2025 // VOL 01

HARLEY-DAVIDSON® PRODUCT CATALOG

Welcome to Klock Werks

Klock Werks started in a 700 square foot garage in Mitchell, South Dakota. Just a guy, some tools, and a belief that there were cool bikes to be built.

By 2006, we built the first bagger to compete – and win – Discovery Channel’s Biker Build-Off. Not long after, we took that same bike (WFB) to the Bonneville Salt Flats and set multiple land speed records.

Since then, we’ve partnered with brands like Jack Daniel’s® and Indian Motorcycle®, grown our crew, expanded our product line, and continued to innovate for riders around the world.

But no matter how far we’ve come, what’s always mattered most are the relationships. Relationships with our customers, our dealers, and the people who’ve believed in us since the beginning.

We’re still based right here in Mitchell, South Dakota just like we’ve always been. Still rider-focused. Still doing things the right way. And still proud to say: #GETKLOCKED

FIND THE PARTS THAT FIT YOUR BIKE

No guesswork. No gimmicks.
Just parts that are built to perform
for your exact make and model.

KNOW YOUR YEAR AND MODEL?

Use the filter found on the landing page of our website to filter Klock Werks parts built to fit your ride.

Start by selecting your bike's year, make, model family, and then model.

NOT SURE WHAT YOU'RE RIDING?

Check your VIN or head to the top menu – click Shop On-Road, pick your make, and scroll through our visual model guide to spot your ride by image.

Contact Klock Werks at info@getklocked.com or (605) 996-3700 for inquiries or customer service needs.

★ #GETKLOCKED ★

TRY IT BEFORE YOU BUY IT

Ninety-eight percent of people who try the Flare® Windshield buy it! Klock Werks invites you to take a cruise with a demo windshield and see for yourself why the Flare® is the last windshield you will ever need to buy.

Dealers across the country have chosen to participate in the 'Try It Before You Buy It' Demo Program so you can try a Flare® Windshield before you decide to buy. To find a Flare® Windshield Demo Dealer nearby, check the "Demo Location" box in our locator at getklocked.com.

If your dealer isn't part of the program, ask them to contact us at [\(605\) 996-3700](tel:605-996-3700) to get set up.

WHERE TO BUY

YOU'LL FIND US JUST ABOUT EVERYWHERE.

Want to get your hands on what you see here? Check with your local dealer or reach out to us directly—we're happy to help. We are proudly distributed by Drag Specialties, Parts Unlimited, Parts Canada, Parts Europe, Rollies Speed Shop (Australia) and Harley Custom World (Japan).

If you're a motorcycle shop or retail business looking to carry Klock Werks parts, shoot us a message. We're easy to work with, and we'd be proud to have you in the family.

Just call [\(605\) 996-3700](tel:605-996-3700) and ask to talk with our dealer specialist.

Warranty

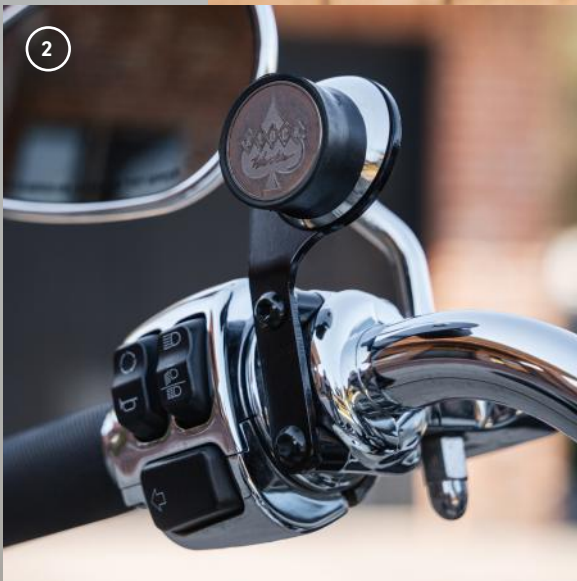

If you believe you have a warranty related issue with a genuine Klock Werks branded part, please contact us immediately. We will be happy to replace the part with a new one if the conditions of our warranty policy are met. Klock Werks reserves the right to refuse any item we believe is damaged as a result of improper care. Please contact us directly for details on specific parts.

