CUSTOM HORIZONTAL & VERTICAL FLAGS

Custom flags are perfect for displaying a logo at businesses, city halls, schools, and stadiums, or they can promote an upcoming event. Flags are digitally printed on polyester flag cloth using water-based heat-set dye sublimation inks.

Flags are single-sided (1S) or double-sided (2S) with a block out layer in-between.

С

CUSTOM KAHUNA

Kahuna Flags combine the eye-catching movement of our Feather Dancer Flags with the large real estate and ease of layout found in a rectangular format. Great for retail businesses and property management promotions, Kahuna Flags are digitally printed with a right-reading front and reverse-reading back (1S).

Kit includes flag, flagpole hardware, and a fiberglass ground stake.

Flags are designed for use with OEM hardware only.

Pole Banners Pole Banner Hardware	

VINYL & MESH BANNERS

Our grand format printers offer seamless banners up to 16 feet using high quality, durable, and fade-resistant inks. Vinyl banners are affordable and versatile signage for property advertising and events. Mesh banners are perfect for very large or high wind applications. Custom banners are made to your size specifications with multiple finishing options available.

ⴷ

WARNING! This product can expose you to chemicals, including Methylpyrrolidone and Benzophenone which are known to the State of California to cause cancer or birth defects or other reproductive harm. For more information, go to **www.p65Warnings.ca.gov**

CLOTH BANNERS

Display cloth banners are a lightweight alternative to vinyl banners and are ideal for indoor applications. The printed surface cannot be scratched, and you can save on shipping costs due to the lighter weight. Wrinkles can be steamed away (do not iron or apply direct heat). Dry clean only.

POLE BANNERS

Highlight your property name, amenities, or special events on light poles with double-sided pole banners. We offer time tested hardware that's available in several standard widths. Have existing hardware? We'll size your banners to fit!

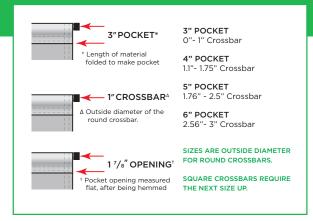

POCKET SIZING

M

WARNING! This product can expose you to chemicals, including Methylpyrrolidone and Benzophenone which are known to the State of California to cause cancer or birth defects or other reproductive harm. For more information, go to www.p65Warnings.ca.gov

When specifying the required pocket size for pole banners, please base it off the size of the pole used for the crossbars. The size should be the outside diameter of the crossbar. Square crossbars will always require a larger sleeve than round crossbars. Please be sure to specify size and round or square crossbar.

		PRICED PER SQUARE FOOT				
SKU	MATERIAL	20-75	76-500	501-1,000	1,001-4,000	4,001+
18VBAN	18oz Blockout Vinyl (per side)	\$6.77	\$4.52	\$4.07	\$3.61	Call

Prices are based on double-sided printing on standard widths of 18", 24", 30", and 36" with 3" pockets and trimmed side edges and customer provided art. In isolated instances, prices may be subject to yield. Creative services available for an additional cost.

POLE BANNER HARDWARE

One pole banner requires a single pole banner bracket kit which includes 2 horizontal poles (crossbars), 2 brackets, and 4 bands. A double pole banner (one on each side of a light pole) requires a double pole banner bracket kit which includes 4 horizontal poles (crossbars), 4 brackets, and 4 bands.

SOFTLINE PADDED A-FRAMES

Softline A-Frames $^{\text{TM}}$, our signature padded a-frames, keep your athletes safe while showcasing your sponsors or team branding right next to the action. These padded a-frames are great for courtside or field side placement and are available in 3' x 4' or 3' x 8' size. They are easy to move and they fold up flat for easy storage.

Softline A-Frames™ feature vinyl banners with a quick-change Velcro® system which allows for easy and affordable season or game-to-game graphic changes. The ability to swap out graphics can be useful when sponsors change their artwork midseason or when hosting special events with unique sponsors.

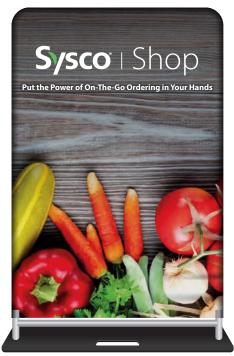

INTELIFRAME BACKDROP

CUSTOM TABLE COVERS

Custom Table Throws and Table Runners are digitally printed in full color on white Deluxe Display Cloth. Table Throws are available in standard 6' and 8' table lengths. Table Runners are 30" wide and can be used with any length table. The Table Throw and the Table Runner are economical alternatives to our traditional Full Coverage Tablecloth and either one can be a great looking addition to a standard solid color trade show tablecloth. Steam away wrinkles.

Dry Clean Only.

SMART FRAME SYSTEM

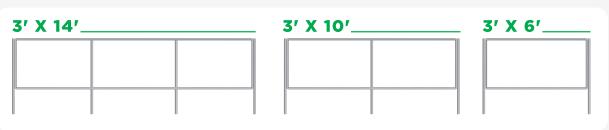

Easy to assemble and made from corrosion-resistant aluminum tubing, this tensional system secures your banner and reduces wind load. Frame secures to the ground with fiberglass ground stakes. For viewing on two sides, install a 2-sided banner on the 6' frame or install two single-sided banners on the 10' or 14' frame.

