

RUGBY SCHOOL
THAILAND

ACADEMIC

SCHOLARSHIP

Information for Applicants

Academic Scholarships are a recognition of a student's ability, or potential, to achieve at the highest level in their academic studies. Awarded to students who demonstrate this at all times, our academic scholars will progress to world-leading universities and become leaders in their chosen careers.

Academic scholars will identify a 'specialist subject' and receive a mentor, but will be academically strong across the board.

The purpose of scholarship awards is to recognise outstanding ability. Scholarships may be awarded with or without a fee remission attached. If the main reason to apply for a scholarship is to obtain a fee remission, please talk to the admissions department about the school's bursary scheme.

We expect our scholars to:

- maintain a good minimum average diligence/effort grade in all subjects;
- receive consistently good attainment grades in all academic subjects;
- uphold the values of RST and be an excellent role model to other students in all aspects of school life, but particularly in their commitment to academics;
- involve themselves fully in the academic life of the school beyond the classroom.

Scholarships are reviewed annually.

Scholars' Programme

All scholars follow a tailored programme and work closely with a specialist mentor.

Scholars will benefit from opportunities such as:

- taking part in the Scholars' Showcase;
- events which bring together scholars from each area. These events may include a formal dinner, symposium or trip;
- collaborating with fellow scholars from their subject areas to create an assembly presentation;
- the opportunity to undertake an independent research project.

Academic scholars will benefit from:

- attending lectures and workshops;
- involvement in the IPQ programme (Sixth Form);
- accessing the Elite Universities Programme (Sixth Form).

Assessment Process

Applications are accepted throughout the year from students aged 11+ who demonstrate exceptional ability in their field.

Applicants must first complete and pass the standard admissions process. Following initial screening, comprising a review of achievements, cognitive tests, and an interview with the Head of School, qualified applicants may be invited to undertake further department or subject-specific assessments; plus add additional information to their application to support the application for scholarship.

To apply, please begin **HERE** or contact **<admissions@rugbyschool.ac.th>** for further information.

Please note that internal candidates (students already attending the School) must be recommended by their teachers in order to apply. Eligible current students will be notified accordingly and are encouraged to discuss this with their tutors if needed.
