HANDY INFORMATION FOR YOUR STAY AT THE MARATHON COACH SERVICE DEPARTMENT

RVS 360° Camera System

(Available on Coach 1300 & Newer)

The RVS 360° Camera System provides a comprehensive, real-time view of your coach and its surroundings. Cameras mounted on the front, sides, and rear work together to create a seamless bird's-eye perspective, giving you full situational awareness in tight spaces. The system is fully integrated into the cockpit and viewable through the Crestron dash display, allowing for intuitive control and effortless visibility while driving, parking, or maneuvering in close quarters.

Aftermarket Multi-Camera System

(Ideal for Older Coaches)

For older coaches, we offer an aftermarket camera solution using the same high-quality RVS cameras found in our 360° system. This setup delivers enhanced visibility around the coach through a dedicated external monitor, rather than the integrated dash display. It's an excellent upgrade for owners looking to add modern safety and convenience, providing added confidence when navigating parking areas, fuel stations, and tight campsites.

Front Wheel Monitor System

The Front Wheel Monitor System takes the guesswork out of parking and positioning your coach. Discreetly mounted on the exterior, adjustable rotating cameras provide clear bird's-eye and side views of your front wheels, helping you avoid curbs, obstacles, and blind spots. Integrated with your existing backup monitor, you can easily switch between rear, side, and front wheel camera views for added confidence when maneuvering in tight spaces.