Returns & Exchanges

All returns and exchanges are subject to a 20% restocking fee assessed at our discretion. Any request to return or exchange a product must be made within 30 days of purchase (proof of purchase required). Refunds will only be issued on parts that are 100% new and never been installed. All items shipped back to Klock Werks must have a Return Merchandise Authorization number clearly displayed on the outside of the package. To request an authorization number simply email info@getklocked.com or call [\(605\) 996-3700](tel:605-996-3700). Failure to request and display the RMA # properly may result in your package being refused. Klock Werks reserves the right to refuse any item we believe is damaged as a result of improper care or installation.

Important

Careful thought and effort have been used to ensure accuracy in this catalog. However, mistakes can happen. Carefully test fit ALL parts prior to painting! Klock Werks will not be responsible for any painted parts, or assume any other liability due to an error in a parts listing. All prices, descriptions, fitments, and availability of the parts listed in this catalog are subject to change at any time and without notice. Contact us directly for the latest information.

Klock Werks has designed easy-to-install phone mounts that incorporate our patented iOmounts® system! With multiple styles to choose from, it's possible to mount in nearly any location! Simply open and setup the mount, attach the razor-thin iOdisc™ to your device (which works with most smooth and hard phone cases) and connect to the powerful iOcore™ magnetic carrier (if applicable).

MAGNETIC iOcore™

An extra strong 20lb. magnet with brute strength that is the heart of the system

SEMISPHERE MOUNT

Allows rotation in any direction for preferred placement

iOdisc™ (2)

A razor-thin, unobtrusive steel disk that adheres to the device. This is what makes iOmounts® device-universal!

NECESSARY HARDWARE

We wouldn't leave you hanging. If hardware is necessary, you bet it's included

INSTALL

If installation is even necessary, install the phone mount in its designed location with the included hardware.

ADHERE

Center the iOdisc™ on your case, apply firm pressure and let cure.

ATTACH

Once the iOdisc™ has cured for 24 hours, your device is ready to be attached to any iOmount®!

ONCE THE IODISC™ IS ADHERED TO YOUR DEVICE, EASILY DETACH FROM THE PHONE MOUNT AND CONNECT TO OTHER IOmounts® PRODUCTS, INCLUDING NOMAD™ FOR YOUR OFF-ROAD VEHICLE, CAR, HOME, AND MORE!

HORIZONTAL OR VERTICAL? ROTATE IN ANY DIRECTION FOR PERFECT PLACEMENT EVERY TIME!

HANDLEBAR MOUNTS

Klock Werks has designed easy-to-install, motorcycle model-specific phone mounts that incorporate the iMounts® system! Simply install the mount to your bike with included hardware, attach the razor-thin stainless steel iDisc™ to your device and connect to the powerful iCore™ magnetic carrier.

INCLUDES: Semisphere Mount, iCore™ (black), iDiscs™ (2), phone tether and hardware

FLARE®
WINDSHIELDS

REDIRECT THE WIND TO IMPROVE YOUR RIDE.

The Klock Werks Flare® Windshield was originally developed out of a need for stability at high speeds while racing on the Bonneville Salt Flats. This innovative and patented design features “hips” on the sides that re-route air to create downforce on the front of the bike while the “flip” at the top kicks the air up, sending it back as clean, less turbulent air for the rider and passenger.

THE HIPS

Adds downforce for improved stability at highway speeds

THE FLIP

Creates clean, less turbulent air for rider and passenger

LOOK FOR THE LOGO

Our logo is always front and center on every authentic Flare®

PROVEN PERFORMANCE

Designed by real riders, tested on the Salt Flats.

DURABLE OPTIONS

Hard-coated polycarbonate or high-strength acrylic.

MADE IN THE USA

Sourced from folks we trust, supporting communities across the USA.

MATERIAL OPTIONS

POLYCARBONATE Impact-resistant Lexan® polycarbonate with double-sided hard coating for maximum durability and scratch protection.

ACRYLIC High-quality acrylic with excellent optical clarity and a polished finish.

FLARE®
WINDSHIELDS

THE STORY OF THE FLARE®

Less than 3 weeks after winning the Discovery Channel's Biker Build-Off in 2006, Klock Werks found themselves at the Bonneville Salt Flats with their winning WFB (Way Fast Bagger). In the first 2 passes a National Land Speed Record was set!

However, even with the best suspension installed, the bike experienced an unsettling lift from the front end with increasing speeds and that's when Klock Werks set out to find a solution that would make the bike more stable at high speeds.

Brian kept it simple and started by holding his arm out the window while driving home from Bonneville, testing airflow with his hand held in different positions to figure out how to add downforce. It was then that he realized the solution was to modify the windshield. From there, a prototype was designed, and the Flare® Windshield was born.

