Exhibition

Karnataka State Dental Expo

30-05-26 

Vatech participated in the Karnataka State Dental Expo, showcasing advanced dental imaging solutions and connecting with dental professionals across the region. The event provided an excellent opportunity to share innovations that support accurate diagnosis and improved clinical outcomes.

Expo dent Patna 2026

(6-07)-06-26 

Vatech proudly participated in Expo dent Patna 2026, connecting with dental professionals and showcasing its latest imaging innovations. The event provided a great platform to engage with the dental community and demonstrate solutions that support accurate diagnosis and efficient patient care.

Exhibition

(12-14)-06-26 

A Successful Famdent Mumbai 2026 – Thanks to You!

The Vatech India team would like to thank all our customers, doctors, channel partners, and visitors who stopped by our booth at Famdent Mumbai 2026.

Your support, curiosity, and valuable feedback inspire us to continue delivering innovative imaging solutions

We are grateful for the opportunity to connect, share ideas, and demonstrate the future of digital dentistry together.

Thank you for being part of the Vatech family
Until next time—see you at the next exhibition!

Wireless Intraoral Scanner

FEATHER-LIGHT FEEL, FASTER SCANNING

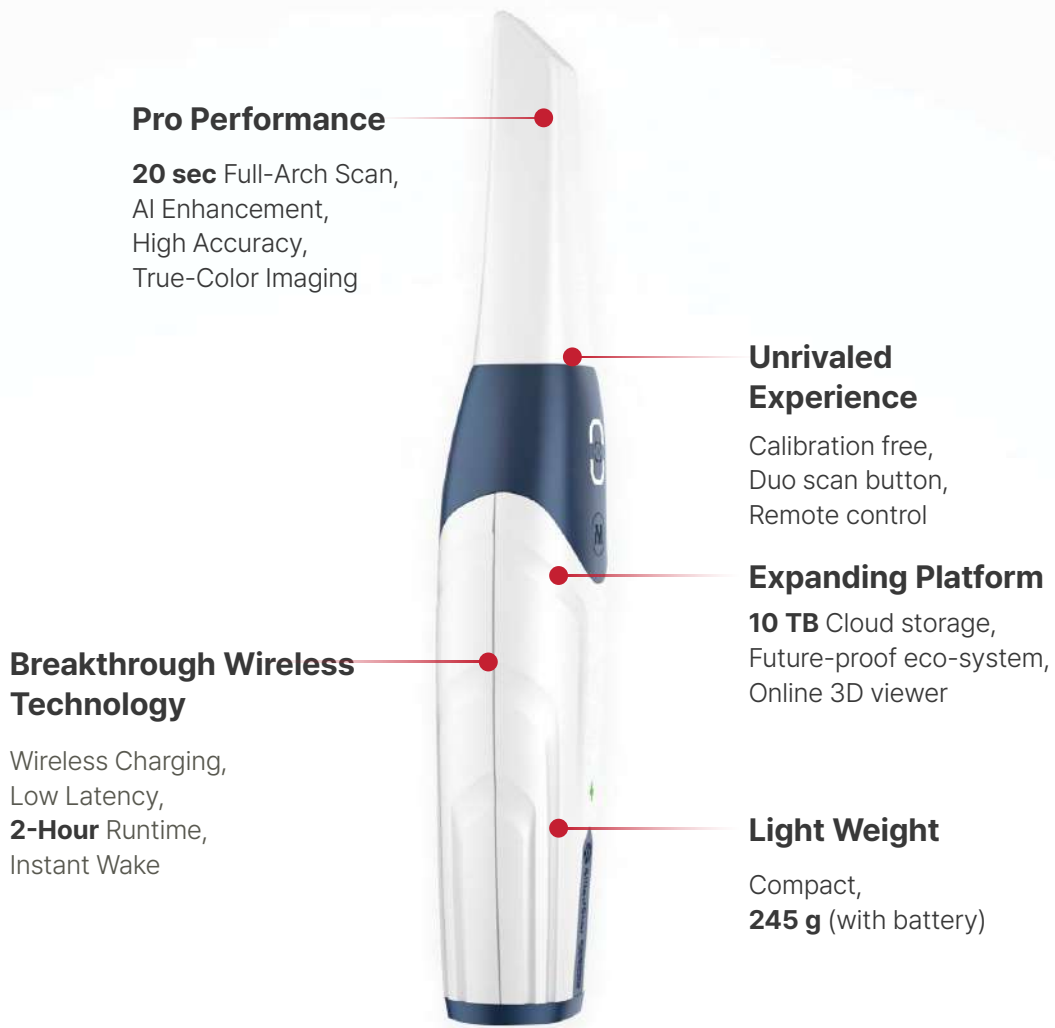

Wireless Intraoral Scanner

Spotlight June

INNOVATION TAKES FLIGHT

Introducing Valt Intraoral Scanner AS 200E, a wireless intraoral scanner that takes a quantum leap ahead of its competitions. With its meticulous design, all-day battery life, unrivaled experience, & vibrant eco-system, it's the ultimate intraoral scanner for the new and the pro

