# A Solution for Lift Cars + Wall Lining

## High Pressure Laminate

For your lift cars & elevators we offer a variety of High Pressure Laminate Decors in combination with exclusive Textures possessing a **Group 1 Fire Rating**. This collection gives each Lift Car & Elevator a Unique Character. Matching Pre-Finished Melamine Board and High Pressure Laminate Panels complement your design needs.

**Fire-Rated Grade** - Fire safety regulations make the interior design of lift cars a technical challenge - especially in department stores, shopping centres, hospitals and other buildings frequented by a large number of people.

A **Group 1 Fire Rating** makes it possible to design concepts in situations where strict regulations must be followed.
