

Driving Smarter, Safer, More Sustainable Transportation Solutions, Together.

Engineering Excellence: Advancing Transportation Solutions

Comprehensive Engineering and Project Execution

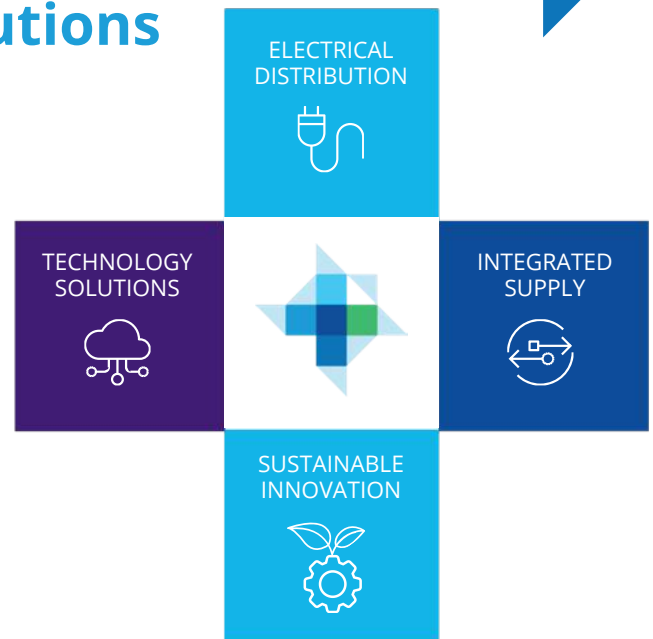

Turtle focuses on technology-driven, multi-discipline projects, offering bundled solutions that include systems integration, testing and commissioning, CAD services, fiber optic and copper cable testing, while stocking premier brands of power distribution, automation, communications, and lighting equipment.

Dedicated Support and Custom Solutions

Our design/build teams work closely with EPCs to customize requirements to actual site conditions, fast-track schedules, and complete projects quickly and cost-effectively. Our specialists and experts provide equipment and consulting services for complex systems integration and value engineering, ensuring robust and fail-safe communications and signaling networks.

Technical Expertise and Innovative Services

Drawing on over 100 years of experience and excellence, we offer the latest technologies and innovative services required for demanding transport and infrastructure projects from planning and design to close out.

Smart, Sustainable Transportation Solutions that Drive Value, Efficiency and Effectiveness

Transportation agencies and municipal partners nationwide have relied on Turtle to deploy transportation technologies such as:

Public Address, Customer Information Signs, & Kiosk Systems

Designed to communicate via audio and visual formats within public areas

Fare Gate Technology

Wide aisle fare gates, mobile ticketing, and modernized fare payment systems

Network Solutions & Monitoring

Routers, switches, network security, wireless access points, copper and fiber patch panels as well as alarm monitoring systems and legacy alarm monitoring migration

Instrumentation & Control Equipment

Used for motor-driven systems including supervisory control cabinets, motor control cabinets, room ventilation panel testing and measuring equipment, and monitoring devices

Integrated Station Management Systems

Designed for monitoring activities such as power, signal, and environmental control systems

Wireless, WiFi, and Distributed Antenna Systems

Telephones/intercom units, radiating antenna cable, non-radiating cable, radio equipment, passive system components, and antennas

Fire Alarm Components & Surveillance Systems

CCTV cameras, access control, security and intruder alarms, VMS, and perimeter protection

Closed-Circuit Television (CCTV) and Help Point Intercom Systems

Passenger identification (PID) at stations, facilities, and onboard vehicles

On-Board & Wayside Network & Communications Signaling Equipment

Rail Control Center C3 Systems and PLC Code Control

Traction Power Systems

Overhead and third rail traction power systems for public transportation agencies, private railroads, and airport people movers

Our Related Offerings

Power Conditioning, Quality & Backup

Uninterruptible power supplies, power factor correction & automatic transfer switches

Components for Electrical & Mechanical Subsystems

Variable frequency drives, circuit breakers and fuses

Facility Power Distribution

Busway, transformers, panelboards, switchgear and floor-based power

Facility/power Monitoring & Management

Integrated facility systems, facility management software, remote monitoring meters & software

Monitoring Consoles:

Command, Control, and Communications center consoles

White Space Power Distribution

Low voltage busway, floor-standing/wall-mount /enclosure power distribution units (PDUs)

Airflow & Thermal Management Solutions

Rack, enclosure, and aisle-based containment solutions

Racks & Enclosures

IT equipment racks, enclosures and colocation cages

Wire & Cable Management

Specialty cable and fiber solutions

Indoor & Outdoor Lighting

High efficiency LED luminaires and lighting controls
