

Commercial Laundry
Equipment

Description:

- Robust construction. Durable quality stainless steel panel & drum, acid and alkali resistance, corrosion free.
- Microprocessor control. User friendly and easy programmable. 5 pre set programs and 25 programmable, setting washing period, time, frequency at will. Optional hand operation control.
- Mechanical suspension shock structure, combination of large diameter spring and hydraulic damper, perfect running, low noise, 100% free-standing.
- Large door opening makes loading and unloading easy.
- Integrated Safety door locking system
- Soap dispensers, corrosion free.
- Air regulated system for drain and inlet valves.
- Hot/cold fill. Steam/electric heated. Remote lubricating.
- Imported CTTO viton seal. Multiple sealing system, oil sealing, water sealing, stainless steel sealing. No leakage.
- TWB bearing, precise and durable.
- Imported Siemens chip inverter system, realizing washing and extracting stepless adjusting.

Series	Product Description	Model	Dimension(mm)	Run Power (Kw)	Water Heat		Roller Size

Description:

- Fast drying performance
- Micro processor control. temperature control and over-temperature protection device installed.
- Durable stainless steel drum , prevent the fabric from pollution, anti-corrosion.
- Concentrated airflow and sealed drum ensure maximum air utilization and energy savings to improve drying efficiency.
- Heat-exchanger adopt seamless pipe to make higher thermal efficiency.
- Advanced structure, fewer moving parts mean fewer maintenance problems and less wear.
- Heating: electrical, steam, electrical and steam, gas/LPG.
- Easy accessibility to the vital parts, easy service, quick replacement of the belt.
- Large door, easy loading and unloading, opens 180°, option: left or right opening.

Description:

- The roller is made of 304 stainless steel, the transmission shaft is made of fine drawn steel pipe and the outer stainless steel pipe, which greatly extends the service life of the whole machine.
- The two-side frame of the ironing machine is welded with high-strength and high-quality steel plates, so that the equipment can ensure efficient and stable operation during high-load operation.
- Using frequency conversion control, the speed can be adjusted according to different cloth.
- With the automatic tightening mechanism of the conveyor belt, it can automatically tighten the conveyor belt to the best state according to the energy supply and the thickness of the fabric, and improve the ironing quality.
- A safety baffle is installed at the feeding place. As long as the baffle is pushed, the equipment will stop immediately to ensure the safety of the operator.
- Modular box design, so that the machine can easily upgrade the number of rolls according to customer requirements.
- The steam end of the large roller is equipped with lubricating oil filling device, which can ensure the lubrication of the main bearing and is equipped with a safety emergency stop switch.
- About ironing machine We can produce single roller ironing machine, two roller ironing machine, three roller ironing machine, four roller ironing machine, five roller ironing machine and so on
- There are three heating methods of the ironing machine to choose one of them: electric heating, steam heating, gas heating.

Description:

-Barrier washers are separated into un-clean area and a clean area, clothes is loaded from the unclean area and unloaded from the clean area so that the washed clothes can be treated against cross infection. So it is the best solution for hospitals.

-The large touch screen with English operation interface. Which ensures the dialogue between operator and the machine more convenient and reliable.

-Heavy-duty design and anti-shock device makes running smoothly and shock to minimum.

-Auto-correction button makes the door positioned accurately at the loading and unloading.

-Double-bolt locking system. With anti-loosen functions, security and easy operation guaranteed.

Series	Product Description	Model	Dimension(mm)	Run Power (Kw)	Water Heat		Roller Size	
					Electric	Steam		
LA	Barrier Washer Extractor 20kg	BW-200	1360*1250*1690	220~240v 380~400v	2.20	18.0kw	20~25kg	Ø730*490mm

Description:

- High speed embedded microprocessor. More advanced than SCM (Single chip micryoco)270° rotation, Easy to control.
- High speed pulse input to detect the speed and length of cloth, folding accurately.
- Total error detection.
- Automatic program for your choice, Bed Sheets five-fold. Pillowcase two-fold. apply to many kinds of cloth.
- Password protection to prevent parameters being changed.
- I/O testing function.
- Multi-lauguage menu.
- Check-up speed of machine running.
- Static eliminator available to avoid static generation.
- Germany Schneider electric parts ,Korea LS inverter.two invertors.
- Four driving motors make folding no stuck.

Series	Product Description	Model	Dimension(mm)	Run Power (Kw)	Bed Sheets	Pillowcase
LA	Bedsheet Folding Machine	ZD3000-V	4200*2300*1760	220~240v 380~400v	1.87	5-Fold 2-Fold

Description:

- This product is specifically designed for automated towel folding.
- High folding speed significantly improves labor productivity.
- The towel folding machine folds 900-1200 towels per hour.
- Utilizing advanced design concepts to optimize the frame structure, making the machine robust and stable.

Series	Product Description	Model	Dimension(mm)	Run Power (Kw)	Air Pressure	Folding
LA	Towel Folding Machine	MZD-100	1150*2700*1200	380~400v 0.50	0.5Mpa	2-Fold

Description:

- High quality recycling working system.99% solvent can be recycled. saving solvent. perfect seal, no pollution to the air, no harm to human.
- Inverter equipped, compact structure, stable running, different speed, the washing ,extracting and balancing can be selected according to the different fabrics.
- PLC computer controller.
- Frequency conversion motor, saving power.
- Circulation filtering devices, keeping the solvent clean during washing to get the better result.
- With firm structure, all water contact pipe and main parts are on stainless steel to make sure a long service life.
- Trap under the machine, which ensure no leakage and protect environment.
- Centrifugal filter, which makes drying speed faster and less consuming solvent.
- Washing result is satisfied, non-damaged, clean, non-shrinkage or non-crease, fur coats will be soft and non-fading.
- Device combines advantages of brand-name in Germany and Italy.

Clothes Packing Machine

- Saving time and labor, simply to hang clothes together with the hanger to the packing machine, put on the special purpose packing membrane, press down the Packing Machine to finish the clothing packing;
- Adjust the length of package at will. Be suitable for all kinds of clothing packing, such as trousers, coat, T-shirts
- The post-packaging clothing can be effective dustproof and avoid the oil pollution.

Clothes Conveyor

Widely used in dry cleaning shops, garments factories. Easy operation and maintenance, extremely practicable, very good performance.
