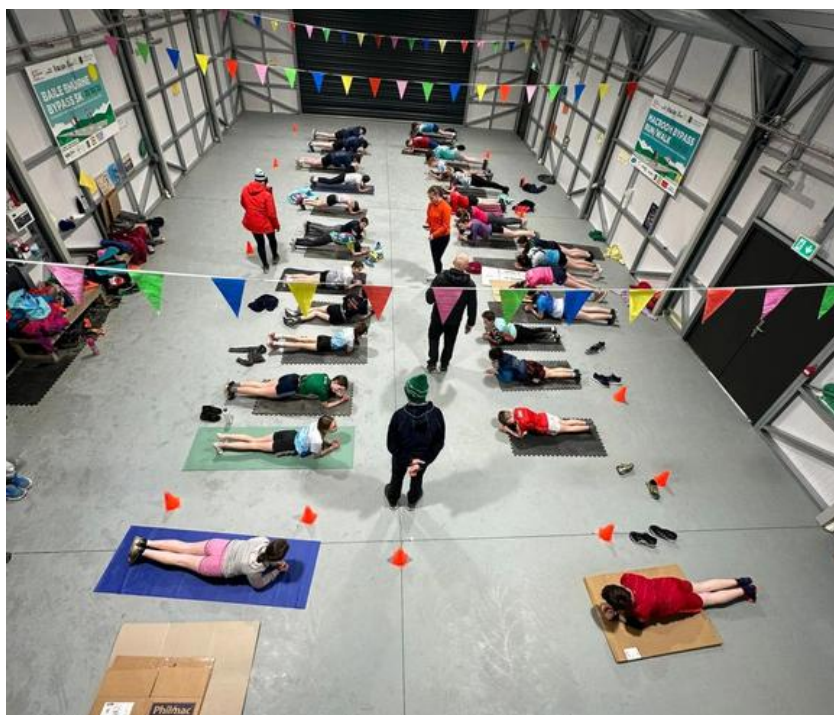

We extended this unit by 10m in early 2020 to facilitate the business's extra space requirements and extended by another 6m extension in 2021 as the business grew!

In 2023, David Gavigan, spotted another gap in the market and further expanded his facilities by introducing a 6m x 3m gold range Therapy Room to his grounds. This dedicated addition caters to the holistic side of the business, a discerned need identified by David through his understanding of client requirements.

