Welcome Message from ASRM President Dr. Elizabeth Ginsburg

This year, we're excited to welcome you to San Antonio, Texas, for the 81st ASRM Scientific Congress & Expo, centered around the theme Global Collaboration to Advance Reproductive Health. Dr. Danny Schust, Scientific Congress Program Chair,

and Dr. Divya Shah, Postgraduate Program Chair, and their team have worked hard to build a powerful program that will draw you in, ignite your curiosity, and energize you to elevate the way you care for your patients.

OUR WEEKEND BEGINS with a collaborative line-up of on-site postgraduate, hands-on courses, and workshops. We have ensured that there are a variety of topics and experts to engage with from our affiliated societies, professional and special interest groups, as well as domestic and international Society Partners. The expansion of our hands-on program includes ultrasound imaging, office hysteroscopy, testicular tissue management, and our popular embryo transfer simulation course. New this year is an embryology workshop, led by experts from the Society of Reproductive Biologists & Technologists, specifically designed for fellows.

Following a weekend packed with exciting content, prepare for an outstanding lineup of plenary and keynote speakers who will discuss technology and innovation in medicine, equity, ethics, and health disparities, collaborative action and policy, and professional development. As always there will be a wealth of thought-provoking content around clinical practice and a comprehensive slate of high impact research throughout the program. Last, but certainly not least, is our 'Environmental' seminar series where we

will further explore the impact of environmental factors on infertility. The F&S Journal Club Global, roundtables, industry-sponsored sessions, the ASRM members' meeting, and the Society Social Hour are attendee favorites that you won't want to miss.

Answering the call for this year's theme, the program will also highlight three global-focused panel discussions that will include representatives from ASRM, as well as many of our international society partners. We believe these sessions will spark discussion and conversation that will lead to better clinical care across the world.

The Spotlight & Engagement Pavilion returns as a dynamic hub of activity, featuring poster presentations, oral abstracts, and industry-sponsored discussions. Be sure to catch the engaging sessions in the Spotlight Theater, including the ASRM Center for Policy and Leadership's PRIMED Advocacy Scholars Showcase, The Best of Fertility and Sterility 2025, special industry partner highlights, and timely conversations on restorative reproductive medicine and today's policy landscape.

We welcome our members, trainees, and colleagues from around the world and look forward to your participation and engagement in all the educational, networking, and social activities during the ASRM 2025 Scientific Congress & Expo! I also hope you will join us on Sunday night, October 26, 2025, at the President's Gala Celebration in support of the ASRM Research Institute. We look forward to seeing you in San Antonio.

Sincerely,

A handwritten signature in black ink, appearing to read 'Elizabeth Ginsburg'.