Pro Performance

20 sec Full-Arch Scan,
AI Enhancement,
High Accuracy,
True-Color Imaging

Unrivaled Experience

Calibration free,
Duo scan button,
Remote control

Expanding Platform

10 TB Cloud storage,
Future-proof eco-system,
Online 3D viewer

Breakthrough Wireless Technology

Wireless Charging,
Low Latency,
2-Hour Runtime,
Instant Wake

Light Weight

Compact,
245 g (with battery)

Calibration Free

Valt Intraoral Scanner, AS 200E is calibration-free, so you can scan accurately right out of the box no tools, no interruptions, no recalibration

Remote Control

Touch-free, hygienic workflow with easy scan control view, rotate, and navigate effortlessly

Pristine Accuracy

20µm precision in full-arch scans powered by advanced imaging & processing

DUO SCAN BUTTONS

Two scan buttons were strategically placed on both sides of the device.

So when it's time to switch, you can easily rotate the device and press with your usual finger to continue scanning. No need to remember button positions or reassemble the tip.

True-tone color

Highly advanced algorithms capture and recreate true-to-life colors

Scan speed

Wireless freedom. Zero compromise. Scan a full arch in just 20 seconds with faster, smoother performance than wired systems

Ai powered enhancement

Off-line machine learning algorithms speed up your scanning process & build models with better accuracy

Lossless image compression

Fast wireless transmission (Upto 10 m)

20 seconds
Full arch scan

60 seconds
Archs & bites

Patient engagement

Engage patients, manage records, & grow your practice smartly and cost-effectively

Tip in two sizes

Touch screen support

ALL-DAY BATTERY LIFE

Upto 2 hrs. continuous scanning

60 cases in single charge

Wireless charging

Sleep mode & instant wake

Advanced power management maximizes efficiency while keeping Valt Intraoral Scanner, AS 200E ready at a moment's notice

Spare battery

Designed for uninterrupted workflows with a convenient dual-battery system

by vatech

We Have the Solution You've Been Looking For

PROBLEM

Waste Time Switching an RVG & Struggling to Capture Images Across Multiple Operatories

SOLUTION

Just seamless imaging across operatories

One IOS. Multiple Chairs. Zero Hassle

IOS/RVG wirelessly connects with an AirBridge to attend multiple operatories—no laptop moving required

vatechindia News

Good News for our customers

Own your Dream CBCT/ OPG today
Pay with Ease Through Easy EMI

Thinking about upgrading your practice with a CBCT, OPG, or 2D/3D imaging system, **but concerned about the upfront investment?**

With Vatech India's financing support through **Shinhan Bank**, you don't have to wait.

Easy EMI Solutions for Indian Dentists

Invest in advanced diagnostic technology today and repay comfortably through affordable monthly EMIs. Let your imaging system help generate the revenue that supports its own repayment.

Why Choose EMI Financing?

- Minimal upfront financial burden
- Flexible loan tenures and attractive interest rates
- Fast and simple approval process
- Preserve working capital for your clinic operations
- Start earning from CBCT and OPG services immediately

Shinhan

vatechindia News

Make Your Machine Work for You

Every scan performed on your Vatech CBCT or OPG contributes to your practice growth & helps cover your monthly installment

Parameter	Shinhan Bank	Other Bank
Interest Rate	8.7%	11% or more
Documentation	Less	More
Disbursement Time	5-7 Working days	10-15 Working days
Response Time	Fast	Moderate/ Slow
Approval Process	Simple & Quick	Lengthy
Customer Support	Strong & Responsive	Varies by Bank

Don't let budget constraints delay your clinic's growth. Invest today, scan tomorrow, and pay comfortably through easy EMI options

WithZine Korea news

Vatech Networks News is a monthly highlight that connects HQ & global teams through shared culture & stories.