# West Muskerry Athletics Club

Box Profile Panel

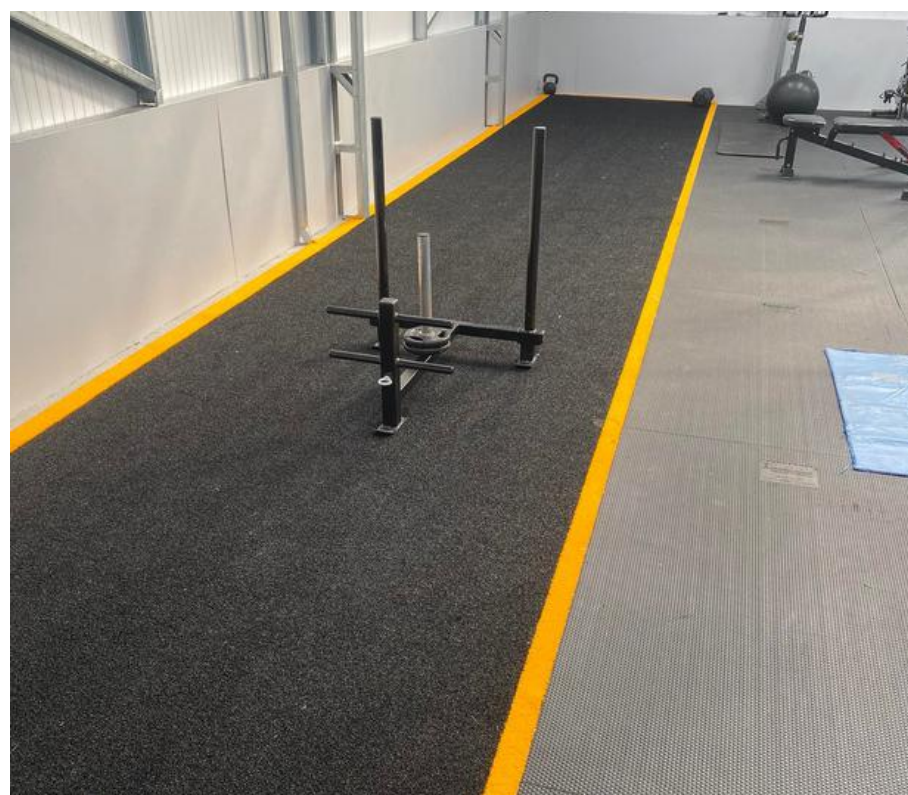

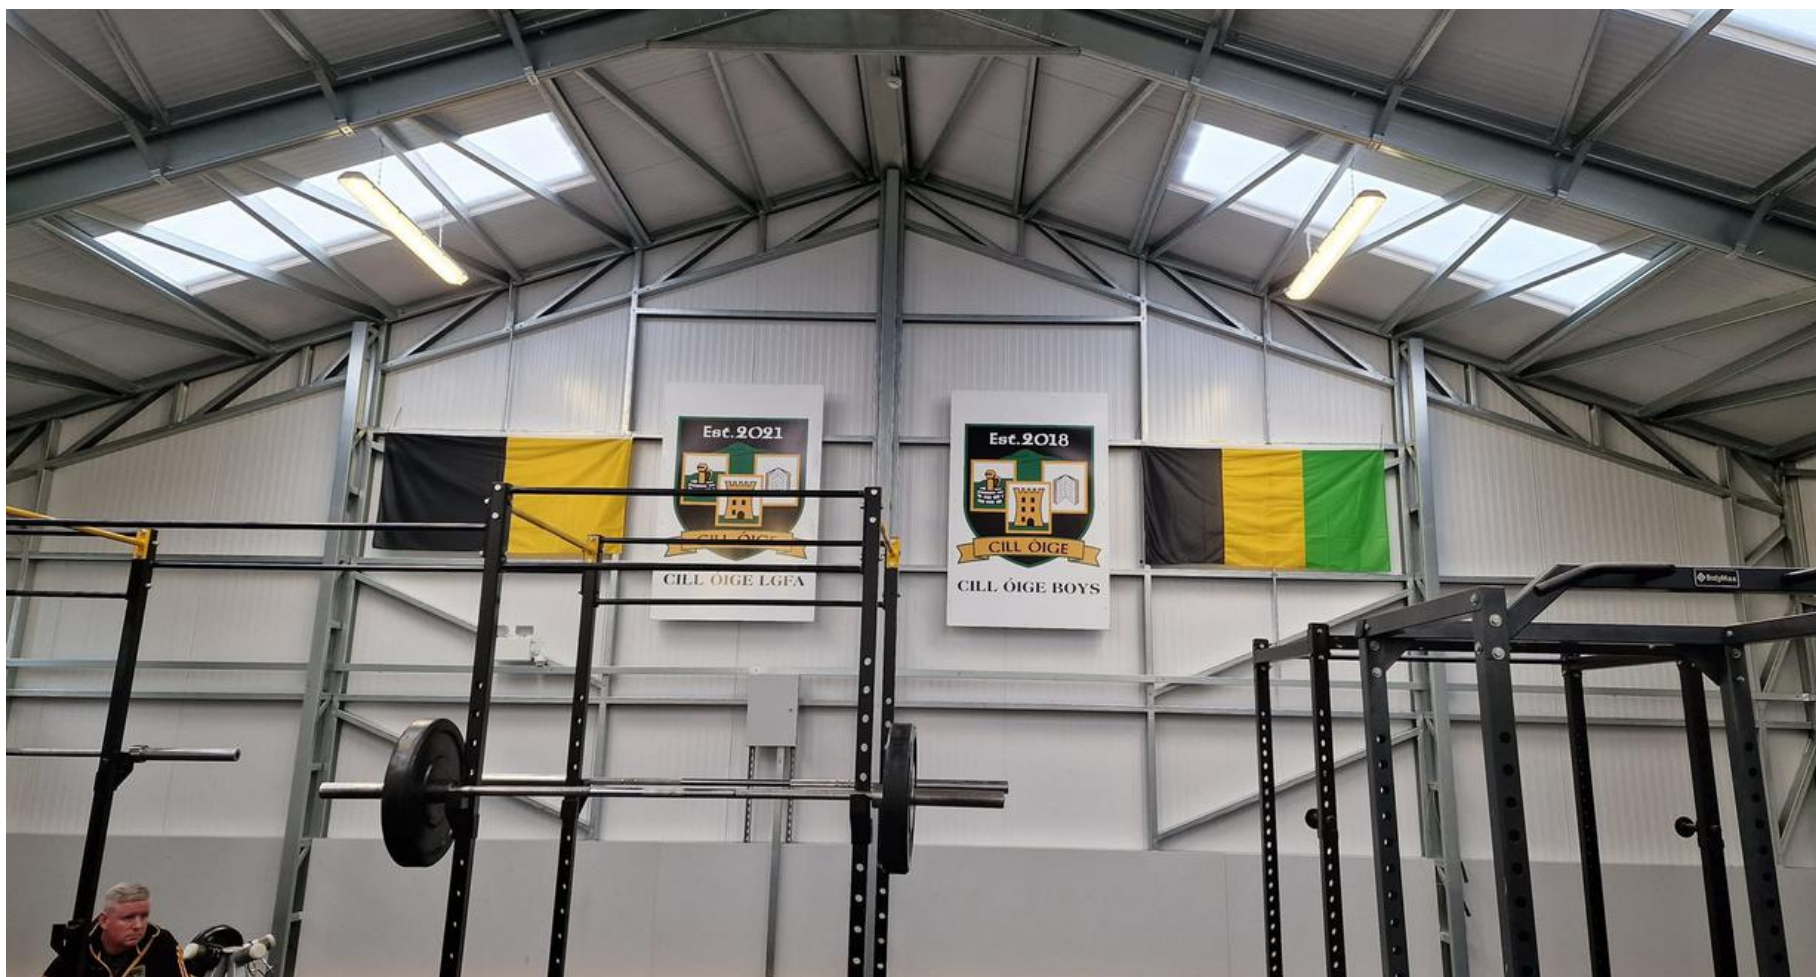

## West Muskerry Athletics Club

Years of dreaming, months of meticulous planning, and unwavering dedication went into making this vision of a new club house a reality for Westmuskerry Athletics Club. The entire project underwent meticulous design and expert manufacturing at our cutting-edge Kilbeggan facility.

- Club House Size: 24m x 10m
- Side Walls Height: 4m
- Construction: Kingspan Side Panels
- Wall Insulation: 100mm
- Roof Insulation: 120mm
- Color Scheme: Goosewing Grey with Anthracite Roof and trimmings.

# ROSEMOUNT CLUB HOUSE

# SLIEVE BLOOM E RIDERS

# Killaloe Sailing Club Facilities

## Killaloe Sailing Club

- Killaloe Sailing Club, a hub for Irish dinghy sailing since 1963, had