design by Pio & Tito Toso

INNOVATIVE MATERIALS FOR INTERIOR DESIGN.
ITALIAN DESIGN SINCE 2013.

In 2013, Arpa Industriale created a new material. Evolving over time, a whole new family of materials came to life. Drawing inspiration from the Phoenix's legend and its ability to infinitely regenerate, FENIX marked the beginning of a breakthrough chapter in the story of interior design.

Created with proprietary technologies, FENIX makes you experience unique features. At first glance, the surfaces strike for their super-matt appearance. By touching them, you feel how pleasantly soft they are, with the further surprise of leaving no fingerprints. Thermal healing of superficial micro-scratches is also possible.

Stories coming from different sides of the world are the inspiration behind FENIX timeless palette. In three different product lines, its surfaces are suitable for furnishing and interior fitting with vertical and horizontal applications.

FENIX is manufactured by Arpa Industriale and distributed by Nover in Australia.

NOVER. A PARTNER YOU CAN TRUST.

Spanning a history of over 70 years, Nover is a proud Australian owned and operated company specialising in the wholesale distribution of quality products to the kitchen, joinery and furniture manufacturing sector. Through our continued dedication to excellence and an unwavering focus on innovation, we are pleased to supply the industry's largest product range.

Arclinea, Italia kitchen
design by Antonio Citterio

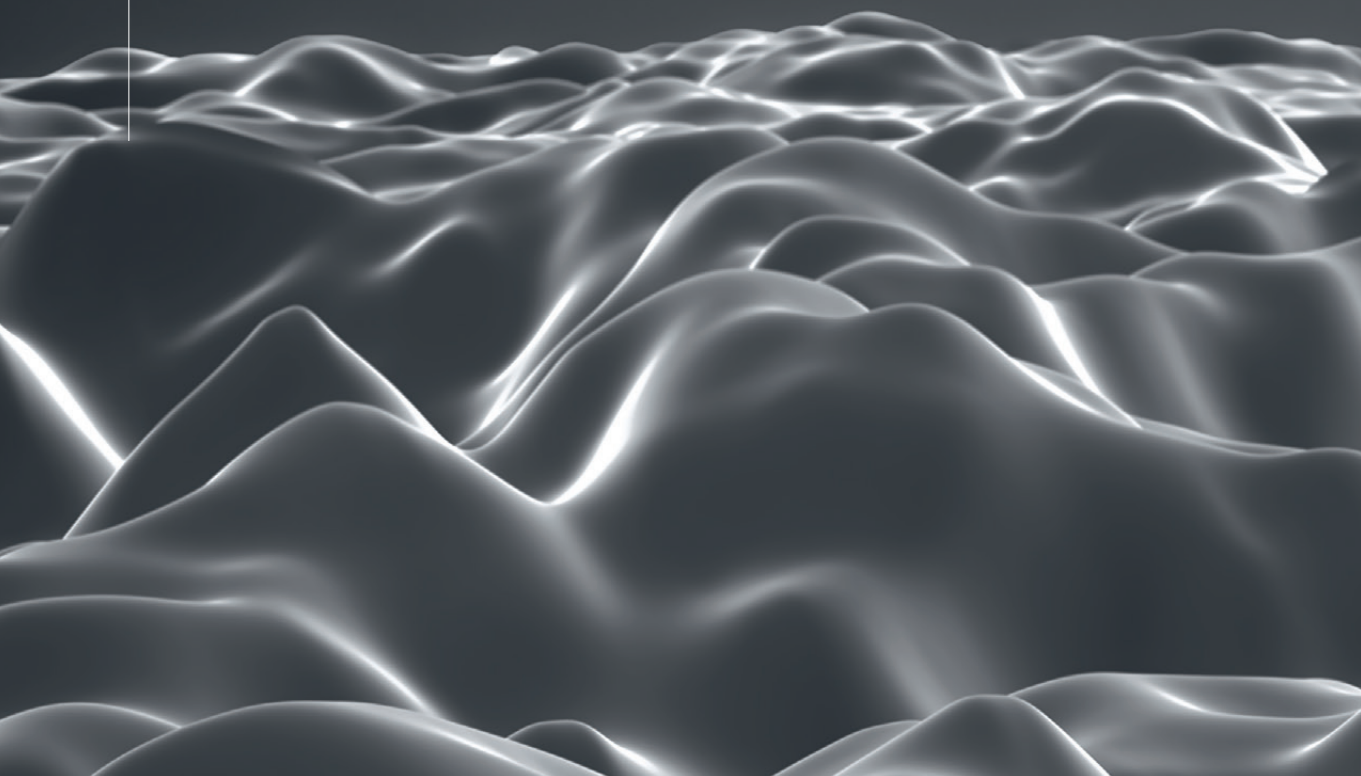

BNBIZ Coworking Hotel, doors and walls
design by Gio Tiroto

FEATURES

When viewed under a microscope, you can see that the structure of FENIX is like a landscape with uneven peaks and valleys.
When light waves hit the surface, the angle of incidence is not the same everywhere.
Therefore, light reflects in different directions. This is what makes FENIX matt.

