ABSTRACT EMBARGO POLICY

ASRM asks that authors maintain an embargo on information in the abstracts, along with any additional information that will be presented at the Congress, until the day and time scheduled for presentation at the Congress, with the exception of certain abstracts that are included in ASRM's press releases for the Scientific Congress – these will usually have an embargo set a few hours earlier than the scheduled presentation time. For more information regarding what may be released publicly before the Congress, or how to comply with the embargo, please contact publicaffairs@asrm.org.

ADA STATEMENT

The American Society for Reproductive Medicine fully complies with the legal requirements of the Americans with Disabilities Act (ADA) and the rules and regulations thereof. Accommodations for Disabilities: Please notify Lee Pearce at lpearce@asrm.org a minimum of 10 working days in advance of the event if a reasonable accommodation for a disability is needed.

ANTI-HARASSMENT AND NONDISCRIMINATION POLICY FOR MEETINGS

It is the policy of the American Society for Reproductive Medicine that all participants in Society activities will enjoy an environment free from all forms of discrimination, harassment, and retaliation. ASRM is committed to the philosophy of equal opportunity and treatment for all members regardless of race, color, religion, age, gender, sexual orientation, gender identity, national origin, citizenship, disability, military status, or any other reason not related to scientific merit. AUTHORSHIP INTEGRITY POLICY

ASRM holds scholarly veracity and responsible conduct and research reporting as essential for maintaining the integrity of research enterprise and discovery. This policy provides a clear understanding of the expectations of authorship. [Click here to read the full policy.](#)

CANCELLATION POLICY

The American Society for Reproductive Medicine reserves the right to cancel this activity due to unforeseen circumstances. In the event of such cancellation, the full registration fee will be returned to the registrant.

CODE OF CONDUCT

ASRM is committed to providing a professional, collegial, safe, supportive, and respectful in-person and on-demand meeting environment. We expect individuals to uphold the professional and educational purposes of ASRM. Anyone who feels unsafe or experiences unwelcome conduct, who observes or experiences unacceptable behavior, or who believes there has been a violation of this Code of Conduct, is encouraged to immediately notify one of the ASRM employees and/or send an e-mail to asrm@asrm.org. ASRM reserves the right to take actions most likely to ensure the safety and security of participants, including the termination of a participant's account for the remainder of the event. ASRM also reserves the right to communicate with employers, participant sponsors, vendors, local law enforcement, media, and the public as ASRM deems appropriate related to its response under this Code of Conduct.

CONTINUING MEDICAL EDUCATION POLICY

The American Society for Reproductive Medicine (ASRM) is a multidisciplinary organization dedicated to the advancement of the science and practice of reproductive medicine. It is of the best interest of ASRM to implement internal firewalls to prevent the sharing of information acquired from promotional activities, ensure content validity, and determine any potential conflicts of interest. DISCLAIMER STATEMENT

The content and views presented in this educational activity are those of the faculty/authors and do not necessarily reflect those of the American Society for Reproductive Medicine. This material is prepared based on a review of multiple sources of information, but it is not exhaustive of the subject matter. Therefore, healthcare professionals and other individuals should review and consider other publications and materials on the subject matter before relying solely upon the information contained within this educational activity to make clinical decisions about individual patients.

EQUAL OPPORTUNITY STATEMENT

The American Society for Reproductive Medicine values and promotes diversity among its members, officers, and staff. The Society prohibits discrimination toward any member or employee due to race, color, religion, age, gender, sexual orientation, national origin, citizenship, disability, military status, or other basis prohibited by law. ASRM strives to achieve gender, racial, and ethnic balance in hiring and governance.

ASRM maintains policies, procedures, and personnel actions that conform to the letter and spirit of all laws and regulations pertaining to equal opportunity and nondiscrimination in employment, appointments, and elections to office.

MEDIA REGISTRATION POLICY

The American Society for Reproductive Medicine welcomes members of the press, publishing in all forms of print, electronic, audio, and visual media, to cover our Scientific Congress & Expo. [Click here to read the full policy.](#)

RELEVANT FINANCIAL RELATIONSHIP POLICY

ASRM's policy is that all financial relationships and roles with ineligible companies be subject to review. All voluntary non-employee persons involved in accredited activities must report all financial relationships held within the past 24 months, regardless of the monetary amount received, annually and whenever a change occurs. Financial relationships will be mitigated by the procedures outlined below. This policy is intended to supplement, but not replace, any applicable state and federal laws governing financial relationships applicable to nonprofit and charitable organizations. REFUND/NON-ATTENDANCE POLICY

Cancellations received on or before September 11th, will receive a full refund minus a \$150 processing fee. Cancellation requests must be submitted in writing. Cancellations received after September 11th will not be eligible for a refund.