2026.05.22

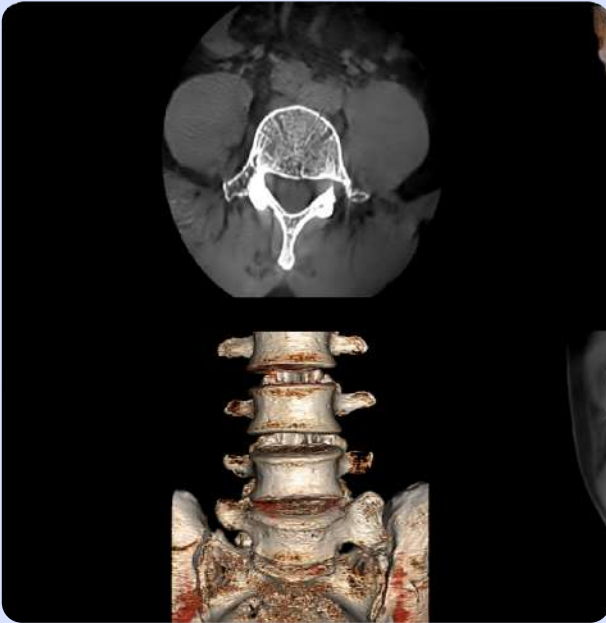

As part of its anniversary celebrations, Vatech Australia marked its anniversary by participating in a local environmental volunteer program at Sydney's Narraring Reserve with Greater Sydney Landcare. For the second consecutive year, employees helped protect the local ecosystem through weed removal, litter collection, and environmental conservation activities, reinforcing Vatech's ongoing commitment to the community and sustainability.

2026.05.27

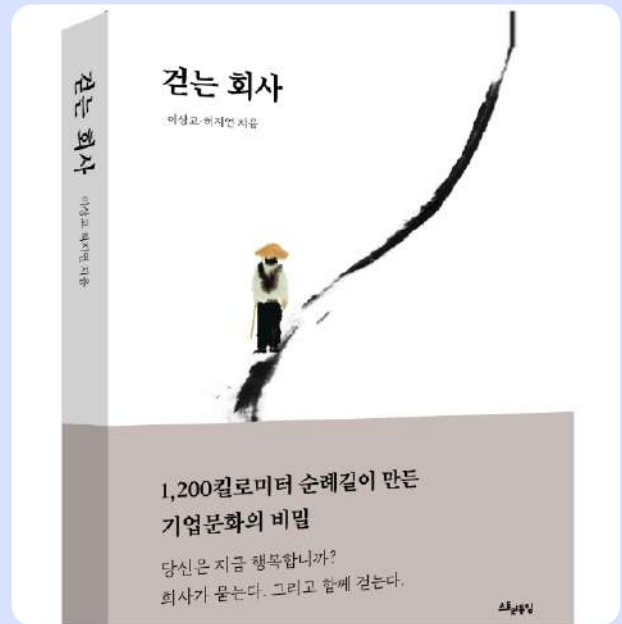

At SIDEX 2026, Vatech unveiled its next-generation premium CT, 'Green X Plus', for the first time. As the successor to Green X, it features a wider imaging range (FOV) and enhanced image quality to deliver an even more precise diagnostic environment. In addition, Vatech showcased a seamless digital workflow—spanning from imaging to diagnosis and consultation integrated with the AI-based comprehensive viewer 'Clever One'. Vatech MCIS's also ran its VALUE UP promotion alongside the launch.

June 2026 Edition

2026.05.07

'Smart M Plus', a musculoskeletal specialized CT developed by Vatech, has officially launched sales in Korea, with the first installation completed at an orthopedic clinic in Seoul. Featuring high-precision 3D imaging, low radiation exposure, and a compact design, Smart M Plus marks Vatech's expansion beyond dental imaging into the musculoskeletal sector.

2026.05.27

Vatech Networks has published 'The Walking Company', a book inspired by its Shikoku pilgrimage program. In an era that prioritizes performance & efficiency, the book tells the story of a "slightly strange company". Through the reflections & personal growth of participating employees, the book highlights Vatech's belief that true competitiveness comes from people. Currently available only in Korean.

HQ News Korea

Celebrating 24 Years of Innovation and Partnership

For 24 years, Vatech has been driven by a simple mission: to improve lives through innovation and technology. Together with our customers, partners, and communities, we have overcome challenges, achieved milestones, and continuously advanced the future of dental imaging.

Today, we stand at the beginning of a new era. Rapid advancements in artificial intelligence and digital technology are transforming healthcare faster than ever before. In this changing world, Vatech remains committed to embracing innovation, reimagining the way we work, and delivering smarter solutions that help dental professionals provide better patient care.

While technology evolves, our core values remain unchanged. We believe in collaboration, trust, and genuine care for people. These principles have guided us for the past 24 years and will continue to shape our future.