Low light reflectivity, extremely matt surface

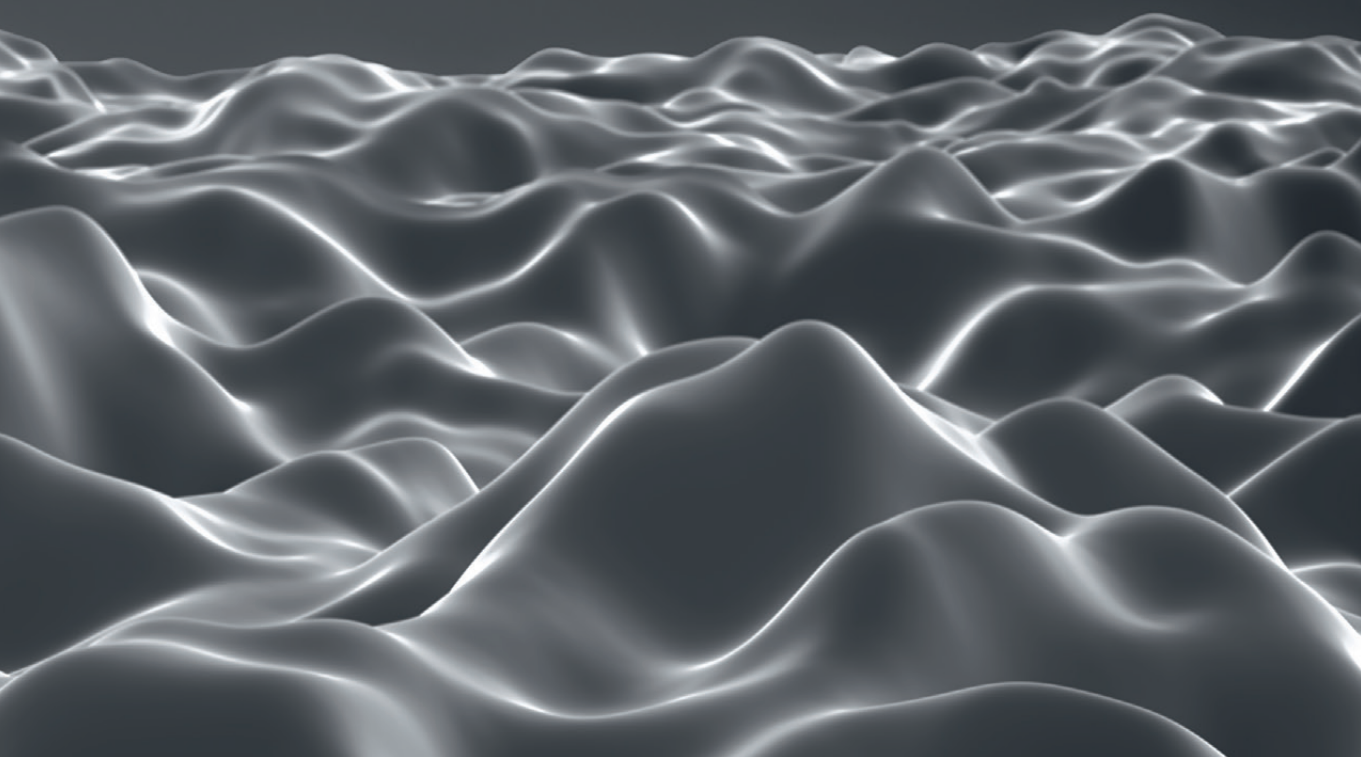

Soft touch

Anti-fingerprint

Thermal healing of superficial micro-scratches

Arpa Showroom, bathroom vanity
design by Agenzia LEM

More innovative and made of more natural raw materials, FENIX^{NTM} Bloom is available in different colours of unique elegance. Bloom technology significantly reduces by 50% the phenol in the core's resin thanks to the use of lignin, a renewable natural material defined as the glue that holds wood fibres together.

Code	Name	Code	Name

FENIX IS CARBON NEUTRAL

When neutrality means to take a stand instead.

Based on the total quantity of square metres sold monthly, FENIX contributes to the reduction of CO₂ emitted into the atmosphere through carbon offsetting projects. To reach carbon neutrality, everything is measured. From the extraction and transport of the raw materials, through the production of FENIX and, ultimately, their disposal, everything is quantified and certified by a third party. Believing in “do more with less,” we focus on durability and on increasing the bio-based composition of our products, guaranteeing their quality while using less resources.

DISCLAIMER

This document gives general recommendations. This document serves as a general guide to good practice and constitutes no form of warranty or representation as to fitness for purpose in respect of the products and processes described in it. Any information or products contained within this document must be verified and tested for suitability by the user for his or her particular purpose or specific application.
