"Wonderful K-Beauty"

Hot Korean Pavilion, Hotter Korean Wave

Approximately 480 Korean companies are participating in Cosmoprof Asia 2024, which will be strategically held across two venues. From 11 to 13 November, AsiaWorld-Expo (AWE) will host exhibitors specializing in ingredients, machinery and equipment, packaging, contract manufacturing, and private label.

From 12 to 14 November, the Hong Kong Convention & Exhibition Centre (HKCEC) will welcome exhibitors of finished products, including cosmetics and toiletries, natural and organic beauty, salon and spa products, hair and nail care, and accessories.

A new section, the Extraordinary Gallery, will debut at the HKCEC as an inspirational “show within the show,” providing an ideal international platform for selected innovative brands and companies from every sector of the beauty supply chain.

Korean exhibitors will showcase the latest technologies and products across various categories—cosmetics, salon and nail products, OEM·ODM solutions, packaging, and cosmetic raw materials—spanning HKCEC Halls 1E, 3E, 3G, 5E, 5G and AWE Halls 3, 5, 6, 7, 8, and 10.

Around 480 Korean companies, including major exhibitors such as Tfit Global, COSMOCOS, and BNK, are expected to draw significant attention from global visitors.

A key strength of Korean brands lies in their production of oriental-medicine-based skincare, innovative makeup products like cushion compacts, and facial mask packs made with advanced materials. Korean cosmetics formulated with natural ingredients are particularly anticipated to attract strong interest from international buyers.

In addition, many leading Korean OEM·ODM manufacturers, including Kolmar Korea, Cosmecca Korea, and MEGACOS, will actively present their cutting-edge technologies. Comprehensive brand developers such as Ancors and packaging specialists including CTK Clip, Samhwa, and Taesung will also exhibit their latest innovations at AWE Hall 3, demonstrating the competitiveness and creativity of the K-Beauty industry.

K-Beauty Hot Sellers

Now the global beauty trend is spotlighting K-beauty once again.

With innovative technology and creative concepts, Korean cosmetic brands continue to redefine skincare and makeup standards.

Here introduces K-beauty's rising stars that embody the spirit of innovation and authenticity.

Hydration that Heals Your Skin

SKIN CARE

Korean skincare is known for its scientific innovation and gentle yet powerful formulas. From hydrating creams to soothing repair treatments, these essentials keep skin balanced, radiant, and resilient every day.

COSMOCOS has been committed to becoming a global beauty company that creates new beauty since it was founded in 1992 based on a shared management philosophy of being an upright corporate citizen.

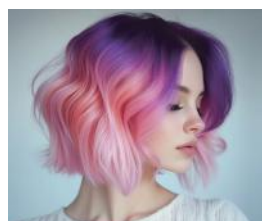

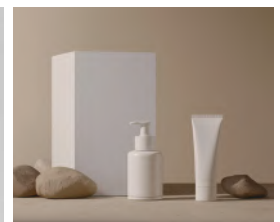

Starting from its first release of "Flor de Man," which opened the market for men's makeup products and multifunctional premium cleansers, our company has launched hit cosmetic brands including "Danahan," the natural herbal brand, and "RG II," the professional anti-aging brand.

We have strengthened our brand positioning and our reputation for quality and value, winning prizes at the Korea Best Brand Awards for seven years running, as well as the grand prize at the Premium Brand Index.

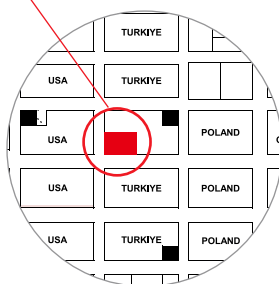

Our company entered into a partnership with KT&G in June 2011. Changing the corporate name from Somang Cosmetics to COSMOCOS in September 2016 marks the second leap towards becoming "the world's leading beauty company that creates new beauty."

Beauty in everyday life 'MEDB'
We are MedB, dedicated to researching
the natural beauty found in everyday life.

We have continuously researched daily
skincare for the past 10 years, and we
are constantly researching skincare
methods tailored to consumers'
skin worldwide.

