DESIGNER**FORM**

Designerform's THERMOLAMINATED doors and panels offer is inspired by the latest global trends to provide you with the designs, colours and finishes to enhance your individual character and style of your kitchen, the centrepiece of your home.

Our dedicated and highly trained tradespeople proudly produce Designerform THERMOLAMINATED doors and panels using only the best quality materials. All doors and panels are constructed using low emission E0 (E-Zero) Australian made environmentally accredited substrate board. Our stylish doors are profiled, edged and pressed using the highest quality Japanese (Bonlex) PVC foil, Australian made E0 substrate board with a programmed fabrication process utilising the latest German and Italian precision machinery in our state-of-the-art Campbellfield facility.

At Designerform, we provide total flexibility on your choice of THERMOLAMINATED doors and panels. With an extensive product range of colours, profiles and designs available, we can offer you the design solutions and outcomes to your commercial and domestic requirements. We invite you to visit our showroom or our website to view our full range of decors and customized service solutions. Our THERMOLAMINATED doors and panels provide you with peace of mind, offering highly resistant and durable surfaces able to withstand the rigors of the day to day impact that a busy family kitchen, pantry, laundry, wardrobe, entertainment, storage and study area demands.

Designerform designs and manufactures standard and customised profile THERMOLAMINATED doors and panels for internal joinery, motorhomes, commercial applications and specifications including kitchens, butler's pantry, laundry, wardrobes, study, storage and wall panel solutions.

If you have your own unique door style in mind, our in-house Designerform programmers would be happy to create one for you. All THERMOLAMINATED doors are available in routed, single sided, double sided and raw MDF finishes. Doors are produced with standard white backs, however, can be colour matched on both sides upon request. All Designerform THERMOLAMINATED manufactured doors and panels are backed by our 7-year limited manufacturer warranty.

Designerform is an established market leader due to our commitment to quality, service and on time delivery as an Australian made and family owned custom-made solutions provider of THERMOLAMINATED doors and panels.

PAINT

All doors in this brochure are available in double-sided white supplied for paint or painted by Designerform.

The Dulux colour range is now available in 2 PAC at Designerform. Please inquire for more information. Visit the Dulux website to view the complete colour range.

Advantages of ordering Designerform

2 PAC Kitchen Doors and Panels:

- A single contact turnkey solution provider of finished 2 PAC doors and panels.
- Large selection of Designerform profiles available – <https://designerform.com.au/products/kitchen/door-styles/>
- Select from the full range of DULUX colours and finishes – <https://www.dulux.com.au/colours>.
- Efficient single point of contact with competitive supply timelines.

WHAT IS A 2 PAC KITCHEN?

- A 2 PAC Polyurethane door/ panel is the most common material used for kitchens, robes, vanities, custom joinery and commercial projects.
- With excellent durability there is no limit on colours and available gloss levels from 10% (matt), 25% (satin), 50% (semi-gloss) and 100% (full gloss).
- Low maintenance and easy-to-clean.

Contact your Designerform representative or our office for further assistance.

ACCESSORIES

DOOR EDGE PROFILES

RANGEHOODS

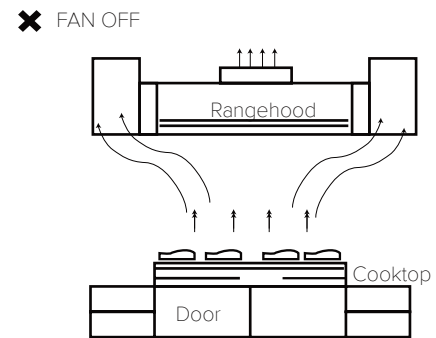

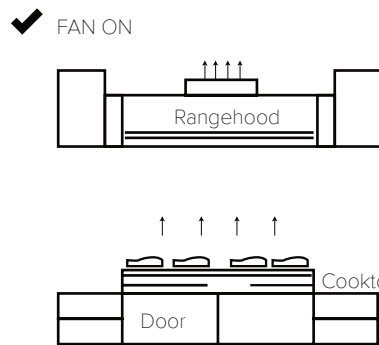

HEAT DEFLECTORS, OVENS AND DISHWASHERS

Exposure to high heat over long periods of time may cause damage to THERMOLAMINATED doors and panels.

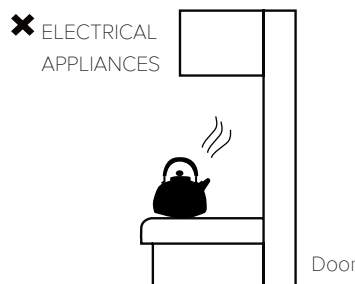

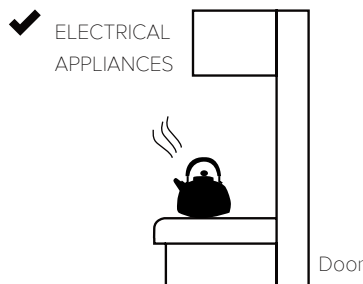

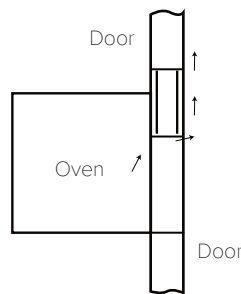

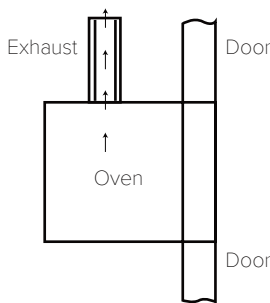

When installing appliances we recommend that the appliance manufacturer's installation specifications and the Australian Standards AS/NZS 4386.1 are adhered to. Where possible the appliances should be of a ducted exhaust configuration. Concealed rangehoods with THERMOLAMINATED doors and panels will void warranty.

Stainless steel heat deflectors are available from Designerform and are essential for use where heat is likely to come in contact with THERMOLAMINATED doors and panels for example dishwashers, ovens and microwaves. Warranty will be void if heat deflectors are not used.

✓ OVEN WITH DUCTED EXHAUST

✗ OVEN WITH FRONT PANEL EXHAUST

PLEASE NOTE

It is not recommended to use undermount or concealed rangehoods with thermolaminated doors and panels as this will void warranty.
