## ABOUT US

NuovaWoman is launching a new case study led by Bakir Altai MD, F.R.C.S., who trained at the Royal College of Surgeons in Scotland. Dr. Altai has developed **The Symphony** Laser Liposuction Technique that advances the science of medicine by offering women safe, minimally invasive procedures done under conscious sedation.

The level of results **Dr. Altai** achieves previously required invasive surgical procedures that involved extensive cutting of the skin and many weeks or even months of recovery. **Dr. Altai's** Symphony Laser Liposuction Techniques are performed under local anesthesia and require minimal recovery time.

The NuovaWoman Case study will include 3 groups of women: group 1 women needing significant weight loss prior to procedures, group 2 women who have lost significant weight and have loose skin and group 3 women of age that have sagging skin due to aging's muscle and fat loss.

Women can apply to join the study which has specific requirements, including payment of treatment fees, full release of photos and video interviews, follow up zooms and one in office interview following year one post procedure. Apply at [NuovaWoman.com/study](https://NuovaWoman.com/study).

### **The study will include for each participant:**

- Laser Liposuction on the face, neck, breasts, torso, veins on legs, and sagging arms.
- Fat Transfer as needed
- Skin Reduction and Resurfacing of all areas
