Reformer Aluminium Domus

Reformer Aluminium Domus is the smallest Reformer. It takes very little space and its assembly is very fast and easy. It includes a security system that keeps the carriage fixed to the stretcher frame, avoiding it to fall down when the Reformer is in vertical position.

Reformer Domus is perfect for home and small training rooms. Due to its size, that allows to maximize the space it can be stored under the bed or behind the door.

IT INCLUDES:

- Reformer
- Complete set of 4 springs (4 different strengths)
- Set of double loop handle
- Rope set
- Fixed foot strap
- Anti-slip Pad
- Small headrest pillow

Material	Aluminium
Measurements	Length: 194cm, Width: 59cm, Height: 53cm.
Footbar	Fixed. Height: 55cm, Width: 58cm.
Cart	Light and silence sliding carriage including a security system that keeps it fixed to the stretcher frame, avoiding it to fall down when the Reformer is in vertical position.
Upholstery	Resistant and easy to clean. Various colors.
Springs	Security system. Combination of several strengths. They can be chosen individually.
Shoulder rest	Fixed.

Reformer Compact

Reformer Compact is perfect for multifunctional training rooms, due to his features it is very easy to move and stack until 8 units.

This Reformer does not accept the adaptation of the A-S tower due to its height.

IT INCLUDES:

- Complete set of springs
- Complete set of handles
- Rope set
- Foot strap
- Nylon handle with neoprene grip

Material	Aluminium
Measurements	Length: 246cm Width: 72cm Height: 60cm
Footbar	Height: 50 cm, Width: 73 cm. Rotation of 250° and more than 20 positions.
Cart	Light and silence sliding carriage with 8 wheels system
Upholstery	Resistant and easy to clean. Various colors.
Springs	Security system. System of individual subjection and System of regulation of multiple positions. Combination of several resistances.
Shoulder rest	Removable shoulder straps with thread system and interchangeable with each other.
Headrest	3 positions
Ropes and handles	Height adjustment system of the pulleys. Rope length regulation system.

Reformer Aluminum Monitor

Reformer aluminum monitor has an aluminum structure that gives to this Equipment a perfect combination of stability, safety and lightness. The features of this equipment allow to enjoy all the usability of a Reformer at the same time that facilitate the movement of the machine by one single person due to its light design and wheels system.

Stackable until 4 units.

IT INCLUDES:

- Complete set of springs
- Complete set of handles
- Rope set
- Foot strap
- Nylon handle with neoprene grip

Material	Aluminium
Measurements	Length: 246cm Width: 72cm Height: 79cm
Footbar	Height: 50 cm, Width: 73 cm. Rotation of 250° and more than 20 positions
Cart	Light and silence sliding carriage with 8 wheels system
Upholstery	Resistant and easy to clean. Various colors.
Springs	Security system. System of individual subjection and System of regulation of multiple positions. Combination of several resistances.
Shoulder rest	Removable shoulder straps with thread system and interchangeable with each other.
Headrest	3 positions
Ropes and handles	Sistema de regulación de altura de las poleas. Sistema de regulación de longitud de las cuerdas.

Reformer Wood Monitor

Reformer wood monitor, built in Beech wood, has a very solid and stable structure, that allows the execution of every exercise in a very safe and comfortable way.

This model has a classical design but it has been made with all the adaptations that compose our Adapter System, which allows the machine to adapt to the necessities of each user:

IT INCLUDES:

- Complete set of springs
- Complete set of handles
- Rope set
- Foot strap
- Nylon handle with neoprene grip

Material	Solid wood beech
Measurements	Length: 242cm Width: 80cm Height: 71cm
Footbar	Height: 50 cm, Width: 73 cm. More than 20 different positions along 250°
Cart	Light and silence sliding carriage with 8 wheels system
Upholstery	Resistant and easy to clean. Various colors.
Springs	Security system. System of individual subjection and System of regulation of multiple positions. Combination of several resistances.

Material	Solid wood beech
Measurements	High: 88.5cm Width: 54.5cm Length: 113cm, System of regulation of position by groove with fixation.
Upholstery	Resistant and easy to clean. Various colors.
Number of bars	4 bars

Universal Spine Corrector

Principal advantage of this equipment is to stretch the column, tone the muscles and improve the posture.

Material	Upholstered-wood-structure
Measurements	Length: 74cm Width: 42cm Height: 31cm
Handles	Metallic
Upholstery	Resistant and easy to clean. Various colors.

Universal Box

Material	Upholstered-wood-structure
Measurements	Length: 74cm Width: 44cm Height: 23cm
Upholstery	Resistant and easy to clean. Various colors.

Small Arc

Measurements	50 x 50 x 20.5cm
--------------	------------------

Universal Jumpboard

Accessorie for Universal Reformer that allows to work on lining up ankle, knee and hip.

Material	Solid wood beech
Measurements	Height: 33cm Width: 42cm
Upholstery	Resistant and easy to clean. Various colors.

Feet Support Table

Accessory for Classic Reformer

Material	Solid wood beech
Measurements	Length: 42 cm and Width: 23 cm

Corner Cover for Classic Reformer Head

Corner Cover for Classic Reformer Head

Foot Corrector

First device invented and patented by Joseph Pilates with a pedal that He would develop until getting all kind of other equipments.

Airplane Board

Breath-a-Cizer

The Pilates or Breath-a-Cizer breathing exerciser is another small device Joseph Pilates invented.

It is a device with a windmill wheel. It is blown through a straw and moving the breathing wheel learns the proper use of the diaphragm, proper breathing and treats people with asthma. The breathing wheel was actually called the artificial respirator and was designed by Joe as a way to practice and improve proper breathing.

Toe Corrector

This device complement the foot corrector work. These devices are specific for the feet and used when the student need them. Most of these exercises are called Pre Pilates, that help people to do the rest of exercises on the other apparatus.