Setting Up Your Document	. 57-59
File Formats	. 57
Templates	. 58
Image Resolution	. 58
Hem & Trim Allowances	. 59
Color Matching	. 59

SETTING UP YOUR DOCUMENT

Follow the guidlines in this section to get your files set up properly or you can contact us and our designers can get your files set up for an extra charge.

- Please build one file per design. In the case of programs that support multiple pages only place one design per page.
- All colors used in document must be specified as CMYK, not Spot colors. Files submitted in RGB will be converted to CMYK which may cause a color shift in the art.

Most programs allow the user to add an image to a file by linking or embedding. Embedded images are stored within the document itself, while linked files are not. Because of this, linked files can suddenly vanish when opened from a different computer. Embed all images to avoid losing them when files are submitted.

RASTER

FILE FORMATS

We support two main types of file formats: Vector Art and Raster Art. If you're unsure of what type of art you have, check out the diagram below or see details to the right:

VECTOR

- Can be scaled to any size while maintaining quality
- Preferred unless printing photos

RASTER/BITMAP

- Made of pixels (tiny squares)
- When scaled larger, the image will look pixilated (fuzzy)

VECTOR ART

- -Can be scaled to any size while maintaining quality
- -Preferred unless printing photos

RASTER ART

- -Also known as bitmap art
- -Composed of pixels (tiny squares) grouped together to make an image
- -When scaled larger, the image will look pixilated (jagged)

High resolution image 200 dpi

Low resolution image 25 dpi

SETTING UP YOUR DOCUMENT

While this applies mostly to vector documents, please follow the guidlines in this section to get your files set up properly or you can contact us and our designers can get your files set up for an extra charge.

BLEEDS

Consider the bleeds in a document the 'wiggle room' to make sure you don't have any white showing once your graphic is trimmed out from it's printed roll format. This also helps account for any minor shifting that may occur during the printing process.

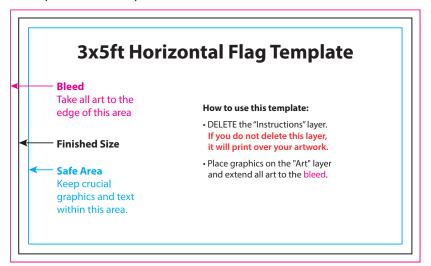

TRIM SIZE

This is the finish size you'd like your graphic to be.

SAFE AREA

This area is where all important information, such as text and any logos, should stay so they don't get cut off if the material being printed on shifts slightly during the printing process or when the graphic is being trimmed.

Template Example:

NEEDS IMPROVMENT

High resolution image: 200 dpi minimum

Low resolution image: 25 dpi

RESOLUTION FOR BITMAP & DIGITAL IMAGES

When including Photoshop (bitmap) images, you should scan or create your image at its final reproduction size at the following resolutions:

75-100 pixels per inch for vinyl banners 100-120 pixels per inch for textile printing 50-220 pixels per inch for rigid substrates

Rasterized type/images in Photoshop will lose its crisp look and appear 'out of focus' if the file resolution is too small. Save these files in the JPEG format with the quality or compression level set to Highest Quality or Maximum Quality. This setting ensures there is no distortion or loss of detail while providing the best compression of the file.

SETTING UP YOUR DOCUMENT

BANNERS

Our standard hem turns 1.125" of material (add 2.25" to your required finished size) and is double stitched with the stitching coming in 3/4" from the folded edge. A 2.5" margin from the (2.25" oversized) unfinished trim edge of the banner is required to prevent live content from being turned and sewn.

POLE POCKETS

Calculated based on the outside diameter of the pole. Up to 1" pole diameter would use a standard 3" pocket that has a 2.25" opening (measured flat). 1.25" – 1.875" Poles that use a 4" pocket would have a 3.25" opening (measured flat). Please request a template for banners that require pole pockets to help prevent your live content from being sewn through.

HORIZONTAL FLAGS

Standard hem for Horizontal Flags turns 0.75" of material and is Double Stitched along the top and bottom edges with the stitching coming in 3/8" from the folded edge. For 5' x 8' flags or larger, the Fly edge of the flag is Quad stitched and turns 2" of material with the stitching coming in 1.5" from the folded edge. All other flag sizes receive a standard hem fly end.

MARGINS

Double Stitched sides require a 1.5" margin from the unfinished trim edge to prevent live content from being turned and sewn. Quad Stitched sides require a margin of 2.5" – 3" from the unfinished trim edge. The canvas header covers 1.5" of the left hand side of the flag, so a margin of 2" from the header's unfinished trim edge is required.

NOTE: SETUP HELP

If you're setting up your own document, see the specific material guidelines below. If you need help, please give us a call and we can help or one of our designers can get your files set up for an extra charge.

NOTE: RIGID SIGNS

Please consult for rigid sign requests as these can have special requirements depending on project scope

COLOR MATCHING

If color is critical to your job, we can produce a small print sample of your file to inspect and/or supply a printed color chart so you can see how your Pantone spot colors will print.** Color corrections can then be made and another print sample made for final approval.

If you specify Pantone spot colors, our color management will attempt to get as close as possible.

Due to the nature of digital imaging, exact Pantone spot color matches are not always possible.

Please note that metallic inks are not available for digital printing. Pantone's CMYK equivalent will be substituted for the metallic inks specified in your file. If you do not wish to have this substitution to occur, please select a nonmetallic color to simulate the effect you are trying to achieve.
