HIKVISION

WHAT SCHOOL TEACHERS ENCOUNTER

Maintaining quality teaching materials is crucial in education today. However, traditional course recording methods can create challenges for teachers, including the following:
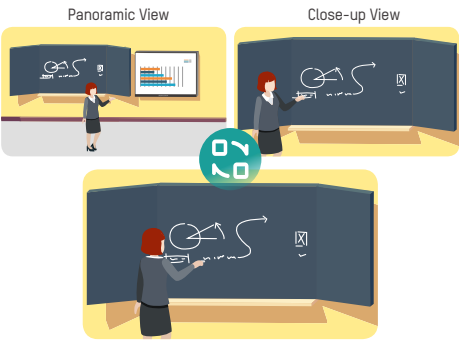

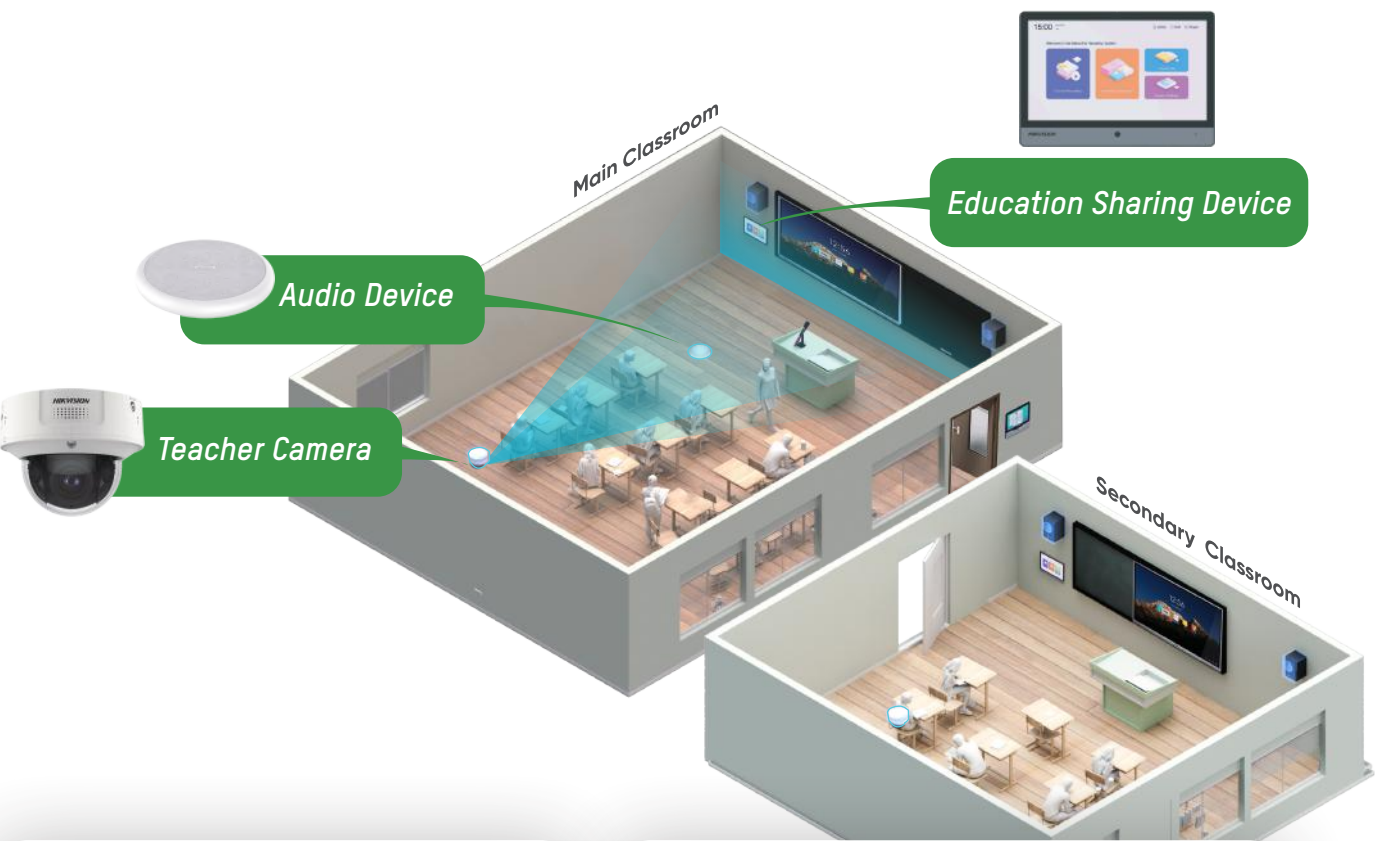

· **A static camera** fails to capture the nuances of teacher movements and blackboard details

· **The complex, multi-step setup and operation** is burdensome for teachers

· **The cumbersome saving and sharing process** hinders quick spreading of educational resources

WHAT **WE OFFER**

➤ Flexible view-switching capabilities

➤ Easy-to-use touchscreen devices

➤ Streamlined & efficient sharing mechanism

SOLUTION **HIGHLIGHTS**

Hikvision's solution overcomes the challenges faced by traditional course recording methods, and helps create a more immersive learning experience while expanding the educational applications.

HikCentral Professional

Panoramic View   Close-up View

Multi-perspective classroom recording

The **Teacher Camera** allows for seamless switch between close-up and panoramic views, offering excellent and smooth images. This helps students follow along in class, while enabling teachers to meticulously review their teaching performance.

