About us

Koplus was founded in The Netherlands in 2009.

A world-class workplace furniture manufacturer with worldwide distribution across the globe and showrooms in the UK, USA, Japan, Australia, UAE and the Far-East.

Koplus prides itself on attention to detail and on being excellent value for money.

Our acoustic booths were conceived and designed by the award-winning company's founder & designer – Michael Ko, recognising that there was a need for booths and pods that were effective for the demands of the modern workplace,

Sustainability is at the heart of everything we do – all ranges are GreenGuard certified and we hold all relevant accreditations including ISO50001, ISO14001 and ISO9001.

Our Clerkenwell & Manchester showrooms is open during business hours and our lead-time is typically 3-7 days – we hold all Koplus items in stock in Sussex, including over 300 booths.

Koplus UK and RimSeating have exclusively partnered to supply the UK market with our stunning collection of seating and tables.

- KOPLUS Booths are constructed from steel & aluminium, offering far superior strength, longevity and demountability.
- We keep stock of approximately 300+ booths in our large Sussex warehouse.
- Stocked product is usually available to be installed within 3-7 days.
- Showrooms in Clerkenwell and Manchester.
- Industry leading dB sound ratings.
- Quotations usually returned within 4 hours from request.
- *Lifetime warranty on booths for first build and placement (*subject to conditions).

ISO:23351 – SOUND RATING – What is it?

The ISO 23351-1:2020 standard facilitates the objective comparison of the sound-reducing qualities of office phone, work and meeting booths.

When evaluating products, ensure decibel reduction figures are based on ISO 23351 testing from certified external facilities to avoid arbitrary results.

What is ISO 23351-1:2020?

This standard measures the speech level reduction of furniture ensembles and enclosures. The result is denoted as DS,A (decibels/dB), ranging from Class A+ (highest isolation) to Class D (lowest). No manufacturers currently have an A+ rating (> 33 dB).

Classification System

For ensuring speech privacy in a typical office, a pod must achieve a minimum sound reduction of 25 dB (ISO 23351). Only compare ratings measured by certified external facilities.

Ambient Noise Consideration

As booth costs can vary significantly due to construction quality and sound ratings, it is important to know what level of booth/pod sound reduction is probably required.

The activity within the booth and personnel in the vicinity is also crucial. For example; If you require total privacy because of confidential meetings or calls, you will need either Class A or a highly rated Class B. Ambient Noise Consideration:

In very quiet office spaces below 35 dB ambient noise levels (which is not that rare - in fact quite common), Class A pods might be necessary to prevent conversations from being heard outside of the pods.

In most office environments, Class B pods provide sufficient privacy without the eerie silence that can sometimes accompany more heavily insulated spaces and which might cause occupants to feel isolated/disconnected.

In very quiet office spaces, a Class A pod might create an environment that feels excessively silent.

In noisy office environments (>60 dB ambient noise levels), a Class C pod would be sufficient.

-**Very Quiet Offices (<35 dB)**: Class A pods might be necessary.

-**Typical Offices**": Class B pods are usually sufficient.

-**Noisy Offices (>60 dB)**": Class C pods may suffice.

KOLO SOLO booth
with MOUNT Sit-Stand desk
and TONIQUE task chairs

KOLO SOLO PHONE BOOTH

A privacy on-demand personal space designed for quick confidential calls and video conferences. Fully equipped with various lighting and power features.

WHY VINYL?

Koplus offer a large range of powder coated colour finishes from our factory. However, we can also offer additional colours and unique designs for our acoustic booth ranges, by using vinyl wrap technology. This allows you to create wonderful splashes of vibrancy in your workspace or even have bespoke artwork and designs that say something about your business or just to provoke attention!