Welcome Message from ASRM President Dr. Elizabeth Ginsburg

This year, we're excited to welcome you to San Antonio, Texas, for the 81st ASRM Scientific Congress & Expo, centered around the theme Global Collaboration to Advance Reproductive Health. Dr. Danny Schust, Scientific Congress Program Chair,

and Dr. Divya Shah, Postgraduate Program Chair, and their team have worked hard to build a powerful program that will draw you in, ignite your curiosity, and energize you to elevate the way you care for your patients.

OUR WEEKEND BEGINS with a collaborative line-up of on-site postgraduate, hands-on courses, and workshops. We have ensured that there are a variety of topics and experts to engage with from our affiliated societies, professional and special interest groups, as well as domestic and international Society Partners. The expansion of our hands-on program includes ultrasound imaging, office hysteroscopy, testicular tissue management, and our popular embryo transfer simulation course. New this year is an embryology workshop, led by experts from the Society of Reproductive Biologists & Technologists, specifically designed for fellows.

Following a weekend packed with exciting content, prepare for an outstanding lineup of plenary and keynote speakers who will discuss technology and innovation in medicine, equity, ethics, and health disparities, collaborative action and policy, and professional development. As always there will be a wealth of thought-provoking content around clinical practice and a comprehensive slate of high impact research throughout the program. Last, but certainly not least, is our 'Environmental' seminar series where we

will further explore the impact of environmental factors on infertility. The F&S Journal Club Global, roundtables, industry-sponsored sessions, the ASRM members' meeting, and the Society Social Hour are attendee favorites that you won't want to miss.

Answering the call for this year's theme, the program will also highlight three global-focused panel discussions that will include representatives from ASRM, as well as many of our international society partners. We believe these sessions will spark discussion and conversation that will lead to better clinical care across the world.

The Spotlight & Engagement Pavilion returns as a dynamic hub of activity, featuring poster presentations, oral abstracts, and industry-sponsored discussions. Be sure to catch the engaging sessions in the Spotlight Theater, including the ASRM Center for Policy and Leadership's PRIMED Advocacy Scholars Showcase, The Best of Fertility and Sterility 2025, special industry partner highlights, and timely conversations on restorative reproductive medicine and today's policy landscape.

We welcome our members, trainees, and colleagues from around the world and look forward to your participation and engagement in all the educational, networking, and social activities during the ASRM 2025 Scientific Congress & Expo! I also hope you will join us on Sunday night, October 26, 2025, at the President's Gala Celebration in support of the ASRM Research Institute. We look forward to seeing you in San Antonio.

Sincerely,

A handwritten signature in black ink, appearing to read 'Elizabeth Ginsburg'.

Needs Assessment and Description

ASRM 2025 Scientific Congress & Expo is focused on “Global Collaboration to Advance Reproductive Health.” This comprehensive program caters to the educational and career development needs of professionals across the field of reproductive medicine. This inclusive program offers skill building through advanced hands-on courses, profession-specific breakout sessions, interactive and dynamic symposia sessions led by experts in our field, and hot-topic special sessions.

The ASRM 2025 Scientific Congress & Expo advances knowledge across the full spectrum of reproductive medicine—from fertility and infertility in both women and men to menopause, cryopreservation, and groundbreaking research shaping the field’s future. Attendees will gain fresh insights into how global partnerships are driving equity, overcoming reproductive health challenges, and improving outcomes worldwide. By convening leading experts, advocates, and policymakers, the meeting fosters collaboration, showcases innovative practices, and supports progress across diverse communities and health systems. Together, participants will explore how strengthening international collaboration opens vital opportunities to exchange ideas, align best practices, and confront shared challenges through a multidisciplinary approach grounded in equity.

We look forward to a dynamic and impactful Congress that stimulates skill-building, knowledge-sharing, and collaboration that will move the field of reproductive medicine forward.

LEARNING OBJECTIVES

At the conclusion of the Scientific Congress, participants should be able to:

1. Identify global similarities and differences in reproductive health access, treatment, and outcomes.
2. Apply evidence-based practices to improve clinical reproductive care throughout diverse communities.
3. Foster international collaborative opportunities for research, education, and service delivery.
4. Review the latest scientific advances across the global reproductive health space.
5. Explore ethical, legal, and culturally sensitive approaches to third-party reproduction, emphasizing support for diverse populations.
6. Assess the current clinical practice of endometriosis, fibroids, recurrent pregnancy loss, contraception, reproductive urology, and polycystic ovary syndrome world-wide.
7. Evaluate innovations in reproductive genetic screening and testing and apply collaborative approaches to address clinical challenges and inconsistencies.
8. Discuss the implications of environmental factors and biomarkers on infertility.
