INTRODUCTION TO

THE COMPANY

An ISO 9001:2015 certified company established in 1984 has been at the forefront of the cast aluminium, brass, and bronze industry in the United Arab Emirates and the region for decades.

The largest non-ferrous foundry in the Middle East. Has an extensive range of cast decorative architectural designs for lamp posts, gates, fences, balustrades, screens and other miscellaneous products (trash bins, benches, bollards, street and garden furnitures, etc.) Following International Health & Safety and Quality standards.

MISSION

A leading Architectural cast aluminium and Cathodic protection foundry producing bespoke, customized and high-quality castings with superior technical details offering value added service to Gulf regions' public municipalities, property developers, oil companies and offshore construction contractors.

VISION

To be a world leader in offering excellence, high quality, creative, innovative engineering solutions and to continuously diversify, develop and research high-tech products in a healthy safe environment for both Architectural and Cathodic protection divisions.

ARCHITECTURAL PRODUCTS

LIGHTING

Alico Industries offer lighting fixtures ranging from wall mounted to 18m high lamp posts. The designs comply with international standards whilst maintaining the traditional arabesque beauty.

GATES

The entrance gates to a property is a physical expression of the owners' personality and naturally as such there are a myriad of individual designs.

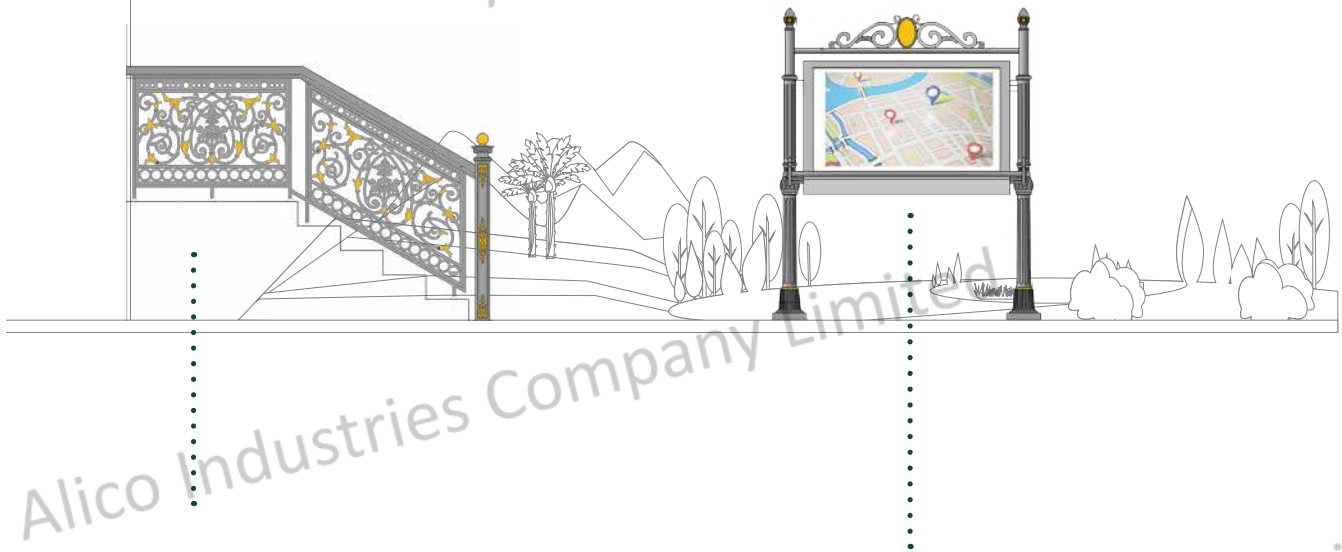

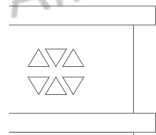

Our expert designers and craftsmen design, produce and install the perfect gate according to client's requirements incorporating up-to-date design standards and technology.

Available in all shapes and sizes, our gates are composed of the best materials available and are very elegant and trendy. They come with an added advantage of remote-control for both sliding and hinged gates.

SCREENS & MASHRABIYAS

Screens are most attractive with an abundance of designs and are still much used as 'glassless windows' adding to the mystique of the orient in the region. Screens are primarily used to give shade, as a decorative item and/or offer security to the property.

The region is renowned for its elaborate and intricate decorative designs and utilizing modern technology. Alico Industries combine beauty with mechanical strength that has replicated these mediums into long lasting and trouble free cast aluminium and specializes in large scale screens.

FENCES & BALUSTRADES

Whether for security, safety or simply to define a boundary, Alico Industries produce an extensive range of fence designs and continue to develop innovative new designs based on specific requirements to enrich and blend in with their surroundings.

Alico Industries also offer decorative fencing for bridges, pedestrian and crash barrier as per international motorway standard. The finish, alloy, height and width will depend upon the area, site conditions and specifications.

MISCELLANEOUS

These categories of products are made with dramatic and elegant features that blend with their surroundings. Designs are themed to harmonize with the overall concept of its location and can be modern or classical. The range includes park benches, trash bins, bollards, signages, canopies, wall bracket mounted torches, street and garden furniture, clock casings, gazebos, information booths and stands for hotels, shopping malls and restaurants.

MISCELLANEOUS
