FOOD & BEVERAGE INDUSTRY CAPABILITY

2025

SMARTER PACKHOUSES, COLD STORAGE & PROCESSING FACILITIES

For over 40 years, Entegra has delivered more than 2,000 world-class infrastructure projects. We are a trusted partner for the Australian food and beverage sector – engineering packhouses, cold storage, and processing facilities that enable growers to scale their operations efficiently.

With deep industry expertise, we prioritise precision, durability, and long-term value, ensuring every project meets the highest standards of quality.

We are committed to innovation and sustainable growth through future-ready designs that stand the test of time.

END-TO-END DESIGN & CONSTRUCTION SPECIALISTS

Entegra is a creative design and construction company.

Our solutions are designed to optimise workflows, reduce waste, and future-proof businesses.

Entegra is trusted by industry leaders across Australia, having designed and constructed over 500,000m² of infrastructure for the food and beverage sector, with a 95% on-time project completion rate.

We believe infrastructure should drive productivity and sustainable, profitable growth.
Recognised for Excellence

Our commitment to excellence is reinforced by ISO certifications: ISO 9001 for Quality Management, ISO 14001 for Environmental Management, and ISO 45001 for Occupational Health and Safety.

From initial design to post-project service, these standards drive our dedication to delivering safe, sustainable, and high-quality outcomes in every project.

"Entegra partners with the best in Australian horticulture to create high-performance infrastructure that enhances productivity, sustainability, and profitability. Our approach is built on industry expertise, progressive design, and a commitment to efficiency."

Greg McCalman | Entegra Director

SOLUTIONS TO TRANSFORM YOUR BUSINESS

The benefits of having Entegra as your infrastructure growth partner are wide-ranging.

Productivity-Based Food Chain Design
Our focus on time and motion efficiency ensures minimal handling and streamlined packhouse processes, while our automation-ready facilities enable the integration of cutting-edge technology.

Specialised Expertise in Temperature-Controlled Buildings
Our custom-built cold storage and ripening facilities help reduce spoilage and maintain product quality, while being designed to meet HACCP and export accreditation compliance requirements.

Optimised Building Compliance for Faster, Cost-Effective Projects
Our BCA-optimised designs reduce capital costs and regulatory approval times, while our integrated fire engineering meets safety standards without over-capitalisation.

In-House Multi-Disciplinary Design Teams
Our integrated feasibility, architecture, and construction teams enable faster execution, fewer errors, and seamless communication throughout the project.

Progressive Budgeting and Design Development
We employ ROI-driven planning to balance upfront investment with long-term cost savings, while our phased construction strategies help mitigate risk in large capital investments.

BRIGHT LIGHT AGRIBUSINESS

Hattah, VIC

📌 **30,000m² Facility**

- Australia's largest family-owned almond operation
- Integrated hulling, shelling and storage for export markets
- Advanced automation and robotic packaging – faster, more efficient export readiness

RED RICH FRUITS

Coldstream, VIC

📍 **14,000m² Facility**

- 80m clear span – uninterrupted packhouse operations for maximum efficiency
- Dual pack line with cold storage – ensuring freshness and seamless logistics
- Solar-ready roof and rainwater harvesting – sustainable energy-efficient design

HOWE FARMING ENTERPRISES

Mareeba, QLD

📌 **12,000m² Facility**

- Triple the avocado packing capacity, double the banana processing capacity
- Integrated cool storage and ripening rooms – reducing spoilage and extending shelf life
- Automated grading and waste re-purposing for banana powder production
