RIP SOFTWARE

ColorGate

YOUR PARTNER FOR DIGITAL PRINTING

The Production server product family consists of highly flexible RIP software solutions that ensure to meet and configure individual requirements when highest quality demands are needed. All individual applications ensure excellent Colour Management with optimum colour rendering and consistent reproduction at any time. Whether large, wide and grand format printing, digital production according to international standards, such as ISO, FOGRA, PSD, Gracol, G7 as well as for campaign printing, textile or for screen printing and print and cut - the PS Line-up offers the optimal RIP configuration for all types of digital print services. ColorGATE always utilizes the latest Adobe PDF Print Engine (APPE) in its basic solutions.

Onyx

INNOVATIVE COLOUR TECHNOLOGIES

Full-featured RIP software with everything a print shop needs to get started in wide-format print. Enjoy additional colour management and finishing tools for greater output control and automated print-and-cut workflows with ONYX PosterShop. Onyx Thrive is double the power with twice the Adobe RIP processors, Job Editors, and a network license to suit the demands of any size print business using multiple devices. A single, scalable RIP and print workflow solution for your entire print production environment.

Caldera

UNIFY YOUR WORKFLOW FROM PREPRESS TO PRINT & CUT
• Achieve consistent colours on your printers & substrates
• Automate tasks to save time
• Reduce your production costs

CalderaRIP

When you're looking for speed, reliability and flexibility in a busy production environment, CalderaRIP can handle all your print and print-to-cut applications. With a host of sophisticated features and intuitive user interface, CalderaRIP is ideal for growing printing businesses and for high-demanding production environments.

PrintFactory

PrintFactory is versatile and scalable print software that enables job preparation to take place where it's most convenient, eliminates the need for users to be tied to a single RIP, and prevents bottlenecks caused by last-minute changes. PrintFactory is independent software developed by printers who understand the importance of improving workflows and colour management. With support for over 3500 devices, it seamlessly integrates with external systems, enabling two-way communication and providing valuable feedback.

BUBBLE-FREE PRO

Flatbed Applicator

The Bubble-Free Pro Applicator and Flatbed Laminator allows a single operator to mount and laminate a wide range of materials in super-fast time whilst eliminating the danger of bubbles or creases. Mounting and laminating can be onto any flat surface up to 60mm thick. The Bubble-Free Pro Applicator is available in three widths - 1500mm, 1700mm and 2200mm - providing maximum working widths of 1450mm, 1640mm and 2140mm, respectively. The Bubble-Free Mouse might be small, starting at only 1000 x 2000mm but it still allows a single operator to mount and laminate materials in super-fast time whilst eliminating the danger of bubbles or creases.

KEY FEATURES

▷ Quick mounting without any bubbles or wrinkles.

▷ Controlled application pressure prevents media stretching.

▷ Easy positioning of material to be mounted.

▷ Fast production speed for increased productivity.

▷ Quick and easy to learn.

▷ Self-healing cutting mat.

▷ A choice of colours available.

The Bubble-Free Applicator can be ordered with:

Glass board and LED lighting and MDF board and PVC mat. It can also be ordered in customised dimensions.

The pressure roller has a 15mm-thick soft rubber coating to guarantee the bubble free application.

The pressure roller is controllable on both sides.
The pneumatic system uses FESTO parts.

The pressure of the roller can be adjusted over a wide range by the pneumatic controller.

The castors with brakes allow the table to be easily moved and/or fixed into position.

meevo

MX Event
Silicone Edge Automated Stitching SEG Keder Sewing Machine

The Meevo MX Event with (Silicone Edge Automated Stitching) SEAS quickly and accurately handles and aligns large display textiles for fastening. This model is ideal for increasing workflow without any compromise on accuracy, automatically sewing SEG Keder to all different sizes of fabric panels.

KEY FEATURES

▷ Silicone Edge Automated Stitching.

▷ Automatically joins large format panels together.

▷ Eliminates a workflow backlog by automating tricky alignments.

This innovative solution provides a 4 metre long with the option of a 2m or 3m extention table which can be added to both ends to handle and align heavy and oversized display textiles for sewing SEG Keder or joining panels. This technological solution developed with levelling castors can be easily and quickly moved around the factory floor.

meevo

NEW

A semi-automatic sewing machine capable of performing 4 different sewing operations

KEY FEATURES

▷ SM Versatile with SEAS is the right machine for companies that need to diversify their sewing solutions to create more production flexibility.

With SM Versatile, you don't need to invest in different sewing machines to respond to different finishing requests, as it is an equipment prepared to sew at least 4 important finishing operations in a single machine:

1. Sew SEG Keder
2. Sew reinforcement tapes
3. Velcro application
4. Sew open hems

SM Optima+SEAS

▷ A semi-automatic SEG Keder sewing system Increase your productivity and quality in an easy and efficient way.

The SM Optima is a SEG Keder semi-automatic sewing system that is composed by a high-end lockstitch sewing machine, an optimized sewing table and a SEAS Universal Kit.

The system was developed to be as easy to use as possible, with ideal dimensions for large textile handling and to be easily moved across factory floor when necessary.

SEAS Universal Kit

▷ The SEAS Universal Kit is a set of accessories that transform a normal sewing machine into a high quality and productive machine to sew any type of SEG Keder.

The focus on the development of this solution was to allow companies that already own a sewing machine to start or significantly increase the SEG finishing.

With a quick and easy installation, which can be done by any employee of the company, with intuitive use without the need for training, simple maintenance and reduced delivery times, this is the right solution for anyone who wants to be present in one of the areas of highest growth in the Soft Signage world.