After extensive planning and testing, including an incredible opportunity to test the design in Nascar Country at the A2 Wind Tunnel in Mooresville, NC, the Flare® Windshield is now available to you!

FIND YOUR FLARE®

SIZE REALLY DOES MATTER

Over the years, we've learned that what works for your buddy might not work for you. Like shoes, one size does not fit all. As a result, Klock Werks now offers a wide selection of sizes for you to choose from. Follow these easy steps below to Find Your Flare®!

In most cases, Klock Werks recommends you choose a Flare® size that you can look over comfortably.

1

GRAB A BUDDY

To ensure the most accurate measurement, recruit a friend that can assist you with this process. While measuring by yourself is possible, it can be difficult.

2

GET IN YOUR RIDING POSITION

Sit on your motorcycle, and *get comfortable*. Try to sit like you do when you ride the majority of the time. Remember, the longer we ride the more we tend to slouch which may impact your needed Flare® size.

3

MEASURE FOR YOUR IDEAL FLARE®

Place a yard stick horizontally above your top lip. Hold it level (parallel to the ground), and have your buddy measure vertically from the bottom edge up, in the center of the existing windshield, to determine your Flare® Windshield size.

4

CHOOSE A FLARE® SIZE

For the best performance, Klock Werks recommends you choose a Flare® size that is comfortably lower than your line of sight, but not lower than your chin.

STILL NOT 100% SURE WHICH FLARE® SIZE TO CHOOSE?

The Try It Before You Buy It program is available, in select areas, for you to test ride the Flare®. This ensures you find the best fit for you *and* your ride. To find a dealer near you that offers the program, check out the Dealer Locator at GETKLOCKED.COM. >>

SPORT GLIDE FLARE® WINDSHIELD

Sport Glide owners, you asked, we listened. This functional and sexy windshield is designed to keep a low sport profile, while kicking up the air to create a less turbulent wind pocket. Available in one height, we've created this windshield for your unique fairing.

Measures approximately 8" from the lip of the fairing to the top of the windshield.

THE FLIP

Creates clean, less turbulent air for rider and passenger

THE HIPS

Re-routes air to add downforce and aid stability

SLEEK STYLE

The trademark sleek styling of the Flare® compliments your bike

LOOK FOR THE LOGO

Our logo is always front and center on an authentic Flare®

BUILT TO LAST

Made from hard-coated polycarbonate for added strength and durability

MADE IN THE USA

We source from companies we know and trust in the USA

BILLBOARD
FLARE®

HOW TO FIND YOUR BILLBOARD FLARE®:

1. Find your family
2. Locate your model
3. Determine your bracket style*
4. Choose your size and color

HOW THE BILLBOARD HEIGHT IS MEASURED:

Measure from the headlight cutout (just above the headlight) up to the top of the shield.

BRACKET TYPES:

*The Billboard Flare® does not include mounting hardware. It is designed to work with factory mounting brackets and hardware.

NO TWO RIDERS ARE THE SAME

At Klock Werks, we know that the perfect ride starts with the perfect fit. That's why we designed two distinct handlebar styles to match your unique riding style and comfort needs. Whether you're chasing aggressive adjustable performance or all-day economic ergonomics, our bars are built for adjustability to keep you in control and riding longer—with attitude.

IF YOU WANT TO...

ADJUST IT YOUR WAY

KlipHanger Bars are the ultimate for customization. Tweak your hand and wrist position to dial in your perfect ride feel.

RIDE IN NATURAL COMFORT

Ergo Bars are designed to match the way your body wants to ride. No strain, no forced posture - just smooth control and all-day ease.

KLIPHANGER BARS

ERGO BARS

Riding Style	Aggressive, performance-oriented	Relaxed, comfort-focused
Adjustability	Fully adjustable for up and back hand and an and out wrist positioning	Fixed ergonomic wrist shape for natural grip with up and back options
Design Aesthetic	Bold, sharp, high-impact styling	Sleek, clean, minimalistic lines
Comfort Level	Reduces fatigue on long rides with fine-tuned adjustments	Designed to ease tension in shoulders and wrists
Install	May require additional setup depending on height	Model-specific fitment for easier install
Best For...	Riders looking to dial in the perfect aggressive setup	Riders who want all-day comfort with a clean, custom look

FIND YOUR PERFECT SETUP

KLIPHANGER BARS

FOR TOURING MODELS

Fits perfectly with the narrower center section of the 2015-2023 Road Glide models with anti-vibration clamps.