Simplified installation and operation

Professional Recording System
Teachers can log in to the device using face recognition and access their own recording files. With a single click on the Education Sharing Device, they can easily start, pause, and end recordings, accessing multi-view videos. After class, videos can be played back or exported via USB.
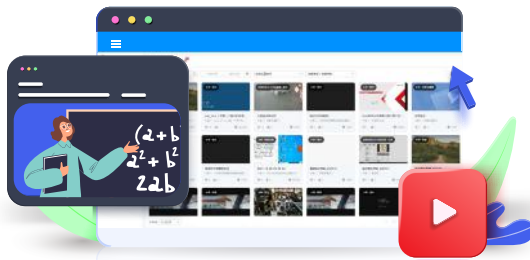

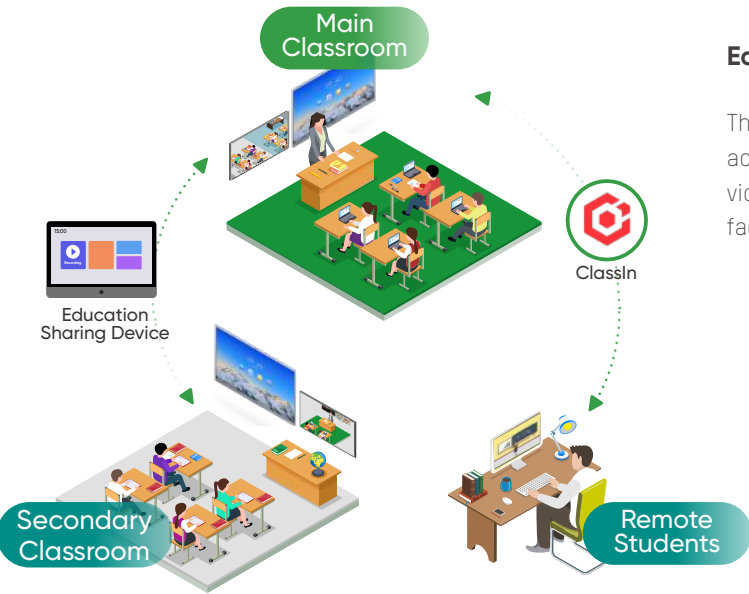

Economical Recording System
The camera automatically starts recording based on the class schedule. Teachers can review recordings on HikCentral Professional platform after class.

Remote Students

Easy course sharing with remote students

The **Education Sharing Device** enables real-time interaction across classrooms. Using ClassIn software, the in-class video can be shared online for conferences or live streaming, facilitating professional course sharing.

Building a course video library

All recorded videos can be backed up to a central storage for long-term access, creating a robust video library that provides valuable resources for teachers to enhance instructional practices.
