BERG FURNITURE

Take a seat, relax and experience the joy of supreme comfort. This is the message behind our exclusive furniture, which has brought joy to thousands of people around the world for generations. We design furniture and bring it to life, with a genuine desire to continue the proud tradition of classic Danish furniture design. At BERG, we consider comfort, design and ergonomics equally important, and we believe that it's only where they meet, in the middle, that the perfect piece of furniture is created.

Well-being of body and soul is achieved when furniture adapts to the body and not the other way around. Unique comfort with relief for the upper and lower back provides stress-free rest. Our designs aren't standardised, off-the-shelf products, but are created in dialogue with you to meet your personal needs and wishes. Each chair is adapted to the individual user, marrying design, materials and personal needs to create the perfect seating position and the joy of superior comfort. Our skilled employees produce your furniture with professional pride, passion and a craftsman's love of details. BERG Furniture unites form and function – we call it Comfort in Design.

BERG SQUARE

Nasa – perhaps the most comfortable chair in the world. Nasa boasts a simple, timeless design combined with patented Century foam. Its organic form and personalised adjustment options make it uniquely comfortable. A stepless tilt function provides the best possible posture in all positions. We adjust the chair's height, tilt and backrest according to your needs, to give you maximum and completely individual seating comfort. The robust Aston stitching and details on the armrests and footstool reveal craftsmanship of the highest quality.

ERGONOMICS TO SUIT YOU

I've had a chair made that suits my body's needs perfectly. It's adapted to my personal measurements so that, for example, the lumbar support and seat height are adjusted correctly. The built-in ergonomics really increase my quality of life. I can definitely feel that the personal adaptations provide relief in the right places. I can concentrate better and feel rested when I stand up.

FOCUS ON COMFORT

To us, furniture isn't just about sitting comfortably. We want to sit PERFECTLY. That's why we've chosen furniture by BERG Furniture. Here we find just the right level of comfort to make sitting for long periods of time a pleasure. The furniture is designed according to our needs, wishes and expectations. The resultant comfort satisfies our need for personalisation, ergonomics, quality materials and, not least, excellent craftsmanship. The unparalleled seating comfort lets us relax with a book, a TV series and good times with family and friends. We spend a lot of time sitting in these chairs, which is why we want the best of the best.

DESIGN AND FUNCTION

I fell for the furniture's timeless, classic and sculptural design. Form follows function. There's clearly a reason why BERG do things the way they do. It's not just design for design's sake, but a beautiful combination of design and function. I never compromise on the quality of the things I have around me. And when they have distinctive designs and I can even have the product adapted to ME – then the choice is easy. A daily delight for the eyes and body.

BERGFURNITURE.DK

Our skilled craftsmen produce your furniture with professional pride, passion and love of details. We've made a short video about this which you can watch at bergfurniture.dk.

PROUD DANISH TRADITIONS

Our customers are very discerning when it comes to the things they surround themselves with. That's why we, too, don't like to compromise. Either we do it right, or we don't do it at all. The keyword is individuality. Customising a piece of furniture so it adapts to the body, and not the other way around. A responsible attitude towards the environment and our employees' working conditions. A desire to protect nature and choose raw materials that are traceable and don't contain harmful substances. A conscious choice and an opportunity we have because we produce our furniture in Denmark and can control the process from beginning to end. The individual employee's signature on each product we make shows our accountability and confidence in every stage of production. We never talk about shelf or stock items, but rather tailor-made furniture from us to you.
