

Progressive Response, Adapting Comfort

Our Adapture™ advanced memory foam is formulated to highlight the enveloping nature of memory foam and deliver it slowly, making the change and adaptation to the body more perceptible to the user.

After the initial, slow sink and envelopment, the unique chemistry allows the foams to maintain their support through the compression and adaptation response for a luxurious, personalized experience.

Its superior properties are largely a result of the VPF™ manufacturing technology, which ensures consistent high quality and environmentally friendly foam.

CUSTOMER BENEFITS:

- Active conformity, adaptive nature
- Luxurious envelopment
- Personalized pressure relief
- Sleep enhancing
- CertiPUR-US® certified foam

Density lb/ft ³	IFD ppi	Airflow DOW	Comp Set %
3.5	15	> 2.5	< 5

Meets CertiPUR-US® program standards for content, emissions and durability, and is analyzed by independent, accredited testing laboratories.

Innovation You Can Feel.

FXI unleashes the full potential of innovation to make life more comfortable, healthier and smarter through progressive, end-to-end leadership in bedding. From the lab to the shelf—and every step along the way—FXI's brands and programs offer unmatched reach, bring our pioneering spirit to life, and ensure positive business impact by helping consumers "feel" the benefits of a better life.