Discover the beauty of everyday life with
MedB.

■ Product Category

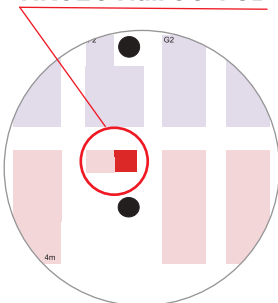

- MD-ONE Hair Therapy Intensive Peptide Complex Protein Milky Essence
Formulated with seven premium natural oils and five powerful peptides, MD-ONE Hair Therapy Intensive Peptide Complex Protein Milky Essence delivers rich nutrition and elasticity to damaged hair. This lightweight, non-sticky cream-type essence deeply nourishes dry and weak hair while strengthening the hair cuticle to enhance resilience and shine.

Dermatologically tested with 0.00% irritation index, it is safe for sensitive scalp and daily use. The formula contains ingredients such as macadamia seed oil, camellia oil, and argan kernel oil to supply moisture, elasticity, and gloss, while peptides (Palmitoyl Tetrapeptide-7, Acetyl Hexapeptide-8, etc.) help repair and protect hair from heat and chemical damage.

Infused with a fresh lemon-herb fragrance, the essence leaves hair feeling soft, smooth, and refreshed — offering salon-quality hair care at home.

Facebook : @kolmarkorea

Kolmar Korea has been a pioneer in the beauty industry since its founding in 1990, establishing the groundbreaking ODM (Original Development & Design Manufacturing) business model for the first time in Korea.

From the very beginning, the company has boldly invested in research and development to create products consumers can trust. Thanks to its forward-looking R&D philosophy rather than a short-term focus, Kolmar Korea has grown into a leader equipped with proprietary core technologies in the cosmetics sector.

Based on its exceptional technology and high product quality, Kolmar Korea provides a systematic, complete service ranging from trend analysis, product planning, and development to shipments and management processes. The company supports brands to ensure that K-Beauty continues to expand throughout the world.

Today, the company invests approximately 7% of its total revenue in R&D. At the Kolmar Korea's R&D Complex in Seoul, opened in 2019, more than 600 researchers are working together to develop sustainable cosmetics through convergence of diverse technologies.

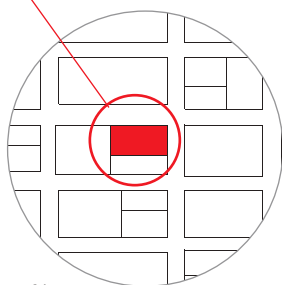

Kolmar Korea was the first company to apply GMP (Good Manufacturing Practice), a pharmaceutical industry quality-control standard, to the cosmetics industry. It was the first in Korea to obtain CGMP (Cosmetics GMP) certifications No. 1 and No. 2, setting a new benchmark for quality excellence across the industry.

A milestone moment came in May 2022, when Kolmar Korea acquired the global trademark rights for "KOLMAR", marking the first time in the history of Korea's cosmetics, pharmaceutical, and health-supplement industries that a Korean company reclaimed a global headquarters brand. The company now holds exclusive rights to use the KOLMAR name across major markets worldwide.

To strengthen its North American presence, Kolmar Korea opened the North America Technology & Sales Center in New Jersey in July 2023 — a regional hub for marketing and business operations that enables agile response to local trends and policies. In July 2025, the company completed its 2nd U.S. factory in Pennsylvania, increasing annual production capacity from 180 million to 300 million units, establishing a critical production base to meet surging K-Beauty demand on platforms like Amazon and other global channels.

Moving forward, Kolmar Korea aims to secure sustainable global growth by enhancing competitiveness across the entire production-to-delivery cycle and expanding its sales network globally, reinforcing its position as a world-leading total beauty manufacturer.

A full-page advertisement featuring a close-up of an astronaut's helmet in space. The helmet's visor reflects the Earth, with the word 'kolmar' written across it in a blue, lowercase, sans-serif font. The astronaut's suit is white with a South Korean flag patch on the shoulder. The background is the vastness of space with the Earth's horizon and a bright light source.
