

Health Professionals for a Healthy Climate

2024 Impact

1,500

Hours contributed by dedicated health professional volunteers like you to protect and improve human health by promoting climate health.

33

New volunteers welcomed into HPHC's growing network of **500+** interdisciplinary health professionals.

130

Collected more than **130** petition signatures from health professionals, which contributed to the Minneapolis City Council voting to close the Hennepin Energy Recovery Center to protect the lungs and lives of future generations to come.

67

Electric school buses secured for Minnesota schools, from Red Lake to Rochester to Lanesboro.

The effort was led by **25+** health professionals and community volunteers committed to improving air quality and reducing asthma risks.

NEWS LOCAL

Indigenous perspectives shed light on climate change's impact on health, culture

The event, held at Sanford Bemidji, invited Indigenous community members to share their personal experiences of how climate change is affecting their health and way of life.

10

Times HPHC or our health professional advocates influenced the public conversation through news media coverage.

2025 priorities for the healthy climate we need.

The climate health emergency is here, and you can help Minnesota move toward the healthy, equitable climate we know is possible.

Organizational Growth & Geographic Outreach

In 2025, HPHC will scale up our reach and impact to **engage more health professionals** from a variety of professions, lived experiences, and locations **to build an even stronger collective of voices** responding to the emerging health impacts of climate change in Minnesota.

Leading with anti-oppressive principles, HPHC will respond to the emerging health impacts of climate change and deepen work in:

Bemidji

Mankato

Duluth

Rochester

Ely

St. Cloud

Environmental justice communities statewide

Climate-Resilient Healthcare

Support health professionals in making system change at the grassroots level; newly engage **four or more health systems** about adopting sustainable practices, conduct audits, and implement significant mitigation projects at **two healthcare locations**.

Education & Engagement

Relaunch Education & Engagement Committee to **provide new opportunities for health professionals** to share knowledge, passion, and informed responses to microplastics, wildfire smoke, and other emerging climate and health issues.

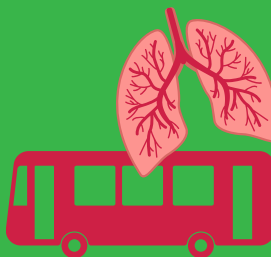

Policy & Advocacy

Listen to community needs to **inform equitable public policies**.

Through community listening and learning sessions, **equip health professionals to respond meaningfully** to the health effects of wildfire smoke, phthalates, pollution, electronic waste contamination, and more.

Clean Transportation & Decarbonization

Bring community and health professional voices together to secure state funding for school districts to receive electric vehicle charging systems, **filling a gap in the current infrastructure**, and improving air quality.

By belonging to our circle of donors, you can sustain these and other important actions throughout the state and throughout the year. Join today!
