What tool to use?

In general: avoid harsh treatments. Avoid using any abrasive products or tools on materials like aluminium, ceramic and synthetic materials, as these can cause scratches. We recommend Jati & Kebon soft scrubbing pads; suitable for cleaning every surface. Do not powder-wash or use chlorine bleach, oils, and avoid abrasive cleansers. Test new solutions on a hidden area. After cleaning use the application cloths to apply an outdoor furniture protector.

TEAK CLEANER & PROTECTOR

If teak remains untreated, this silver-grey patina deteriorates to a dark-grey and greenish. A transparent protector makes the wood water- & dirt repellent and helps to prevent stains while keeping the natural look. Apply a non-hazardous teak cleaner to clean and restore discoloured, dark grey teak and hardwood. Use the appropriate tools and avoid using a hard brush to clean your teak furniture.

FABRICS & ROPE

CLEANER & PROTECTOR

The best and simplest way to preserve the beauty, comfort and performance of fabrics is by brushing off any dirt before it gets entrenched, as well as by cleaning up any spills or stains with soap and water shortly after they occur, when they are easiest to remove. We recommend our Fabrics & Rope Cleaner.

Jati & Kebon Furniture's cushion covers and fillings are made to dry easily and properly with improved water draining, making them develop less mildew and moulds.

You can keep your fabrics looking better for longer when you regularly give them a treatment with a Fabric Protector.

MULTISURFACE

CLEANER & PROTECTOR

Jati & Kebon aluminium furniture is protected by a high-quality, water-repellent powder coating. The resulting finish is knock and scratch resistant, impregnable to moisture, highly resistant to corrosion and easy to clean.

Make sure to handle the furniture with care, avoiding scratches and dents that could damage the coating, making your furniture more vulnerable to the elements. Also watch out for corrosive liquids like sunscreen and cosmetics.

It's recommended to further improve the resistance by applying an extra layer of protection with the Multisurface Protector.