As we celebrate this milestone, we extend our heartfelt gratitude to our customers for being part of our journey. Together, we will continue to innovate, grow, and create a brighter future for dentistry.

And most importantly, thank **you** to our customers, whose dedication & trust make everything we do possible.

Logistic (Part Leader)

Congratulations on this well-deserved recognition. Your dedication, reliability, and commitment to ensuring seamless operations have played a vital role in our success. Thank you for your hard work and valuable contributions. Wishing you continued success ahead.

Congratulations to our Star Performers!

Meet the New AI-Powered Ez3D-i™ with (Davis Tool Kit for Segmentation)

From Visualization to Intelligent Decision-Making

Digital dentistry is evolving rapidly, and artificial intelligence is now redefining how clinicians diagnose, plan, and communicate treatment. With the latest advancements in Vatech Ez3D-i, AI is no longer just an add-on—it is an integrated clinical assistant designed to enhance efficiency, accuracy, and confidence throughout the diagnostic workflow.

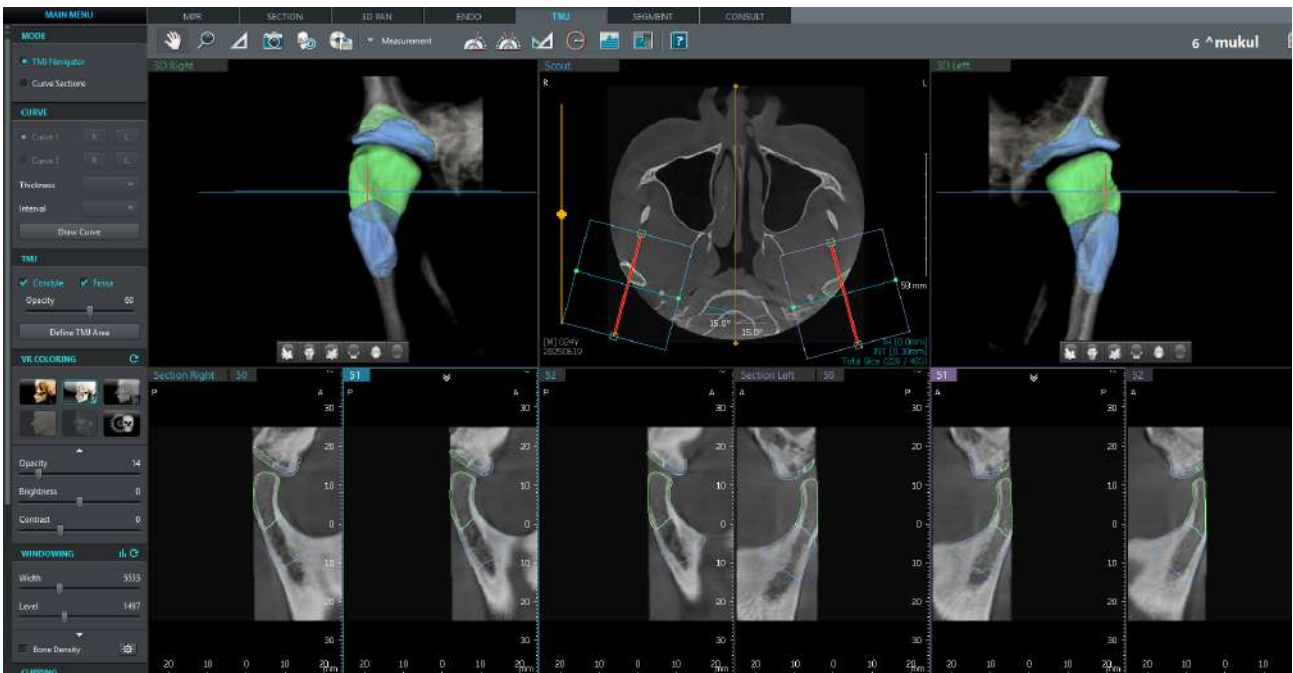

Discover AI in Ez3D-i

The latest version of Ez3D-i combines Vatech's trusted 3D imaging platform with advanced AI capabilities that help clinicians analyze CBCT data faster and more precisely than ever before. By automating complex tasks and highlighting critical anatomical structures, Ez3D-i enables practitioners to spend less time navigating software and more time focusing on patient care.