PICK A STYLE, BOLT IT ON

Nothing shapes a bike's look faster than the right fender. Whether you're aiming for aggressive and tight or long and low, we've got you covered. Our stamped steel fenders are made to fit clean, bolt up easy, and last forever.

EXACT FITMENT

Each fender is made to match your model and tire combo for a dialed-in fit right out of the box.

BUILT TO LAST

Stamped from 14-gauge steel then laser cut using 5-axis laser technology for accurate bolt-on installation every time.

E-COATED TO RESIST RUST

We go the extra mile and add e-coat, a rust-fighting finish that protects your fender and cuts down on prep work.

MADE IN THE USA

Stamped right here in the heartland of good ol' USA.

KEEP AN EYE OUT FOR THE FIT KIT LOGO! TO MAKE INSTALLATION EVEN EASIER, THESE FENDERS ARE PACKAGED WITH MOUNTING BLOCKS AND HARDWARE IN ONE BOX.

Installation requires use of front fender
MOUNTING BLOCKS on some models. Some
fitments are available as Fit Kits.

FRONT FENDERS

BENCHMARK SERIES

Traditional bagger style without the factory rivets. Benchmark Style Front Fenders offer rivetless smooth sides, an extended (1-1/2") rear tail and a lower profile than your stock fender. The 14-gauge stamped steel is rigid enough to act as a fork brace. Benchmark fenders are 6-1/2" wide. Fitments available for 16", 17", 18", 19" (fits up to 140 series tire) or 21" wheels (fits up to 130 series tire).

TIRE HUGGER SERIES

If you'd like to step away from traditional "full coverage" fender style, take a look at our Tire Hugger Series Front Fender options. Designed to hug your tire closely and let you show off your wheel, these direct bolt-on replacement fenders will dramatically change the look of your bike. The use of 5-axis laser cutting ensures accurate fitment, and the stamped steel with e-coat minimizes any need for bodywork and continues to resist rust and corrosion even after it's painted. The 14-gauge steel is even strong enough to act as a fork brace for your front end.

19" SERIES

Modern day performance and styling for your ride. Klock Werks is on-trend with 7 different front fender styles to help you lead the pack and take your project one step further. Klock Werks fenders are stamped from 14-gauge steel and e-coated to prevent rust and corrosion. Deep draw stamping technology provides a smooth surface that won't require hours of bodywork at the painter, saving you cash. The 14-gauge steel is even strong enough to act as a fork brace for your front end.

REAR FENDERS

STAMPED STEEL

All Klock Werks Rear Fenders are stamped from 14-gauge US Steel and e-coated to prevent rust and corrosion. The use of precision deep-draw stamping technology ensures a consistent flawless finish that minimizes body work. All mounting holes are pre-cut using 5-axis laser technology for accurate fitment and bolt-on ease.

BENCHMARK REAR FENDER

One of the first products developed by Klock Werks, the Benchmark Series Rear Fenders are made from 14-gauge stamped steel, precision-cut, E-coated, and painter-approved. These fenders prove that classic design never goes out of style.

DETAILS MATTER

The little things? They're not so little. The right parts do more than just finish a bike – they solve problems, smooth out installs, and hold up for the long haul. We design each and every product like it matters, because it does. Whether it's a better fit, a smarter design, or a tougher material, you'll feel the difference in every ride.

BIKE-SPECIFIC DESIGNS

No guesswork here. Our parts are made to fit your exact make and model for a cleaner install and a factory-tight feel.

BUILT LIKE WE MEAN IT

Hard-coated, rust-resistant, road-tested. Because cheap parts are expensive in the long run.

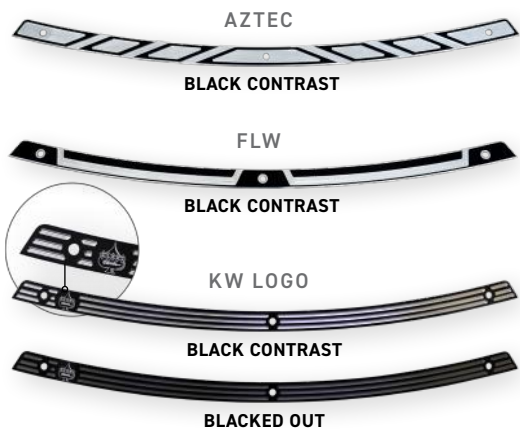

NOTHING WE WOULDN'T USE

Every part is tested, tweaked, and built to work smarter - not just look the part.

