

Gifted Education Programs

at Loreto Normanhurst

Empowering high-ability learners through enrichment, challenge, and opportunity.

UNSW GERRIC

Advanced, interest-driven enrichment workshops delivered by expert educators and university academics.

Think Tank Program

An after-school extension program where students investigate complex problems and develop creative, collaborative solutions.

Future Problem Solving (FPS)

An international program that engages students in applying critical and creative thinking to futuristic scenarios, designing strategic and sustainable solutions.

Da Vinci Decathlon

A multidisciplinary academic competition that challenges students across ten rigorous domains through teamwork, creativity, and problem-solving.

Learning Nova Program

A specialised Year 5 and 6 enrichment program focusing on deep learning, inquiry, and high-order thinking across a holistic curriculum.

Mathematics Olympiad

A challenging problem-solving program designed to strengthen advanced mathematical reasoning, logic, and perseverance.

Debating and Public Speaking

Communication programs that empower students to think deeply, speak confidently, and engage respectfully as they craft persuasive arguments, analyse complex issues, and develop authentic voice and presence.

Thriving Minds Philosophy Days

A thinking-skills program where students explore philosophical and ethical questions through dialogue, inquiry, and reflection.

Macquarie University & Young Wisdom Incubator

University-supported enrichment experiences offering deep inquiry, intellectual challenge, and opportunities for innovation.