a vision in 2017 to create permanent on-site facilities, including changing rooms, a common room, a boat shed, and a training area.
- In 2018, planning permission was granted, and fundraising began in earnest to bring the dream to fruition.
- It was all smooth sailing from then, and in 2023, Shanette was honored to manufacture and install these units for Killaloe Sailing Club.

The project involved the design, manufacture and installation of four units for the site in Killaloe, featuring two fully insulated Gold Range Units and two Bronze range units offering versatile spaces for the club's needs.

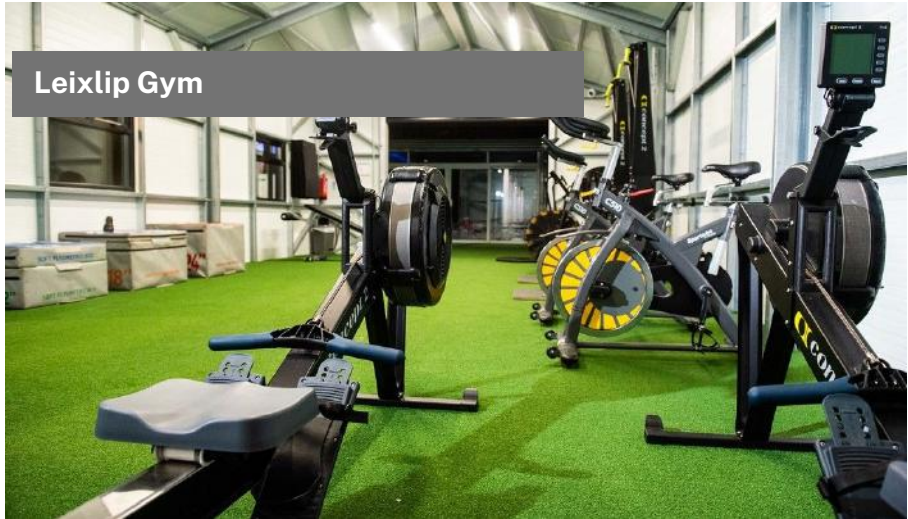

- 16.5m x 6m 80mm and 100mm Insulated Gold Range Common Room
- 18m x 6m 80mm Gold Range changing facilities.
- 12m x 6m Bronze Range Multi-Purpose unit
- 12m x 6m Bronze Range Boat House