AI Segmentation: See More in Seconds

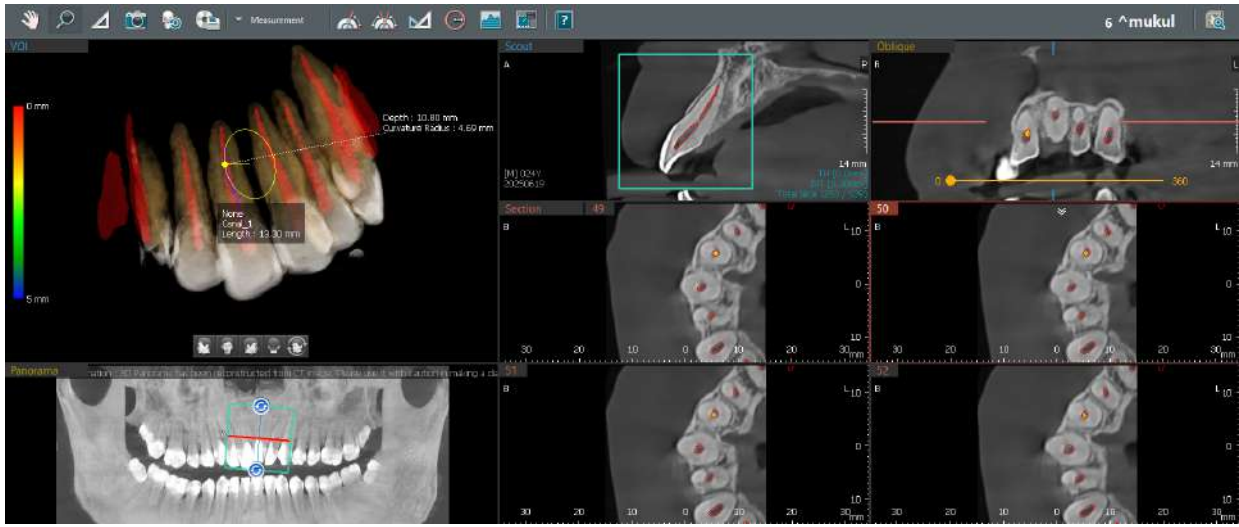

One of the most exciting innovations in Ez3D-i is AI-powered automatic segmentation. With a single workflow, the software can automatically identify and segment up to 135 anatomical structures, transforming complex CBCT volumes into clear, easy-to-understand visual models. This allows clinicians to quickly assess anatomy, improve treatment planning, and enhance patient communication.

AI-Assisted Endodontic Analysis

Endodontic treatment planning becomes significantly easier with AI-assisted root canal tracing.

Using intelligent algorithms, Ez3D-i can automatically generate root canal pathways with just two clicks while simultaneously measuring canal length and diameter. This helps clinicians achieve greater accuracy while reducing chairside planning time.

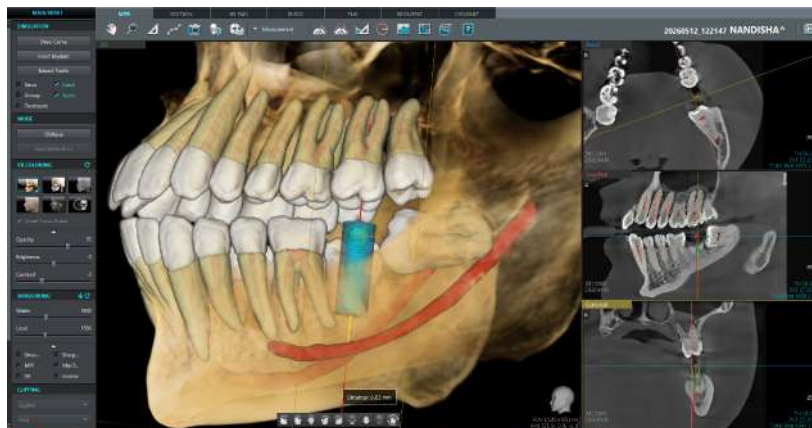

Smarter Implant Planning

AI also enhances implant workflows by providing intelligent planning tools that support:

- Automatic implant collision detection
- Distance measurement from vital anatomical structures
- Sinus identification
- Crown mirroring for prosthetically driven implant planning

These features help clinicians create safer, more predictable treatment plans while minimizing risks during surgery.

Better Communication, Better Acceptance

Complex diagnoses become easier for patients to understand when AI-generated segmented models clearly visualize their condition. By presenting anatomy in a simplified and intuitive manner, clinicians can improve patient understanding, engagement, and treatment acceptance.

The Future of CBCT is Intelligent

Ez3D-i AI represents the next generation of dental imaging software—where artificial intelligence works alongside clinicians to deliver faster analysis, improved accuracy, and enhanced treatment planning.

Ez3D-iTM AI

Analyze Faster. Plan Smarter. Treat with Confidence.

Because the future of diagnosis isn't just 3D—it's Intelligent.
