GYMNASTICS

TEAMWEAR

2025 - 2026

2025 marks the start of an exciting new cycle in the world of gymnastics — new code of points, new competition formats, and new stars to take the sport forward, and for us, a new chapter in our journey under the ownership of OZONE. We remain committed to pushing boundaries in men’s gymnastics apparel while embracing the strength in distribution and depth of market presence that OZONE brings. Our shared mission is to continue to develop industry-leading gymnastics apparel while providing exemplary customer service worldwide.

CRAFTING A CLEANER FUTURE

At TURN, we are deeply rooted in purpose. Our contemporary collection reflects this belief — meticulously engineered using recycled polyester fabrics and sustainable practices that don't compromise performance. By reducing our reliance on virgin materials and cutting back on plastic waste in our packaging, we're making a conscious commitment to leave the sport (and the planet) better than we found it. Through our new partnership with CleanHub, we're actively supporting efforts to protect our oceans, helping to intercept plastic before it reaches coastal ecosystems around the world.

ATHLETE-LED INNOVATION

This year also represents a creative turning point in our journey. In collaboration with Olympic medalist and generational talent Frederick Richard, we've reimaged traditional apparel to bring gymnasts a new visual language. Uniform? Think again. Audacious and unapologetically modern, this is identity in motion—a movement fueled by confidence, culture, and the next wave of game-changers.

BUILT FOR BIG MOMENTS

TURN's growth globally continues apace through the expansion of our national federation and pro team partnerships. 2025 saw TURN enter into an exciting new partnership with the Deutsche Turnliga (DTL), the world's preeminent professional gymnastics league, furthering our mission of supporting the growth of men's gymnastics.

Whether it's custom apparel for elite competition and podium presence or training kits built to last through the hardest sessions, TURN is trusted by federations, coaches, clubs, and athletes who demand the highest standard. We're honored to stand alongside them on the world stage, helping shape the sport's evolution through innovation, craftsmanship, and an unwavering commitment to elevating our amazing sport.

TURN was born out of frustration. Men's gymnastics apparel was overlooked and outdated, so we set out to create a brand and product line centered around innovation and the latest design trends.

The Freedom Gusset was born in 2017 and has been a staple of our singlets ever since. We now had the first singlet that was created purely for male gymnasts. Contoured to fit the male body with mesh nylon spandex for added breathability and constructed with flat lock cover stitching for a fit that was freeing and like nothing that came before.

Never Done Perfecting.

Prospekt Polo Shirt

Prospekt Training Shorts

Our Prospekt training range is a staple of our product range and will continue to be for many years. We listened to frustrated customers who had bought from other brands only to find their apparel had been discontinued. This practice is both wasteful and costly, forcing teams to transition to new uniforms unnecessarily. So we did something about it.

We call our Prospekt training range "elevated basics" - basic in color only whilst being packed with quality features that will make these your go-to garment beyond just gymnastics.

Custom design is where TURN truly excels and now with no minimum order quantity, going custom is more accessible than ever before.

Our online kit builder is the perfect way to get started, to discover our latest designs, and to make the order process efficient. We pride on making the process as headache free as possible!

If you have your own idea, bring it on! Book a design session with one of our designers to work on bringing your vision to reality.

Fallen in love with your design? Work with the same sales advisor to outfit your girl's team in matching designs in OZONE.

Contact TURN today to begin your team uniform journey!

At TURN, we're proud to say that our partnership with CleanHub is preventing 16,500lb of plastic waste from ending up in landfills, open environments, or our oceans.

More than 2 billion people worldwide dispose of their trash in nature because there are no waste collection services. Through CleanHub, we fund projects that collect plastic waste - either directly from nature, at community collection points or directly from local households. The plastic is then sorted and any material that can be recycled is reused. Plastic that cannot be recycled is used as an alternative fuel in cement production, replacing coal and gas. This prevents the plastic from entering the environment again.