If it feels like something's missing, it probably is. These parts are where function meets form.

FLARE® WINDSHIELD TRIM

FOR H-D 2014-2023 FLH

After installing literally thousands of Flare® Windshields at events and locations over the years, we put together a solid line of easy to install, stylish designs that add the final touch and detail to set your bike apart from others. Hardware included.

FLARE® NUTS

FOR H-D 98-13 FLTR AND FXRP FAIRING

Factory well-nuts are prone to failure after a few uses. Klock Werks Flare® Nuts are manufactured out of a superior material and have a revolutionary design, including a metal washer molded into the flange to prevent the well-nut from pushing through the windshield mounting hole and ending up inside your fairing. In addition, we've added a superior brass threaded insert that tightens the well-nut, but allows for continuous installation and removal. These advantages ensure these are the last set of well-nuts you will need!

For H-D 1996-2013 Tour Pak	Rear Speaker Grilles (pair)	4405-0151

SOFTAIL DASH AND IGNITION RELOCATION KIT

Here's an innovative kit that gives your Softail a more streamlined, smooth, show finish. It visually increases the length of the tank without actually stretching it.

The Klock Werks steel dash has a raw finish and fits stock-length Softail tanks. The kit reuses stock ignition switch and key; ignition switch mount replaces the horn mount and requires horn relocation. The ignition switch relocation mount is show chromed, CNC-machined 6061 Aluminum, is easy to install and uses factory wiring. All necessary mounting hardware is included.

FITMENT	DESCRIPTION	PART #
For H-D 2000-2015 FXST · 2000-2017 FLST	Complete Kit	2106-0045
for H-D 1994+ FLHR · 1996+ FLHP · 2000 FLHF, FLRT, FXST, FLST	Ignition Switch (Mount Only)	2106-0074

CURVACEOUS METAL DASH

FOR H-D FL TOURING MODELS

Klock Werks Curvaceous Metal Dash smooths out your tank for a clean, low-profile look and accepts most aftermarket low-profile vented gas caps. Stretched look for a fraction of the cost. The Klock Werks dash gives the stretched look for a fraction of the cost with e-coated, stamped steel, ready to paint.

UPPER FILLERS

FOR H-D FL TOURING MODELS

All eyes will be on the rear of your bike when you choose Klock Werks Upper Fillers. These 16-gauge steel fillers have an E-coat finish (ready-to-paint) and mate up to Klock Werks Lower Fillers or the stock panels on Street Glides, accenting the line of your fender and hiding clutter for a custom look. Upper Fillers are available in two versions: a smooth version for models with or without detachable backrests and a slotted version for models with detachable Tour-Pak®. Eliminates stock license plate mount bar. All are sold in pairs and include all necessary hardware.

LOWER FILLERS

FOR H-D 1995-2008 TOURING MODELS

Constructed from 16-gauge steel and e-coated for rust and corrosion resistance, they are the only steel filler designed to be used with or without detachables. Lower fillers are great to use in conjunction with Klock Werks Upper Fillers to smooth out the entire area. Lower Fillers are sold in pairs and include all necessary hardware.

KLEANING PRODUCTS

DEVELOPED BY RIDERS, FOR RIDERS

At Klock Werks, we don't just design and produce awesome parts for your motorcycle. We are riders who understand the need to clean our own Flare® Windshields, painted parts, chrome surfaces and engines! We've tested countless products in the market, and engineered our own water-based cleaning agent that includes a protective wax polish to create a complete kleaning product lineup. This is what we use and we are excited to share it with you!

SHINE WERKS

RECOMMENDED CLEANER FOR YOUR FLARE® AND MORE!

Shine Werks cleans, shines and protects plastic, leather, acrylic, plexiglass, lexan, chrome, fiberglass, and paint. Invisible protective coating protects surfaces and repels dirt, dust, fingerprints, smudges and bugs. Resists scratching and marring of surfaces. Dries quickly and buffs to a streak free shine!

ENGINE WERKS

WATER BASED PRODUCT TO RENEW THE FINISH ON YOUR MOTOR

Engine Werks is a unique water-based product designed to renew the powder coat finish on your motor. This product uses solvent free and non-flammable ingredients that are designed to deter dust and dirt from collecting on the surface of the motor. Simply spray Engine Werks on the cool, dry, powder coated surfaces of your motor and let dry. Renew as needed.
