elleci district

A growing space for constantly evolving ideas

For more than 30 years we have been creating innovative materials and shaping design solutions that improve people's quality of life.

We combine technology, Italian style and matchless ability to anticipate desires to elevate everyday experiences in the kitchen and bathroom.

100.000 mq

Total Area

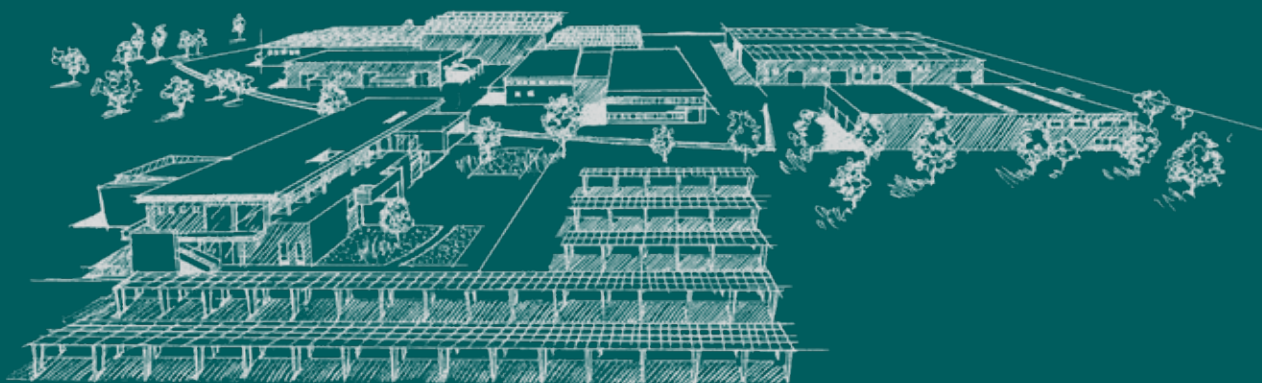

50.000 mq

Production area

1,2

Million units/year

Production capacity

elleci plant 1

Historic manufacturing plant focused on flexibility and customization of production.

elleci plant 2

Independent, highly sustainable and technological production plant where tradition and know-how meet modernity and automation.

elleci innovation center

Dedicated to research and development where the most ambitious ideas take shape.

elleci care

Value and caring relationships: this space is fully directed at enhancing the relationship of trust with customers in pre- and post-sales phases.

elleci home

A hospitality and training area; a place where past and future visions coexist. A complete experience of Elleci world.

Today, more than ever, innovation means responsibility.
We base every business decision on fixed goals:

- Program
“Road to 2030-2050”
- Sustainable supply chain
- Believe in talents
and territory
- Transparent financial
governance

Materials

At the Elleci Innovation Center, the team of researchers combines expertise and technological leadership with innovation. This is how high-performance materials are created, designed to make a positive impact on people's daily lives.

GRANITEK

A material made of quartz sand, characterized by a slightly textured surface and natural colours. The technology enhances the intrinsic properties of the stone and improves its performance, ensuring cleanliness, durability, and resistance.

Drain System

The modern drain system:
attractive, efficient, easy to use and maintain

Open Up

The push-control remote control
with a flat, minimal chic look.

Flow Pro

Elleci's exclusive solution is
designed to provide maximum
functionality and to fit seamlessly
in with the sink. The choice of
finish - Black, Gold and Brushed
Stainless Steel - transforms it
into a design element that blends
in with elegant components.

Black

Gold

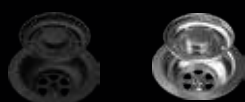

Inox

Design is functional aesthetic

The optional remote controls interact with the different **Flow Pro**, **Flow** and **Ghost** systems to elevate the user experience by allowing you to open and close the drain remotely.

Flow

Clean lines and a touch of style are the distinguishing traits of Flow, which is designed to improve water outflow and usability compared to traditional drain systems.

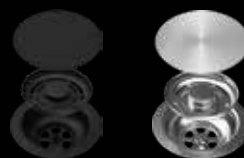

Black

Inox

Ghost

The cover conceals the drain and becomes a design feature, matching seamlessly with the bowl, mixer and accessories or used to create colour contrasts.

Black

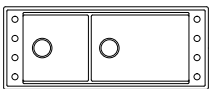

Inox

Mixology

Smart shapes, modular solutions and flexibility create a finite space with an infinite number of uses. Creatively inspired by professional workstations, Mixology juxtaposes and superimposes the figure of the home chef with that of the **bartender**, turning the spotlight on the art of mixing drinks and new trends in entertaining at home.

Dialogo

Intuition is a light-bulb moment. The preparation area evolves into a seamless system in which all elements work together, enhancing performance.

The rational design exploits the size of the extra-large bowl, slanted to improve drainage.

Waste Disposal

A waste disposal unit is an essential modern appliance that disposes of organic waste and makes life easier in the kitchen. With the simple press of a button, the food is ground up and eliminated. Easy to install, compact, quiet and safe. Food waste is reduced to small particles and discharged into the sewage system with the waste water.
